In investigating Alaska's request, EPA contacted the vendors of sewage sludge incinerators and found that multiple hearth or fluid bed reactor type incinerators which can achieve the particulate matter standard are not commercially available below a size capacity of 140 kg/hr (300 lb/hr). This means that incineration would not be a disposal option where units smaller than 140 kg/hr are needed. Since the unique problems in parts of Alaska also prevent disposal by land application or sanitary landfill, sludge disposal cannot be accomplished in an environmentally acceptable mnaner under existing regulations. EPA concluded that a revision to the standards of performance for sludge incinerators is appropriate.

In developing a revision to the standard to accommodate the unique problems in parts of Alaska, EPA intends that the proposed exemption not create an incentive to utilize small incinerators which would not be covered under the standard. To avoid this situation the proposed exemption applies only where an owner or operator can demonstrate to the satisfaction of the Administrator that land application and sanitary landfills are not feasible disposal methods for the sewage sludge. The size exemption is based on the capacity of the waste water treatment plant rather than the incinerator in order to prevent constructing multiple small incinerators rather than larger units which would be subject to the standard.

The proposed amendment of § 60.150 would not affect applicable national mercury emission standards under § 61.50 which currently regulates mercury emissions from all sludge incinerators. These standards are not subject to the exemption because control of mercury emissions can be achieved by ordinances or statutes which prevent mercury-bearing material from being introduced into the municipal waste treatment system.

PUBLIC PARTICIPATION

Interested persons may participate in this proposed rulemaking by submitting written comments (in triplicate) to the Emission Standards and Engineering Division, U.S. Environmental Protection Agency, Research Triangle Park, North Carolina 27711, Attention: Mr. Don R. Goodwin. Comments on all aspects of the proposed revision are welcome. All relevant comments received not later than March 15, 1977 will be considered. Comments received will be available for public inspection and copying at the EPA Public Information Reference Unit, Room 2922 (EPA Library), 401 M Street, S.W., Washington, D.C. 20460.

AUTHORITY: Sections 111, 114, and 301(a) of the Clean Air Act, as amended by sec. 4(a) of Pub. L. 91-604, 84 Stat. 1678 and by sec. 15(c)(2) of Pub. L. 91-604, 84 Stat. 1713 [42 U.S.C. 1857c-6, 1857c-9 and 1857g(a)].

Dated: January 14, 1977.

RUSSELL E. TRAIN,
Administrator.

In 40 CFR Part 60, it is proposed to amend Subpart 0, by revising § 60.150 as follows:

§ 60.150 Applicability and designation of affected facility.

(a) The affected facility to which the provisions of this subpart apply is each incinerator which combusts the sludge produced by municipal sewage treatment plants except as provided under paragraph (b) of this section.

(b) The owner or operator of a sewage sludge incinerator may apply to the Administrator for an exemption to the requirements of this subpart for any sewage sludge incinerator that is in a municipal waste treatment plant having a dry sludge capacity below 140 kg/hr (300 lb/hr). The Administrator will grant an exemption provided the owner or operator demonstrates to the Administrator's satisfaction that it is not feasible to dispose of the sludge by land application or in a sanitary landfill because of freezing conditions. For the purpose of determining the capacity of a municipal waste treatment plant under this paragraph, the dry sludge capacity of the municipal waste treatment plant or the dry sludge capacity of the sewage sludge incinerator, whichever is greater, is used.

LEGAL SERVICES CORPORATION

[45 CFR Part 1606]

FINANCIAL ASSISTANCE

Procedures Governing Applications for and Denial of Refunding

The Legal Services Corporation was established pursuant to the Legal Services Corporation Act of 1974, Pub. L. 93-355, 88 Stat. 378, 42 U.S.C. 2996-2996*l* ("the Act"). Section 1011 of the Act, 42 U.S.C. 2996j, provides that the Corporation shall prescribe procedures to insure that, among other things, applications for refunding are not denied unless the grantee, contractor, or person or entity receiving financial assistance has been afforded reasonable notice and an opportunity for a timely, full, and fair hearing.

Pursuant to section 1008(e) of the Act, the Corporation hereby affords notice and publishes for comment the following proposed regulation concerning procedures governing applications for and denial of refunding. Public comment will be received by the Corporation at its headquarters offices, Suite 700, 733 15th Street, NW., Washington, D.C. 20005 on or before February 25, 1977. Comments must be in writing and may be accompanied by a memorandum or brief in support thereof. Comments received may be seen at the above offices during business hours Monday through Friday.

Final regulations will be issued by the Corporation after review and consideration of public comments received pursuant to this notice.

COMMENT

To insure that the provision of legal assistance to eligible clients would not be disrupted unnecessarily, Congress provided, in section 1011 of the Act, that a recipient's application for refunding should not be denied unless the recipient had been afforded reasonable notice and opportunity for a timely, full, and fair hearing.

The current draft was prepared after consideration of 48 written comments received in response to the publication of a proposed temporary regulation on March 12, 1976 (now in effect) and a proposed final draft on April 30, 1976, as well as lengthy analyses submitted by NLADA and PAG, and proposed drafts prepared by those organizations.

It seems a fair conclusion that section 1011 of the Act calls for procedures less elaborate than those of the Administrative Procedure Act,[1] but broadly comparable to the due process requirements applied to termination of governmental financial benefits, licenses, or employment. This conclusion precludes summary procedures or any provision that is unfair, but does not compel the Corporation to imitate courtroom procedures. Most refunding decisions require the exercise of discretion and policy judgments, issues that are better settled by discussion than by adversarial confrontation. Rarely will refunding hearings be adjudicative in the conventional sense. Nor is it the purpose of the hearing to review or to challenge a decision after it has been made; the purpose is to provide an opportunity for meaningful involvement of a recipient before a final decision is reached, thereby insuring that the Corporation will not act hastily, or on mistaken grounds, or without receipt of all information and viewpoints entitled to consideration.

The major issues raised in the comments received by the Corporation should be considered by the Board.

1. GROUNDS FOR DENIAL OF REFUNDING

The requirements of section 1011 are procedural, and nothing in the Act requires the Corporation to issue a regulation stating all the grounds and criteria that may be applied in the future in considering applications for refunding. The Committee decided that it is desirable to do so, however, and that the grounds enumerated in § 1606.4 are adequate to cover all contingencies likely to occur.

This draft corrects a flaw that comments identified in the earlier one, which failed to provide a hearing on the question whether a generally applicable law or policy was being applied correctly in a particular case.

2. PRESIDING OFFICER

Section 1606.7(a)(1) states that the presiding officer "may be an officer or employee of the Corporation who has not previously been concerned with the investigation or consideration of the application for refunding, or may be a person recruited or retained from outside the Corporation who is familiar with the provision of legal services to the poor and supportive of the purposes of the Act."

Many comments urged the use of an administrative law judge or another person not employed by the Corporation in every case. The request seems misfounded.

Assuming that the presiding officer was not involved in the preliminary determination or the investigation that led to it, there cannot be a serious question about the propriety or validity of designating a Corporation official to preside at the hearing. In "The National Paralegal Institute v. The Legal Services Corporation," Civ. No. 76-1260, (August 12, 1976) the Court held that the provision of the Corporation's temporary regulations authorizing a Corporation employee to act as presiding officer satisfied the requirements of section 1011. The decision was clearly supported by Supreme Court decisions defining constitutional requirements for an impartial tribunal.[2]

The Corporation's regulation is consistent with the one adopted by ACTION, that is also required by statute to provide a full and fair hearing before terminating funding, 42 U.S.C. 5052. It provides that the presiding officer shall be the responsible ACTION official, or at the discretion of the responsible ACTION official, an independent hearing examiner designated pursuant to the Administrative Procedure Act, 45 CFR 1206.1-7(b)(1). The ACTION regulations were published in the FEDERAL REGISTER on January 16, 1974, seven months before passage of the Legal Services Corporation Act, with its provision containing identical language. There is no reason to believe that the Congress intended to impose heavier requirements on the Corporation than on ACTION.[3]

The current draft authorizes appointment of a presiding officer who is not employed by the Corporation. It may be expected that an outsider will most frequently be appointed when a recipient is charged with violating the Act or failing to provide high quality assistance, and the burden of proof is upon the Corporation as provided by § 1606.11. But when the issues presented require judgments about the effective use of Corporation resources, decisions should be made by a person familiar with the overall development of Corporation policy.

3. OBLIGATIONS OF THE CORPORATION

The temporary regulation places the burden of proof in every case upon the recipient. Section 1606.11 of the current draft imposes upon the Corporation the obligation of proving, by a preponderance of the evidence, any disputed fact relied upon as a ground for denying refunding. On issues of policy, the Corporation has the obligation of showing that there is a substantial basis for denying refunding.

The Committee believes there is no legal requirement for the Corporation to assume these obligations, but concluded that it would be wise policy for it to do so.

The other changes from the published draft were minor or technical in nature.

PART 1606—PROCEDURES GOVERNING APPLICATIONS FOR AND DENIAL OF REFUNDING

1606.20 Notice.

AUTHORITY: Secs. 1006(b)(1), (3), 1007(a)(1), 1007(a)(3), 1007(a)(9), 1007(d), 1008(e), 1011 (42 U.S.C. 2996e(b)(1) and (3), 2996f(a)(1), 2996f(a)(3), 2996f(a)(9), 2996(d), 2996g(e), 2996j.

§ 1606.1 Purpose.

By affording a recipient the opportunity for a timely, full, and fair hearing that will promote informed deliberation by the Corporation when there is reason to believe an application for refunding should be denied, this part seeks to avoid unnecessary disruption in the delivery of legal assistance to eligible clients.

§ 1606.2 Definitions.

(a) "Denial of refunding" means a decision that, after expiration of its current grant or contract, a recipient—

(1) Will not be provided with financial assistance; or

(2) Will have its annual level of financial support reduced to an extent that is not required by a reduction in the Corporation appropriation that is apportioned among all recipients of the same class, and is either more than 10 percent or more than $20,000 below the recipient's annual level of financial assistance under its current grant or contract; or

(3) Will be provided with financial assistance subject to a new condition or restriction that is not generally applicable to all recipients of the same class, and that would significantly reduce the ability of a recipient to maintain its current level of legal assitance to eligible clients.

(b) "Director of a recipient" means the person who has overall day-to-day responsibility for management of operations by the recipient.

(c) "President", as used in this part, means the President (or acting President) of the Corporation, and not his designee.

[1] Had full APA procedures been intended, the Act could simply have adopted them as it did 5 U.S.C. 552 in section 1005(g).

[2] Thus, a parole revocation hearing, or one for the revocation of probation, may be conducted before an in-house presiding officer so long as he was not directly involved in the antecedent investigation. "Morrissey v. Brewer," 408 U.S. 471 (1972); "Gagnon v. Scarpelli," 413 U.S. 788 (1973). A board of physicians may first investigate and then itself bear a license suspension. "Withrow v. Larkin," 421 U.S. 35 (1975). A board composed of senior prison officials may decide a disciplinary case. "Wolff v. McDonnell," 418 U.S. 539 (1974). A "neutral investigative officer", reviewed by the hospital superintendent, can determine whether a mental patient should be transferred to the maximum security unit. "Jones v. Robinson," 440 F.2d 249 (CADC, 1971). A school may be denied eligibility for educating nonimmigrant alien students if the due process hearing is conducted before an official who did not participate in the investigation. "Blackwell College of Business v. Attorney General", 454 F.2d 928 (CADC, 1971).

[3] See also 45 CFR 1067.1-7, and 45 CFR 1303.3-1, implementing 42 U.S.C. 2944(e) (OEO), and 42 U.S.C. 2928(h)(3) (Headstart), respectively.

(d) "Presiding Officer" means the President, or a person designated by the President to recommend a final decision that an application for refunding should be granted or denied.

§ 1606.3 Application for refunding.

At least 120 days before expiration of its current grant or contract, a recipient that desires refunding shall file an application therefor with the Corporation in conformity with directions that, from time to time, may be issued by the Corporation.

§ 1606.4 Grounds for denial of refunding.

An application for refunding may be denied when:

(a) Denial is required by law; or

(b) Denial is required by a Corporation policy that is generally applicable to all recipients of the same class; or

(c) There has been substantial failure by a recipient to comply with a provision of law, or a rule, regulation, or guideline issued by the Corporation, or a term or condition of a current or prior grant from or contract with the Corporation or a predecessor agency. In the absence of unusual circumstances, refunding shall not be denied for this cause unless the Corporation has given the recipient notice of such failure and an opportunity to take effective corrective action.

(d) There has been substantial failure by a recipient to provide high quality, economical, and effective legal assistance, as measured by generally accepted professional standards, the provisions of the Act, or a rule, regulation or guideline issued by the Corporation. In the absence of unusual circumstances, refunding shall not be denied for this cause unless the Corporation has given the recipient notice of such failure and an opportunity to take effective corrective action.

(e) Denial will implement a provision of the Act, or a Corporation policy, rule, regulation or guideline regarding economical or effective use of resources.

§ 1606.5 Preliminary determination.

(a) When there is reason to believe an application for refunding should be denied, the Corporation shall serve a written preliminary determination upon the recipient, which shall state the grounds for proposed denial, and shall identify, with reasonable specificity, any facts or documents relied upon as justification for denial.

(b) The preliminary determination shall advise the recipient that it may, within ten days of receipt of the preliminary determination, make written request for

(1) A hearing under this part, or

(2) An informal conference under § 1606.6 with a subsequent right as there provided to request a hearing.

(c) The preliminary determination shall also advise the recipient of its right to request interim or termination funding, as the case may be, under § 1606.18 or §1606.19.

§ 1606.6 Informal conference.

On timely request by the recipient, the Corporation employee who made the preliminary determination shall conduct an informal conference with the recipient at a time and place designated by the employee. The parties thereto shall exchange views, seek to narrow the issues, and explore the possibilities of settlement or compromise. At the conclusion of the conference, which may be adjourned for deliberation or consultation, the Corporation employee may, in writing, modify, withdraw, or affirm the preliminary determination. The recipient may, within five days thereafter, make written request for a hearing under § 1606.9 through § 1606.15.

§ 1606.7 Initiation of proceedings.

Within ten days of a request for a hearing made under § 1606.5(b) or § 1606.6, the Corporation shall notify a recipient in writing of

(a) The name of the presiding officer, and of the attorney who will represent the Corporation;

(b) The date, time and place scheduled for a prehearing conference, if any should be requested or ordered; and

(c) The date, time and place scheduled for the hearing.

§ 1606.8 Presiding Officer.

(a) The presiding officer may be an officer or employee of the Corporation who has not previously been concerned with the investigation or consideration of the application for refunding, or may be a person who is not an employee of the Corporation, who is familiar with the provision of legal services to the poor and supportive of the purposes of the Act.

(b) After designation, the presiding officer shall not consult with or receive communications from the employee who made the preliminary determination or from those representing the Corporation on any of the factual issues in the hearing except in the presence of, or with copies to, the recipient.

§ 1606.9 Prehearing conference.

(a) A prehearing conference may be ordered by the presiding officer, and shall be ordered if requested by either the recipient or the Corporation. The matters to be considered at the conference shall include:

(1) Proposals to define and narrow the issues;

(2) Efforts to stipulate the facts, in whole or in part;

(3) The probable number, identity, and order of presentation of exhibits and witnesses;

(4) On the agreement of the parties, the possibility of presenting the case on written submission or oral argument;

(5) The desirability of advance submission of some or all of the direct testimony in writing;

(6) Any necessary variation in the date, time and place of the hearing; and

(7) Such other matters as may be appropriate.

(b) In advance of the prehearing conference, the presiding officer may require a party to submit a written statement discussing any matter described in paragraph (a) of this section. After the prehearing conference, the presiding officer may establish the procedures, consistent with this part, to be followed at the hearing.

(c) The presiding officer may, at the prehearing conference or at any subsequent appropriate time prior to completion of the hearing, require the Corporation or the recipient, on sufficient notice, to produce a relevant document in its possession, to make a report not unduly burdensome to prepare, or to produce a person in its employ to testify, if any might offer a relevant and substantial addition to the accuracy or completeness of the record. With the consent of the presiding officer, a party may make a written submission before the hearing.

§ 1606.10 Conduct of hearing.

(a) The hearing shall be scheduled to commence at the earliest appropriate date, ordinarily not later than 45 days after the notice required by § 1606.7, and, whenever practical, shall be held at a place convenient to the recipient and the community it serves. A hearing affecting more than one community or recipient shall be held in a single centrally located place unless the presiding officer determines that an additional hearing place is required.

(b) The presiding officer shall preside, conduct a full and fair hearing, avoid delay, maintain order, and insure that a record sufficient for full disclosure of the facts and issues is made. The hearing shall be open to the public unless, for good cause and in the interests of justice, the presiding officer shall determine otherwise.

(c) The presiding officer may allow any interested person or organization to participate in the hearing if such participation will not broaden the issues unduly or cause delay, and will aid in proper determination of the issues.

(1) A person or organization wishing to participate in a hearing shall request permission from the presiding officer, stating the reason for the request, and the nature of the evidence or argument to be offered; and shall notify the Corporation and the recipient of its request.

(2) The presiding officer shall notify the Corporation, the recipient, and the person or organization requesting participation whether the request has been granted, and in case of denial shall include a brief statement of the reasons therefor.

(3) The presiding officer may limit the scope or form of participation authorized under this paragraph.

(d) The Corporation and the recipient each may present its case by oral or documentary evidence, conduct examination and cross-examination of witnesses, examine any document submitted by another party, and submit rebuttal evidence.

(e) If a party fails, without good cause, to produce a person or document required under § 1606.9(c), the presiding officer may make an adverse finding on the fact or issue with respect to which production was required.

(f) Technical rules of evidence shall not apply. The presiding officer shall make any procedural or evidentiary ruling that may help to insure full disclosure of the facts, to maintain order, or to avoid delay. Irrelevant, immaterial, repetitious or unduly prejudicial matter may be excluded.

(g) Official notice may be taken of published policies, rules, regulations, guidelines and instructions of the Corporation, of any matter of which judicial notice may be taken in a federal court, or of any other matter whose existence, authenticity, or accuracy is not open to serious question.

(h) A record or summary of the hearing shall be made in a manner determined by the presiding officer, and shall be made available to a party upon payment of its cost.

§ 1606.11 Obligations of the Corporation.

At a hearing under § 1606.10:

(a) The Corporation shall have the obligation of proving, by a preponderance of the evidence, the existence of any disputed fact relied upon as justification for denial of refunding on a ground described in paragraph (e) or (d) of § 1606.4; and

(b) On all other issues, the Corporation shall have the obligation of establishing a substantial basis for denying the application for refunding.

§ 1606.12 Briefs and argument.

(a) Within ten days after the close of the hearing, each party may, and upon request of the presiding officer, shall, submit to the presiding officer, with service upon all other parties, proposed findings of fact and argument on matters of law or policy.

(b) The presiding officer may direct or permit oral argument at the close of the hearing or after submission of briefs.

§ 1606.13 Recommended decision.

(a) As soon as practicable after the hearing, and normally within twenty days after its conclusion, the presiding officer shall issue a written recommended decision

(1) Granting the application for refunding, subject to any modification or condition that may be deemed necessary on the basis of information adduced at the hearing; or

(2) Denying the application for refunding.

(b) The recommended decision shall contain findings of the significant and relevants facts and shall state the reasons for the decision. Findings of fact shall be based solely on the evidence adduced at the hearing or on matters of which official notice was taken.

§ 1606.14 Final decision.

(a) If neither the Corporation nor the recipient requests review by the President, a recommended decision shall become final ten days after receipt by a recipient.

(b) The recipient or the Corporation may seek review by the President of a recommended decision. A request shall be made in writing within ten days after receipt by the party of the recommended decision, and shall state in detail the reasons for seeking review.

(c) Within thirty days after receipt of a request for review of a recommended decision, the President may adopt, modify, or reverse the recommended decision, or direct further consideration of the matter. In the event of modification or reversal, the President's decision shall conform to the requirements of § 1606.13(b).

(d) If the presiding officer is the President, within thirty days after the conclusion of a hearing, a final decision that conforms to the requirements of § 1606.13 shall be issued.

(e) A decision by the President shall become final upon receipt by a recipient.

§ 1606.15 Time extension and waiver.

(a) Any period of time provided in these rules may, upon good cause shown and determined, be extended (1) By the person making the preliminary determination, prior to the time the presiding officer is designated; (2) By the presiding officer, prior to the issuance of a recommended decision; or (3) By the President at any time.

(b) Requests for extensions of time shall be considered in light of the overall objective that the procedures prescribed by this part ordinarily shall be concluded within 90 days of the preliminary determination.

(c) Any other provision of these rules may be waived or modified (1) By the presiding officer, if other than the President, with the assent of the recipient and of counsel for the Corporation, or (2) By the President upon good cause shown and determined.

§ 1606.16 Right to Counsel.

At a hearing under § 1606.10, the Corporation and the recipient each shall be entitled to be represented by counsel, or by another person. The attorney designated may be an employee, or may be outside counsel retained for the purpose, who may be compensated at the reasonable and customary rate for an attorney practicing in the vicinity of the attorney retained. Unless prior written approval is received from the Corporation, such fees shall not exceed the daily equivalent of the rate of level V of the Executive Schedule specified in section 5316 of Title 5, United States Code.

§ 1606.17 Reimbursement.

If an application for refunding is granted after a Preliminary Determination has been issued under § 1606.5, a recipient, at the discretion of the President, may receive reimbursement by the Corporation, in whole or in part, for reasonable and actual expenses that were required in connection with proceedings under this part.

§ 1606.18 Interim funding.

Failure by the Corporation to meet a time requirement of this part shall not entitle a recipient to refunding. If the Corporation fails to take final action upon an application for refunding prior to the expiration of the term of a recipient's current grant or contract, the Corporation shall provide the recipient with interim funding necessary to maintain its current level of legal assistance activities under the Act until

(a) The application for refunding has been approved and funds pursuant thereto received, or

(b) A final decision denying the application has been made.

§ 1606.19 Termination funding.

After a final decision to deny refunding, and without regard to whether a hearing has occurred, the Corporation may authorize temporary funding it necessary to enable a recipient to close or transfer current matters in a manner consistent with the recipient's professional responsibility to its present clients.

§ 1606.2 Notice.

A notice required to be sent to a recipient under this part shall be sent to the director of the recipient, and may be sent to the chairperson of its governing body.

THOMAS EHRLICH,
President,
Legal Services Corporation.

[45 CFR Part 1621]

CLIENT GRIEVANCE PROCEDURE

Proposed Rulemaking

The Legal Services Corporation was established pursuant to the Legal Services Corporation Act of 1974, Pub. L. 93-355, 88 Stat. 378, 42 U.S.C. 2996-2996*l* ("the Act"). Section 1006(b)(1), 42 U.S.C. 2996e(b)(1), provides that the Corporation shall have authority to insure compliance of the Act.

Pursuant to section 1008(e) of the Act, the Corporation hereby affords notice and publishes for comment the following proposed regulations concerning client grievance procedures. Public comment will be received by the Corporation at its headquarters offices, Suite 700, 733 15th Street, NW., Washington, D.C. 20005 on or before February 25, 1977. Comments must be in writing and may be accompanied by a memorandum or brief in support thereof. Comments received may be seen at the above offices during business hours Monday through Friday.

Final regulations will be issued by the Corporation after review and consideration of public comments received pursuant to this notice.

COMMENT

A person who is denied legal assitance by a recipient, of who is dissatisfied with the assistance rendered, is unable to ob-

tain legal assistance from another source. And, although a client does not pay a fee, adequate recourse should be available when the client believes that the services provided by a recipient do not meet the high standards of effectiveness required by the Act. Further, the fact that a recipient carries on its activities with funds from a public source imposes an additional responsibility beyond those imposed on every lawyer by the Code of Professional Responsibility. An effective client grievance procedure is an appropriate means of insuring the accountability of a recipient to its clients.

The proposed regulation requires the establishment by the governing body of a recipient of a grievance committee with authority to consider compliants that have not been resolved by staff action. The Code of Professional Responsibility does not prevent a committee containing nonlawyers from inquiring into a lawyer's conduct of a case when the committee is acting at the request of the client. Ethical prohibitions against interference with the professional judgment of a lawyer are designed to insure that the lawyer will be directly responsible to the client, and not subject to interference or control by an intermediary. See ABA Formal Opinions 237 and 294. Inquiry by a grievance committee acting at the request of the client is consistent with these opinions.

If a client expresses dissatisfaction with any aspect of the assistance provided by a recipient, it would be appropriate for the recipient to inform the client of the existence of a local group, such as the National Clients Council or the National Welfare Rights Organization, that may be able to counsel the client about the subject of the complaint.

PART 1621—CLIENT GRIEVANCE PROCEDURE

Sec.
1621.1 Purpose.
1621.2 Governing Body Grievance Committee.
1621.3 Procedures.

AUTHORITY: Sec. 1006(b)(1) (42 U.S.C. 2996e(b)(1)).

§ 1621.1 Purpose.

By providing an effective remedy for a client who believes that legal assistance has been denied improperly, or who is dissatisfied with the assistance provided, this part seeks to insure that every recipient will be accountable to its clients and will provide the high quality legal assistance required by the Act.

§ 1621.2 Governing Body Grievance Committee.

The governing body of a recipient shall establish a grievance committee, composed of lawyer and client representatives in the same proportion in which they are on the governing body.

§ 1621.3 Procedures.

(a) A recipient shall establish effective procedures for determining the validity of a complaint that assistance has been improperly denied or ineffectively rendered. The procedures adopted shall be subject to approval by the Corporation.

(b) The procedures shall include:

(1) Adequate notice to clients of how to make a complaint;

(2) Provision of assistance to a client who requests help in presenting a complaint; and

(3) An opportunity for a complainant to appear before the grievance committee established by the govrening body if the director of the recipient is unable to resolve the matter.

(c) A record of every complaint and its disposition shall be preserved for review by the Corporation.

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

[50 CFR Part 17]

ENDANGERED AND THREATENED WILDLIFE AND PLANTS

Proposed Provisions for Interagency Corporation

Proposed regulations to assist the Federal agencies in complying with section 7 of the Endangered Species Act of 1973.

The Assistant Secretary for Fish and Wildlife and Parks, U.S. Department of the Interior, and the Director, National Marine Fisheries Service, National Oceanic and Atmospheric Administration, U.S. Department of Commerce, hereby jointly issue substantively identical proposed rulemakings that would establish rules and procedures for interagency cooperation pursuant to section 7 of the Endangered Species Act of 1973, 16 U.S.C. 1531–1543 (hereinafter cited as Act). The U.S. Fish and Wildlife Service (hereinafter cited in this preamble as FWS) regulations would be established in Part 17 of Chapter I of Title 50, Code of Federal Regulations, while the National Marine Fisheries Service (hereinafter cited in this preamble as NMFS) regulations (published elsewhere in this issue, see FR Doc 77-2382, published in the proposed rules section of this issue under the Department of Commerce) would be established in Parts 217 and 223 of Chapter II of Title 50, Code of Federal Regulations. The NMFS regulations in Parts 217 and 223 are only for those species under the jurisdictional responsibilities of the Secretary of Commerce (endangered species are identified in 50 CFR 222.23(a) and threatened species are identified in 50 CFR 227.4). The FWS regulations in Part 17 would apply to all other endangered and threatened species.

BACKGROUND

The Act became effective on December 28, 1973. Recognizing that all Federal agencies must cooperate to conserve and protect endangered and threatened species and their habitat, section 7 of the Act states:

INTERAGENCY COOPERATION

Section 7. The Secretary shall review other programs administered by him and utilize such programs in furtherance of the purposes of this Act. All other Federal departments and agencies shall, in consultation with and with the assistance of the Secretary, utilize their authorities in furtherance of the purposes of this Act by carrying out programs for the conservation of endangered species and threatened species listed pursuant to section 4 of this Act and by taking such action necessary to insure that actions authorized, funded, or carried out by them do not jeopardize the continued existence of such endangered species and threatened species or result in the destruction or modification of habitat of such species which is determined by the Secretary, after consultation as appropriate with the affected States, to be critical.

By internal memorandum of October 16, 1974, the Secretary of the Interior further defined Interior's responsibilities under section 7 and established the lead role of the FWS within the Department of the Interior.

In a joint letter to all Federal agencies on December 3, 1974, the Secretaries of the Interior and Commerce pointed out the responsibilities of the agencies under section 7 and asked for their cooperation in implementing the Act. The letter of December 3 also clarified the responsibilities of the FWS and the NMFS as lead agencies for the two Departments in implementation of the Act.

On April 22, 1975, the Director of the FWS and the Director of the NMFS published a joint notice in the FEDERAL REGISTER (40 FR 17764–17765) describing how "critical habitat" would be determined for endangered and threatened species pursuant to section 7 of the Act.

On May 29, 1975, the FWS and NMFS convened a conference for affected Federal agencies to discuss the Act and its implications for the activities and programs of the agencies. At this meeting, the Federal agencies requested that guidelines be developed to assist them in meeting their responsibilities under section 7.

In response to that request, the FWS and NMFS convened an Ad Hoc Interagency Committee of representatives from 11 Federal agencies to advise the two Services in developing the necessary guidelines.

An April 22, 1976, "Guidelines to Assist the Federal Agencies in Complying with Section 7 of the Endangered Species Act of 1973" were transmitted to all Federal agencies by the FWS and NMFS. These guidelines are an interim measure to furnish a broad and flexible framework within which Federal agencies may prepare internal procedures to fulfill their responsibilities under section 7. However, as stated in the guidelines, they are "a starting point for the development and promulgation of regulations."

At the request of the Office of Management and Budget, copies of the guidelines were again transmitted to the Federal agencies on May 20, 1976, and comments due by August 1, 1976, were solicited for a "quality of life" review. As of

September 28, 1976, 40 comments had been received from Federal agencies. Although 8 comments expressed unequivocal support for the guidelines and 3 comments were opposed, the remaining 29 did not express general support or opposition, limiting themselves to comments on particular language, organization, or approach. Seven of the 29 simply stated they had no comment at that time.

The guidelines were subsequently revised by the FWS and NMFS for publication as a proposed rulemaking incorporating various comments of the Federal agencies. At the request of the Office of Management and Budget, the Director of the FWS, on behalf of the FWS and of the NMFS, forwarded this draft proposed rulemaking to the affected Federal agencies on November 11, 1976, requesting comments not later than December 1, 1976. As of January 5, 1977, 4 Federal agencies had commented. The draft regulations were then revised for this proposed rulemaking, incorporating many of the Federal agency comments.

DISCUSSION OF THE COMMENTS OF THE FEDERAL AGENCIES

Many of the comments of the Federal agencies on both the guidelines and draft regulations were clearly appropriate, have been incorporated into the proposed regulations, and need not be discussed here. However, several comments, whether adopted or not, merit discussion because of their importance and generality.

First, nearly one-third of the Federal agencies commenting indicated that use of the consultation process should be discretionary with the agency, although the Council on Environmental Quality took the opposite position. The position taken in the proposed rulemaking affirms the ultimate responsibility of each individual agency to decide whether or not it is in compliance with the Act. The proposal establishes a fixed procedure of consultation because the FWS and NMFS believe they cannot responsibly fulfill their obligations under section 7 unless there is a rational and uniform procedure for the provision of biological advice to agencies considering actions within the borders of section 7.

Second, nearly one-third of the Federal agencies commenting expressed in one form or another that set time frames are necessary for the consultation process. The FWS and NMFS acknowledge these agencies' concern that the process not be protracted. They have adopted a 60-day limit for threshold examinations and a 60-day limit for all consultation following receipt of information adequate for a biological opinion, except where special difficulty is incurred in obtaining necessary data. The FWS and NMFS do not expect that consultation will normally be protracted and anticipate that many requests for consultation will be dispatched summarily after a threshold examination. Nonetheless, the FWS and NMFS would be abdicating their responsibilities under section 7 if they were to commit themselves without exception to a time frame that in some cases would render inadequate biological advice. Therefore, the proposal leaves to agreement of the affected agency and the FWS or NMFS the time frame for completion of consultation on especially difficult actions.

Third, about one-fourth of the Federal agencies commenting stressed the need for habitat maps or published geographic coordinates for listed species, and the FWS and NMFS concur. The FWS is now working to satisfy the need, and has already designated critical habitat. This deficiency is not a valid reason for withholding implementation of the proposal, however, because the requirements of section 7 apply to Federal agencies even in the absence of a rulemaking such as that proposed, and it is to the Federal agency's advantage to have whatever biological advice and assistance the FWS and NMFS have to offer. The intended proposal simply establishes uniform procedures whereby Federal agencies can obtain the best available biological opinion as to the effect of an action on endangered or threatened species.

Fourth, about one-quarter of the Federal agencies commenting, including the Council on Environmental Quality, suggested that the consultation process should be linked to established procedures for interagency review of environmental impact statements. The FWS and NMFS expressly support this suggestion in the proposal and encourage it as a means to reduce paperwork.

Fifth, 4 of the Federal agencies expressed the opinion that the preparation and usual intragency review of environmental impact statements satisfy the consultation requirements of section 7. The Council on Environmental Quality did not support this position, but stated that an environmental impact statement should be prepared if an activity or program would jeopardize a species or potentially destroy its critical habitat. Although the FWS and the NMFS encourage consolidation of section 7 consultation and impact statement review, they will only be able to fulfill their obligations under section 7 if agencies that so consolidate will comply with the procedures stated in this proposal and will state the biological opinions of the FWS and NMFS pursuant to section 7 in final environmental impact statements, assessments, or other documents.

Sixth, 4 of the Federal agencies commenting indicated that advanced projects should be exempted from the requirements of section 7. Neither FWS nor NMFS intends that section 7 bring about the waste that can occur if an advanced project is halted. The proposed regulations would clearly limit application of section 7 to cases where Federal involvement or control remains and in itself could jeopardize the continued existence of a listed species or modify or destroy its critical habitat. That the proposal would not exempt advanced projects where such Federal involvement or control remains simply reflects the belief of the FWS and the NMFS that their role under section 7 is limited to providing biological advice and assistance, not in determining if a project may continue. The affected agency must decide whether the degree of completion and extent of public funding of particular projects justify an action that may be otherwise inconsistent with section 7. It seems reasonable that such an agency should seek the advice of the FWS or of the NMFS as to the effect the action will have upon the species in question, so that the agency may weigh the biological effect among other factors in reaching a decision.

Seventh, 3 of the Federal agencies commenting stressed that critical habitat should be the minimum habitat required by the Act or that the meaning of "modification" of such habitat in section 7 should be strictly qualified. The intended proposal incorporates both of these suggestions. Critical habitat is defined as habitat "the loss of which would appreciably decrease the likelihood of survival and recovery of a listed species or a distinct segment of its population." Modification is incorporated in the phrase "destruction or adverse modification," and then defined to be an alteration that appreciably diminishes the value of that habitat for a listed species.

Eighth, 3 of the Federal agencies commenting expressed the opinion that section 7 has no extraterritorial application, and a fourth agency stated that critical habitat should not be determined extraterritorially. However, the Council on Environmental Quality strongly supported extraterritorial application of section 7, and questioned whether it was appropriate to preclude determination of critical habitat in foreign countries. The proposal adopts the position that critical habitat may not be determined in foreign countries. However, the requirement that Federal agency actions not jeopardize the continued existence of listed species is taken to be applicable to listed species wherever occurring. This position adopts the recommendations of the Interior Department Solicitor's Office and the General Counsel's Office of the National Oceanic and Atmospheric Administration on the issue.

Ninth, 4 of the Federal agencies commenting stated that non-Federal entities should be able to consult with the FWS or the NMFS on behalf of the Federal agency. In response, the regulations for proposal have been revised to clarify that the affected Federal agency may obtain technical assistance from any source. However, the proposed regulations emphasize that the Federal agency must take full responsibility for the initiation, carrying out, and completion of consultation, and may not delegate it.

Tenth, several Federal agencies, both formally and informally, have inquired as to the assistance the FWS and the NMFS will provide in consultation. The proposed regulations have been revised to spell this out as clearly as possible. In general, the FWS and the NMFS take responsibility for review of information provided to them by the affected agency, and they will advise agencies on the

kind of information needed and may perform on-site inspections. However, the FWS and the NMFS cannot commit themselves to fund or to carry out the basic study necessary for decision.

All comments of the Federal agencies have been considered in developing the proposed regulations and are maintained in the Office of the Associate Director for Federal Assistance, U.S. Fish and Wildlife Service, Department of the Interior, Washington, D.C. 20240.

DESCRIPTION OF THE PROPOSAL

The purpose of this proposal is to establish joint rules and procedures for interagency cooperation pursuant to section 7 of the Act. Although these proposed regulations are codified for the FWS in Chapter I of Title 50 of the Code of Federal Regulations, the NMFS is publishing substantively identical proposed regulations codified in Chapter II of the same Title.

This joint proposal is summarized below, with cites to NMFS codification in parentheses:

1. Section 17.3 (§ 217.12) is amended by adding key terms used in section 7 and in this proposal.

2. The following sections of Subpart I—Interagency Cooperation (Part 223—Endangered and Threatened Fish or Wildlife—Interagency Cooperation) are added:

(A) A § 17.91 (§ 223.1) is added on the scope of section 7 of the Act. This section affirms the responsibilities of the Federal agencies under section 7 by directing them to carry out conservation programs for listed species, and requiring them to insure that their actions do not jeopardize the continued existence of listed species or result in destruction or modification of critical habitat. The sections affirms that the prohibition against actions causing jeopardy applies extraterritorially.

(B) Section 17.92 (§ 223.2) describes the application of section 7 to previously initiated Federal agency actions.

(C) Section 17.93 (Subpart B—Consultation) sets forth procedures that the Federal agencies should follow in meeting the consultation and assistance requirements of section 7.

(1) The consultation process is to be initiated by Federal agencies after review and identification of actions that may affect listed species. If such review indicates no effect on listed species, consultation is not required unless requested by the FWS or NMFS. If a Federal agency identifies any action that may affect listed species, that agency should initiate consultation by written request to the appropriate FWS or NMFS official, with a copy to the Secretary of State if foreign countries or the high seas are involved. Additionally, consultation can be requested by either the FWS or NMFS should it become aware of a Federal action that may affect listed species and that has not received the benefit of section 7 consultation. Informal consultation at the field level between the FWS or NMFS and the Federal agencies can be initiated, but is not a substitute for the formal consultation process contained in this proposal. Federal agencies may obtain assistance from any source so long as they retain full responsibility for consultation.

(2) Consultation and assistance can take place in several forms.

(a) Consultation may be consolidated with interagency review under the National Environmental Policy Act (42 U.S.C. 4321 et seq.), the Fish and Wildlife Coordination Act (16 U.S.C. 661 et seq.), and other appropriate statutes. However, such consolidation does not relieve the Federal agencies of complying with the consultation procedures contained in this proposal.

(b) Consultation may be carried out through one Federal agency when several Federal agencies are involved in a common activity or program, and the FWS or NMFS concurs in the arrangement.

(3) It is the responsibility of the affected Federal agencies to obtain the biological data necessary to evaluate the effect of an action. The FWS or NMFS will assist to the extent feasible when requested, but will not fund the basic study.

(4) Upon receipt of a written request for consultation from a Federal agency, the FWS or NMFS will conduct a threshold examination. A threshold examination is a preliminary assessment by the FWS or NMFS to ascertain if an action will adversely affect listed species or their habitat.

(a) If, in either Director's opinion, the Federal action will promote the conservation of listed species or their habitat, the Federal agency will be notified within 60 days of initiation, and further consultation will not be required unless additional consultation will benefit the listed species.

(b) If an action is not specifically for the conservation of listed species and the threshold examination reveals that listed species or their habitat will not be adversely affected, the Federal agency will be notified within 60 days of initiation, and further consultation will not be required.

(c) If the Federal action may adversely affect listed species or their habitat, the agency will be so notified in writing within 60 days of initiation, and a final biological opinion will be rendered within 60 days after receipt of information adequate for a biological opinion, unless special circumstances require that a longer period be negotiated.

(5) The consultation process is complete only when the FWS or NMFS has rendered a written biological opinion on the effect of the Federal action on listed species or their habitat. Such opinions and any recommendations will be accompanied by supporting facts and documentation. Upon receipt of the biological opinions and recommendations from the FWS or NMFS, it will then be the responsibility of the Federal agency to determine whether and how to proceed in light of its section 7 obligations.

(6) Consultation should be reinitiated on a Federal action if the Federal agency or FWS or NMFS obtains significant information not previously considered, if the Federal action is significantly modified, or if a new species is listed that is affected by the action.

(D) Section 17.94 (Subpart C—Determination of Critical Habitat) sets forth procedures for determining critical habitat and states criteria the FWS or NMFS will consider in making such determinations.

PUBLIC COMMENTS SOLICITED

The Director of the FWS, on behalf of the FWS and NMFS, hereby solicits written comments and suggestions from the public at large, concerned Governmental agencies, the scientific community, industry, private interests, and any other interested persons. It is hoped that such comments will expose any potential problems so that our final rules will be clear, equitable, and effective.

The final promulgation of these regulations will take into consideration the comments received. Such comments or other additional information may lead the FWS and NMFS to adopt final regulations that differ from this proposal.

SUBMITTAL OF WRITTEN COMMENTS

Interested persons may participate in this rulemaking by submitting written comments to the Director (FWS/LE), U.S. Fish and Wildlife Service, P.O. Box 19183, Washington, D.C. 20036. All relevant comments received on or before March 28, 1977 will be considered. The FWS, on behalf of both the FWS and NMFS, will attempt to acknowledge receipt of all comments, but may not respond substantively.

Comments received will be available for public inspection during normal business hours (7:45 a.m. to 4:15 p.m.) at the Office of the Associate Director for Federal Assistance, U.S. Fish and Wildlife Service, Department of the Interior, 18th and C Streets, NW, Washington, D.C. 20240.

This notice of proposed rulemaking is issued under the authority of the Endangered Species Act of 1973, 16 U.S.C. 1531–1543.

Dated: January 19, 1977.

NATHANIEL P. REED,
Assistant Secretary,
Fish and Wildlife and Parks.

ROBERT W. SCHONING,
Director,
National Marine Fisheries Service.

Accordingly, it is hereby proposed to amend Part 17, Subchapter B, Chapter I of Title 50, Code of Federal Regulations, as follows:

1. Add to the definitions of § 17.3, maintaining alphabetical order, the following:

§ 17.3 Definitions.

* * * * *

"Activities and programs" means all actions of any kind authorized, funded, or carried out by Federal agencies, in whole or in part, examples of which include, but are not limited to: (1) actions intended to conserve listed species or their habitat; (2) the promulgation of regulations; (3) the granting of licenses, contracts, leases, easements, rights-of-way, permits, or grants-in-aid; or (4) actions directly or indirectly causing modifications to the land, water, or air.

* * * * *

"Critical habitat" means any air, land, or water area (exclusive of those existing man-made structures or settlements which are not necessary to the survival and recovery of a listed species) or any constituent thereof, the loss of which would appreciably decrease the likelihood of the survival and recovery of a listed species or a distinct segment of its population. The constituent elements of critical habitat include, but are not limited to: physical structures and topography, biota, climate, human activity, and the quality and chemical content of land, water, and air. Critical habitat may represent any portion of the present habitat of a listed species and may include additional areas for reasonable population expansion.

"Destruction or adverse modification" means a direct or indirect alteration of critical habitat which appreciably diminishes the value of that habitat for survival and recovery of a listed species. Such alterations include, but are not limited to those diminishing the requirements for survival and recovery listed in § 17.94(b). There may be many types of activities which could be carried out in critical habitat without causing such diminution.

* * * * *

"Federal agency" means each authority of the Government of the United States except for the Congress, the courts of the United States, the Governments of the territories or possessions of the United States, or the Government of the District of Columbia.

* * * * *

"Jeopardize the continued existence of" means to engage in an activity or program which reasonably would be expected to reduce the reproduction, numbers, or distribution of a listed species to such an extent as to appreciably reduce the likelihood of the survival and recovery of that species in the wild. The level of reduction necessary to constitute "jeopardy" would be expected to vary among listed species.

"Listed species" means any species of fish, wildlife, or plant which is designated as endangered or threatened pursuant to the Act.

* * * * *

"Recovery" means improvement in the status of listed species to the point at which listing is no longer required.

2. Add §§ 17.91 through 17.94 of Subpart I, to read as follows:

Subpart I—Interagency Cooperation

§ 17.91 Scope.

This subpart interprets and implements section 7 of the Act. Section 7 (16 U.S.C. 1536) applies to all listed species of fish, wildlife, or plants and imposes three burdens upon the Federal agencies. First, it directs them to utilize their authorities to carry out conservation programs for listed species. Such affirmative conservation programs must comply with any applicable permit requirements of 50 CFR Part 17 for listed species. Second, it requires every Federal agency to insure that its activities and programs in the United States, upon the high seas, and in foreign countries will not jeopardize the continued existence of a listed species. And third, section 7 directs all Federal agencies to insure that their activities and programs do not result in the destruction or modification of critical habitat. Although the Fish and Wildlife Service and the National Marine Fisheries Service share responsibilities for the Act, the regulations in this subpart apply only to listed species under the jurisdiction of the Fish and Wildlife Service. A Federal agency can determine which Service to initiate consultation with by scanning the list of species under the jurisdiction of the National Marine Fisheries Service located at 50 CFR 222.23(a) and 227.4. If the Federal agency's activity or program may affect a listed species which is cited in 50 CFR 222.23(a) or 227.4, then the agency should initiate consultation with the National Marine Fisheries Service. If the listed species is not cited in 50 CFR 222.23(a) or 227.4, the Federal agency should initiate consultation with the Fish and Wildlife Service.

§ 17.92 Applicability to previously initiated actions.

Section 7 applies to all activities or programs where Federal involvement or control remains which in itself could jeopardize the continued existence of a listed species or modify or destroy its critical habitat.

§ 17.93 Consultation.

(a) *Initiation.* (1) It is the responsibility of each agency to review its activities or programs and to identify any such activities or programs that may affect listed species or their habitat. Reviewing agencies may obtain advice from the Service, but this is supplemental to and not a substitute for the formal consultation process set forth in this Subpart. Where a Federal agency funds or authorizes an activity or program to be carried out by a non-Federal entity, the Federal agency should initiate the consultation process and not the non-Federal entity.

(2) If a Federal agency decides that its activities or programs will not affect listed species or their habit the consultation requirements of section 7 will not apply unless requested by the Service.

(3) When a Federal agency identifies activities or programs that may affect listed species or their habitat, the agency should convey a written request for consultation to the Regional Director for the Region where the activity or program is or will be carried out or to the Regional Director for the Region where the Federal agency is situated if more than one Region is involved, or to the Director if foreign countries or the high seas are involved. In addition, if foreign countries or the high seas are involved, a copy of the request for consultation should be forwarded to the Secretary of State c/o the Director, Office of Environmental Affairs.

(4) In addition, the Director or Regional Director will request initiation of consultation if he identifies any activity or program of a Federal agency that has not received prior consultation and that may affect listed species or their habitat.

(5) Informal consultation may be initiated at the field level between the Service and the Federal agencies or their authorized representatives. Such informal consultation is supplemental to and not a substitute for the formal consultation process set forth in this Subpart.

(b) *Form.* (1) Consultation under section 7 may be consolidated with interagency cooperation required by other statutes, such as the Fish and Wildlife Coordination Act (16 U.S.C. 661 et seq.) or the National Environmental Policy Act (42 U.S.C. 4321 et seq.). The satisfaction of the requirements of these other statutes, however, does not of itself relieve a Federal agency of its obligation to comply with the consultation procedures set forth in this Subpart.

(2) When particular progams or activities involve more than one Federal agency, these agencies may, with concurrence of the Director, fulfill their consultation responsibilities through a single agency.

(c) *Assistance from the Service.* It is the primary responsibility of each Federal agency requesting consultation to conduct appropriate studies and to provide the biological information necessary for adequate review of the effect an activity or program has upon listed species or their habitat. To the extent it is able, the Service will upon request provide relevant available data and reports, personnel, and recommendations for additional studies or surveys, but the Service will not fund any such additional studies or surveys.

(d) *Assistance from other sources.* Federal agencies may seek assistance from any source to obtain the biological information necessary for review of the effect an activity or program has upon listed species or their habitat. Such assistance may include, but is not limited to that obtained by contract or required by regulations of the Federal agency. However, responsibility for compliance with the procedures of this Section remains with the Federal agency and cannot be delegated by it.

(e) *Threshold examination.* Upon receipt of a request for consultation, the Director or Regional Director will conduct a threshold examination of the activity or program under review. A threshold examination may include a review of available information or an on-site inspection of the area.

(1) If an activity or program under review will, in the opinion of the Director, promote the conservation of listed

species, the appropriate Federal agency shall be notified in writing within 60 days after consultation is initiated, and additional section 7 consultation shall be unnecessary unless it would further benefit the listed species. The Service, to the extent feasible, will assist in carrying out such programs if requested by the Federal agency. The Federal agency should be aware that in addition to satisfaction of section 7 requirements, a permit may be required for activities otherwise prohibited by section 9 of the Act (16 U.S.C. § 1538).

(2) If an identified activity or program is not specifically for the conservation of listed species, but the Director or Regional Director concludes from the threshold examination that in no likelihood will the activity or program jeopardize the continued existence of a listed species or result in the destruction or adverse modification of its critical habitat, the appropriate Federal agency shall be notified in writing within 60 days of initiation and further section 7 consultation shall be unnecessary.

(f) *Further consultation.* If an identified activity or program is not specifically for the conservation of listed species, and the Director or Regional Director concludes as a result of the threshold examination that the activity or program may jeopardize the continued existence of a listed species or result in the destruction or adverse modification of its critical habitat, the Federal agency will be so notified in writing within 60 days of initiation. The Federal agency, with assistance as feasible from the Service and other sources of expertise, shall then initiate biological surveys or studies to determine how the activity or program may affect listed species or their critical habitat. Within 60 days of receipt of adequate information and documentation, unless special circumstances require negotiation of a longer period, the Service will end consultation by issuing a biological opinion.

(g) *Biological opinions.* (1) If the Director or Regional Director concludes that an activity or program under review is not likely to jeopardize the continued existence of listed species or result in destruction or adverse modification of critical habitat, he will so notify the Federal agency in writing.

(2) If the Director or Regional Director concludes that an activity or program under review is likely to jeopardize the continued existence of a listed species or result in the destruction or modification of critical habitat, he will so notify the Federal agency in writing and may recommend any changes that in his opinion will eliminate these effects of the activities or programs.

(3) Biological opinions issued pursuant to paragraphs (g) (1) and (2) will be accompanied by a statement of the facts and documentation on which they are based.

(4) Upon receipt and consideration of the final biological opinion and recommendations of the Service, it is the responsibility of the Federal agency to determine whether to proceed with the activity or program as planned, in light of its section 7 obligations. Where the consultation process has been consolidated with interagency cooperation required by other statutes, such as the Fish and Wildlife Coordination Act (16 U.S.C. 661 et seq.) or the National Environmental Policy Act (42 U.S.C. 4321 et seq.), the final biological opinion and recommendations of the Service should be stated in the documents required by those statutes.

(h) *Reinitiation.* Consultation shall be reinitiated by the Service or by the Federal agency:

(1) If new information reveals impacts of an activity or program that may hinder the survival and recovery of listed species;

(2) If the activity or program is modified in a manner that may hinder the survival and recovery of listed species; or

(3) If a new species is listed that may be affected by the activity or program.

§ 17.94 Determination of critical habitat.

(a) *Procedure.* Whenever deemed necessary and appropriate, the Director shall determine critical habitat for a listed species. After exchange of biological information, as appropriate, with the affected States and Federal agencies with jurisdiction over the lands or waters under consideration, the Director shall publish proposed rulemakings in the FEDERAL REGISTER. Comments of the scientific community and other interested persons will also be considered in promulgating final rulemaking.

(b) *Criteria.* The Director will consider the physiological, behavioral, ecological, and evolutionary requirements for the survival and recovery of listed species in determining what areas or parts of habitat (exclusive of those existing man-made structures or settlements which are not necessary to the survival and recovery of the species) are critical. These requirements include, but are not limited to:

(1) Space for individual and population growth and for normal behavior;

(2) Food, water, air, light, minerals, or other nutritional or physiological requirements;

(3) Cover or shelter;

(4) Sites for breeding, reproduction, or rearing of offspring; and generally,

(5) Ecosystems that are protected from disturbances and are representative of the geographical distribution of listed species.

(c) *Emergency determination.* Paragraphs (a) and (b) notwithstanding, the Director may make an emergency determination of critical habitat if he finds that an impending action poses a significant risk to the well-being of a listed species by the destruction or adverse modification of its habitat. Emergency determinations will be published in the FEDERAL REGISTER and will remain in effect for no more than 120 days.

[FR Doc.77-2383 Filed 1-25-77;8:45 am]

Fish and Wildlife Service

[50 CFR Part 26]

BACK BAY NATIONAL WILDLIFE REFUGE, VIRGINIA

Public Entry and Use

The Department of the Interior is considering issuance of regulations to govern public access, use, and recreation on the Back Bay National Wildlife Refuge. Prior regulations were published in the FEDERAL REGISTER, 41 FR 22361–22364, June 3, 1976 and 41 FR 31537–31539, July 29, 1976.

The policy of the Department of the Interior is, whenever practical, to afford the public an opportunity to participate in the rule-making process. Accordingly, interested persons may submit written comments, suggestions or objections regarding the proposed revision to the Regional Director, U.S. Fish and Wildlife Service, One Gateway Center, Suite 700, Newton Corner, Massachusetts 02158, by February 25, 1977.

PROPOSED REGULATIONS

These regulations are proposed under the authority of Section 4 of 80 Stat. 927, 16 U.S.C. 668dd: 76 Stat. 654, 16 U.S.C. 460k–3: and 65 Stat. 186, 16 U.S.C. 715s. Accordingly it is proposed that the 1976 special regulations governing public access, use and recreation be revised as set forth below:

§ 26.34 Special regulations concerning public access, use and recreation for individual wildlife refuge areas.

VIRGINIA

BACK BAY NATIONAL WILDLIFE REFUGE

(a) General Use. (1) Entry on foot or by motor vehicle on designated travel routes in public use areas is permitted for the purpose of nature study, sightseeing, wildlife observation, photography, hiking, surf fishing, surfing, swimming, and bicycling during daylight hours.

(2) Swimming and surfing are permitted only on that portion of the beach lying between the north boundary of the refuge and the dune crossing at field headquarters. No lifeguards are provided. Swimming and surfing will be at the visitor's own risk.

(3) The parking lot at the field headquarters is reserved for persons engaged in surf fishing and nature study. Surf fishing is permitted in accordance with applicable State regulations.

(4) Open fires are not permitted. Portable grills with a contained fuel supply are permitted on the beach north of the field headquarters.

(5) Pets on a leash not exceeding 10 feet in length are permitted on refuge public use areas.

(6) Bicycles and registered motor vehicles are permitted on the paved refuge access road and on the parking area at field headquarters. All other types of motorized vehicles are prohibited except as specifically authorized pursuant to these regulations.

(b) Access Permits. (1) Access to and travel along the ocean portion of the refuge by motorized vehicles may be allowed between the dune crossing entrance at the field headquarters and the south boundary of the refuge only after a permit has been issued by the refuge manager or his designated representative.

(2) Permits may be issued for such period of time as appears justifiable to the refuge manager, taking into account the need for and duration of access required by the applicant. In no case will the permit remain in effect beyond December 31 of the year in which it is granted. Permits may be renewed upon the submittal of a proper application.

(3) Permits must be permanently displayed at all times while on refuge property in such a manner as to be readily visible on any motor vehicle. Permits shall be nontransferable. No more than one vehicle owned by the permit holder shall be registered with the refuge manager for use in accordance with these regulations. That vehicle shall be operated on the refuge beach only by the permit holder or a member of his immediate family and household.

(4) Permits may be issued as follows: (i) Residential. (A) To persons now residing on, owning, or leasing land with permanent habitable dwelling, south of the refuge in the False Cape State Park acquisition area, Virginia.

(B) To permanent, full-time residents who can furnish proof of residency prior to December 31, 1975 on the Outer Banks from the refuge boundary south to and including the village of Corolla, North Carolina, as long as they remain permanent, full-time residents. Residence is defined as the dwelling in which the permit applicant lives year round on a full-time basis.

The burden of proof of showing that the prospective permittee meets these criteria shall be on the prospective permittee by presentation of appropriate documentation. Such permitted vehicles shall be restricted to two round trips per day. Travel is restricted to the designated route of travel between the hours of 5 a.m. to 11 p.m. The refuge manager may make exceptions to access restrictions for qualified permittees who have demonstrated, to the satisfaction of the refuge manager, a need for access relating to health or livelihood.

(ii) Non-residential: (A) To full-time commercial fishermen who have verified their dependence for a livelihood since on or before 1972 upon ingress, egress or crossing refuge land. Not more than three (3) special use permits for commercial fishing on the refuge will be in force at one time. Selection of refuge fishing permits will be determined by a lottery when the number of qualified applicants, as described above, exceeds the number of permits available. Commercial fishermen: a commercial fisherman shall be described as one who performs the act of harvesting finfish by gill net or haul seine in the Atlantic Ocean, and who has owned and operated a commercial fishing business since on or before 1972.

(B) For a school bus transporting resident students to and from the False Cape area during the school term.

(C) For service vehicles on business calls during the hours of 8 a.m. to 5 p.m., Monday through Friday, upon written verification of a request from a resident as described in (b) (4) (i) above. Service vehicles. Any vehicle owned or operated by or on behalf of an individual, partnership, or corporation engaged entirely in the business of furnishing construction, maintenance, or repair services, including but not limited to building, plumbing, septic tanks, installation or repair of household appliances, carpentry, painting, lansdcaping, garbage collection, and delivery services.

(D) For public utility vehicles on official business calls upon written verification of a request from a resident as described in (b) (4) (i) above. Public utility vehicles: Any vehicles owned or operated by a public utility company enfranchised to supply Outer Banks residents with electricity or telephone service.

(6) Excluded from the restrictions of these regulations are any military, fire, emergency, or law enforcement vehicle when used for emergency purposes and official use by an employee, agent, or designated representative of the Federal, State, or local government in the course of his official duties.

(7) In an emergency, the refuge manager may suspend, for such period or periods as he shall deem advisable, any or all of the foregoing restrictions on vehicular travel, and he may announce such suspension by whatever means are available. In the event of high winds and waves, storms, adverse weather conditions or high tides, the refuge manager may close all or any portion of the refuge to vehicular travel for such period as he shall deem advisable in the interest of public safety, or may adjust the periods of access otherwise prescribed pursuant to (b) (4) (i) above.

(8) (i) The refuge manager may prescribe restrictions as to the types of vehicles to be permitted to ensure public safety and adherence to all applicable rules and regulations.

(ii) All vehicles registered with the refuge manager must be equipped with four-wheel drive or oversand tires and carry, at all times on the refuge beach a shovel, jack, tow rope or chain, board or similar support for the jack, low-pressure tire gauge and spare tire.

(9) Violators of these special regulations and all other regulations pertaining to the Back Bay National Wildlife Refuge will be subject to legal action as prescribed by 50 CFR 28.31, including mandatory revocation by the refuge manager of such permits for the duration of the permit period.

(10) all permits issued under (b) (4) (i) will be terminated in the event that alternate access is provided during the permit period.

(11) The provisions of this special regulation are effective through December 31, 1977. They supplement the regulations which govern recreation on wildlife refuge areas generally, which are set forth in Title 50.

The refuge, comprising approximately 4,600 acres, is delineated on a map available from the Refuge Manager, Back Bay National Wildlife Refuge, Pembroke Office Park, Pembroke No. 2 Building Suite 218, Virginia Beach, Virginia 23462, and from the Regional Director, U.S. Fish and Wildlife Service, One Gateway Center, Suite 700, Newton Corner, Massachusetts 02158.

WILLIAM C. ASHE,
Acting Regional Director,
U.S. Fish and Wildlife Service.

JANUARY 13, 1977.

[FR Doc.77-2400 Filed 1-25-77;8:45 am]

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

[50 CFR Parts 217 and 223]

ENDANGERED AND THREATENED FISH OR WILDLIFE

Interagency Cooperation

Proposed regulations to assist the Federal agencies in complying with section 7 of the Endangered Species Act of 1973.

The Director, National Marine Fisheries Service, National Oceanic and Atmospheric Administration, U.S. Department of Commerce, and the Assistant Secretary for Fish and Wildlife and Parks, U.S. Department of the Interior, hereby jointly issue substantively identical proposed rulemaking that would establish rules and procedures for interagency cooperation pursuant to section 7 of the Endangered Species Act of 1973, 16 U.S.C. 1531–1543. The National Marine Fisheries Service regulations would be established in Parts 217 and 223 of Chapter II of Title 50, Code of Federal Regulations, while the Interior Department regulations (published elsewhere in this issue, see FR Doc. 77–2383, published in the proposed rules section of this issue under the Department of Interior) would be established in Part 17 of Chapter I of Title 50, Code of Federal Regulations.

Parts 217 and 223 are only for those species under the jurisdictional responsibilities of the Secretary of Commerce (endangered species are identified in 50 CFR 222.23(a) and threatened species are identified in 50 CFR 227.4). The FWS regulations in Part 17 would apply to all other endangered and threatened species.

For background information, discussion of comments received from Federal agencies, a description of the joint proposal, and solicitation and submittal of public comments, see FR Doc. 77–2383, supra.

This notice of proposed rulemaking is issued under the authority of the Endangered Species Act of 1973.

Dated: January 19, 1977.

ROBERT W. SCHONING,
Director, National Marine Fisheries Service.

NATHANIEL P. REED,
Assistant Secretary,
Fish and Wildlife and Parks.

Accordingly, it is hereby proposed to amend Part 217, Chapter II of Title 50, Code of Federal Regulations, and to add a new Part 223, Chapter II of Title 50, Code of Federal Regulations, as follows:

§ 217.11 [Amended]

1. Revise the reference "Parts 217–222" in § 217.11 to read "Parts 217–223."

2. Add to the definitions of § 217.12, maintaining alphabetical order, the following:

§ 217.12 Definitions.

* * * * *

"Activities and programs" means all actions of any kind authorized, funded, or carried out by Federal agencies, in whole or in part, examples of which include, but are not limited to: (1) Actions intended to conserve listed species or their habitat; (2) the promulgation of regulations; (3) the granting of licenses, contracts, leases, easements, rights-of-way, permits, or grants-in-aid; or (4) actions directly or indirectly causing modifications to the land, water, or air.

* * * * *

"Critical habitat" means any air, land, or water area (exclusive of those existing man-made structures or settlements which are not necessary to the survival and recovery of a listed species) or any constituent thereof, the loss of which would appreciably decrease the likelihood of the survival and recovery of a listed species or a distinct segment of its population. The constituent elements of critical habitat include, but are not limited to physical structures and topography, biota, climate, human activity, and the quality and chemical content of land, water, and air. Critical habitat may represent any portion of the present habitat of a listed species and may include additional areas for reasonable population expansion.

"Destruction or adverse modification" means a direct or indirect alteration of critical habitat which appreciably diminishes the value of that habitat for survival and recovery of a listed species. Such alterations include, but are not limited to those diminishing the requirements for survival and recovery listed in § 223.22. There may be many types of activities which could be carried out in critical habitat without causing such diminution.

* * * * *

"Federal agency" means each authority of the Government of the United States except for the Congress, the courts of the United States, the Governments of the territories or possessions of the United States, or the Government of the District of Coumbia.

* * * * *

"Jeopardize the continued existence of" means to engage in an activity or program which reasonably would be expected to reduce the reproduction, numbers, or distribution of a listed species to such an extent as to appreciably reduce the likelihood of the survival and recovery of that species in the wild. The level of reduction necessary to constitute "jeopardy" would be expected to vary among listed species.

"Listed species" means any species of fish or wildlife which is designatd as endangered or threatened pursuant to the Act.

"NMFS means the National Marine Fisheries Service.

* * * * *

"Recovery" means improvement in the status of listed species to the point at which listing is no longer required.

* * * * *

"Regional Director" as used in Part 223, means a Regional Director of the National Marine Fisheries Service.

3. Add Part 223 to read as follows:

PART 223—ENDANGERED AND THREATENED FISH OR WILDLIFE—INTERAGENCY COOPERATION

Subpart A—Introduction

Sec.
223.1 Scope of regulations.
223.2 Applicability to previously initiated actions.

Subpart B—Consultation

Sec.
223.11 Initiation.
223.12 Form.
223.13 Assistance from the Service.
223.14 Assistance from other sources.
223.15 Threshold examination.
223.16 Further consultation.
223.17 Biological opinions.
223.18 Reinitiation.

Subpart C—Determination of Critical Habitat

Sec.
223.21 Procedure.
223.22 Criteria.
223.23 Emergency determination.

AUTHORITY: Endangered Species Act of 1973, 16 U.S.C. 1531 et seq.

Subpart A—Introduction

§ 223.1 Scope of regulations.

This Part interprets and implements section 7 of the Act. Section 7 (16 U.S.C. 1536) applies to all listed species of fish, wildlife, or plants and imposes three burdens upon the Federal agencies. First, it directs them to utilize their authorities to carry out conservation programs for listed species. Such affirmative conservation programs must comply with any applicable permit requirements of 50 CFR Parts 220, 222, and 227 for listed species. Second, it requires every Federal agency to insure that its activities and programs in the United States, upon the high seas, and in foreign countries will not jeopardize the continued existence of a listed species. And third, section 7 directs all Federal agencies to insure that their activities and programs do not result in the destruction or modification of critical habitat. Although the National Marine Fisheries Service and the U.S. Fish and Wildlife Service share responsibilities for the Act (the regulations in this Part apply only to listed species under the jurisdiction of the National Marine Fisheries Service. A Federal agency can determine which Service to initiate consultation with by scanning the list of species under the jurisdiction of the National Marine Fisheries Service located at 50 CFR 222.23(a) and 227.4. If the Federal agency's activity or program may affect a listed species which is cited in 50 CFR 222.23(a) or 227.4, then the agency should initiate consultation with the National Marine Fisheries Service. If the listed species is not cited in 50 CFR 222.23(a) or 227.4, the Federal agency should initiate consultation with the U.S. Fish and Wildlife Service.

§ 223.2 Applicability to previously initiated actions.

Section 7 applies to all activities or programs where Federal involvement or control remains which in itself could jeopardize the continued existence of a listed species or modify or destroy its critical habitat.

Subpart B—Consultation

§ 223.11 Initiation.

(a) It is the responsibility of each agency to review its activities or programs and to identify any such activities or programs that may affect listed species or their habitat. Reviewing agencies may obtain advice from the NMFS, but this is supplemental to and not a substitute for the formal consultation process set forth in this Part. Where a Federal agency funds or authorizes an activity or program to be carried out by a non-Federal entity, the Federal agency should initiate the consultation process and not the non-Federal entity.

(b) If a Federal agency decides that its activities or programs will not affect listed species or their habitat, the consultation requirements of section 7 will not apply unless requested by the NMFS.

(c) When a Federal agency identifies activities or programs that may affect listed species or their habitat, the agency should convey a written request for consultation to the Regional Director for the Region where the activity or program is or will be carried out or to the Regional Director for the Region where the Federal agency is situated if more than one Region is involved, or to the Director if foreign countries or the high seas are involved. In addition, if foreign countries or the high seas are involved, a copy of the request for consultation should be forwarded to the Secretary of State, c/o the Director, Office of Environmental Affairs.

(d) In addition, the Director or Regional Director will request initiation of consultation if he identifies any activity or program of a Federal agency that has not received prior consultation and that may affect listed species or their habitat.

(e) Informal consultation may be initiated at the field level between the NMFS and the Federal agencies or their authorized representatives. Such informal consultation is supplemental to and not a substitute for the formal consultation process set forth in this Part.

§ 223.12 Form.

(a) Consultation under section 7 may be consolidated with interagency cooperation required by other statutes, such as the Fish and Wildlife Coordination Act (16 U.S.C. 661 et seq.) or the National Environmental Policy Act (42 U.S.C. 4321 et seq.). The satisfaction of the requirements of these other statutes, however, does not of itself relieve a Federal agency of its obligation to comply with the consultation procedures set forth in this part.

(b) When particular programs or activities involve more than one Federal agency, these agencies may, with concurrence of the Director, fulfill their consultation responsibilities through a single agency.

§ 223.13 Assistance from the Service.

It is the primary responsibility of each Federal agency requesting consultation to conduct appropriate studies and to provide the biological information necessary for adequate review of the effect an activity or program has upon listed species or their habitat. To the extent it is able, the NMFS will upon request provide relevant available data and reports, personnel, and recommendations for additional studies or surveys, but the NMFS will not fund any such additional studies or surveys.

§ 223.14 Assistance from other sources.

Federal agencies may seek assistance from any source to obtan the biological information necessary for review of the effect an activity or program has upon listed species or their habitat. Such assistance may include, but it not limited to that obtained by contract or required by regulations of the Federal agency. However, responsibility for compliance with the procedures of this subpart remains with the Federal agency and cannot be delegated by it.

§ 223.15 Threshold examination.

Upon receipt of a request for consultation, the Director or Regional Director will conduct a threshold examination of the activity or program under review. A threshold examination may include a review of available information or an on-site inspection of the area.

(a) If an activity or program under review will, in the opinion of the Director, promote the conservation of listed species, the appropriate Federal agency shall be notified in writing within 60 days after consultation is initiated, and additional section 7 consultation shall be unnecessary unless it would further benefit the listed species. The NMFS, to the extent feasible, will assist in carrying out such programs if requested by the Federal agency. The Federal agency should be aware that in addition to satisfaction of section 7 requirements, a permit may be required for activities otherwise prohibited by section 9 of the Act (16 U.S.C. 1538).

(b) If an identified activity or program is not specifically for the conservation of listed species, but the Director or Regional Director concludes from the threshold examination that in no likelihood will the activity or program jeopardize the continued existence of a listed species or result in the destruction or adverse modification of its critical habitat, the appropriate Federal agency shall be notified in writing within 60 days of initiation and further section 7 consultation shall be unnecessary.

§ 223.16 Further consultation.

If an identified activity or program is not specifically for the conservation of listed species, and the Director or Regional Director concludes as a result of the threshold examination that the activity or program may jeopardize the continued existence of a listed species or result in the destruction or adverse modification of its critical habitat, the Federal agency will be so notified in writing within 60 day of initiation. The Federal agency, with assistance as feasible from the NMFS and other sources of expertise, shall then initiate biological surveys or studies to determine how the activity or program may affect listed species or their critical habitat. Within 60 days of receipt of adequate information and documentation, unless special circumstances require negotiation of a longer period, the NMFS will end consultation by issuing a biological opinion.

§ 223.17 Biological opinions.

(a) If the Director or Regional Director concludes that an activity or program under review is not likely to jeopardize the continued existence of listed species or result in destruction or adverse modification of critical habitat, he will so notify the Federal agency in writing.

(b) If the Director or Regional Director concludes that an activity or program under review is likely to jeopardize the continued existence of a listed species or result in the destruction or modification of critical habitat, he will so notify the Federal agency in writing and may recommend any changes that in his opinion will eliminate these effects of the activities or programs.

(c) Biological opinions issued pursuant to paragraphs (a) and (b) of this section will be accompanied by a statement of the facts and documentation on which they are based.

(d) Upon receipt and consideration of the final biological opinion and recommendations of the NMFS, it is the responsibility of the Federal agency to determine whether to proceed with the activity or program as planned, in light of its section 7 obligations. Where the consultation process has been consolidated with interagency cooperation required by other statutes, such as the Fish and Wildlife Coordination (Act (16 U.S.C. 661 et seq.) or the National Environmental Policy Act (42 U.S.C. 4321 et seq.), the final biological opinion and recommendations of the NMFS should be stated in the documents required by those statutes.

§ 223.18 Reinitiation.

Consultation shall be reinitiated by the NMFS or by the Federal agency:

(a) If new information reveals impacts of an activity or program that may hinder the survival and recovery of listed species;

(b) If the activity or program is modified in a manner that may hinder the survival and recovery of listed species; or

(c) If a new species is listed that may be affected by the activity or program.

Subpart C—Determination of Critical Habitat

§ 223.21 Procedure.

Whenever deemed necessary and appropriate, the Director shall determine critical habitat for a listed species. After exchange of biological information, as appropriate, with the affected States and Federal agencies with jurisdiction over the lands or waters under consideration, the Director shall publish proposed rulemakings in the FEDERAL REGISTER. Comments of the scientific community and other interested persons will also be considered in promulgating final rulemaking.

§ 223.22 Criteria.

The Director will consider the physiological, behavioral, ecological, and evolutionary requirements for the survival and recovery of listed species in determining what areas or parts of habitat (exclusive of those existing man-made structures or settlements which are not necessary to the survival and recovery of the species) are critical. These requirements include, but are not limited to:

(a) Space for individual and population growth and for normal behavior;

(b) Food, water, air, light, minerals, or other nutritional or physiological requirements;

(c) Cover or shelter;

(d) Sites for breeding, reproduction, or rearing of offspring; and generally,

(e) Ecosystems that are protected from disturbances and are representative of the geographical distribution of listed species.

§ 223.23 Emergency determination.

Sections 223.21 and 223.22 notwithstanding, the Director may make an emergency determination of critical habitat if he finds that an impending action poses a significant risk to the well-being of a listed species by the destruction or adverse modification of its habitat. Emergency determinations will be published in the FEDERAL REGISTER and will remain in effect for no more than 120 days.

notices

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Forest Service

MANTI DIVISION GRAZING ADVISORY BOARD

Meeting

The Manti Division Grazing Advisory Board will meet at 1:30 p.m., February 17, 1977, in the Ephraim Town Hall, Ephraim, Utah. The purpose of this meeting is to discuss the following specific topics:

1. Resource Planning Act Review.
2. Representative of B.L.M. to discuss new B.L.M. Organic Act.
3. National Forest Management Act of 1976.
4. Discussion of Manti-LaSal National Forest grazing related problems.

The meeting will be open to the public. Persons who wish to attend should notify Mr. Vail H. Neilson, Ephraim, Utah, Telephone No. 283-4398.

Written statements concerning specific topics of discussion may be filed with the committee before or after the meeting. Public comments and discussion concerning topics of the agenda will be permitted to the extent time permits.

Dated: January 14, 1977.

B. J. GRAVES,
Acting Forest Supervisor.

OCHOCO NATIONAL FOREST GRAZING ADVISORY BOARD

Meeting

The Ochoco National Forest Grazing Advisory Board will meet at 10:00 a.m., February 25, 1977 in the Forest Supervisor's Office, Federal Building, Prineville, Oregon.

The purpose of this meeting is the Forest's range program in relation to administration; improvement construction and maintenance; Forest and permittee responsibilities; and other subjects presented by the board members, permittees, and the general public.

The meeting will be open to the general public.

Persons interested in presenting a subject at the meeting may file a request and brief with either:

Carl Mayo, Chairman, Riley, Oregon 97758,
or
Jack H. Royle, Secretary, P.O. Box 490, Prineville, Oregon 97754.

Written statements may be filed with the board before or after the meeting.

Dated: January 18, 1977.

GLEN E. HETZEL,
Forest Supervisor.

TIMBER MANAGEMENT PLAN, GREEN MOUNTAIN NATIONAL FOREST

Availability of Draft Environmental Statement

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969, the Forest Service, Department of Agriculture has prepared a draft environmental statement on the Timber Management Plan for the Green Mountain National Forest, USDA-FS-R9-DES-(ADM)-77-05.

The environmental statement concerns a proposed plan for managing the timber resource on the Green Mountain National Forest for the period January 1, 1977, through September 30, 1986. The Green Mountain National Forest is located in parts of Addison, Bennington, Rutland, Washington, Windham, and Windsor Counties, Vermont.

This draft environmental statement was transmitted to CEQ on January 19, 1977.

Copies are available for inspection during regular working hours at the following locations:

USDA, Forest Service, South Agriculture Bldg., Room 3231, 12th St. and Independence Ave., SW., Washington, D.C. 20250.
USDA, Forest Service, Eastern Region, 633 West Wisconsin Avenue, Milwaukee, Wisconsin 53203.
USDA, Forest Service, Green Mountain National Forest, Federal Building, 151 West Street, Box 519, Rutland, Vermont 05701.

A limited number of single copies are available upon request to the Forest Supervisor of the Green Mountain National Forest at the above address.

Copies of the environmental statement have been sent to various Federal, State, and local agencies as outlined in the CEQ Guidelines.

Written comments are invited from the public and from State and local agencies which are authorized to develop and enforce environmental standards, and from Federal agencies having jurisdiction by law or special expertise with respect to any environmental impact involved for which comments have not been requested specifically.

Written comments concerning the proposed action and requests for additional information should be sent to Forest Supervisor, Green Mountain National Forest, at the above address. Written comments must be received by March 18, 1977, in order to be considered in the preparation of the final environmental statement.

CARL N. WILSON,
Acting Regional Forester.

JANUARY 19, 1977.

[FR Doc.77-2476 Filed 1-25-77;8:45 am]

UNION PASS PLANNING UNIT

Availability of Draft Environmental Statement

Pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969, the Forest Service, Department of Agriculture, has prepared a draft environmental statement for the Union Pass Planning Unit, Bridger-Teton National Forest, Wyoming. The Forest Service report number is USDA-FS-DES (Adm) R4-77-3.

The environmental statement identifies and evaluates the probable effects of the land management plan for the Union Pass Planning Unit on the Bridger-Teton National Forest, Wyoming. The purpose of the plan is to allocate National Forest lands within the unit to specific resource uses and activities; establish management objectives; document management direction, management decisions, and necessary coordination between resource uses and activities; and provide for the protection, use and development of the various resources within the planning unit. The plan provides for minimization of adverse effects and maximization of desirable effects. Significant areas will remain undeveloped with options for future management remaining open.

This draft environmental statement was transmitted to CEQ on January 17, 1977.

Copies are available for inspection during regular working hours at the following locations:

USDA, Forest Service, South Agriculture Bldg., Room 3230, 12th St. and Independence Ave., S.W., Washington, D.C. 20250.
Regional Planning Office, USDA, Forest Service, Federal Building, Room 4403, 324—25th Street, Ogden, Utah 84401.
Forest Supervisor, Bridger-Teton National Forest, Forest Service Building, Jackson, Wyoming 83001.
District Forest Ranger, Big Piney Ranger District, P.O. Box 218, Big Piney, Wyoming 83113.

A limited number of single copies are available upon request from Forest Supervisor H. Reid Jackson, Bridger-Teton National Forest, Forest Service Building, Jackson, Wyoming 83001.

Copies of the environmental statement have been sent to various Federal, State, and local agencies as outlined in the CEQ Guidelines.

Comments are invited from the public, and from State and local agencies which are authorized to develop and enforce environmental standards, and from Federal agencies having jurisdiction by law or special expertise with respect to any environmental impact involved for which comments have not been requested specifically.

Comments concerning the proposed action and requests for additional information should be addressed to Forest Supervisor H. Reid Jackson, Bridger-Teton National Forest, Forest Service Building, Jackson, Wyoming 83001. Comments must be received by March 21, 1977, in order to be considered in the preparation of the final environmental statement.

Dated: January 17, 1977.

P. M. REES,
Director, Regional Planning and Budget.

[FR Doc.77-2477 Filed 1-25-77;8:45 am]

WOODS PLANNING UNIT

Availability of Final Environmental Statement

Pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969, the Forest Service, Department of Agriculture, has prepared a final environmental statement for the Woods Planning Unit, Arizona, USDA-FS-R3 FES Adm 76-04.

The environmental statement concerns a proposed land use plan. The final environmental statement was transmitted to CEQ on January 18, 1977.

Copies are available for inspection during regular working hours at the following locations:

USDA, Forest Service, So. Agriculture Bldg., Rm. 3230, 14th and Independence Ave., SW, Washington, D.C. 20250.
USDA, Forest Service, Southwestern Region, 517 Gold Avenue, SW, Albuquerque, New Mexico 87102.
Coconino National Forest, 114 North San Francisco Street, Flagstaff, Arizona 86001.

A limited number of single copies are available upon request to Forest Supervisor, Coconino National Forest, 114 North San Francisco Street, Flagstaff, Arizona 86001.

Copies of the environmental statement have been sent to various Federal, State, and local agencies as outlined in the CEQ guidelines.

GARY E. CARGILL,
Acting Regional Forester, Region 3.

CIVIL AERONAUTICS BOARD

[Order 77-1-86; Docket 27573; Agreement C.A.B. 26293]

INTERNATIONAL AIR TRANSPORT ASSOCIATION

Order

Issued under delegated authority January 14, 1977.

An agreement has been filed with the Board pursuant to section 412(a) of the Federal Aviation Act of 1958 (the Act) and Part 261 of the Board's Economic Regulations between various air carriers, foreign air carriers and other carriers, embodied in the resolutions of the Joint Traffic Conferences of the International Air Transport Association (IATA). The agreement was adopted at the 22nd meeting of the Joint Specific Commodity Rates Board held in Miami Beach on October 19-23, 1976 and has been assigned the above C.A.B. agreement number.

With respect to air transportation as defined by the Act, the agreement proposes revisions to the specific commodity rates structures applicable on the North Atlantic, North/Central Pacific and South Pacific market areas. These revisions are outlined in the attachments hereto, and reflect reductions from otherwise applicable general cargo rates.

Pursuant to authority duly delegated by the Board in the Board's Regulations, 14 CFR 385.14, it is not found that the subject agreement is adverse to the public interest or in violation of the Act, provided that approval is subject to the conditions hereinafter ordered.

Accordingly, *It is ordered*, That:

Agreement 26293 is approved, provided that (a) approval shall not constitute approval of the specific commodity descriptions contained therein for purposes of tariff publications; (b) tariff filings shall be marked to become effective on not less than 30 days' notice from the date of filing; and (c) where a specific commodity rate is published for a specified minimum weight at a level lower than the general commodity rate applicable for such weight, and where a general commodity rate is published for a greater minimum weight at a level lower than such specific commodity rate, the specific commodity rate shall be extended to all such greater minimum weights at the applicable general commodity rate level.

Persons entitled to petition the Board for review of this order, pursuant to the Board's Regulations, 14 CFR 385.50, may file such petitions within ten days after the date of service of this order.

This order shall be effective and become the action of the Civil Aeronautics Board unless within such period a petition for review is filed or the Board gives notice that it will review this order on its own motion.

This order will be published in the FEDERAL REGISTER.

PHYLLIS T. KAYLOR,
Secretary.

Agreement CAB 26293

[Order 77-1-124; Docket Nos. 29001; 30249; 30258]

SOUTHERN AIRWAYS, INC., ET AL.

Route Exchange Agreement and Certificates of Public Convenience Order

Adopted by the Civil Aeronautics Board at its office in Washington, D.C., on the 21st day of January, 1977.

The route exchange agreement between Southern Airways and Trans World Airlines provides, principally, for the transfer to Southern of TWA's authority to engage in air transportation between Nashville, on the one hand, and St. Louis, Tampa-St. Petersburg-Clearwater ("Tampa"), Ft. Lauderdale and Miami, on the other.[1] By Order 76-12-1 the Board instituted this proceeding to consider:

(1) Whether that route transfer agreement should be approved.

(2) Whether any carrier (including Southern) should be certificated between Nashville, on the one hand, and Atlanta, St. Louis, Tampa, Miami, and/or Ft. Lauderdale, on the other hand; and/or

(3) Whether TWA's authority between Nashville, on the one hand, and Atlanta, St. Louis, Tampa, Miami, and/or Ft. Lauderdale, on the other hand, should be deleted.

The order consolidated into Docket 29001 the applications of Delta and Ozark for authority to serve the markets at issue, to the extent those applications are consistent with the scope of the proceeding as outlined above. The order also provided for the receipt of comparable route applications and motions to consolidate from other carriers.

Braniff subsequently applied for a certificate to engage in air transportation between the terminal point St. Louis, Missouri, the intermediate points Nashville, Tennessee and Tampa-St. Petersburg-Clearwater, Florida and the terminal point Miami/Ft. Lauderdale, Florida, subject to the con-

[1] By its terms the agreement also provides for the transfer of TWA's Nashville-Atlanta authority to Southern. Since Southern already holds nonstop rights in that market, however, Order 76-12-1 noted that "the instant agreement is correctly characterized as contemplating only the deletion of TWA and not the transfer of any [Nashville-Atlanta] authority to Southern."

dition that all flights on the segment which serve St. Louis, Missouri, shall also serve Nashville, Tennessee.[3]

Braniff's motion to consolidate that application into Docket 29001 accompanied the application. No answers to Braniff's motion to consolidate have been filed and we shall grant it.

Southern also has filed a route application[4] and motion to consolidate. Southern's application, however, provides for Atlanta-St. Louis service, via Nashville, along with Nashville-St. Louis/Tampa/Miami/Ft. Lauderdale authority. Eastern opposes grant of Southern's motion to the extent that Southern's application provides for St. Louis-Atlanta service. Eastern argues that the thrust of Order 76-12-1 is to preclude the consideration in this proceeding of additional St. Louis-Atlanta service.

We have concluded that Southern's application in Docket 30258 should be consolidated into this proceeding without the limitation requested by Eastern. For one thing, Southern's 401 application precisely tracks the authority it would obtain were the route transfer approved. More importantly, the language in Southern's application about which Eastern objects—language that purports to give Southern one-stop St. Louis-Atlanta authority via Nashville—adds nothing to the authority Southern could gain in this proceeding even if no reference were made to Atlanta at all. St. Louis-Nashville authority is specifically at issue in this proceeding. And Southern already holds nonstop Nashville-Atlanta rights. Under normal Board rules of construction, the award of St. Louis-Nashville authority to Southern would give that carrier one-stop St. Louis-Atlanta rights absent the imposition of a specific restriction to the contrary.

Eastern will be free at subsequent stages of this proceeding to show why Southern should not be permitted to obtain St. Louis-Atlanta authority via Nashville. But the action Eastern seeks in its answer to Southern's motion to consolidate would not have the effect Eastern seeks. And we see no reason to adopt, on a pretrial basis, a restriction that would preclude one-stop St. Louis-Atlanta authority via Nashville.

As a last matter, we note that Southern's 401 application provides for a closed door restriction on services between Miami/Ft. Lauderdale and Tampa.[4] We recognize that the route transfer agreement provides for just such a restriction. But we sufficiently disfavor restrictions of that nature to conclude that the scope of this proceeding should not be limited by a closed door Miami/Ft. Lauderdale-Tampa pretrial restriction.

Accordingly, it is ordered, That: (1) The motions of Braniff Airways and Southern Airways to consolidate their applications in, respectively, Docket 30249 and Docket 30258 into the proceeding instituted by Order 76-12-1 be and they hereby are granted; and (2) Such proceeding shall hereafter be designated the "TWA-Southern Route Exchange Case."

This order will be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board.

PHYLLIS T. KAYLOR,
Secretary.

[Docket No. 30255]

TRANS-MEDITERRANEAN AIRWAYS, S.A.L.

Foreign Air Carrier Permit; Notice of Prehearing Conference and Hearing

Notice is hereby given that a prehearing conference in this proceeding is assigned to be held on February 15, 1977, at 9:30 a.m. (local time), in Room 1003, Hearing Room B, 1875 Connecticut Avenue, N.W., Washington, D.C., before Administrative Law Judge William A. Kane, Jr.

Notice is also given that the hearing may be held immediately following conclusion of the prehearing conference unless a person objects or shows reason for postponement on or before February 8, 1977.

Ordinary transcript will be adequate for the proper conduct of this proceeding.

Dated at Washington, D.C., January 19, 1977.

HENRY M. SWITKAY,
Acting Chief
Administrative Law Judge.

[FR Doc.77-2727 Filed 1-25-77;8:45 a.m.]

DEPARTMENT OF COMMERCE

Domestic and International Business Administration

FREDERICK CANCER RESEARCH CTR.

Decision on Application for Duty-Free Entry of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (15 CFR 301).

A copy of the record pertaining to this decision is available for public review during ordinary business hours of the Department of Commerce, at the Office of Import Programs, Department of Commerce, Washington, D.C. 20230.

Docket Number: 76-00490. Applicant: Frederick Cancer Research Center, P.O. Box B, Frederick, Maryland 21701. Article: Electron Microscope, Model HU-12A. Manufacturer: Hitachi, Ltd., Japan. Intended use of article: The article is intended to be used in a variety of collaborative research projects ranging from viruses, molecular genetics, cytochemistry, and cell surface markers which include: (a) immunoelectron microscopy of normal and pathologic cells to determine the presence of cross-reactive antigens with different microorganisms used in immunotherapy, (b) ultrastructural studies of animal and human tumors, (c) chronological studies of tissue ultrastructure during invasion of normal tissues by tumor cells, during treatment of the tumor with various chemotherapeutic and immunotherapeutic agents and during regression of the tumor, (d) autoradiography studies at the ultrastructural level of normal and pathologic tissues, (e) studies of cell surfaces as they are modified by physiologic and pathologic agents, (f) studies on viral ultrastructure *in situ* and in isolated preparations, (g) microscopy of critical point dried single cells and thick sections.

Comments: No comments have been received with respect to this application.

Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, was being manufactured in the United States at the time the article was ordered (December 26, 1974).

Reasons: This application is a resubmission of Docket Number 75-00362-33-46040 which was denied without prejudice to resubmission April 19, 1976 for informational deficiencies. The foreign article has a specified resolving capability of 3 Angstroms. The most closely comparable domestic instrument available at the time the article was ordered was the Model EMU-4C electron microscope manufactured by the Adam David Company. The Model EMU-4C had a specified resolving capability of 5 Angstroms. The Department of Health, Education, and Welfare (HEW) advises in its memorandum dated December 10, 1976 that the additional resolving capability of the foreign article is pertinent to the purposes for which the foreign article is intended to be used. We, therefore, find that the Model EMU-4C was not of equivalent scientific value to the foreign article for such purposes as the article is intended to be used at the time the article was ordered.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, which was being manufactured in the United States at the time the article was ordered.

RICHARD M. SEPPA,
Director, Special
Import Programs Division.

HARVARD UNIVERSITY ET AL.

Applications for Duty-Free Entry of Scientific Articles

The following are notices of the receipt of applications for duty-free entry of scientific articles pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651; 80 Stat. 897). Interested persons may present their views with respect to the question of whether an instrument or apparatus of equivalent scientific value for the purposes for which the article is intended to be used is being manufactured in the United States. Such comments must be filed in triplicate with the Director, Special Import Programs Division, Office of Import Programs, Washington, D.C. 20230, on or before February 15, 1977.

Amended regulations issued under cited Act, (15 CFR 301) prescribe the requirements applicable to comments.

A copy of each application is on file, and may be examined during ordinary Commerce Department business hours at the Special Import Programs Division, Department of Commerce, Washington, D.C. 20230.

Docket Number: 77-00064. Applicant: Harvard University, Purchasing Department, 75 Mt. Auburn Street, Cambridge, Massachusetts 02138. Article: Electron Microscope, Model EM-400 with High Tilt Goniometer and accessories. Manufacturer: Philips Electronics Instruments, NVD, The Netherlands. Intended use of article: The article is intended to be used for the study of microscopic samples of nervous tissue from experimental animals, including brain, spinal cord and peripheral nervous system; in particular the synapses, the sites of transmission of information between nerve cells. Experiments will be conducted with the objective of understanding the structural basis of nervous function in a sensory system, and the mechanisms of development. Application received by Commissioner of Customs: December 19, 1976.

Docket Number: 77-00072. Applicant: Rutgers University, Department of Chemistry, 73 Warren Street, Newark, NJ 07102. Article: Mass Spectrometer, Model MS 30 and accessories. Manufacturer: AEI Scientific Apparatus, Inc., United Kingdom. Intended use of article: The article is intended to be used for both high resolution and low resolution mass spectrometry. Natural products will be examined and structural elucidations of steroids, triterpenes, sesterterpenes, and other organic compounds of biological interest will be carried out. Application received by Commissioner of Customs: December 22, 1976.

Docket Number: 77-00074. Applicant: University of California, Biochemistry Department, 401 Biochemistry Building, Berkeley, California 94720. Article: Electron Microscope, Model EM 301 and accessories. Manufacturer: Philips Electronics Instruments NVD, the Netherlands. Intended use of article: The article is intended to be used for the following research projects: (1) Studies of nucleic acids by electron microscopy using protein free spreading techniques for DNA, DNA fragments and DNA-enzyme complexes, (2) Studies of cellular structures (e.g., active transport of amino acids in thin sections of the bacterium *Salmonella typhimurium*, biochemical and morphological changes in the sexual mating reactions of yeast, biosynthesis of the spore coat in wild type and spore defective mutants contractile proteins in cytokinesis and mitosis, bacterial membranes and their flagellar attachment sites), and (3) Structural studies employing unstained or negatively stained preparations viewed in darkfield as well as bright field. The article will also be used for instruction in specimen preparative techniques required for specific research projects and for individual and small group instruction in the operation of the electron microscope and associated techniques. Application received by Commissioner of Customs: December 10, 1976.

Docket Number: 77-00078. Applicant: University of Rochester, 601 Elmwood Avenue, Rochester, NY 14642. Article: Electron Microscope, Model EM 10-A and accessories. Manufacturer: Carl Zeiss, West Germany. Intended use of article: The article is intended to be used for studies of materials and phenomena related directly to the analysis of the mammalian central nervous system and specifically to the ultrastructural correlates of neuroendocrine mechanisms and the fine structural localization of brain hormones. The properties of the material to be investigated for the phenomena relates to the capability of localizing radiolabelled neurohormones releasing factors and neurotransmitters with transmission electron microscopy in the primate central nervous system, that has been embedded in plastic and thin sectioned. Relevant regions of the primate brain including the hypothalamus, brain stem and other circumventricular organs will be analyzed as to their capacity to sequester various radioactive bioactive peptide molecules. The article will also be used for educational purposes in the courses: Anatomy 595, Ph.D. Research; Anatomy 395, Research in Anatomy; Anatomy 500, Techniques in Neuroendocrine Morphology; and Anatomy 596, Ultrastructural Correlates of Neuroendocrine Mechanisms. The objectives of these courses are to instill in students basic fundamental ultrastructural techniques to determine the fine anatomy of the central nervous system and provide advanced training for senior graduate students, postdoctoral fellows and research associates. Application received by Commissioner of Customs: January 7, 1977.

TELECOMMUNICATIONS EQUIPMENT TECHNICAL ADVISORY COMMITTEE

Partially Closed Meeting

Pursuant to Section 10(a)(2) of the Federal Advisory Committee Act, 5 U.S.C. App. I (Supp. V, 1975), notice is hereby given that a meeting of the Telecommunications Equipment Technical Advisory Committee will be held on Friday, February 11, 1977, at 10:00 a.m. in Room 5611, Main Commerce Building, 14th and Constitution Avenue, N.W., Washington, D.C.

The Telecommunications Equipment Technical Advisory Committee was initially established on April 5, 1973. On March 12, 1975, the Acing Assistant Secretary for Adminisration approved the recharter and extension of the Committee for two additional years, pursuant to Section 5(c)(1) of the Export Administration Act of 1969, as amended, 50 U.S.C. App. Sec. 2404(c)(1) and the Federal Advisory Committee Act.

The Committee advises the Office of Export Administration, Bureau of East-West Trade, with respect to questions involving technical matters, worldwide availability and actual utilization of production and technology, and licensing procedures which may affect the level of export controls applicable to telecommunications equipment, including technical data related thereto, and including those whose export is subject to multilateral (COCOM) controls.

The Committee meeting agenda has five parts:

GENERAL SESSION

(1) Opening remarks by the Chairman.
(2) Presentation of papers or comments by the public.
(3) Nomination and election of a new Chairman.
(4) Discussion of draft sections on Findings—Volume I of the annual report.

EXECUTIVE SESSION

(5) Discussion of matters properly classified under Executive Order 11652, dealing with the U.S. and COCOM control program and strategic criteria related thereto.

The General Session of the meeting is open to the public, at which a limited number of seats will be available. To the extent time permits members of the public may present oral statements to the Committee. Written statements may be submitted at any time before or after the meeting.

With respect to agenda item (5), the Acting Assistant Secretary of Commerce for Administration, with the concurrence of the delegate of the General Counsel, formally determined on January 28, 1976, pursuant to Section 10(d) of the Federal Advisory Committee Act that the matters to be discussed in the Executive Session should be exempt from the provisions of the Act relating to open meetings and public participation therein, because the Executive Session will be concerned with matters listed in 5 U.S.C. 552(b)(1), i.e., it is specifically required by Executive Order 11652 that they be kept confidential in the interest of the national security. All materials to be reviewed and discussed by the Committee during the Executive Session of the meeting have been properly classified under the Executive Order. All Committee members have appropriate security clearances.

Copies of the minutes of the open portion of the meeting will be available

[3] Docket 30249.
[4] Docket 30258.
[4] "Southern shall not enplane or deplane passengers at Tampa-St. Petersburg-Clearwater who deplane or enplane at either Ft. Lauderdale or Miami."

upon written request addressed to the Freedom of Information Officer, Domestic and International Business Administration, Room 3012, U.S. Department of Commerce, Washington, D.C. 20230.

For further information, contact Mr. Charles C. Swanson, Director, Operations Division, Office of Export Administration, Domestic and International Business Administration, Room 1617M, U.S. Department of Commerce, Washington, D.C. 20230, telephone: A/C 202-377-4196.

The complete Notice of Determination to close portions of the meetings of the Telecommunications Equipment Technical Advisory Committee and of any subcommittees thereof, was published in the FEDERAL REGISTER on April 30, 1976 (41 FR 18129).

Dated: January 21, 1977.

RAUER H. MEYER,
Director, Office of Export Administration, Bureau of East-West Trade, U.S. Department of Commerce.

National Oceanic and Atmospheric Administration

CARIBBEAN FISHERY MANAGEMENT COUNCIL

Meeting

Notice is hereby given of a meeting of the Caribbean Fishery Management Council established by section 302 of the Fishery Conservation and Management Act of 1976 (Pub. L. 94-265).

The Caribbean Council will have authority, effective March 1, 1977, over fisheries within the fishery conservation zone adjacent to Puerto Rico and the Virgin Islands. The Council will, among other things, prepare and submit to the Secretary of Commerce fishery management plans with respect to the fisheries within its area of authority, prepare comments on applications for foreign fishing, and conduct public hearings.

This is the fifth in a series of organizational meetings of the Council. The meeting will be held Monday through Thursday, February 14 to February 17, 1977, at the Holiday Inn, Road 2, Firm El Tuque, Ponce, Puerto Rico. The meeting will convene at 1 p.m. on February 14 and adjourn at about noon on February 17. Daily sessions will normally start at 9 a.m. and adjourn at 5 p.m., except as otherwise noted. The meeting may be extended or shortened depending on progress on the agenda.

PROPOSED AGENDA

1. Council Organization and Administration Procedures.
2. Technical Organization and Procedures.
3. Organizational Meetings of the Council's Scientific and Statistical Committee and the Advisory Panel.
4. Review of foreign fishing applications, if any.
5. Other management business.

This meeting is open to the public, and there will be seating for a limited number of public members available on a first come, first served basis. Members of the public having an interest in specific items for discussion are also advised that agenda changes are at times made prior to the meeting. To receive information on changes, if any, made to the agenda, interested members of the public should contact on or about February 11, 1977:

Mr. Robert Cummins, Jr., Special Assistant to the Regional Director, National Marine Fisheries Service, Duval Building, 9450 Gandy Boulevard, St. Petersburg, Florida 33702.

At the discretion of the Council, interested members of the public may be permitted to speak at times which will allow the orderly conduct of Council business. Interested members of the public who wish to submit written comments should do so by addressing the Special Assistant to the Regional Director at the above address. To receive due consideration and facilitate inclusion of these comments in the record of the meeting, typewritten statements should be received within 10 days after the close of the Council meeting.

Dated: January 21, 1977.

WINFRED H. MEIBOHM,
Associate Director, National Marine Fisheries Service.

[FR Doc.77-2534 Filed 1-25-77;8:45 am]

MID-ATLANTIC FISHERY MANAGEMENT COUNCIL

Meeting

Notice is hereby given of a meeting of the Mid-Atlantic Fishery Management Council established by section 302 of the Fishery Conservation and Management Act of 1976 (Pub. L. 94-265).

The Mid-Atlantic Fishery Management Council will have authority effective March 1, 1977, over fisheries within the fishery conservation zone adjacent to the States of New York, New Jersey, Delaware, Pennsylvania, Maryland, and Virginia. The Council will, among other other things, prepare and submit to the Secretary of Commerce fishery management plans with respect to fisheries within its area of authority, prepare comments on applications for foreign fishing, and conduct public hearings.

This meeting of the Council will be held on February 9 and 10, 1977, from 10 a.m. to 5 p.m., and 9 a.m. to 3 p.m., respectively, at the Holiday Inn of Dover, U.S. Nos. 13 and 113, Dover, Delaware.

Proposed Agenda:

(1) Review of Council management plans.
(2) Review of permit applications, if any.
(3) Personnel matters—staff recruitment and procurement of office space and equipment.
(4) Other management business.

This meeting is open to the public and there will be seating for approximately 30 public members available on a first-come, first-serve basis. Members of the public having an interest in specific items for discussion are also advised that agenda changes are at times made prior to the meeting. Interested members of the public should contact Mr. Donald G. Birkholz, National Oceanic and Atmospheric Administration, National Marine Fisheries Service, State Fish Pier, Gloucester, MA 01930 on or about 10 days before the meeting to receive information on changes in the agenda, if any. At the discretion of the Council, interested members of the public may be permitted to speak at times which will allow the orderly conduct of Council business. Interested members of the public who wish to provide written comments should do so by submitting them to Mr. Birkholz, at the above address. To receive due consideration and facilitate inclusion of these comments in the record of the meeting, typewritten statements should be received within 10 days after the close of the Council meeting.

Dated: January 21, 1977.

WINFRED H. MEIBOHM,
Associate Director, National Marine Fisheries Service.

[FR Doc.77-2535 Filed 1-25-77;8:45 am]

CONSUMER PRODUCT SAFETY COMMISSION

[CP 76-14]

GAS FURNACES

Safety Standards Development; Denial of Petition

This notice announces that the Consumer Product Safety Commission has denied a petition to issue a consumer product safety rule for gas furnaces used in residences.

Section 10 of the Consumer Product Safety Act (CPSA), (15 U.S.C. 2059), provides that any interested person may petition the Consumer Product Safety Commission to commence a proceeding for the issuance of a consumer product safety rule. Section 10 also provides that if the Commission denies such a petition, it shall publish its reasons for denial in the FEDERAL REGISTER.

On July 7, 1976, Michael Smith of Elkgrove Village, Illinois, petitioned the Commission to develop mandatory safety standards for gas furnaces and gas conversion furnaces to reduce the hazard of carbon monoxide fumes (Petition CP 76-14).

The petition states that a number of furnace failures and malfunctions in gas furnaces and furnaces that have been converted to gas from oil have exposed residents of the homes in which such furnaces are installed to unnecessary amounts of carbon monoxide (CO). The petition requests a standard which would keep carbon monoxide out of a residence in the event of a furnace failure or as a result of improper burner adjustment, improper installation, a collapsed chimney, or malfunction of the furnace due to "failure or design failure." The petition suggests that the requested standard should include a requirement for a device to warn residents that they are being exposed to carbon monoxide. The petitioner suggests that the device could be an instrument that could be read or a device that would automatically shut down the furnace if carbon monoxide concentration exceeded a certain level. It was suggested that the standard could include a requirement that the furnace compartment be isolated in such a way as to force any escaping fumes outside the residence or that the furnace compartment should be isolated from the home in such a way as to make it impossible for escaping fumes to enter.

Information available to the Commission indicates that over 33 million gas furnaces and gas wall furnaces are currently in use in the United States. In reviewing available injury data, it was found that data reported to the National Electronic Injury Surveillance System (NEISS) showed that approximately 425 instances of poisoning or anoxia that were associated with gas furnaces and required hospital emergency room treatment occurred during fiscal year 1976. The Commission has conducted in-depth investigations of seven cases involving carbon monoxide poisoning that occurred between January 1, 1974 and June 30, 1976. Five of these cases involved improper, blocked or damaged vents. One involved a cracked heat exchanger, and one report stated only that the pilot light had gone out. Death certificates were also examined, although they do not ordinarily contain much technical detail concerning incidents of this type. An analysis of the certificates which have been submitted to the Commission for the period January 1, 1974, through December 31, 1975, shows that improper, blocked, or damaged vents were important factors in the 26 carbon monoxide incidents reported, which resulted in 36 deaths. Leaks in furnaces and defective furnaces were mentioned in several incidents.

From the information available to the Commission, it appears that the vast majority of carbon monoxide poisoning cases connected with gas furnaces may result from improperly installed or maintained furnaces or damaged or blocked vents.

The voluntary standards for gas furnaces, issued by the American National Standards Institute (ANSI), include the following:

1. ANSI Z21.47—1973 Gas-Fired Gravity and Forced Air Central Furnaces, plus addenda.
2. ANSI Z21.48—1973 Gas-Fired Gravity and Fan Type Floor Furnaces, plus addenda.
3. ANSI Z21.49—1975 Gas-Fired Gravity and Fan Type Vented Wall Furnaces.
4. ANSI Z21.44—1973 Gas-Fired Gravity and Fan Type Direct Vent Wall Furnaces, plus addenda.

New gas furnaces are accompanied by maintenance instructions which state that qualified persons should inspect and service the equipment periodically, preferably once a year at the start of the heating season. The applicable American National Standards require each furnace to be supplied with instructions for its proper installation and safe operation. These instructions are also required to state that the furnace is to be installed in accordance with local building codes or, in the absence of local codes, the American National Standard for Installation of Gas Appliances and Gas Piping, Z21.30-1964 (redesignated as part of the National Fuel Gas Code, ANSI Z223.1-1974). From the information available to the Commission, it appears that the vast majority of furnaces are now provided with appropriate instructions and are installed in accordance with their installation instructions. A study funded by the Commission, Calspan Investigations on Flame-Fired Appliances, did not suggest a need for improved furnace installation instructions.

Additional features in the voluntary standards that also help to reduce the possibility of carbon monoxide poisoning include the following: (1) combustion controls, (2) safety interlocks, (3) cyclic testing of heat exchangers to minimize cracking, (4) use of corrosion resistant materials in areas susceptible to corrosion, and (5) CO limits for tests under normal and abnormal conditions. The Commission has information that the voluntary standards are universally complied with by domestic gas furnace manufacturers.

Because the petitioner, in earlier correspondence with the Commission, had expressed special concern about CO build-up as a result of heat exchanger failure, CPSC sponsored a study of the high incidence of furnace heat exchanger failures in Elkgrove Village, Illinois, by Polytechnic, Inc. (a private research organization). The study indicates that this problem was primarily caused by factors relating to the installation of the furnace rather than by the furnace design. It should be noted, however, that furnace heat exchanger failures seldom result in carbon monoxide problems, because the combustion chamber is generally surrounded by the air that is being heated in the plenum and that is at a higher static pressure than the interior of the combustion chamber. Therefore, any leakage due to a crack or split in the heat exchanger would usually be into the combustion chamber rather than into the air which will be supplied to the residence. A Commission-sponsored study by Unified Industries Inc., dated April 30, 1976, of air samples in homes with known leaks in the heat exchanger found that the CO levels in these homes did not exceed the CO level in the air outside the home. The Commission is aware of four incidents involving suspected CO poisoning from cracked heat exchangers. In two of these, blood tests failed to disclose the presence of CO. In the other two (a telephone complaint and an emergency room visit), the results of blood tests, if any, are not available.

From the Commission's analysis of the information available to it, it appears that while the consequences of exposure to high levels of CO from gas furnaces are severe and occur with a frequency that is not negligible, the principal causes of dangerously high concentrations of CO from gas furnaces do not appear to be correctable through the issuance of a mandatory safety standard.

Since there are many ways in which dangerously high concentrations of CO in residences can come about, the ultimate solution would appear to be, along the lines suggested in the petition, the use of CO detectors (with or without automatic furnace cut-off devices) in residences. However, the Commission believes that a mandatory requirement for such detectors is not practicable or economically feasible at this time. The Commission is aware of no device which could perform this function satisfactorily for an extended period of time without frequent recalibration by trained specialists. Also, equipment with the required degree of sensitivity that might be incorporated into such a device now sells for fifteen hundred to two thousand dollars.

While acknowledging the substantial contribution that the development of a reliable, low cost CO detector could make to consumer safety, the Commission must note that it has neither the statutory nor the resources to undertake the development of such a product. The Commission observes that the development of inexpensive fire and smoke detectors by private industry has disclosed a large, and apparently profitable, market for them. The availability of smoke detectors has even encouraged many municipalities to require their installation in residences. The Commission believes that a similarly attractive market may exist for an inexpensive, reliable CO detector and hope that industry will undertake research and development leading to a commercially viable device.

After careful consideration, the Commission has decided to deny this petition because, based on the information available at this time, the Commission believes (1) that the principal causes of dangerously high concentrations of CO from gas furnaces are not correctable by the issuance of a mandatory standard and (2) the suggested requirement for the mandatory use of a CO detector in conjunction with gas furnaces appears to be premature since reliable, low cost CO detectors are not available at this time.

Copies of the petition and other relevant materials may be seen in or obtained from the Office of the Secretary, Consumer Product Safety Commission, Washington, D.C. 20207, during working hours Monday through Friday.

Dated: January 21, 1977.

SADYE E. DUNN,
Secretary, Consumer Product Safety Commission.

ENVIRONMENTAL PROTECTION AGENCY

[FRL 675-4]

AIR PROGRAMS—STANDARDS OF PERFORMANCE FOR NEW STATIONARY SOURCES

Receipt of Application and Approval of Alternative Performance Test Method

On January 26, 1976 (41 FR 3826), the Environmental Protection Agency (EPA) promulgated standards of performance

for new primary aluminum reduction plants under 40 CFR Part 60. The standards limit air emissions of gaseous and particulate fluorides from new and modified primary aluminum reduction plants. The owners or operators of affected facilities are required to determine compliance with these standards by conducting a performance test as specified in Appendix A—Reference Methods, Method 13A or 13B, "Determination of Total Fluoride Emissions from Stationary Sources" published in the FEDERAL REGISTER August 6, 1975 (40 FR 33157). As provided in 40 CFR 60.8(b), (2) and (3), the Administrator may approve the use of an equivalent test method or may approve the use of an alternative method if the method has been shown to be adequate for the determination of compliance with the standard. Method 13A specified that total fluorides be determined by the SPADNS Zirconium Lake colormetric method, and Method 13B specified that this determination be made by the specific ion electrode method.

On September 3, 1976, EPA received written application for approval of equivalency for a third analytical technique from Kaiser Aluminum and Chemical Corporation, Oakland, California. Specifically, the application requested approval of ASTM Method D 3270-73T, "Tentative Method of Analysis for Fluoride Content of the Atmosphere and Plant Tissues," 1974 Annual Book of ASTM Standards—Part 26.

Specific guidelines for the determination of method equivalency have not been established by EPA. However, EPA has completed a technical review of the application and has determined that the ASTM method will produce results adequate for the determination of compliance with the standards of performance for new primary aluminum plants. Therefore, EPA approves the ASTM method as an alternative to the analytical procedures specified in paragraph 7.3 "Analysis" of Method 13A or 13B for aluminum plants, pursuant to 40 CFR 60.8(b)(3).

Dated: January 18, 1977.

ROGER STRELOW,
Assistant Administrator
for Air and Waste Management.

[FRL 675-3]

DIAGNOSTIC X RAYS

Radiation Protection Guidance; Invitation for Comment

Notice is hereby given that pursuant to its responsibility to recommend guidance for Federal agencies regarding radiation matters (42 U.S.C. 2021h), the Environmental Protection Agency is considering recommendations for the guidance of Federal agencies in the conduct of radiation protection for uses of x rays for diagnostic purposes in the healing arts. Public participation is invited in the development of these recommendations prior to their transmittal to the President for approval as guidance for Federal agencies. The Agency has been assisted in developing these proposed recommendations by an Interagency Working Group on Medical Radiation which was formed on July 5, 1974. The Interagency Working Group delivered its final report in October 1976, based on information developed in two background reports previously made available for public comment (41 FR 10705 and 27998) and reflects comments received on these reports. The recommendations listed below also reflect further comments received from Federal agencies on the Agency's draft recommendations based upon this final report.

This action is based on Executive Order 10831 (Public Law 86-373, and the President's Reorganization Plan No. 3 of 1970, which defined functions transferred to the Environmental Protection Agency. Under this authority, "The Administrator shall advise the President with respect to radiation matters, directly or indirectly affecting health, including guidance for all Federal agencies in the formulation of radiation standards and in the establishment and execution of programs of cooperation with States." In carrying out this responsibility, it is recognized that both the Environmental Protection Agency and the Department of Health, Education, and Welfare (DHEW) have statutory responsibilities which impact upon radiation protection in areas which involve the use of radiation in the healing arts. In particular, DHEW has the major responsibility for national health care policy, including areas in the practice of medicine which involve radiation exposure. For this reason, it is important that the two agencies work together closely so that in the development of radiation guidance, health care impact is properly considered. To this end, the two agencies have recently undertaken to develop a formal working relationship which is expressed in a Memorandum of Understanding now in the final stages of approval. This memorandum will be published in the FEDERAL REGISTER.

BACKGROUND

In developing the recommendations under consideration, the Agency has reviewed information on the use of x rays in medicine, has considered potential controls that could be applied without compromising benefits, and has consulted with scientists and professionals within and outside the government. In this regard, the Agency has completed the contract effort begun by the National Academy of Sciences—National Research Council for the former Federal Radiation Council to examine and report on new knowledge on radiation effects and sources of population exposure. The report of the NAS Committee on Biological Effects of Ionizing Radiation (BEIR) was issued in 1972. One of its principal findings was that "• • • medical diagnostic radiology accounts for at least 90% of the total man-made radiation dose to which the U.S. population is exposed." More importantly, the Committee also concluded "• • • that it appears reasonable that as much as a 50% reduction in the genetically significant dose from medical radiology might be possible through improved technical and educational methods."

It is recognized by medical practitioners, medical physicists, and other scientists concerned with radiation protection that exposure due to medical uses of ionizing radiation represents a significant and growing source of exposure for the U.S. population and is also one that can be reduced by good practice. The National Council on Radiation Protection and Measurements has concluded that whereas "there can be no rational means to • • • limit radiation exposure prescribed for patients for necessary and proper diagnostic or therapeutic purposes • • • steps can be taken to minimize unnecessary or medically unproductive radiation exposure. Advantage should be taken of any new technology or procedure that will significantly reduce unnecessary diagnostic or medical exposure, both in individual examinations and treatments, and in the adoption of group screening practices."

The Interagency Working Group on Medical Radiation determined that it is desirable and possible in Federal facilities to reduce exposure from the diagnostic use of x rays by: (1) eliminating clinically unproductive examinations, (2) assuring the use of optimal technic when examinations are performed, and (3) requiring appropriate equipment to be used. As a result of this consensus a Subcommittee on Prescription of Exposure to x rays was established to examine factors to eliminate clinically unproductive examinations. Another Subcommittee on Technic of Exposure Prevention was formed to examine the second and to some extent the third subject areas. The third area is being regulated by the U.S. Food and Drug Administration which issued x-ray equipment performance standards effective August 1, 1974. The reports of these Subcommittees were made available for comment (41 FR 10705 and 27998) prior to making final the Interagency Working Group report. Comments from interested parties have been considered prior to making these recommendations for guidance to Federal agencies.

Without question the use of x rays in the healing arts provides large benefits to society through improved health care; thus, in developing guidance for uses of diagnostic x rays, the Agency has been careful to assure that the necessary benefits to patients from the use of medical and dental x rays are derived. In this regard, the Agency has consulted with the Department of Health, Education, and Welfare, which is the lead Federal agency for health care policy, and medical personnel in both the Federal and private sectors.

DISCUSSION

The most important factor in reducing radiation exposure is to eliminate the prescription of clinically unproductive examinations. Appropriate prescription of x-ray examinations involves two major considerations: (1) the clinical decision to order a particular examination, and (2) the minimization of the number of radiographic views required in an examination. In particular, attention should be given to qualifications of those who order examinations, the elimination of unproductive screening programs, and appropriate clinic procedures to assure that unproductive views are eliminated during the performance of the examination.

Although the largest savings in radiation exposure may be to preclude the prescription of an unproductive x-ray examination, patient exposure can also be reduced by assuring that the examination is performed with good technic. The fundamental objective in performing an x-ray examination is to obtain optimum diagnostic information with minimum patient exposure. Achievement of this objective requires: (1) Assurance that equipment is calibrated and properly functioning, (2) operation of equipment is only by competent personnel, (3) the patient is appropriately prepared, and (4) technic factors which will minimize exposure are selected.

It has been demonstrated that the same technic factors used with different x-ray generators may produce widely varying patient exposures. Thus, the performance of x-ray equipment utilized for diagnostic x-ray procedures is an important factor in limiting patient and operator exposure. The Federal Diagnostic X-ray Equipment Performance Standard (21 CFR Subchapter J) requires that x-ray equipment manufactured after August 1, 1974, be certified by manufacturers to comply with radiation safety requirements issued by the U.S. Department of Health, Education, and Welfare pursuant to the Radiation Control for Health and Safety Act of 1968 (PL 90-602). All Federal health care facilities which perform diagnostic x-ray examinations, should, as soon as practicable before the effective date, utilize medical and dental x-ray equipment that conforms to the requirements of 21 CFR Subchapter J.

RECOMMENDATIONS FOR FEDERAL GUIDANCE

In view of the discussions presented above, the Agency invites comments on the following recommendations which are under consideration as guidance for Federal agencies for reduction of unnecessary radiation exposure due to use of diagnostic x-rays in the healing arts:

1. General radiographic or fluoroscopic examinations should be prescribed only by licensable Doctors of Medicine or Osteopathy; specialized studies should be prescribed only by those physicians with advanced training in the particular specialty. Exception for certain limited procedures may be made for dentists and podiatrists or properly-trained physician assistants, nurse practitioners, and physicians in postgraduate training status.

2. Prescription of an x-ray study should be for the purpose of obtaining diagnostic information, be based on clinical evaluation of the patient, and should state the diagnostic objective and detail relevant medical history.

3. Routine or screening examinations in which no prior clinical evaluation of the patient is made should not be performed; except may be made for identifiable groups on the basis of careful consideration of diagnostic yield, radiation risk, and economic and social factors. In implementation of this recommendation, the Agency recommends that Federal agencies adopt the recommendation by the Interagency Working Group on Medical Radiation that the following examinations should not be routinely performed:

(a) Chest and lower back x-ray examinations in routine physical examinations or as a Federal requirement for employment,

(b) Tuberculosis screening by chest radiography,

(c) Chest x-rays for hospital admission of patients under the age of 40 unless a clinical indication of chest disease exists,

(d) Chest radiography in routine prenatal care,

(e) Mammography examinations for women of an age[1] for which screening has been determined to be nonefficacious and who also do not exhibit symptoms or have a strong family history of breast cancer.

4. Prescription of x-ray examinations of pregnant or possibly pregnant patients should assure that medical consideration has been given to possible fetal exposure and appropriate protective measures are applied.

5. The number, sequence, and types of standard views for an examination should be clinically-oriented and kept to a minimum. Diagnosticians should closely monitor the performance of x-ray examinations and, where practicable, direct examinations to obtain the diagnostic objectives stated by clinicians, through appropriate addition, substitution, or deletion of prescribed views. Technic protocols for performing medical and dental x-ray examinations should detail the operational procedures for all standard radiographic projections, patient preparation requirements, use of technic charts, and image receptor specifications.

6. X-ray equipment used in Federal programs should meet, where practicable, the Federal performance standards (21 CFR Subchapter J) sooner than required or, in the interim, Part F of the "Suggested State Regulations for Control of Radiation." General purpose fluoroscopy units should provide image-intensification; fluoroscopy units for non-radiology specialty use should, when practicable, have electronic image-holding features. Photofluorographic x-ray equipment should not be used for chest radiography.

7. X-ray facilities should have quality assurance programs designed to produce radiographs that satisfy diagnostic requirements with minimal patient exposure; such programs should contain materials and equipment specifications, equipment calibration and preventive maintenance requirements, quality control of image processing, and operational procedures to reduce retake and duplicate examinations.

8. Operation of medical or dental x-ray equipment should be by individuals who have demonstrated proficiency to produce diagnostic quality radiographs with the minimum of exposure required; these individuals should be qualified by didactic training and practical experience identical to, equivalent to, or greater than those programs approved by recognized medical and dental organizations. In implementation of this recommendation, the Agency recommends that Federal agencies adopt the recommendation by the Interagency Working Group on Medical Radiation that such programs be identical to or equivalent to those approved by the Council on Medical Education of the American Medical Association or the American Registry of Clinical Radiography Technologists for medical x-ray equipment operators, or for dental equipment operators, the guidelines of the Oral Radiology Section of the American Association of Dental Schools.

9. Proper collimation should be used to restrict the x-ray beam as much as practicable to the clinical area of interest and within the dimensions of the image receptor; shielding should be used to further limit the exposure of the fetus and the gonads (as detailed in 21 CFR Subchapter J) when such exclusion does not interfere with the examination being conducted.

10. Technic appropriate to the equipment and materials available should be used to maintain exposures as low as is reasonably achievable without loss of requisite diagnostic information; Entrance Skin Exposure Guides for nonspecialty examinations should be established for this purpose and measures should be undertaken to evaluate and reduce, where practicable, exposures which exceed such established guides. In implementation of this recommendation, the Agency recommends that Federal agencies adopt the following Entrance Skin Exposure Guides developed by the Interagency Working Group on Medical Radiation:

Examination (projection):	*ESEG (milliroentgens)*[1]
Chest (P/A)	30
Skull (lateral)	300
Abdomen (A/P)	750
Cervical spine (A/P)	250
Thoracic spine (A/P)	900
Full spine (A/P)	300
Lumbo-sacral spine (A/P)	1000
Retrograde pyelogram (A/P)	900
Feet (D/P)	270
Dental (bitewing or periapical)	700

[1] Entrance skin exposure determined by the NEXT program for a patient having the following body part/thickness: head/15 cm, neck/13 cm, thorax/23 cm, abdomen/23 cm, and foot/8 cm.

11. Dental x-ray examinations should be prescribed only by licensable Doctors of Dental Surgery or Dental Medicine or properly supervised postgraduate den-

[1] The Department of Health, Education, and Welfare issued interim findings on August 16, 1976, that asymptomatic women under the age of 50 should not receive mammography as a part of periodic screening for breast cancer; the optimal age range for which mammography screening of asymptomatic women is justified is being reviewed by the Department and should be followed by Federal agencies when issued.

tists on the basis of clinical evaluation or pertinent history; neither a full-mouth series nor bitewing radiographs should be part of routine preventive dental care except for certain forensic purposes.

12. Intra-oral radiography should be performed with long open-ended, shielded, cylindrical position indicating devices and with technic to restrict the x-ray beam as near the size of the image receptor as practicable.

It is expected that each Federal agency will use these recommendations as a basis upon which to develop detailed standards tailored to meet its particular requirements. In developing these proposed recommendations, however, the Agency and the Interagency Working Group on Medical Radiation were aware that information in several specific areas is continually changing. In order that such information as well as recommendations and guidelines isued by various Federal and professional bodies can be appropriately reflected in guidance to Federal agencies, the Agency recognizes a need to review such information, recommendations, and guidelines from time to time in order to provide specific guidance that may be required for appropriate interpretation of these recommendations. The Agency, in cooperation with the Federal agencies, will follow the implementation of these recommendations, will promote the necessary coordination to achieve an effective Federal program, and will initiate procedures to periodically interpret and expand upon each of the recommendations as required to provide new and changing information for use by Federal agencies in their implementation of the recommendations.

ADDRESS

Comments on the foregoing recommendations should be sent by March 1, 1977, to the Director, Criteria and Standards Division (AW-460), Office of Radiation Programs, U.S. Environmental Protection Agency, 401 M Street, S.W., Washington, D.C. 20460. Single copies of the report of the Interagency Working Group on Medical Radiation entitled "Radiation Protection Guidance for Diagnostic X Rays" are also available and may also be requested at this same address.

Dated: January 18, 1977.

RUSSELL E. TRAIN,
Administrator.

FEDERAL ENERGY ADMINISTRATION

ELECTRIC UTILITIES ADVISORY COMMITTEE

Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (Public Law 92-463, 86 Stat 770), notice is hereby given that the Electric Utilities Advisory Committee will meet Friday, February 18, 1977, at 9 a.m., Room 5041B, FEA Headquarters, 12th & Pennsylvania Avenue, NW., Washington, D.C.

The Committee was established to advise the Administrator, FEA with respect to general electric utilities' aspects of interests and problems related to the policy and implementation of programs to meet the current and continuing national energy shortage.

The agenda for the meeting is as follows:

1. Review of Federal Study Evaluating the Regional Supply and Demand Projections and the Prospect of Shortfalls (ERDA and FEA).
2. Status Report of FEA's Contract Study of State Load-Growth Forecasting.
3. Status Report and Discussion of the Electricity Rate-Reform Study Mandated by Title II of the Energy Conservation and Policy Act of 1976.
4. Remarks from the Floor (10 Minute Rule).

The meeting is open to the public. The Chairman of the Committee is empowered to conduct the meeting in a fashion that will, in his judgment, facilitate the orderly conduct of business. Any member of the public who wishes to file a written statement with the Committee will be permitted to do so, either before or after the meeting. Members of the public who wish to make oral statements should inform Lois G. Weeks, Director, Advisory Committee Management, (202) 566-7022 at least 5 days before the meeting and reasonable provision will be made for their appearance on the agenda.

Further information concerning this meeting may be obtained from the Advisory Committee Management Office.

Minutes of the meeting will be made available for public inspection and copying in the FEA Freedom of Information Office, Room 2107, FEA Headquarters, 12th and Pennsylvania Avenue, N.W., Washington, D.C.

Issued at Washington, D.C. on January 21, 1977.

DAVID G. WILSON,
Acting General Counsel.

[FR Doc 77-2369 Filed 1-21-77;4:24 pm]

ISSUANCE OF DECISIONS AND ORDERS BY OFFICE OF EXCEPTIONS AND APPEALS

Week of November 8 Through November 12, 1976

Notice is hereby given that during the week of November 8 through November 12, 1976, the Decisions and Orders summarized below were issued with respect to Appeals and Applications for Exception or other relief filed with the Office of Exceptions and Appeals of the Federal Energy Administration. The following summary also contains a list of submissions which were dismissed by the Office of Exceptions and Appeals and the basis for the dismissal.

APPEALS

Laketon Asphalt Refining, Inc.; Evansville, Ind.; FEA-0943; Crude Oil

Laketon Asphalt Refining, Inc. (Laketon) filed an Appeal from a Decision and Order which the FEA issued to the firm on August 13, 1976. *Laketon Asphalt Ref., Inc.*, 4 FEA Par. 83,043 (August 13, 1976). The Appeal, if granted, would retroactively relieve Laketon of its obligation to purchase entitlements for the months of April and May 1976. In considering Laketon's Appeal, the FEA determined that despite ample notification by the FEA in the Federal Register of a filing deadline of May 3, 1976, the firm had failed to file an Application for Exception from the Entitlements Program until June 2, 1976. The FEA therefore concluded that there was no reasonable basis upon which Laketon could have believed that it could submit an application beyond the May 3, 1976 deadline and still qualify for exception relief for April and May 1976. The FEA also concluded that Laketon had failed to demonstrate that it would experience a severe and irreparable hardship in the absence of retroactive exception relief. Accordingly, the firm's Appeal was denied.

Peoples Gas Company; Chicago, Ill.; FEA-0900; Naphtha

The Peoples Gas Company (Peoples) appealed from a Decision and Order in which the FEA denied an Application for Exception which the firm had previously submitted from the provisions of 10 CFR, Part 214 (the Canadian Crude Oil Allocation Program). *People's Gas Co.*, 3 FEA Par. 83,215 (June 11, 1976), People's Appeal, if granted, would result in the issuance of an order permitting the firm to purchase 3,000 barrels per day of Kaybob type condensate produced in Canada for use in a synthetic natural gas (SNG) plant which it operates. In considering Peoples' Appeal, the FEA found that contrary to the firm's claim that the Kaybob condensate was essential to enable it to meet the needs of its customers, the amounts of natural gas and SNG available to Peoples are adequate to satisfy its present supply obligations. The FEA also determined that Peoples had not made a convincing showing that it was likely to experience supply difficulties in the foreseeable future which would warrant approval of the exception relief which it requested. Finally, the FEA found that Peoples could replace the Kaybob condensate feedstock which it had previously been able to purchase from Canada with additional quantities of naphtha which it could obtain from its present supplier. It therefore appeared that Peoples' would be able to operate its SNG plant at full capacity without exception relief and the firm's Appeal was accordingly denied.

Quincy Oil, Inc., Boston, Mass.; FEA-0854; No. 6 Fuel Oil

Quincy Oil, Inc. (Quincy) filed an Appeal from a Decision and Order which was issued to it by the FEA on May 7, 1976. *Quincy Oil, Inc.*, 3 FEA Par. 83,180 (May 7, 1976). In that Order, the FEA denied an exception application in which Quincy requested that it be permitted to charge the Taunton Municipal Lighting Plant prices for No. 6 fuel oil for the period prior to June 1, 1976 which were in excess of the maximum permissible levels specified in 10 CFR 212.93. Quincy's Appeal, if granted, would result in the approval of the exception relief which it originally requested. In considering Quincy's Appeal, the FEA found that in the May 7, 1976 Decision the FEA properly evaluated Quincy's request for prospective exception relief by considering only the effect of the FEA Regulations on the firm's operations for the period subsequent to May 7, 1976, the date of issuance of the Decision to Quincy. With respect to the period of time prior to that date, the FEA found that the criteria regarding applications requsting retroactive exception relief were correctly applied. Since the financial data which Quincy provided did not indicate that the firm would incur any hardship or inequity during the last 24 days of May if prospective exception relief were not provided for that period, the FEA concluded the firm's request for prospective exception relief had been properly denied. The FEA also concluded that the May 7 Decision was correct in determining that the income which Quincy realized prior to its payment of interest and rent to its parent company more accurately reflected Quincy's actual operating posture for the purpose of the exceptions process. Finally, the FEA found that Quincy failed to demonstrate that the firm would incur a severe, irreparable injury in the absence of retroactive exception relief. In view of these findings the Quincy Appeal was denied.

Standard Oil Company of California; San Francisco, Calif.; FEA-0890; Gasco Gasoline, Inc.; Los Angeles, Calif.; FEA-0891; Terrible Herbst, Inc.; Las Vegas, Nev.; FEA-0892; Ashland Oil Company of California; San Francisco Calif.; FEA-0897; Motor Gasoline

Standard Oil Company of California (SOCAL), Gasco Gasoline, Inc. (Gasco), Terrible Herbst, Inc. (Herbst), and Ashland Oil Company of California (Ashland) appealed from a Decision and Order issued by the FEA on June 10, 1976, which granted exception relief to Ashland. In the June 10 Order, the Regional Administrator for FEA Region IX was directed to assign a new, lower-priced supplier of motor gasoline to Ashland to replace its base period supplier of motor gasoline for the months of April, May and June 1976. *Ashland Oil Co.*, 3 FEA Par. 83,173 (June 10, 1976).

The exception relief which was granted to Ashland was designed to alleviate a serious financial hardship which the firm was experiencing as a result of its high cost of motor gasoline during the months of April through June 1976. After the Regional Administrator assigned SOCAL to supply motor gasoline to Ashland for this three month period, SOCAL filed its Appeal. Gasco and Herbst purchased motor gasoline from Ashland during the base period. Gasco, Herbst and Ashland contended in their respective Appeals that additional exception relief should have been granted in the June 10 Decision and Order. Since the factual background and legal issues raised in the appeals were similar, the four Appeals were consolidated. In analyzing the arguments presented in the Appeals the FEA determined that there was no merit to the contention that undue administrative delay had preceded the issuance of the June 10 Decision. The FEA found that this issue had been fully considered in the prior proceeding and that Ashland, Gasco and Herbst had advanced no new arguments in their Appeals which would alter the conclusion reached in the prior determination. The FEA also found that the only basis for SOCAL's allegation that Ashland was no longer experiencing high product costs was a report in a trade publication which did not indicate that Ashland's cost of motor gasoline had declined to competitive levels. Moreover, price survey data for motor gasoline in the area in which Ashland markets that product showed that Ashland's selling prices were actually above the average of the prices of its competition. Accordingly, the FEA concluded that SOCAL's contention that Ashland's retail price for motor gasoline had declined to a level point below that of its competitors prices had no merit. Finally, the FEA stated that even if the factual circumstances involving Ashland had changed significantly subsequent to the issuance of the initial exception determination, that factor would not necessarily lead to the conclusion that the prior exception relief should be modified. The FEA noted that the prior relief was designed to alleviate a serious hardship which Ashland had been incurring during a period of time which had already transpired prior to the issuance of the June 10 Decision. The four Appeals were therefore denied.

Sundance Oil Company; Denver, Colo.; FEA-0959; Crude Oil

Sundance Oil Company (Sundance) appealed from a Decision and Order in which the FEA denied an Application for Exception which Sundance submitted from the provisions of 10 CFR, Part 212, Subpart D. *Sundance Oil Co.*, 4 FEA Par. 80,038 (August 6, 1976). The Appeal, if granted, would have resulted in a rescission of the previous Order and the issuance of a further order permitting Sundance to sell at market price levels the crude oil which it produced from the Weigand Lease prior to February 1, 1976. Since the Sundance submission did not even purport to establish that the firm was experiencing a serious hardship or gross inequity as a result of the provisions of Subpart D, the FEA concluded that Sundance had failed to demonstrate that the August 6 Order was erroneous in fact or law. Accordingly the Appeal was denied.

Texaco, Inc.; New York, N.Y. FEA-0995, Motor Gasoline

Texaco, Inc. (Texaco) appealed from a Decision and Order which the FEA issued to Jones and Murtha Distributing Co., Inc. (J&M) on August 31, 1976. *Jones and Murtha Distributing Co., Inc.* 4 FEA Par. 80,076 (August 31, 1976). In the August 31, 1976 Decision the FEA granted J&M an exception to the provisions of 10 CFR 211.9 on the grounds that adherence to its based period supplier/purchaser relationship with The Oil Shale Corporation resulted in a serious hardship to the firm. Based upon that determination, the Regional Administrator of FEA Region X was directed to assign J&M a new supplier for all of J&M's base period use of motor gasoline during the months of September, October and November 1976. Texaco's appeal, if granted, would result in the issuance of an order vacating or modifying the previous decision so that Texaco would not be assigned to supply any portion of J&M's base period use of motor gasoline. In considering the Appeal, the FEA observed that the Regional Administrator for Region X has not yet taken any action pursuant to the provisions of the August 31 Decision. The FEA therefore concluded that Texaco had not been aggrieved by the August 31 Decision and the appeal was accordingly denied.

Varibus Corporation, Gulf States Utilities Company; Beaumont, Tex.; FEA-0776; Fuel Oil

Varibus Corporation (Varibus) and Gulf States Utilities Company (Gulf States) filed a joint Appeal from a Decision and Order which the Federal Energy Administration had issued to Varibus, *Varibus Corp.*, 3 FEA Par. 83,092 (January 30, 1976). In the Decision which it issued, the FEA denied an Application for Exception from the provisions of 10 CFR 212.93 which Varibus had filed concerning its sales of fuel oil to Gulf States. If that exception request had been granted, Varibus, a wholly-owned subsidiary of Gulf States, would have been retroactively relieved of the requirement that the prices which it charged Gulf States for fuel oil sold during the period October 1973 through November 1974 be established in accordance with the Mandatory Petroleum Price Regulations. The Appeal, if granted, would have eliminated or reduced the amount of any possible liability for refunds which Varibus would incur as a result of a compliance action which has been initiated by FEA Region VI. In considering the Appeal, the FEA noted that Gulf States had financed the fuel procurement activities of its subsidiary through direct cash advances to Varibus in the form of interest-bearing loans. Under the terms of two agreements entered into between the firms, Varibus was required to charge Gulf States a price for the fuel oil sold which was equivalent to Varibus' actual cost plus actual overhead including the interest which Varibus remitted to Gulf States. After reviewing the detailed nonproduct cost data which the appellants had submitted, the FEA determined that with the exception of the costs claimed for the interest which Varibus paid to Gulf States, the expenses which Varibus incurred in connection with the fuel procurement activities which it performed on behalf of Gulf States were reasonable and necessary. However, the FEA also concluded that the interest expense which Varibus included in the price of the fuel oil sold to Gulf States did not constitute a legitimate nonproduct cost under the FEA reseller regulations. The FEA observed that Gulf States in turn apparently included this interest in the rates which it charged to its electricity customers through fuel adjustment clauses by reflecting it as a component of the cost of the fuel which was used to generate electricity. At the same time however Gulf States also received the same amount in the form of interest payments from Varibus. In view of the fact that Varibus is a wholly-owned subsidiary of Gulf States, the FEA determined that the net result of these transactions was to effectively reduce the cost to Gulf States of the fuel oil obtained through its subsidiary by the amount of the interest paid to Gulf States by Varibus. The FEA therefore concluded that any failure of Varibus to recover the interest expense as a result of the application of the FEA price regulations to the Gulf States transactions did not constitute a serious hardship or a gross inequity or a showing that the January 30, 1976 Decision was erroneous. The Appeal was accordingly denied.

REQUESTS FOR EXCEPTION

Class Exception—Retroactive Application of Subpart K; FEX-0033; Natural Gas Liquids and Natural Gas Liquid Products

On June 17, 1976, the Federal Energy Administration published a Notice in the Federal Register which stated that the agency was considering the issuance of a Supplemental Order to the Class Exception issued by the Office of Exceptions and Appeals of the FEA on August 29, 1975. *Class Exception—Retroactive Application of Subpart K*, 2 FEA Par. 84,901 (August 29, 1975). See also 41 FR 24609 (June 17, 1976). In the August 29, 1975 Class Exception Decision, the FEA noted that, prior to the January 1, 1975 effective date of 10 CFR, Part 212, Subpart K, the FEA regulations applicable to the pricing of natural gas liquids and natural gas liquid products were set forth in Subpart E of the general price regulations applicable to all "refiners." One of the objectives of the August 29 Class Exception was to eliminate certain inequities which were found to have resulted from the application of Subpart E to the pricing of natural gas liquids and natural gas liquid products prior to the adoption by the FEA of Subpart K. In the June 17, 1976 Notice, the FEA stated that it was considering modifying the August 29 Class Exception determination so as to exclude from the scope of the relief approved those firms which are subject to the jurisdiction of the Federal Power Commission or an equivalent regulatory body. The FEA noted that, in exercising jurisdiction over such firms, those regulatory commissions appear to have taken into account the revenues realized by fully regulated firms from their sales of natural gas liquids and natural gas liquid products in determining the overall revenues necessary to permit

the firms to obtain a specified rate of return. In order to facilitate a full examination of the complex issues involved in the proceeding, the FEA requested any interested parties to submit comments with respect to the proposed Supplemental Order. The FEA also held a public hearing at which oral testimony on the matter was received. After considering the evidence submitted in this proceeding, the FEA concluded that the issuance of the proposed Supplemental Order was not warranted. The FEA found that the price levels charged by the fully regulated firms on May 15, 1973 for natural gas liquids and natural gas liquid products were not distinguishable from the price levels charged on that date by all other members of the class to which exception relief was granted in the August 29 Class Exception. Furthermore, the FEA determined that, in considering natural gas rate-making applications submitted by the fully regulated firms involved in this proceeding, the Federal Power Commission and equivalent regulatory bodies have given and continue to give full weight and consideration to the total revenues received by those firms in their sales to natural gas liquids and natural gas liquid products, including any funds realized as a result of the August 29 Class Exception. Since firms which are fully regulated by the Federal Power Commission or an equivalent regulatory body appear to have been as adversely affected by the application of the provisions of Subpart E of the FEA Regulations to their natural gas processing operations prior to January 1, 1975, as all other firms to which exception relief was provided in the August 29 Class Exception, and since the fully regulated firms cannot derive an undue advantage through the relief provided in that Order, the FEA concluded that any further action with respect to this matter is unnecessary and unwarranted. The FEA therefore dismissed the proposed Supplemental Order proceeding.

Sanford P. Fagadau; Dallas, Tex.; FEE-3164; FEE-3165; Natural Gas Liquids

Sanford P. Fagadau (Fagadau) filed Applications for Exception from the provisions of 10 CFR 212.165 which, if granted, would permit Fagadau to increase the selling prices for the natural gas liquids produced at his Bluegrove and Maryetta natural gas processing plants to reflect the non-product cost increases which he actually incurred and which were in excess of the $0.00375 per gallon passthrough for natural gas liquids permitted under Section 212.165. In considering the applications, the FEA noted that as a general rule exception relief will be granted to any natural gas processor which can demonstrate that the non-product costs which it has experienced since May 1973 have increased substantially in excess of the $0.005 per gallon passthrough for natural gas liquid products and the $0.00375 per gallon passthrough for natural gas liquids permitted under Section 212.165. The FEA found that Fagadau had made such a showing with respect to his Bluegrove and Maryetta gas plants and therefore granted Fagadau appropriate exception relief for those plants.

GO-tane Service Stations, Inc.; Forest Park, Ill.; FEE-2968; Motor Gasoline

GO-tane Service Stations, Inc. (GO-tane) filed an Application for Exception from the provisions of 10 CFR 211.9 which, if granted, would have resulted in the issuance of orders assigning GO-tane new, lower-priced suppliers for a portion of the firm's total base period use of gasoline to replace the Clark Oil and Refining Corporation (Clark) and the Martin Oil Service Company (Martin). GO-tane specifically requested that the Skelly Oil Company (Skelly), which is also one of the firm's base period suppliers, be assigned to partially replace Clark and Martin and to supply additional quantities of motor gasoline directly to 14 retail sales outlets which GO-tane purchased from Skelly in September 1972. In considering the application, the FEA determined that contrary to GO-tane's allegations, the price which GO.tane would pay its base period suppliers for motor gasoline is only marginally higher than the average of the prices which the firm's competitors are required to pay to their suppliers. The FEA also found that GO-tane is able to offset the marginally higher price of the gasoline received from Clark and Martin with purchases of lower-priced gasoline from other suppliers. As a result, the weighted average price which GO-tane pays for its motor gasoline supplies is not significantly different from the prices which the firm's competitors pay to their suppliers for motor gasoline. The FEA therefore concluded that GO-tane had failed to establish that the maintenance of its base period supplier/purchaser relationship with Clark and Martin resulted in a serious hardship or gross inequity to GO-tane and the firm's exception application was denied in the form submitted. However, the FEA also found that under the current FEA regulations which become effective June 1, 1974, GO-tane is apparently entitled to receive significantly more motor gasoline from Skelly than the amount established by a May 9, 1974 Adjustment Order which was issued by FEA Region V. Under the current FEA regulations, GO-tane's allocation entitlement for each of the 14 outlets which the firm purchased from Skelly in 1972 should be based on the quantity of motor gasoline which Skelly provided to the outlets in 1972, rather than the quantity in inventory at each of the stations at the time of the acquisition. The FEA therefore permited GO-tane 60 days from the issuance of the Order in which to take any necessary steps to determine the base period volume which it is entitled to receive for each of its retail sales outlets and assert its right to receive those quantities of petroleum products from suppliers pursuant to the FEA Mandatory Petroleum Allocation Regulations.

Louisiana Land and Exploration Co.; New Orleans, La.; Fee-2845; Crude Oil

The Louisiana Land and Exploration Company (LL&E) filed an Application for Exception from the provisions of 10 CFR 211.63 which, if granted, would extend the exception relief which the FEA had approved in three previous Decisions and Orders. *Louisiana Land and Exploration Co.*, 2 FEA Par. 83,339 (October 22, 1975); *Louisiana Land and Exploration Co.*, 3 FEA Par. 80,586 (February 26, 1976); and *Louisiana Land and Exploration Co.*, 4 FEA Par. 87,003 (July 23, 1976). In those Decisions the FEA deemed LL&E to be the purchaser on December 1, 1973 of up to 32,719 barrels per day of crude oil produced for it from the Jay-Little Escambia Creek Field in northwestern Florida and relieved the firm of its obligation under 10 CFR 211.63(b) to sell any of that crude oil to the Exxon Company, U.S.A. This relief was designed to permit LL&E to obtain a sufficient quantity of Jay Field crude oil to enable it to continue operating its newly constructed refinery in Mobile, Alabama. On the basis of financial and operating data which LL&E submitted in support of its present exception request, the FEA determined that the conditions which prevailed at the time of the earlier proceedings continue to exist. The FEA found that LL&E had invested in the construction of its Mobile refinery in justifiable reliance on the assumption that it would be able to use its Jay Field crude oil as a feedstock, and LL&E would lack an adequate and reliable supply of crude oil for that refinery if exception relief were denied. Consequently, the firm's refining operation and its investment could be seriously jeopardized in the foreseeable future. The FEA therefore approved an extension of the exception relief previously granted for the six-month period from September 1, 1976 through February 28, 1977.

Omega Oil Co.; Dayton, Ohio; FEE-2718; Motor Gasoline

Omega Oil Company (Omega) filed an Application for Exception from the provisions of 10 CFR 211.12 which, if granted, would result in the issuance of Orders by the FEA (i) increasing the base period use of motor gasoline to nine retail outlets which Omega currently owns and operates and (ii) assigning new suppliers to furnish the additional gasoline to the stations. The purchase by Omega on April 1, 1976 of the nine stations from the Standard Oil Company of Ohio (Sohio) was, in furtherance of a Consent Decree entered into between Sohio and the U.S. Department of Justice in late 1970. *See United States* v. *The Standard Oil Co.*, CCH Trade Cases, Par. 72,988 (N.D. Ohio 1970). In its Application, Omega stated that each of the nine retail was outlets being converted from a full service station to a high volume/low markup station and will require a substantially increased base period use of gasoline. In considering Omega's exception application, the FEA determined that the firm had submitted no evidence that the demand for motor gasoline in any of the markets served by the nine retail outlets has increased significantly since the base period or that the current demand for motor gasoline in those market areas is greater than the existing supply. The FEA further concluded that Omega has failed to show how the denial of the exception request would significantly frustrate any of the goals set forth in the Emergency Petroleum Allocation Act of 1973, as amended, or that the firm is currently unable to purchase adequate supplies of surplus motor gasoline for the nine retail outlets. The Omega submission also failed to demonstrate the manner in which the denial of the increased allocations would significantly frustrate or prevent the effectuation of the antitrust objectives embodied in the Consent Decree since under the very terms of the divestiture decree Sohio is required to offer each purchaser an opportunity to enter into supply contracts under which Sohio would provide the outlets with the motor gasoline they currently require. The FEA specifically found that while Sohio had made such an offer, the offer was declined by Omega. The FEA therefore determined that Omega had failed to satisfy any of the criteria which were set forth in prior Decisions as the basis for adjusting a firm's base period use of an allocated petroleum product on gross inequity or serious hardship grounds. Omega's exception application was therefore denied.

Standard Oil Co. (Indiana); Chicago, Ill.; FEE-3166 through FEE-3178; FEE-3216; FEE-3217; Natural Gas liquids and Products

Standard Oil Company (Indiana) (Amoco) filed Applications for Exception from the provisions of 10 CFR 212.165 which, if granted, would permit Amoco to increase the prices it charges to reflect non-product cost increases which the firm has incurred in producing the natural gas liquids and natural gas liquid products at 14 of its natural gas processing plants. In considering the applications, the FEA noted that as a general rule exception relief will be granted to any natural gas processor which can demonstrate that the non-product costs which it has experienced since May 1973 have increased substantially

in excess of the $.005 per gallon passthrough for natural gas liquid products and the $.00375 per gallon passthrough for natural gas liquids permitted under Section 212.165. The FEA found that Amoco had made such a showing with respect to 13 of the 15 gas plants and therefore granted Amoco appropriate exception relief for those plants. However, the FEA denied exception relief for the remaining two plants on the grounds that the adjusted non-product unit cost increase experienced by Amoco with respect to the Levelland and Slaughter plants was not materially in excess of the $.005 per gallon.

Union Oil Co. of California; Los Angeles, Calif.; FEE-3113 through FEE-3129; FEE-3161; FEE-3162; Natural Gas Liquid Products

Union Oil Company of California (Union) filed Applications for Exception from the provisions of 10 CFR 212.165 which, if granted, would permit Union to increase the prices it charges to reflect non-product cost increases which the firm has incurred in producing the natural gas liquid products at 19 of its natural gas processing plants. In considering the applications, the FEA noted that as a general rule exception relief will be granted to any natural gas processor which can demonstrate that the non-product costs which it has experienced since May 1973 have increased substantially in excess of the $.005 per gallon passthrough for natural gas liquid products and the $.00375 per gallon passthrough for natural gas liquids permitted under Section 212.165. The FEA found that Union had made such a showing with respect to 17 of the 19 gas plants and therefore granted Union appropriate exception relief for those plants. However, the FEA denied exception relief for the remaining two plants on the grounds that the adjusted non-product unit cost increase experienced by Union with respect to the Bakke and Stearns plants was not materially in excess of the $.005 per gallon.

REQUEST FOR STAY

Kerr-McGee Corp.; Oklahoma City, Okla.; FES-0882; Covered Products

The Kerr-McGee Corporation (Kerr-McGee) requested that the application to it of certain provisions of the Mandatory Petroleum Price Regulations be stayed pending a decision on an Appeal which the firm filed with the FHA on July 2, 1976. The stay request relates to the determination of maximum allowable prices for covered products which are produced by Kerr-McGee at the Dubach natural gas processing plant (the Dubach Plant) in which the firm owns a 50 percent interest. The Application for Stay, if granted, would permit Kerr-McGee to compute its increased costs and determine its maximum allowable prices at the Dubach Plant separately from the firm's subsidiaries which sell products refined from crude oil. According to the Kerr-McGee submission, stay relief was warranted since the regulatory provisions which govern the computation of increased costs are ambiguous as applied to the Dubach Plant. In considering the stay request, the FEA determined that Kerr-McGee failed to establish that it would experience an irreparable injury in the absence of a stay. The FEA also found that Kerr-McGee had not established in a compelling manner that it would incur a disproportionate burden unless the stay which it requested were approved since the impact of aggregating increased costs at the Dubach Plant with the costs incurred by its other subsidiaries would have only a minimal effect on its firm-wide prices for gasoline. Moreover, the FEA discerned no compelling public policy reasons in this case which warranted the preservations of the *status quo ante* pending a determination of the Kerr-McGee Appeal. The FEA also noted that, contrary to Kerr-McGee's contention that compliance with FEA regulations was impossible, the data which the firm provided indicated that the consolidation of costs on a firm-wide basis including the Dubach Plant was feasible. Since the FEA concluded that Kerr-McGee had satisfied none of the applicable criteria under Section 205.125(b) for the approval of stay relief, the firm's Application for Stay was denied.

REQUEST FOR MODIFICATION OR RESCISSION

Fletcher Oil and Refining Co.; Wilmington, Calif.; FMR-0065; Crude Oil

On September 9, 1976, Fletcher Oil and Refining Company (Fletcher) filed a Request for Modification of a Decision and Order which was issued to the firm on June 18, 1976. *Fletcher Oil and Ref. Co.*, 3 FEA Par. 83,223 (June 18, 1976). The June 18 Order granted Fletcher an exception from the provisions of 10 CFR 211.67 (the Old Oil Entitlements Program) and thereby relieved the firm of any obligation to purchase entitlements during the three month period June 1 through August 31, 1976. Those entitlement purchase obligations related to Fletcher's receipts of old crude oil and crude oil runs to stills during the final month of the firm's fiscal year ended on April 30, 1976, and the two initial months of its 1977 fiscal year. In its Request for Modification Fletcher contended that it did not receive any entitlement exception relief under the June 18 Order which affected its entitlement position for May and June 1976, the initial two months of its 1977 fiscal year. Fletcher therefore requested that the requirement of the June 18 Order that the firm supply certain financial data with respect to its 1977 fiscal year was unnecessary and should be vacated. Fletcher's contentions were sustained in the Decision which the FEA issued in the matter. The FEA determined that Fletcher apparently did not receive any benefit for the exception relief granted with the initial two months of its 1977 fiscal year. Consequently the June 18 Order was amended to eliminate any requirement that Fletcher submit financial data with respect to its 1977 fiscal year.

SUPPLEMENTAL ORDERS

Linden's Propane, Inc.; Lagrange, Ohio; FEX-0103; Propane

On August 31, 1976, the Federal Energy Administration issued a Decision and Order to Linden's Propane, Inc. (Linden) staying the refund provisions of a July 7, 1976 Remedial Order. *Linden's Propane, Inc.*, 4 FEA Par. 85,018 (August 31, 1976). The Stay was granted, however, on the condition that Linden place the disputed funds into an escrow account pending a final determination on the merits of the Appeal which it had filed from the Remedial Order. The Stay was further conditioned upon the submission by Linden of a copy of the required escrow agreement to the Office of Exceptions and Appeals of the FEA within 15 days of receipt of the August 31 Decision. On the basis of its determination that Linden had failed to comply with the express conditions of the August 31 Order, the FEA concluded that the Stay which was approved on August 31, 1976 should be vacated.

Skelly Oil Co.; Tulsa, Okla.; FEX-0097; Catalyst Coke

On October 14, 1976, the Federal Energy Administration issued a Decision and Order to the Skelly Oil Company (Skelly) staying the refund provisions of a September 1, 1976 Remedial Order. *Skelly Oil Co.*, 4 FEA Par. 85,027 (October 14, 1976). The Stay was granted, however, on the condition that Skelly place the disputed funds into an escrow account pending a final determination on the merits of the Appeal which it had filed from the Remedial Order. The Stay was further conditioned upon the submission by Skelly of a copy of the required escrow agreement to the Office of Exceptions and Appeals of the FEA within 15 days of receipt of the October 14 Decision. On the basis of its determination that Skelly had failed to comply with the express conditions of the October 14 Order, the FEA concluded that the Stay which was approved on October 14, 1976 should be vacated.

DISMISSALS

The following submission was dismissed following a statement by the applicant indicating that the relief requested was no longer needed:

State of Alaska; Juneau, Alaska; FEA-0985

Copies of the full text of these Decisions and Orders are available in the Public Docket Room of the Office of Private Grievances and Redress, Room B-120, 2000 M Street, N.W., Washington, D.C. 20461, Monday through Friday, between the hours of 1:00 p.m. and 5:00 p.m., e.s.t., except Federal holidays. They are also available in Energy Management: Federal Energy Guidelines, a commercially published loose leaf reporter system.

DAVID G. WILSON,
Acting General Counsel.

REPORT OF OIL IMPORTS INTO THE UNITED STATES AND PUERTO RICO

Availability of Form

Notice is hereby given that the Federal Energy Administration ("FEA") has available Form FEA P113-M-0 (Report of Oil Imports into the United States and Puerto Rico) and has mailed the form to approximately 700 firms which meet the reporting requirements for this survey.

All companies, including subsidiary or affiliated companies, which import crude oil, unfinished oils and/or finished petroleum products into the United States and Puerto Rico are required to file the FEA P113-M-0 each month beginning with January 1977.

The FEA P113-M-0 will collect data on petroleum imports of crude oil for processing, unfinished oils, finished petroleum products, and residual fuel oil including crude oil to be burned as fuel. A breakdown of imports is required for residual fuel oil imported for sale or consumption in the East Coast Refining District.

The FEA P113-M-0 must be completed and submitted in triplicate not later than 15 working days after the end of each report month. The first report is due at FEA by February 21, 1977, for January 1977 data.

Questions or requests for assistance in completing the FEA P113-M-0 as well as requests for copies of the form, may be referred by mail to the Federal Energy

Administration, Code 2885, Washington, D.C. 20461, or by telephone to FEA at 202/254–8450.

Issued in Washington, D.C., January 21, 1977.

DAVID G. WILSON,
Acting General Counsel.

STRATEGIC PETROLEUM RESERVE; COTE BLANCHE SALT MINE STORAGE SITE

Availability of Final Site-Specific Environmental Impact Statement

Pursuant to section 102(2)(C) of the National Environmental Policy Act, 42 U.S.C. 4332(2)(C), the Federal Energy Administration (FEA) has prepared a final site-specific environmental impact statement (EIS) for the Cote Blanche salt mine site, one of five storage sites that is being considered for the creation of a Strategic Petroleum Reserve. The Reserve is mandated by Part B of Title I, Energy Policy and Conservation Act, 42 U.S.C. 6231–6242. The Reserve will be created for the storage of approximately 500 million barrels of crude oil and/or petroleum products for use in the event of a Presidential determination of a severe energy supply interruption or a requirement to meet the obligations of the United States under the International Energy Program.

The Cote Blanche salt mine site is located in St. Mary Parish, Louisiana. This site is currently under consideration for use in the Early Storage Reserve, i.e., for the first 150 million barrels of storage capacity. The final Cote Blanche EIS (FES–76/77–7) includes comments received by FEA on the draft EIS for the Cote Blanche site (DES–76–7) and FEA analyses and responses to those comments.

Single copies of the final Cote Blanche EIS may be obtained from the FEA Office of Communications and Public Affairs, Room 3138, 12th and Pennsylvania Avenue, NW., Washington, D.C. 20461. Copies of the final Cote Blanche EIS will also be available for public review in the FEA Information Access Reading Room, Room 2107, 12th and Pennsylvania Avenue, NW., Washington, D.C. 20461, between 8 a.m. and 4:30 p.m., e.s.t., Monday through Friday, except Federal holidays.

Interested persons are invited to submit data, views or arguments with respect to the final Cote Blanche EIS to Executive Communications, Box KN, Room 3309, Federal Energy Administration, 12th and Pennsylvania Avenue, NW., Washington, D.C. 20461.

Comments should be identified on the outside of the envelope and on the document submitted to FEA Executive Communications with the designation, "Final Cote Blanche EIS." Fifteen copies should be submitted. All comments should be received by FEA by February 18, 1977, in order to receive full consideration.

Any information or data considered by the person furnishing it to be confidential must be so identified and submitted in one copy only. The FEA reserves the right to determine the confidential status of the information or data and to treat it according to that determination.

Issued in Washington, D.C., January 21, 1977.

DAVID G. WILSON,
Acting General Counsel,
Federal Energy Administration.

Environmental Impact Statement

STRATEGIC PETROLEUM RESERVE; WEEKS ISLAND SALT MINE STORAGE SITE

Availability of Final Site-Specific Environmental Impact Statement

Pursuant to section 102(2)(C) of the National Environmental Policy Act, 42 U.S.C. 4332(2)(C), the Federal Energy Administration (FEA) has prepared a final site-specific environmental impact statement (EIS) for the Weeks Island salt mine site, one of five storage sites that is being considered for the creation of a Strategic Petroleum Reserve. The Reserve is mandated by Part B of Title I, Energy Policy and Conservation Act, 42 U.S.C., sections 6231–6242. The Reserve will be created for the storage of approximately 500 million barrels of crude oil and/or petroleum products for use in the event of a Presidential determination of a severe energy supply interruption or a requirement to meet the obligations of the United States under the International Energy Program.

The Weeks Island salt mine site is located in Iberia Parish, Louisiana. This site is currently under consideration for use in the Early Storage Reserve, i.e., for the first 150 million barrels of storage capacity. The final Weeks Island EIS (FES–76/77–8) includes comments received by FEA on the draft EIS for the Weeks Island site (DES–76–8) and FEA analyses and responses to those comments.

Single copies of the final Weeks Island EIS may be obtained from the FEA Office of Communications and Public Affairs, Room 3138, 12th and Pennsylvania Avenue NW., Washington, D.C. 20461. Copies of the final Weeks Island EIS will also be available for public review in the FEA Information Access Reading Room, Room 2107, 12th and Pennsylvania Avenue NW., Washington, D.C. 20461, between 8 a.m. and 4:30 p.m., e.s.t., Monday through Friday, except Federal holidays.

Interested persons are invited to submit data, views or arguments with respect to the final Weeks Island EIS to Executive Communications, Box KM, Room 3309, Federal Energy Administration, 12th and Pennsylvania Avenue NW., Washington, D.C. 20461.

Comments should be identified on the outside of the envelope and on the document submitted to FEA Executive Communications with the designation, "Final Weeks Island EIS." Fifteen copies should be submitted. All comments should be received by FEA by February 18, 1977, in order to receive full consideration.

Any information or data considered by the person furnishing it to be confidential must be so identified and submitted in one copy only. The FEA reserves the right to determine the confidential status of the information or data and to treat it according to that determination.

Issued in Washington, D.C., January 21, 1977.

FEDERAL POWER COMMISSION

[Docket No. CP77–114]

ARKANSAS OKLAHOMA GAS CORP. ET AL.

Shortening of Notice Period

JANUARY 13, 1977.

On January 4, 1977, Arkansas Oklahoma Gas Corporation, Mississippi River Transmission Corporation, and Arkansas Louisiana Gas Company (Applicants) filed an abbreviated joint application for a certificate of public convenience and necessity under Section 7(c) of the Natural Gas Act. In the application, Applicants request that the Commission utilize the shortened procedure pursuant to Section 1.32 of the Commission's Rules.

Notice of the application was issued on January 11, 1977, setting February 1, 1977, as the last date for filing protests or petitions to intervene. In order to expedite consideration of the subject application, notice is hereby given that the period for filing protests and petitions to intervene in this proceeding is shortened to and including January 25, 1977.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77–2427 Filed 1–25–77;8:45 am]

[Docket No. CS75–379]

BENSON-MONTIN-GREER DRILLING CORP.

Notice of Petition for Waiver

JANUARY 14, 1977.

Take notice that Benson-Montin-Greer Drilling Corporation (BMG), (petitioner), 221 Petroleum Center Building, Farmington, New Mexico, filed a petition for waiver of Section 157.40(c) of the Commission's Rules of Practice and Procedure. Applicant requests waiver of Section 157.40(c) to enable it to sell under its small producer certificate in Docket No. CS75–379 natural gas produced from certain properties in Carbon County, Wyoming which it has acquired from Amoco Production Company (Amoco) and Phillips Petroleum Company (Phillips). BMG is willing to accept a condition which would limit its rate for production attributable to the interests acquired from Amoco and Phillips to the applicable large-producer ceiling rate.

BMG has recently drilled and completed a new well on the properties which it acquired under the December 5, 1975 agreement. BMG proposes to sell to Western under its small producer certificate in Docket No. CS75–379 the gas production attributable to the interests which it acquired from Amoco and Phillips. Such gas will be sold at the applicable national ceiling rate established by the Commission in Opinion Nos. 770 and 770–A.

Any person desiring to be heard or to make any protest with reference to said petition should on or before February 7, 1977, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any party wishing to become a party to a proceeding, or to participate as a party in any hearing therein, must file a petition to intervene in accordance with the Commission's Rules.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77–2423 Filed 1–25–77;8:45 am]

[Docket No. CP77–118]

COLUMBIA GAS TRANSMISSION CORP. AND COLUMBIA GULF TRANSMISSION CO.

Notice of Application

JANUARY 14, 1977.

Take notice that on January 6, 1977, Columbia Gas Transmission Corporation (Columbia Transmission), 1700 MacCorkle Avenue, S.E., Charleston, West Virginia 25314, and Columbia Gulf Transmission Company (Columbia Gulf), 3805 West Alabama Avenue, Houston, Texas 77027, filed in Docket No. CP77–118 a joint application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing Columbia Transmission and Columbia Gulf to transport up to 1,500 Mcf of natural gas per day for General Electric Company (GE), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

It is stated that Columbia Gulf would receive up to 1,500 Mcf of natural gas per day at Erath, Vermilion Parish, Louisiana, from Texas Gas Transmission Corporation (Texas Gas) through existing facilities at the tailgate of Texaco's Henry plant and would redeliver such volumes to Columbia Transmission for GE's account in Boyd County, Kentucky, at an existing point of receipt. Columbia Transmission, it is further stated, would transport and redeliver such gas for GE's account to Baltimore Gas and Electric Company (BG&E) at existing points of delivery located near Baltimore, Maryland.

It is asserted that Columbia Gulf's charge for this transportation service would be 29.34 cents per Mcf, and Columbia Gulf would retain for company-use and unaccounted-for gas 2.5 percent of the total volume of gas delivered into its system. It is further asserted that Columbia Transmission would charge 22.21 cents per Mcf and would retain for company-use and unaccounted-for gas 3.1 percent of the total volume of gas delivered into its system by Columbia Gulf. It is also asserted that the transportation obligations of Columbia Gulf and Columbia Transmission would be subject to the limits of their pipeline capacity and customer service obligations.

It is stated that BG&E has notified GE that no gas would be available for its interruptible customers; hence, GE has acquired the option to purchase sellers' interests under certain leases from Texas Crude, Inc. (Texas Crude) and other owners in the Blue Buck Point gas field in Cameron Parish, Louisiana, for a period commensurate with the productive life of the reserves purchased, a period of not less than ten years. It is further stated that the gas to be transported is to be used for Priority 2 and 3 uses at GE's Columbia, Maryland, plant for drycoaters, pickledryers, enamel dryers, counterflow enamel furnaces, phosphate ovens, paint bake ovens, air make-up systems, and one salt bath unit.

Texas Crude states that unless the sale in place of the Blue Buck Point gas reserves to GE is consummated, such reserves would be sold to intrastate gas purchasers.

It is stated that the transportation and delivery of natural gas by Columbia Transmission is dependent upon the ability of BG&E to receive such gas and redeliver it to GE. It is further asserted that the gas transportation agreement between Columbia Gulf and Columbia Transmission and GE is for a term of ten years or until BG&E terminates its agreement to receive the transported gas for the account of GE, whichever first occurs.

Any person desiring to be heard or to make any protest with reference to said application should on or before February 7, 1977, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicants to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[FR Doc 77 2424 Filed 1–25–77;8:45 am]

[Docket No. ER76–301]

PENNSYLVANIA ELECTRIC CO.

Order Adopting Settlement

JANUARY 14, 1977.

By order issued December 24, 1975, we accepted Pennsylvania Electric Company's (Penelec) filing of November 26, 1975, and suspended the proposed tariff for two months until February 26, 1976. A pre-hearing conference was held on January 19, 1976, and Staff served its cost of service "top sheets" on August 20, 1976. A settlement conference held between Penelec and the intervenors in this docket on September 16, 1976, resulted in an uncontested settlement agreement which was certificated to us by the Administrative Law Judge on November 15, 1976.

Based on our review of the record in these proceedings, including the settlement agreement itself, the filings, documents and pleadings submitted, we conclude that the settlement agreement represents a reasonable resolution of the issues in the proceeding in the public interest, and that accordingly the settlement should be approved.

The Commission finds: The settlement agreement certified by the Presiding Judge to the Commission in this docket, should be approved and made effective, as hereinafter ordered.

The Commission orders: (A) The settlement agreement certified by the Presiding Judge in this docket on November 15, 1976, is hereby approved and made effective, and is incorporated herein by reference.

(B) Within 30 days from the date of this order, Penelec shall file with the Commission revised tariff sheets in conformance with the settlement agreement.

(C) Within 30 days after the settlement tariff sheets are accepted for filing, Penelec shall refund amounts collected in excess of the settlement rates based on service rendered after February 25, 1976, together with simple interest computed at 9 percent per annum.

(D) Within 15 days after refunds have been made, Penelec shall file with the Commission a compliance report showing monthly billing determinants and revenues under prior, present and settlement rates; monthly settlement rate increase, monthly rate refund and the

monthly interest computation together with a summary of such information for the total refund period. A copy of such report shall also be furnished to each State Commission within whose jurisdiction the wholesale customers distribute and sell electric energy at retail.

(E) This order is without prejudice to any filings or orders which have been made or which will hereafter be made by the Commission, its staff, or any party or person affected by this order, in any proceeding now pending or hereafter instituted by or against Penelec or any person or party.

(F) The Secretary shall cause prompt publication of this order in the FEDERAL REGISTER.

By the Commission.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-2422 Filed 1-25-77;8:45 am]

[Docket No. ER76-678]

MAINE ELECTRIC POWER CO.

Order Granting Late Interveniton

JANUARY 14, 1977.

On December 7, 1976, Boston Edison Company, Fitchburg Gas and Electric Light Company, Montaup Electric Company, Newport Electric Corporation, Public Service Company of New Hampshire and Vermont Electric Power Company (the "Petitioners") filed an untimely petition to intervene in the instant proceeding. For the reasons set forth hereinafter the Commission will grant this petition to intervene.

The Petitioners, each a New England utility, have entitlements in power purchased by Maine Electric Power Company (MEPCO) from the New Brunswick Electric Power Commission (New Brunswick). The pertinent contracts, each of which has been filed in this docket, consist of a Unit Participation Agreement dated November 14, 1971 ("Participation Agreement") under which MEPCO buys the power from New Brunswick, and a Power Purchase and Transmission Agreement dated December 1, 1971, ("Purchase Agreement") under which twenty-two New England Utilities, including the Petitioners, buy the power from MEPCO.

By order issued September 15, 1976, the Commission, inter alia, instituted an investigation and hearing regarding the aforementioned agreements. By motion dated November 4, 1976, New England Power Company (NEP) requested that the Presiding Administrative Law Judge proceed to establish procedural dates regarding the aforementioned investigation and hearing to determine appropriate conditions, if any, to be imposed by the Commission upon the importation by MEPCO of power from New Brunswick and upon resale of such power to purchasers under the Power Purchase and Transmission Agreement.

As purchasers under the Power Purchase and Transmission Agreement, the Petitioners state that they will be directly and substantially affected by the Commission's imposition of any condition upon the importation and resale by MEPCO of New Brunswick Power. The Petitioners also state that they became aware that an active effort has been undertaken to impose conditions on the importation of New Brunswick Power only upon receipt of NEP's motion of November 4, 1976. In addition, Petitioners urge that their interests cannot be adequately represented by any of the existing parties and that they may be bound by the Commission's action in this proceeding. The Petitioners assert that they value the interconnection between New England and Eastern Canada as beneficial to each region and desire to see the benefits continued and enlarged. They express concern that if NEP were to obtain the relief it seeks, cooperative Canadian-American endeavor in the electric industry would be severely set back.

Pursuant to a formal Prehearing Conference held on November 9, 1976, in this docket, the Presiding Administrative Law Judge issued a notice dated November 11, 1976, of the contents of NEP's motion to all the signatory parties to the Power Purchase and Transmission Agreement in order to give these parties the opportunity to take such action as they deemed appropriate. A similar notice was published by the Commission in the FEDERAL REGISTER on November 24, 1976.

In light of the foregoing, the Commission concludes that the Petitioners should be permitted to intervene in this proceeding.

The Commission finds: Participation in this proceeding by the Petitioners is in the public interest.

The Commission orders: (A) The Petitioners are hereby permitted to intervene in this proceeding subject to the rules and regulations of the Commission: *Provided, however,* That participation of these companies shall be limited to matters affecting asserted rights and interests as specifically set forth in their petition to intervene; and *Provided, further,* That the admission of these companies shall not be construed as recognition by the Commission that they might be aggrieved because of any order or orders of the Commission entered in this proceeding.

(B) The intervention granted herein shall not be the basis for delaying or deferring any procedural schedules heretofore established for the orderly and expeditious disposition of this proceeding.

(C) The Secretary shall cause prompt publication of this order to be made in the FEDERAL REGISTER.

By the Commission.

[SEAL] KENNETH F. PLUMB,
Secretary.

[Docket No. E-9530]

PYRAMID LAKE PAIUTE TRIBE OF INDIANS v. SIERRA PACIFIC POWER CO.

Order Providing for Hearing

JANUARY 14, 1977.

On July 1, 1975, the Pyramid Lake Paiute Tribe of Indians (Tribe), through its attorneys, filed a complaint and petition for declaratory order (complaint) respecting four unlicensed hydroelectric projects[1] owned and operated by Sierra Pacific Power Company (Sierra Pacific) on the Truckee River in California and Nevada. The Tribe requests that an order be issued declaring that the operation of the projects is illegal and that Sierra Pacific be ordered to cease operation of the projects until each is licensed by the FPC.

The Tribe alleges that the Floriston Rates[2] were designed to meet the power requirements of Sierra Pacific's four plants. By requiring Sierra Pacific to cease operation of these plants, the Tribe claims that the flow in the Truckee River would be more beneficial to the needs and the requirements of the Tribe for the maintenance and preservation of the Pyramid Lake and Truckee River fisheries.

On October 14, 1975, Sierra Pacific filed a motion to dismiss the complaint and answer. Sierra Pacific claims that licenses are not required for the continued operation and maintenance of the projects. Alternatively, Sierra Pacific requests that if licenses are necessary for the projects that their continued operation be allowed.

Sierra Pacific argues that the complaint should be dismissed because the Tribe is seeking to assert water rights in the Truckee. Sierra Pacific alleges that the Tribe has not shown a reasonable nexus between the water and treaty rights and the licensing of the four hydroelectric plants. Sierra Pacific also argues that the Tribe is barred by the doctrine of laches from bringing complaint, because the Tribe has delayed filing its complaint without justification. Sierra Pacific further claims that the Federal Power Act (Act) does not require it to obtain a license for the continued operation of the plants, because none of the provisions of the Act is applicable. Sierra Pacific alleges that the Truckee River is not navigable.

On December 1, 1975, the Tribe filed a response to Sierra Pacific's motion and answer.

There appears to be a question among the parties as to whether or not the Truckee River is a navigable waterway of the United States as defined by Section 3(8) of the Act.[3] Because we do not have

[1] The four projects are the Farad Plant near Farad, California; the Fleish and Verdi Plants near Verdi, Nevada; and the Washoe Plant near Mogul, Nevada.

[2] Floriston Rates are the rate of flow in the Truckee River at the head of the diversion penstock at Floriston, California, as measured at the Iceland Gage.

[3] 16 U.S.C. § 796(8).

a factual record before us, we believe that a hearing should be held to determine if the Truckee River is navigable and thus if the Farad, Fleish, Verdi, and Washoe plants are within our licensing jurisdiction. Of course, the parties and Commission staff will not be limited to asserting jurisdiction based solely on navigation, but may rely on any other basis that may be appropriate. Concerning the request of the Tribe that we order Sierra Pacific to cease operating the projects, it would not be appropriate for us to do so because we have not determined that the projects are within our licensing jurisdiction. The hearing that we are providing for by this order will be limited to the issue of Commission jurisdiction over the four plants.

The doctrine of laches does not bar the Tribe from bringing the complaint nor the Commission from instituting any action. The Supreme Court stated that where a governmental interest is held in trust for the public, the public is not to be deprived of that interest by laches. *U.S. v. California,* 332 U.S. 19, 39, 40 (1974), Congress has given to the Commission the responsibility of protecting our national resources for the public interest in developing hydroelectric power. *First Iowa Hydro-Electric Cooperative v. FPC,* 328 U.S. 152 (1946). The complaint is based on a governmental interest, unauthorized use of our navigable waterways, that is held in trust for the public.

As noted above, Sierra Pacific argues that the Tribe is attempting to use the Commission as a forum for determining treaty and water rights. The Tribe denies this assertion in its answer. While issues such as minimum flows and fish facilities may have a relationship to treaty and water rights, these issues are also relevant to a licensing proceeding.

Public notice of the complaint was given on August 5, 1975. On September 2, 1975, a notice of intervention was filed by the Public Service Commission of Nevada. On October 3 and 14, 1975, petitions to intervene were filed by the Secretary of the Interior and the State of Nevada, respectively. The petitions were granted by order issued November 19, 1975. On August 25, 1975, a letter of protest was filed by the John Webster Brown Civil and Structural Engineers, Inc.

The Commission finds: (1) It is appropriate and in the public interest for the purposes of the Federal Power Act that a hearing be held, as hereinafter provided, on the issue of whether the Farad. Verdi. Fleish, and Washoe plants owned and operated by Sierra Pacific Power Company are within our licensing jurisdiction.

(2) It is appropriate and in the public interest to dismiss all other requests not specifically ruled upon in this order.

The Commission orders: (A) Pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by the Federal Power Act, particularly Sections 4 (e), 4(g), and 23(b) thereof, and the Commission's Rules of Practice and Procedure, an initial conference shall be held at 9:30 a.m. on February 23, 1977, in a hearing room of the Federal Power Commission, 825 North Capitol Street, N.E., Washington, D.C. respecting jurisdiction of the unlicensed hydroelectric projects on the Truckee River owned and operated by Sierra Pacific Power Company.

(B) A Presiding Administrative Law Judge, to be designated by the Chief Administrative Law Judge for that purpose pursuant to Section 3.5(d) of the Commission's Regulations, 18 CFR § 3.5 (d) (1976), shall preside at the hearing in this proceeding, with authority to establish and change all procedural dates and to rule on all motions with the exceptions of petitions to intervene motions to consolidate and sever, and motions to dismiss, as provided for in the Commission's Rules of Practice and Procedure.

(C) The Commission's Rules of Practice and Procedure shall apply in this proceeding except to the extent that they are modified and supplemented herein.

(D) All requests not specifically ruled upon are hereby denied.

(E) The Secretary shall cause prompt publication of this order in the FEDERAL REGISTER.

By the Commission.

KENNETH F. PLUMB,
Secretary.

[Docket No. CI76-754]

TENNECO EXPLORATION, LTD.

Notice of Application for Optional Procedure Certification

JANUARY 14, 1977.

Take notice that on November 18, 1976, Tenneco Exploration, Ltd. filed an amendment to its September 3, 1976 application for a certificate of public convenience and necessity filed pursuant to Section 2.56a of the Commission's General Policy and Interpretations. Tenneco Exploration, Ltd. requests certification under Section 2.75 for natural gas produced from Eugene Island Block 367, offshore Louisiana, at an initial rate of $2.8037 per Mcf with escalations of 5 cents per Mcf at the end of each contract year. In addition, Tenneco Exploration, Ltd. seeks pre-granted abandonment authorization, effective at the conclusion of its current 15-year sales contract.

The subject gas will be produced by Tenneco Exploration, Ltd. and sold to Tenneco Oil Company for resale to Tennessee Gas Pipeline Company.

Any person desiring to be heard or to make any protest with reference to said petition should on or before February 7, 1977, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any party wishing to become a party to a proceeding, or to participate as a party in any hearing therein, must file a petition to intervene in accordance with the Commission's Rules.

KENNETH F. PLUMB,
Secretary.

[Docket No. CI76-755]

TENNECO EXPLORATION II, LTD.

Notice of Application for Optional Procedure Certification

JANUARY 14, 1977

Take notice that on November 18, 1976 Tenneco Exploration II, Ltd. (Exploration II) filed an amendment to its September 3, 1976 application for a certificate of public convenience and necessity filed pursuant to Section 2.56a of the Commission's General Policy and Interpretations. Exploration II requests certification under Section 2.75 for natural gas produced from Eugene Island Block 367, offshore Louisiana, at an initial rate of $2.8037 per Mcf at the end of each contract year. In addition, Exploration II seeks pre-granted abandonment authorization, effective at the conclusion of its current 15-year sales contract.

The subject gas will be produced by Exploration II and sold to Tenneco Oil Company for resale to Tennessee Gas Pipeline Company.

Any person desiring to be heard or to make any protest with reference to said petition should on or before February 7, 1977, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any party wishing to become a party to a proceeding, or to participate as a party in any hearing therein, must file a petition to intervene in accordance with the Commission's Rules.

KENNETH F. PLUM.
Secretary.

[FR Doc.77-2425 Filed 1-25-77;8:45 am]

[Docket No. CP77-123]

ALABAMA-TENNESSEE NATURAL GAS CO.

Application

JANUARY 21, 1977.

Take notice that on January 14, 1977, Alabama-Tennessee Natural Gas Company (Applicant), P.O. Box 918, Florence, Alabama 35630, filed in Docket No. CP77-123 an application pursuant to section 7

(c) of the Natural Gas Act and § 2.79 of the Commission's general policy and interpretations (18 CFR 2.79), for a certificate of public convenience and necessity authorizing the transportation of natural gas on an interruptible basis on behalf of Fruehauf Corporation (Fruehauf), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant proposes to transport for Fruehauf up to 1,800 Mcf of gas per day for use at Fruehauf's Decatur, Alabama, facilities for a period of two years from the date delivery commences.

It is stated that the transportation service is required by Fruehauf to offset curtailments from its supplier, City of Decatur Gas Utility Company (Decatur), which has advised Fruehauf that it anticipates no gas would be available to Fruehauf during the winter months and that there would be severe curtailments during the summer months.

It is stated that the gas to be purchased by Fruehauf and transported by Applicant would be produced from wells wholly owned by Fruekel, the energy subsidiary of Fruehauf, in Tuscarawas and Guernsey Counties, Ohio. It is stated that Fruehauf proposes to have said quantities of natural gas delivered to Applicant by Tennessee Gas Pipeline Company (Tennessee) via Columbia Gas Transmission Company (Columbia) at Tennessee's Barton Sales Delivery Point located in Colbert County, Alabama. Applicant further states that it would transport and deliver such gas to Decatur for the account of Fruehauf at its existing Decatur Sales Delivery Point located in Morgan County, Alabama, to the extent operating conditions permit. It is stated that such deliveries would be made through existing facilities, and Applicant anticipates having available capacity due to curtailments resulting from a supply deficiency on the system of Tennessee, its sole supplier.

Applicant states that its transportation charge for this service would be 12.78 cents per Mcf.

Applicant asserts that it did not consider the subject natural gas supply available for purchase because the well or wells from which the gas to be transported is produced have been exclusively dedicated to Fruekel.

Fruehauf states that the gas to be transported and delivered by Applicant would be used for Priority 2 industrial uses to replace volumes being curtailed by its suppliers, Decatur and Applicant. This curtailment, it is stated, would not only occasion economic hardship in Decatur, where Fruehauf, as one of the city's largest employers, employs 525 people and in 1975 had a total payroll of $3,117,412, but would also adversely affect the manufacturing of transportation equipment and its component parts. It is further stated that a curtailment or shutdown of Fruehauf's Decatur plants would affect 16 other Fruehauf plants in the United States and Canada resulting in employee layoffs and plant shutdowns.

It is further asserted that Alumex Corporation which obtains aluminum siding from Fruehauf's Sheet Mill would be adversely affected.

Any person desiring to be heard or to make protest with reference to said application should on or before February 4, 1977 file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules and practice and procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-2417 Filed 1-25-77;8:45 am]

[Docket No. RP-73-77 (PGA77-4)]

ALABAMA-TENNESSEE NATURAL GAS CO.

Proposed PGA Rate Adjustment

JANUARY 17, 1977.

Take notice that on December 30, 1976, Alabama-Tennessee Natural Gas Company (Alabama-Tennessee), P.O. Box 918, Florence, Alabama 35630, tendered for filing as part of its FPC Gas Tariff, Third Revised Volume No. 1, Twentieth Revised Sheet No. 3-A. This revised tariff sheet is proposed to become effective as of February 1, 1977.

Alabama-Tennessee states that the sole purpose of such revised tariff sheet is to adjust Alabama-Tennessee's rates pursuant to the PGA provisions of Section 20 of the General Terms and Conditions of its tariff to reflect increased rates to become effective on February 1, 1977, to be charged by its sole supplier, Tennessee Gas Pipeline.

The revised tariff sheet provides for the following rates:

Rate schedule:	*20th revised sheet No. 3-A*
G-1:	
Demand	$1.78
Commodity (cents)	111.47
SG-1: Commodity (cents)	124.47
I-1: Commodity (cents)	117.32

Alabama-Tennessee states that copies of the filing have been mailed to all of its jurisdictional customers and affected State regulatory Commissions.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before January 28, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-2441 Filed 1-25-77;8:45 a.m.]

[Docket No. ER77-139]

AMERICAN ELECTRIC POWER SERVICE CORP.

Changes in Rates and Charges

JANUARY 18, 1977.

Take notice that American Electric Power Service Corporation (AEP) on January 10, 1977, tendered for filing on behalf of its affiliate, Ohio Power Company (Ohio), Modification No. 8 dated January 1, 1977 to the Operating Agreement dated June 14, 1962, between Ohio and The Cleveland Electric Illuminating Company, designated Ohio Rate Schedule FPC No. 31.

Section 1 of Modification No. 8 provides for an increase in the Demand Charge for Short Term Power from $0.50 to $0.60 per kilowatt per week and section 3 provides for an increase in the Demand Charge for Limited Term Power from $2.75 to $3.25 per kilowatt per month. Section 2 of Modification No. 8 provides for an increase in the transmission charge for third party Short Term Power transactions from $0.125 per kilowatt per week to $0.15 per kilowatt per week and Section 4 provides for an increase in the transmission charge for third party Limited Term transactions from $0.55 per kilowatt per month to $0.65 per kilowatt per month, both schedules proposed to become effective January 3, 1977.

The Company states that since the use of Short Term and Limited Term Power cannot be accurately estimated, it is impossible to estimate the increase in revenues resulting from the Modification.

The Company states that copies of the filing were served upon The Cleveland Electric Illuminating Company and the Public Utilities Commission of Ohio.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before February 2, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-2445 Filed 1-25-77;8:45 a.m.]

[Docket No. CP66-235]

ATLANTIC SEABOARD CORP.

Petition for Declaratory Order

JANUARY 18, 1977.

Take notice that on December 28, 1976, Columbia Gas Transmission Corporation (Columbia) as successor to Atlantic Seaboard Corporation (Seaboard), 1700 MacCorkle Avenue, S.E. Charleston, West Virginia 25314, filed in Docket No. CP66-235 a petition pursuant to section 16 of the Natural Gas Act and § 1.7(c) of the Commission's Rules of Practice and Procedure (18 CFR 157.7(c)) for a declaratory order to remove the uncertainty of whether or not Columbia must first secure regulatory approval, specifically, a certificate of public convenience and necessity under section 7(c) of the Natural Gas Act, for future replacements of its 20-inch gas transmission pipeline extending from Flat Top, West Virginia, to Dranesville, Virginia, with like size minimum wall thickness pipe, all as more fully set forth in the petition which is on file with the Commission and open to public inspection.

Columbia states that on February 20, 1964, representatives of Seaboard met with members of the Commission's Staff for discussion relative to the replacement of Seaboard's 20-inch gas transmission pipeline with like size minimum wall thickness pipe from West Virginia to the Pennsylvania state line, and from this discussion, Seaboard's representatives concluded that the planned replacements of Seaboard's 35-year old 20-inch pipeline would come within the purview of § 2.55(b) of the Commission's Rules of Practice and Procedure (18 CFR 2.55 (b)). Columbia further states that relying upon this conclusion, Seaboard made two replacements: in 1964, 34 miles of 20-inch pipeline between Covington and Lexington, Virginia, were replaced with like diameter pipe; and in 1965, approximately 35 miles of 20-inch pipeline between Waynesboro and Bickers, Virginia, were replaced with like diameter pipe.

It is stated that the Commission's Order to Show Cause in Docket No. CP66-235 issued January 25, 1966 (35 FPC 146), questioned these replacements under Section 2.55(b) of the Commission's Rules and Regulations; which proceeding was terminated by Commission order issued September 13, 1967, in Docket Nos. CP67-167 and CP66-235 (38 FPC 597). Further, it is stated that subsequent replacements have been made pursuant to Commission authorization as follows:

(1) In 1968, 21.5 miles were replaced as authorized in Docket No. CP67-167 (38 FPC 597).

(2) In 1969, 58.0 miles were replaced as authorized in Docket No. CP69-106 (41 FPC 262).

(3) In 1976, 3.7 miles in two sections of 3.1 miles and 0.6 mile, respectively, were replaced as authorized in Docket No. CP76-239 (56 FPC --------).

Columbia states that the replacements made in 1964, 1965, 1968 and 1969 were part of a planned program to replace the pipeline in systematic large sections, as delineated in the Commission's Show Cause Order in Docket No. CP66-235 (35 FPC 146), so as to increase capacity for its eastern markets, but the replacement program was abandoned in 1970 because of a shortage of gas supply. It is further stated that since 1972 Columbia has had a moratorium on additional sales; the replacement made in 1976 was made because of the condition of the pipe. Columbia asserts that future replacements on this 20-inch pipeline would be made only as required to meet DOT Regulations, class location changes or the condition of the pipe as there is presently no need for increased pipeline capacity.

Columbia states that it could continue to replace small sections of its 20-inch pipeline subsequent to obtaining a certificate of public convenience and necessity from the Commission but finds this method has limited flexibility in effecting minor replacements because of the lead time required to prepare the necessary filings and receive Commission authority. It further states that frequently once the overburden is removed and the pipeline exposed, a different section or length of pipeline is determined to need replacement, thereby requiring further amendment of the originally issued certificate of public convenience and necessity.

Accordingly, Columbia submits, that in view of the foregoing discussion, it would be beneficial and in the public interest for Columbia to possess the flexibility inherent in § 2.55(b) of the Commission's Rules and Regulations in order to effectuate the type replacements contemplated on its 20-inch gas transmission pipeline. It states that the Commission might wish to condition such order to provide for reporting replacement sections at the end of each construction year.

Columbia, therefore, proposes that the Commission issue a Declaratory Order removing any uncertainty as to the availability of § 2.55(b) of the Commission's Rules of Practice and Procedure for future replacement of its 20-inch gas transmission pipeline.

Any person desiring to be heard or to make any protest with reference to said petition should on or before February 8, 1977, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-2433 Filed 1-25-77;8:45 am]

[Docket No. RI77-21]

BETTIS, BOYLE AND STOVALL (OPERATOR), ET AL.

Petition for Special Relief

JANUARY 17, 1977.

Take notice that on December 29, 1976, Bettis, Boyle and Stovall (Operator), et al., P.O. Box 1168, Graham, Texas 76046, filed a petition for special relief in Docket No. RI77-21 pursuant to Commission Order No. 481.

Petitioner seeks authorization to charge $1.10 per Mcf for the sale of gas to Cities Service Gas Company from a number of leases in the Northwest Knowles Field, Beaver County, Oklahoma. Petitioner states that it has undergone extensive rework of the wells and gathering system pertaining to the wells in the aforesaid leases. Petitioner further states that unless the requested increase is granted, abandonment is imminent. The subject gas is currently being sold at 35 cents per Mcf.

Any person desiring to be heard or to make any protest with reference to said petition should on or before January 31, 1977, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any party wishing to become a party to a proceeding, or to participate as a party in any hearing therein, must file a petition to intervene in accordance with the Commission's rules.

KENNETH F. PLUMB,
Secretary.

[FR Doc 77-2439 Filed 1-25-77;8:45 am]

[Docket No. CP77-124]

COLUMBIA GAS TRANSMISSION CORP.

Application

JANUARY 21, 1977.

Take notice that on January 18, 1976, Columbia Gas Transmission Corporation (Applicant), 1700 MacCorkle Avenue, SE., Charleston, West Virginia 25314, filed in Docket No. CP77-124 an application pursuant to section 7(c) of the Natural Gas Act and § 2.79 of the Commission's general policy and interpretations (18 CFR 2.79), for a certificate of public convenience and necessity authorizing the transportation of natural gas on an interruptible basis on behalf of Jones & Laughlin Steel Corporation (J&L), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant proposes to transport for J&L up to 2,000 Mcf of gas per day for an initial two-year term, commencing on the first day of delivery, for use at J&L's Aliquippa, Pennsylvania, steel plant in order to minimize the economic impact of curtailments by Applicant.

It is stated that Applicant would receive such natural gas into its Line C-106 in Warren Township, Washington County, Ohio, at a specific point to be mutually agreed upon and would deliver it to Columbia Gas of Pennsylvania, Inc. (Columbia Pennsylvania) at existing points of delivery in Beaver County, Pennsylvania. Applicant states that it would charge J&L 22.21 cents per Mcf for this transportation service and would retain for company-use and unaccounted-for gas 3.1 percent of the volumes received for the account of J&L. Applicant further states that all receipts and deliveries would be effectuated by means of existing facilities, and such transportation service would be subject to the limits of its pipeline capacity and to its service obligations to its CD, WS, SGES, G and SGS customers.

It is asserted that J&L has contracted with David S. Towner dba David S. Towner Enterprises (Towner) to purchase such gas produced from leases in Washington County, Ohio, for a primary term commencing with the first day of delivery and ending on April 30, 1978, with an option to extend the contract through April 30, 1980. Further, it is asserted that J&L would pay Towner $2.30 per Mcf through April 30, 1977, $2.30 per Mcf from May 1 through October 31, 1977, and $2.40 per Mcf from November 1, 1977, through April 30, 1978.

It is stated that J&L's Aliquippa plant, where such gas would be used for Priority 2 or Priority 3 industrial uses, manufacturers steel products in the form of hot and cold rolled and coated sheets and strip, hot rolled and cold finished bars, tubular products, light plates, structural shapes, tin mill products and rod wire products. It is further stated that J&L employs approximately 11,000 people in the Aliquippa plant and has a yearly payroll of approximately $150,000,000, and that a curtailment would have a domino like impact within the plant and throughout Beaver County, Pennsylvania, where it is the largest employer.

Applicant states that it did not consider the subject gas supply available for purchase because the intrastate market is available and marginal gas reserves such as these cannot be developed for the regulated interstate market because of the high cost of development.

Any person desiring to be heard or to make any protest with reference to said application should on or before February 4, 1977, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-2416 Filed 1-25-77;8:45 am]

[Docket No. ER77-142]

CONNECTICUT LIGHT AND POWER CO.

Purchase Agreement

JANUARY 18, 1977.

Take notice that on January 10, 1977, the Connecticut Light and Power Company (CL&P) tendered for filing a proposed Purchase Agreement with Respect to Various Gas Turbine Units, dated November 30, 1976 between (1) CL&P and The Hartford Electric Light Company (HELCO), and (2) Mansfield Municipal Electric Department (MMED).

CL&P states that the Purchase Agreement provides for a sale to MMED of a specified percentage of capacity and energy from five gas turbine generating units (Norwalk Harbor, Devon, South Meadow 10, Middletown and Torrington Terminal) during the period from December 1, 1976 to December 31, 1976 together with related transmission service.

CL&P states that questions as to MMED's Capability Responsibility Obligation, under the terms of the New England Power Pool (NEPOOL) Agreement, during the Term of this Purchase Agreement affected the amounts of gas turbine capacity that could be purchased by MMED and thus delayed execution of the agreement until a date which prevented the filing of such rate schedule more than thirty days prior to the proposed effective date.

CL&P therefore requests that, in order to permit MMED to receive urgently needed capacity, and in order to allow CL&P and HELCO to receive payment for such capacity, the Commission, pursuant to Section 35.11 of its regulations, waive the thirty-day notice period and permit the rate schedule filed to become effective on December 1, 1976.

CL&P states that the capacity charge for the proposed service was a negotiated rate, the monthly transmission charge is equal to one-twelfth of the annual average unit cost of transmission service on the Northeast Utilities (NU) system determined in accordance with § 13.9 of the New England Power Pool (NEPOOL) Agreement and the uniform rules adopted by the NEPOOL Executive Committee, multiplied by the number of kilowatts of winter capability which MMED is entitled to receive, reduced to give due recognition of the payments made by MMED for transmission services on intervening systems, and the variable maintenance charge was arrived at through negotiations.

CL&P states that copies of this rate schedule have been mailed or delivered to CL&P, Hartford, Connecticut; HELCO, Hartford, Connecticut; and MMED, Mansfield, Massachusetts.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before February 1, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-2446 Filed 1-25-77;8:45 am]

[Docket No. RP77-7]

CONSOLIDATED GAS SUPPLY CORP.

Proposed Changes in FPC Gas Tariff

JANUARY 14, 1977.

Take notice that Consolidated Gas Supply Corporation (Consolidated) on December 30, 1976 tendered for filing Twentieth Revised Sheet Nos. 8 and 9 to its FPC Gas Tariff, Second Revised Volume No. 1 to be effective February 1, 1977.

Consolidated states the purpose of this filing is to request that a portion of its general rate increase at Docket No. RP77-7 become effective for the period February 1, 1977 through April 30, 1977 when, after suspension, the increase in Docket No. RP77-7 will become effective.

In its general rate increase, Consolidated demonstrated that among the reasons for the rate change, was a rate filing of Transcontinental Gas Pipe Line Corporation (Transco) at Docket No. RP76-136 who, along with selling natural gas, renders a transportation service to Consolidated. Transco's increase was suspended by the Commission until February 1, 1977. Consolidated states that an increase filed by Columbia Gas Transmission Company (Columbia Gulf) at Docket Nos. RP76-94 and RP76-138, which became effective November 1, 1976, was inadvertently overlooked and has been included herein. Columbia Gulf provides transportation service under Rate Schedules X-9 and X-10. Consolidated contends that if the proposed increase is not allowed to become effective as proposed, Consolidated will be exposed to three months of increased costs without an offsetting increase of its own to recover such costs. The estimated jurisdictional exposure to Consolidated for the three-month period will be approximately $1.0 million of unrecoverable costs unless the Commission approves these proposed tariff sheets.

Consolidated has requested a waiver of the Commission's Rules and Regulations as may be required to permit the filed tariff sheets to become effective as proposed.

Copies of this filing were served upon Consolidated's jurisdictional customers as well as interested state commissions.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before January 28, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-2420 Filed 1-25-77;8:45 am]

[Docket No. CI77-213]

CONTINENTAL OIL CO.

Application

JANUARY 21, 1977.

Take notice that on January 13, 1977, Continental Oil Company (Applicant), P.O. Box 2197, Houston, Texas 77001, filed in Docket No. CI77-213 an application pursuant to section 7(c) of the Natural Gas Act for a limited-term certificate of public convenience and necessity authorizing the sale for resale and delivery of natural gas in interstate commerce to Michigan Wisconsin Pipeline Company (Mich-Wis) from the Cupp D No. 1 Well, S. W. Mayfield Field, Beckham County, Oklahoma, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant states that it commenced the sale of natural gas to Mich-Wis on January 10, 1977, within the contemplation of § 157.29 of the regulations under the Natural Gas Act (18 CFR 157.29) and that it proposes to continue said sale for a period of six months from the date of termination of the sixty-day emergency period or until Applicant is able to begin the sale to the alternate and originally intended purchaser, whichever date is earlier.

It appears reasonable and consistent with the public interest in this case to prescribe a period shorter than 15 days for the filing of protests and petitions to intervene. Therefore, any person desiring to be heard or to make any protest with reference to said application should on or before February 4, 1977, file with the Federal Power Commission, Washington, D.C., 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-2414 Filed 1-25-77;8:45 am]

[Docket No. CP74-98]

EL PASO NATURAL GAS CO.

Notice Prescribing Procedures for the Submission of Comments Regarding Issues Presented by Court Remand

JANUARY 18, 1977.

These proceedings involve the question of the allocation of the cost of looping a segment of El Paso Natural Gas Company's Alamogordo, New Mexico, lateral, which serves only customers of Southern Union Gas Company (Southern Union). In *Southern Union Gas Company* v. *FPC*, 536 F. 2d 440 (D.C. Cir., June 18, 1976), the Court found that the Commission had failed adequately to explain its reasons why the cost of these facilities should be borne solely by Southern Union and remanded the record in this proceeding for further development.

The Commission believes that the issues presented on remand can be most efficiently and expeditiously resolved through the submission of written comments. If the comments demonstrate a need for ore formal procedures, we will prescribe such procedures. The Commission requests the parties to this proceeding to address the following questions in their comments:

1. Should the certificate granted to El Paso Natural Gas Company (El Paso) be conditioned to specify the means of payment for the certificated facilities, for example, to require application of the lateral line policy in El Paso's tariff?

2. If the certificate is conditioned on application of El Paso's lateral line policy, should Southern Union be required to bear the entire cost of the lateral?

3. If the certificate is conditioned on application of El Paso's lateral line policy, are there offsetting factors which would relieve Southern Union of the obligation to pay the entire cost of the facilities?

4. If it is determined that El Paso's lateral line policy should not be applied in this case, should be a special facilities charge be imposed on Southern Union since the annual volumetric limitations in El Paso's curtailment plan preclude any system-wide benefit?

5. Since El Paso commenced construction of the lateral without prior Commission authorization, what portion, if any, should be borne by El Paso's shareholders of the costs attributable to this lateral.

In addition, the parties are invited to comment upon other questions which the remand raises but which they feel have not been fully addressed by the foregoing specific questions.

An original and fourteen (14) copies of all initial and reply comments shall be filed with the Secretary of the Federal Power Commission on or before February 3, 1977, and on or before March 3, 1977, respectively. All written submittals shall be single spaced and submitted upon letter size paper (8" by 10½" or 8½" by 11"), and shall state the name, title, mailing address and telephone number of the person or persons to whom communications concerning this proceeding should be addressed. All written submittals will be placed in the Commission's public files and will be available for inspection in the Commission's Office of Public Information at 825 North Capitol Street, NE., Washington, D.C. 20426, during regular business hours. All statements and submittals in response to this notice shall be under oath, acknowledged by a notary public or comparable official, as follows: "---------- being duly (name) sworn, deposes and says that he is (title and organization, if filing is in a representative capacity), that he has examined the statements contained in the submittal or response, and that all such statements are true and correct to the best of his knowledge, information and belief."

By direction of the Commission.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-2443 Filed 1-25-77;8:45 am]

[Docket No. ER77-85]

INDIANA & MICHIGAN ELECTRIC CO.

Changes in Rates and Charges

JANUARY 18, 1977.

Take notice that American Electric Power Service Corporation (AEP) on January 6, 1976 tendered for filing on behalf of its affiliate Indiana & Michigan Electric Company (I&M), Modification No. 9 dated November 1, 1976 to the Interconnection Agreement dated November 27, 1951 between Illinois Power Company and Indiana & Michigan Electric Company. I&M's Rate Schedule FPC No. 23.

Sections 1 and 3 of Modification No. 9 provide for an increase in the demand charge for Short Term Power and Limited Term Power from $0.50 to $0.60 per kilowatt per week and $2.75 to $3.25 per kilowatt per month respectively. Section 2 and 5 provide for an increase in the Short Term Power and Limited Term Power transmission charges from $0.125 to $0.15 per kilowatt per week and $0.55 to $0.65 per kilowatt per month respectively, both schedules proposed to become effective January 1, 1977. Applicant states that since the use of Short Term and Limited Term Power cannot be accurately estimated, it is impossible to estimate the increase in revenues resulting from the Modification.

Copies of the filing were served upon Illinois Power Company, the Public Service Commission of Indiana, the Michigan Public Service Commission and the Illinois Commerce Commission.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426 in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10).

All such petitions or protests should be filed on or before January 30, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene.

Copies of this application are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-2434 Filed 1-25-77;8:45 am]

[Docket No. ER77-144]

KANSAS CITY POWER & LIGHT CO.

Filing of Change in Rate Schedule

JANUARY 18, 1977.

Take notice that on January 11, 1977, Kansas City Power and Light Company (KCPL) tendered for filing a Municipal Wholesale Firm Power Contract dated December 20, 1976, between KCPL and the City of Gardner, Kansas. KCPL requests an effective date thirty (30) days after filing. The Contract terminates the Municipal Wholesale Firm Power Contract, dated November 6, 1967, KCPL Rate Schedule FPC No. 66, and provides for rates and charges for wholesale firm power service by KCPL to the City of Gardner.

KCPL states that the proposed rates are KCPL's rates and charges for similar service under schedules previously filed by KCPL with the Federal Power Commission.

KCPL states that copies of this filing have been served upon the City of Gardner, Kansas and the State Corporation Commission of Kansas.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before February 3, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-2435 Filed 1-25-77;8:45 am]

[Project No. 2168]

LOWER VALLEY POWER & LIGHT, INC.

Application for Amendment of Transmission Line License

JANUARY 19, 1977.

Public notice is hereby given that an application was filed on March 8, 1976, under the Federal Power Act (16 U.S.C. 791a–825r) by the Lower Valley Power & Light, Inc. (Correspondence to: Mr. Boyd A. Parker, Assistant General Manager, Lower Valley Power & Light, Inc., P.O. Box 118, Afton, Wyoming 83110) for amendment of the license for constructed transmission line Project No. 2168 located in Bonneville County, Idaho and Lincoln County, Wyoming and affecting lands of the United States in Targhee National Forest and other U.S. lands.

Applicant proposes to change the existing 16.5-mile-long single-circuit, wood-pole transmission line from 69 kilovolt capacity to 115-kilovolt capacity. Single pole structures would be replaced by double or triple wood pole, H-frame structures.

All structures would be reinsulated for 115 kilovolts. Except for rerouting of approximately one-third mile in section 23, Township 1 South, Range 45 East, and approximately one-fourth mile in Section 17, Township 1 South, Range 45 East, the existing location of the line will be retained.

Applicant states that the increases in voltage and conductor size are necessary to provide additional transmission line capacity needed for the Lower Valley Power & Light service area. The rerouted line will connect to a 115-kilovolt section of the U.S. Bureau of Reclamation Palisades Dam Substation. Applicant states that it has obtained a new right-of-way at the substation and the rerouting has been coordinated with the U.S. Bureau of Reclamation.

Any person desiring to be heard or to make any protest with reference to said application should file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All such petitions or protests should be filed on or before March 7, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules. The application is on file with the Commission and is available for public inspection.

Take further notice that, pursuant to the authority contained in and conferred upon the Federal Power Commission by Sections 308 and 309 of the Federal Power Act (16 U.S.C. 825g, 825h) and the Commission's Rules of Practice and Procedure, specifically § 1.32(b) (18 CFR 1.35(b)), (1976), a hearing may be held without further notice before the Commission on its application if no issue of substance is raised by any request to be heard, protest or petition filed subsequent to this notice within the time required herein and if the applicant or initial pleaser requests that the shortened procedure of § 1.35(b) be used.

Under the shortened procedure herein provided for, unless otherwise advised, it will not be necessary for applicant or initial pleader to appear or be represented at the hearing before the Commission.

KENNETH F. PLUMB,
Secretary.

[Docket No. ER77-148]

NEW ENGLAND POWER CO.

Filing

JANUARY 18, 1977.

Take notice that on January 12, 1977, New England Power Company (NEPCO) tendered for filing as an initial rate schedule a System Power—Unreserved Power Contract between NEPCO and the City of Burlington, Vermont, Electric Department (Burlington) dated as of November 15, 1976.

The Power Contract provides for NEPCO's supply to Burlington of various capacity entitlements of System Power—Unreserved, together with related energy during, the period December 1, 1976, through February 28, 1977. "System Power—Unreserved" is electric power supplied by NEPCO without specification as to the source of generation, without reserves, and various percentages of which are made available for delivery only at such times as, and to the extent that, specified NEPCO generating units are generating power on line or available for such generation.

NEPCO requests waiver of the notice requirements so as to permit the Power Contract to become effective as of December 1, 1976, in accordance with its terms.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before February 4, 1977. Protest will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

NEW ENGLAND POWER CO.

Filing

JANUARY 18, 1977.

Take notice that on January 12, 1977, New England Power Company (NEPCO) tendered for filing as an initial rate schedule a System Power—Unreserved Power Contract between NEPCO and Green Mountain Power Corporation (G.M.P.C.) dated as of November 15, 1976.

The Power Contract provides for NEPCO's supply to G.M.P.C. of various capacity entitlements of System Power—Unreserved, together with related energy during portions of the period January 1, 1977, through October 31, 1981. "System Power—Unreserved" is electric power supplied by NEPCO without specification as to the source of generation, without reserves, and various percentages of which are made available for delivery only at such times as, and to the extent that, specified NEPCO generating units are generating power on line or available for such generation.

NEPCO requests waiver of the notice requirements so as to permit the Power Contract to become effective as of January 1, 1977 in accordance with its terms.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with §§ 1.8 or 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before February 1, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

NEW ENGLAND POWER CO.

Filing

JANUARY 18, 1977.

Take notice that on January 12, 1977 New England Power Company (NEPCO) tendered for filing as an initial rate schedule a System Power—Unreserved Power Contract between NEPCO and the Town of Braintree, Massachusetts, Electric Light Department (Braintree) dated as of April 1, 1976.

The Power Contract provides for NEPCO's supply to Braintree of a 21,450 KW entitlement of System Power—Unreserved capacity, together with related energy during the period commencing on April 1, 1976, and extending until the earlier to occur of (1) the commercial operation date of Braintree's combined-cycle unit now under construction in Braintree, Massachusetts or (2) March 31, 1977. Said term may be extended from month to month. "System Power—Unreserved" is electric power supplied by NEPCO without specification as to the source of generation, without reserves, and various percentages which are made available for delivery only at such times as, and to the extent that, specified NEPCO generating units are generating power on line or available for such generation.

NEPCO requests waiver of the notice requirement so as to permit the Power Contract to become effective as of April 1, 1976 in accordance with its terms.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before February 4, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

[Docket Nos. E-7638 and E-7647]

PUBLIC SERVICE COMPANY OF INDIANA, INC.

Extension of Time

JANUARY 18, 1977.

In the matter of Public Service Company of Indiana, Inc., Southern Indiana Gas and Electric Company and Public Service Company of Indiana, Inc.

On January 7, 1977, the City of Huntingburg, Indiana, filed a motion to extend the date for filing comments, as set by Commission's notice issued January 4, 1977, on the "Motion to Reaffirm and Ratify the Commission's Prior Findings and Order and Terminate Proceedings", filed December 1, 1976, by Public Service Company of Indiana, Inc., and Southern Indiana Gas and Electric Company, in the above-designated proceedings. The motion states that parties to the proceeding have no objection.

Upon consideration, notice is hereby given that the date for filing protests and petitions to intervene is extended to and including January 31, 1977.

LOIS D. CASHELL,
Acting Secretary.

[FR Doc.77-2438 Filed 1-25-77;8:45 am]

[Docket No. ER77-138]

SOUTHERN CALIFORNIA EDISON CO.

Filing of Initial Rate Schedule and Request for Waiver

JANUARY 18, 1977.

Take notice that Southern California Edison Company (Edison), on January 7, 1977, tendered for filing a December 7, 1976, Agreement with the San Diego Gas and Electric Company providing for the transmission by Edison on an interruptible basis of power purchased on a non-firm basis by San Diego from two separate sources. Edison will charge San Diego for transmission, dispatching, and

scheduling services, and for losses in delivery of such non-firm energy.

Edison states that San Diego requests that service be initiated at the earliest possible date under this Agreement, and for that reason Edison requests that the notice provisions of the Commission's regulations be waived and the filing be permitted to become effective no later than January 31, 1977.

Copies of this filing were served upon San Diego Gas and Electric Company and the Public Utilities Commission of the State of California.

Any person desiring to be heard or to protest this application should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before January 31, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket No. ER77-149]

SOUTHERN CALIFORNIA EDISON CO.

Tariff Change

JANUARY 18, 1977.

Take notice that Southern California Edison Company (Edison) on January 12, 1977 tendered for filing a change of rate of interruptible transmission services under the provisions of Edison's agreement with the City of Riverside as embodied in Rate Schedule FPC No. 84. The new rate for these services effective on January 13, 1977, which requires waiver of the notice requirements, is 1.31 mills per kilowatt-hour. This is an increase of .02 mills per kilowatt hour. Said filing is in accordance with terms of the agreement stating that whenever the California Public Utilities Commission (CPUC) finds a new overall rate of return on retail operations to be reasonable for Edison • • • the rate for interruptible transmission service shall be adjusted based on said new rate of return. Said new rate of return was authorized in CPUC Decision 86794.

The Company states that copies of this filing were served upon the City of Riverside, California, and the Public Utilities Commission of the State of California.

Any person desiring to be heard or to protest this application should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before February 3, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any persons wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket No. ER77-150]

SOUTHERN CALIFORNIA EDISON CO.

Tariff Change

JANUARY 18, 1977.

Take notice that Southern California Edison Company (Edison) on January 12, 1977 tendered for filing a change of rate for interruptible transmission services under the provisions of Edison's agreement with the City of Anaheim as embodied in Rate Schedule FPC No. 83. The new rate for these services effective on January 13, 1977, which requires waiver of the notice requirements, is 1.24 mills per kilowatthour. This is an increase of .02 mills per kilowatthour. Said filing is in accordance with terms of the agreement stating that whenever the California Public Utilities Commission (CPUC) finds a new overall rate of return on retail operations to be reasonable for Edison . . . the rate for interruptible transmission service shall be adjusted based on said new rate of return. Said new rate of return was authorized in CPUC Decision 86794.

The Company states that copies of this filing were served upon the City of Anaheim, California, and the Public Utilities Commission of the State of California.

Any person desiring to be heard or to protest this application should file a petition to intervene or protest with the Federal Power Commission, 825 North Capital N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10) All such petitions or protests should be filed on or before February 3, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket No. CP77-127]

TENNESSEE GAS PIPELINE CO. AND EAST TENNESSEE NATURAL GAS CO.

Application

JANUARY 21, 1977.

Take notice that on January 18, 1977, Tennessee Gas Pipeline Company, a Division of Tenneco Inc. (Tennessee), P.O. Box 2511, Houston, Texas 77001, and East Tennessee Natural Gas Company (East Tennessee), P.O. Box 10245, Knoxville, Tennessee 37919, filed in Docket No. CP77-127 a joint application pursuant to section 7(c) of the Natural Gas Act and § 2.79 of the Commission's general policy and interpretations (18 CFR 2.79), for a certificate of public convenience and necessity authorizing the transportation of natural gas on an interruptible basis for a limited term of two years on behalf of Briggs Division of the Celotex Corporation (Briggs), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Tennessee proposes to transport up to 850 Mcf of natural gas per days plus volumes for its fuel and use requirements from its Main Line Valve 702 plus 1.95 miles located in Desoto Parish, Louisiana, to East Tennessee for the account of Briggs at its existing Greenbrier Sales No. 2 Delivery Point in Robertson County, Tennessee (Greenbrier). East Tennessee proposes to transport such gas, up to 850 Mcf per day less reductions of volumes used for fuel and use requirements for the account of Briggs of Knoxville Utilities Board (KUB). Such gas, it is stated, would be transported and delivered by KUB to Briggs for its plant located in Knoxville, Tennessee.

It is stated that Briggs proposes to purchase such natural gas from ENERCO Exploration and Management Co. (ENERCO) from the latter's production areas in northern Louisiana for $1.40 per million Btu's in order to offset curtailments presently being imposed on it by KUB. Tennessee states that ENERCO would construct, at its sole cost, the necessary meter station and interconnection with Tennessee's existing pipeline at Tennessee's Main Line Valve 702 plus 1.95 miles.

It is further stated that Briggs would pay Tennessee each month for transportation service: (1) A demand charge to be determined by multiplying $1.27 by the maximum daily quantity, less any demand charge credit provided therein, if applicable; and (2) a volume charge equal to 17.01 cents per Mcf multiplied by (a) the total of the daily volumes delivered during such month or (b) the number of days in said month multiplied by 66⅔ percent of the maximum daily quantity, whichever is greater, less any applicable annual minimum bill credit as provided therein. Further, it is stated that Tennessee would receive 3.28 percent of the daily volume transported for fuel and use requirements. It is also stated that Briggs would pay East Tennessee each month for transportation service a charge to be determined by multiplying the rate of 20.74 cents per Mcf by the volume of natural gas actually transported and delivered by East Tennessee for the account of Briggs, and East Tennessee would retain 0.72 percent of the volume delivered for fuel and use requirements.

Briggs states that the gas to be transported would be for Priority 2 industrial uses at its Knoxville, Tennessee,

plant where Briggs manufactures porcelain enamel fixtures, and any slowdown due to failure to offset recent curtailments would result in the layoff of some 200 employees.

Tennessee and East Tennessee state that they did not consider the subject natural gas supply to be available for purchase because ENERCO has stated that it would sell the gas to one of the intrastate purchasers which has made an offer if the present arrangements are not approved.

It is stated that Tennessee and East Tennessee anticipate having capacity available to perform the subject transportation service because of curtailments resulting from a supply deficiency on their respective systems.

Any person desiring to be heard or to make any protest with reference to said application should on or before February 4, 1977, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act, and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-2415 Filed 1-25-77;8:45 am]

[Docket No. RP71-11 (PGA77-3); RP76-99 (non-consolidated)]

TENNESSEE NATURAL GAS LINES, INC.

Proposed Rate Change Under Tariff Rate Adjustment Provisions

JANUARY 14, 1977.

Take notice that on January 4, 1977, Tennessee Natural Gas Lines, Inc. ("Tennessee Natural") tendered for filing proposed changes to First Revised Volume No. 1 of its FPC Gas Tariff to be effective on February 1, 1977, consisting of the following revised tariff sheets:

Twentieth Revised Sheet No. PGA-1,
Fifteenth Revised Sheet No. PGA-2, and
Third Revised Sheet No. 4-A.

Tennessee Natural states that the purpose of the instant filing is to make a PGA rate adjustment pursuant to the purchased gas adjustment provisions of Rate Schedule G-1 and SWS-1 of its FPC Gas Tariff to reflect a rate change of its sole supplier, Tennessee Gas Pipeline Company, a Division of Tenneco Inc. ("Tennessee Gas"), proposed to become effective on February 1, 1977, pursuant to such supplier's motion to make rates effective filed on December 20, 1976 in its general rate increase proceeding at Docket No. RP76-137.

Tennessee Natural further advises the Commission that it has discovered that, although the same has operated correctly in the past, in the future due to changed circumstances the PGA provisions of its tariff as applied to its SWS-1 Rate Schedule (for service from its LNG storage facility) may result in Tennessee Natural recovering rate changes of its supplier on a time period basis different than the Commission may have intended; that if such is the case, the PGA provisions of its tariff as applied to its SWS-1 Rate Schedule will have to be changed and that the same will be complex and will require time and study to work out. Tennessee Natural states its belief that the proper forum for working out such problems, if any, would be its general rate proceeding in Docket No. RP76-99. Tennessee Natural states that, in the meantime, it voluntarily agrees that it will collect the PGA increase in the commodity component of its SWS-1 Rate Schedule (Sheet No. PGA-2 tendered for filing) subject to refund and will refund back to the effective date thereof any amounts collected thereunder in excess of the rates it would have collected under any revised PGA clause applicable to its SWS-1 rate schedule which may finally be approved.

Tennessee Natural states that copies of the filing have been mailed to its jurisdictional customer and the affected state regulatory commission.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 N. Capitol Street, Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before January 28, 1977.

Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. This notice does not provide for consolidation of the captioned proceedings and any party desiring to protest or intervene in either proceeding should file separately in either docket. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-2418 Filed 1-25-77;8:45 am]

[Docket No. CP77-125]

TEXAS GAS TRANSMISSION CORP.

Application

JANUARY 21, 1977.

Take notice that on January 18, 1977, Texas Gas Transmission Corporation, 3800 Frederica Street, Owensboro, Kentucky 42301 (Applicant) filed in Docket No. CP77-125 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing for a term of ten years the transportation of up to 3,750 Mcf of natural gas per day on an interruptible basis for General Electric Company (GE) to be used for Priority 2 and 3 requirements in GE's plants in Louisville, Kentucky, Bloomington, Indiana, and Columbia, Maryland, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant proposes to transport natural gas for GE pursuant to an agreement dated January 6, 1977, between Applicant and GE. It is stated that Applicant would receive the volumes of gas to be transported from Natural Gas Pipeline Company of America (Natural) through existing facilities at the tailgate of Texaco's Henry plant and redeliver, for the account of GE, up to 2,000 Mcf of gas per day to Louisville Gas and Electric Company (LG&E), up to 250 Mcf of gas per day to Indiana Gas Company, Inc. (Indiana Gas), and up to 1,500 Mcf of gas per day to Columbia Gulf Transmission Company (Columbia Gulf). It is further stated that the gas would be delivered to LG&E and Indiana Gas at existing points of delivery and to Columbia Gulf by a dispatching arrangement with Texaco's Henry plant. It is indicated that deliveries to Columbia Gulf are contingent upon the continuation of the dispatching arrangement with Texaco's Henry plant.

It is stated that the gas to be transported would be produced from the Blue Buck Field, Cameron Parish, Louisiana. It is stated that GE has signed an option agreement with Texas Crude, Inc. (Texas Crude), and other owners, under which GE has acquired the option to purchase in place reserves located in the Blue Buck Field. It is indicated that Texas Crude would sell the gas to an intrastate customer if GE does not buy the gas.

Applicant states that it would collect an initial charge of 20.68 cents per Mcf for volumes delivered to LG&E and 21.32 cents per Mcf for volumes delivered to Indiana Gas. Applicant further states

that no rate would be charged for volumes delivered to Columbia Gulf. Applicant further states that it would retain a volume equal to 8.6 percent of the volumes delivered to LG&E and a volume equal to 9.1 percent of the volumes delivered to Indiana Gas. It is said that no volumes will be retained for gas delivered to Columbia Gulf. It is stated that the retained volumes would be utilized as makeup for compressor fuel and line loss, which percentages were calculated on an incremental basis for pipeline throughout to and within the rate zones in which the deliveries would be made.

Applicant states that no new facilities would be constructed.

Any person desiring to be heard or to make any protest with reference to said application should on or before February 4, 1977, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to the proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[FR Doc. 77-2413 Filed 1-25-77;8:45 am]

[Docket No. RP77-25]

TRANSCO GAS SUPPLY CO.

Tariff Filing

JANUARY 17, 1977.

Take notice that Transco Gas Supply Company (Gasco) on December 30, 1976, as corrected on January 6, 1977, tendered for filing First Revised Sheet No. 106 to its FPC Gas Tariff, Original Volume No. 2 with the proposed effective date of February 1, 1977. Transco states that this revised tariff sheet provides for an increase from 14.39% to 15.73% in the percentage applicable to return and income taxes on Gasco's rate base. This percentage increase is occasioned by a rate increase filing to be placed into effect by Transcontinental Gas Pipe Line Corporation (Transco) in Docket No. RP76-136 on February 1, 1977, subject to refund.

Under the terms of Gasco's approved tariff, the percentage applicable to return and income taxes on Gasco's rate base is 14.39% or such other percentage applicable to return and income taxes which is reflected in any rate filing of Transco; provided, however, that if such other percentage is reflected in a rate filing of Transco under which revenues are being collected subject to refund, Gasco shall make such refunds and adjustments as may be required based upon the final determination by the Federal Power Commission of such percentage for Transco.

The Company states that copies of the filing have been mailed to Transco and, for information purposes, to each of Transco's customers and interested State Commissions.

Any persons desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before January 28, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-2440 Filed 1-25-77;8:45 am]

[Docket No. RP77-26]

TRANSCONTINENTAL GAS PIPE LINE CORP.

Tariff Filing

JANUARY 14, 1977.

Take notice that Transcontinental Gas Pipe Line Corporation (Transco) on December 30, 1976, tendered for filing certain revised tariff sheets to its FPC Gas Tariff Original Volume No. 2.

Transco states that these tariff sheets provide for an increase in the rates charged for the interruptible transportation service rendered by Transco. The proposed effective date of such increased rates is January 31, 1977, and it is requested that the Commission suspend the use of such tariff sheets for one (1) day and provide that the sheets become effective February 1, 1977, subject to refund pending the outcome of the proceedings in Docket No. RP76-136.

Transco also states that its general rate increase filed in the above referenced docket on July 30, 1976, was suspended until February 1, 1977. In that docket Transco did not propose an increase for interruptible transportation service since it believed that the present rates were sufficient to cover the proper share of Transco's cost of service. However, the staff of the Commission in submitting its top sheets in Docket No. RP76-136 allocated greater costs to interruptible service than would be provided under existing rates. Transco, in order that its rates be compensatory in the event the allocation methods utilized by the Staff are found to be proper, further states that it has developed rates for interruptible transportation service utilizing the method of cost allocation as Staff in its top sheets.

The Company states that copies of the filing have been mailed to each of the customers receiving service under the affected schedules.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before January 28, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Public Health Service

NATIONAL IMMUNIZATION: POLICY WORK GROUPS

Meetings

Notice is hereby given that as a follow-up to a public meeting on National Immunization Policy held November 12, 13, and 14, 1976, the Assistant Secretary for Health, Department of Health, Education, and Welfare, has entered into a contract with JRB Associates, Inc., 8400 Westpark Drive, McLean, Virginia, to establish and coordinate the activities of six Work Groups with membership from outside the Federal government. Each group is charged with developing a set of recommendations to be used by the Public Health Service in developing national policy relative to immunization. Meetings of these Work Groups are open to the public.

The areas of concern of the six Work Groups and tentative schedules of meetings are as follows:

NATIONAL IMMUNIZATION POLICY

January 25–26, Sheraton O'Hare, Rosemont, Illinois.

February 21–22, Sheraton Motor Inn-Airport, Romulus, Mich.

CONSENT

February 11, February 25, Key Bridge Marriott, Arlington, Virginia.

LIABILITY

January 31, February 13–14, February 28, Crystal City Marriott, Arlington, Virginia.

HEALTH INFORMATION AND PUBLIC AWARENESS

February 12–13, Sheraton Motor Hotel, New Orleans, Louisiana, March 1–2 (Washington, D.C. metropolitan area).

RESEARCH AND DEVELOPMENT

February 5–6, Shamrock Hilton, Houston, Texas.

PRODUCTION AND SUPPLY

(Meeting in conjunction with the Research and Development group) February 5–6, Shamrock Hilton, Houston, Texas.

Policy recommendations developed by the Work Groups will be available after March 15, 1977, and may be obtained from Ms. Marie Curtis (see below).

The schedule of meetings is tentative; time and place of meetings may be confirmed by contacting Ms. Marie Curtis, JRB Associates, Inc., McLean, Virginia, (703) 821–4666.

CHARLES U. LOWE,
Special Assistant for Child Health Affairs.

PUBLIC HEALTH SERVICE REGIONAL OFFICES

Statement of Organization, Functions, and Delegations of Authority

Part HD, Chapter HD, of the Statement of Organization, Functions, and Delegations of Authority of the Department of Health, Education, and Welfare entitled Public Health Service (PHS) Regional Offices (39 FR 1468, January 9, 1974, as amended by 42 FR 2123, January 10, 1977) is amended to reflect the transfer of the alcoholism, drug abuse, and mental health functions from the Division of Health Services to the newly established Division of Alcoholism, Drug Abuse, and Mental Health in Region X.

Section HD–B, Organization and Functions, is amended by deleting the title "Division of Alcoholism, Drug Abuse, and Mental Health" (HD2T, HD7T, HD8T, HD9T) and substituting the title "Division of Alcoholism, Drug Abuse, and Mental Health" (HD2T, HD7T, HD8T, HD9T, HDXT). There is no change in the functional statement for this division.

Dated: January 17, 1977.

JOHN OTTINA,
Assistant Secretary for Administration and Management.

[FR Doc.77-2574 Filed 1-25-77;8:45 am]

Office of the Assistant Secretary for Health

HEALTH PROFESSIONS EDUCATIONAL ASSISTANCE

Notice of Rulemaking Procedures

The Health Professions Educational Assistance Act of 1976 (Pub. L. 94–484) enacted on October 12, 1976, amends Title VII of the Public Health Service Act to revise and extend programs which provide student and institutional assistance for training in the health and allied health professions; and assign personnel to provide health services in health manpower shortage areas. The Department of Health, Education, and Welfare has identified the need to develop and publish approximately forty (40) separate Notices of Proposed Rulemaking (NPRM) and approximately forty (40) Final Rule documents no later than September 30, 1978 in order to implement the Act.

The Secretary's regulations policy established on July 25, 1976,[1] provides for the publication of Notices of Intent (NOIs) in addition to the requirements for publishing Notices of Proposed Rulemaking, and Final Rules, in order to increase the opportunity for public involvement early in the rulemaking process. This same policy statement also prescribes a 45 day comment period for Notices of Intent and Notices of Proposed Rulemaking unless a lesser period of 30 days has been justified to and approved by the Secretary.

In recognition of the large volume of rulemaking documents required under this Act, their complexity, and the relatively short time available, the Secretary, after careful consideration, has permitted the following modifications to the Regulatory Policy of July 25, 1976; [2]

1. Authority for issuing Notices of Intent has been delegated to the Assistant Secretary for Health;

2. Notices of Intent will be published covering related clusters of proposed rules, rather than publishing separate Notices of Intent for each proposed regulation; and,

3. A 30-day comment period has been approved for Notices of Intent and Notices of Proposed Rulemaking for implementing Sections 701 and Section 783,

[1] A complete text of the Secretary's Regulations Policy of July 25, 1976, was published in the FEDERAL REGISTER, of August 17, 1976, (41 FR 34811–34812).

[2] These modifications apply only to Rulemaking Procedures for Regulations promulgated under Pub. L. 94–484.

Physicians Assistants and Expanded Function Dental Auxiliaries, and Section 332(b) Health Manpower Shortage Area Criteria.

The Secretary has concluded that these procedural modifications will maintain the integrity of the July 25, 1976 policy, particularly, those aspects designed to allow increased opportunity for early public involvement, yet allow the Department the ability to promulgate the required rulemaking documents by September 30, 1978.

A list of the approximate publication dates of Notices of Intent and the program topics to be covered within each Notice, is provided below:

Subject	Authority[1]

NATIONAL COMMISSION FOR PROTECTION OF HUMAN SUBJECTS OF BIOMEDICAL AND BEHAVIORAL RESEARCH

Meeting

Notice is hereby given that the National Commission for the protection of Human Subjects of Biomedical and Behavioral Research will meet on February 11, 12 and 13, 1977, in Conference Room 6, C Wing, Building 31, National Institutes of Health, 9000 Rockville Pike, Bethesda, Maryland. The meeting will convene at 9:00 a.m. each day and will be generally open to the public, subject to the limitations of available space. Topics identified in the mandate to the Commission under the National Research Act (Public Law 93–348), as amended, and the Health Research and Health Services Amendments of 1976 (Public Law 94–278), including the identification of ethical principles that should underlie the conduct of biomedical and behavioral research involving human subjects, and the disclosure of research information, will be the agenda for this meeting.

Written materials of any length may be submitted to the Commission at any time. Requests for information should be directed to Ms. Anne Ballard (301–496–7776), Room 125, Westwood Building, 5333 Westbard Avenue, Bethesda, Maryland 20016.

Dated: January 17, 1977.

CHARLES U. LOWE,
Executive Director, National Commission for the Protection of Human Subjects of Biomedical and Behavioral Research.

Bureau of Land Management

[NM 29647, 29648, 29649, 29650, 29651, 29652, 29653, 29654, and 29655]

NEW MEXICO

Notice of Applications

JANUARY 19, 1977.

Notice is hereby given that pursuant to Section 28 of the Mineral Leasing Act of 1920 (30 U.S.C. 185) as amended by the Act of November 16, 1973 (87 Stat. 576), El Paso Natural Gas Company has applied for nine 4½-inch natural gas pipelines rights-of-way across the following lands:

NEW MEXICO PRINCIPAL MERIDIAN, NEW MEXICO

T. 26 N., R. 12 W.,
Sec. 14, SE¼NW¼;
Sec. 34, NE¼NE¼.
T. 28 N., R. 12 W.,
Sec. 7, lots 4 and 6;
Sec. 17, NW¼NW¼;
Sec. 18, lot 1, S½NE¼, NE¼NE¼, and SW¼SE¼;
Sec. 23, NE¼SW¼;
Sec. 32, W½NW¼, NE¼NW¼.
T. 27 N., R. 13 W.,
Sec. 35, NE¼NE¼.
T. 28 N., R. 13 W.,
Sec. 12, SE¼SE¼.

These pipelines will convey natural gas across 2.136 miles of national resource lands in San Juan County, New Mexico.

The purpose of this notice is to inform the public that the Bureau will be proceeding with consideration whether the applications should be approved, and if so, under what terms and conditions.

Interested persons desiring to express their views should promptly send their name and address to the District Manager, Bureau of Land Management, P.O. Box 6770, Albuquerque, New Mexico 87107.

FRED E. PADILLA,
Chief, Branch of Lands and Minerals Operations.

NEW MEXICO

Notice of Application

JANUARY 17, 1977.

Notice is hereby given that, pursuant to Section 28 of the Mineral Leasing Act of 1920 (30 U.S.C. 185), as amended by the Act of November 16, 1973 (87 Stat. 576), The Permian Corporation has applied for a water plant site and access road right-of-way across the following land:

NEW MEXICO PRINCIPAL MERIDIAN, NEW MEXICO

T. 21 S., R. 27 E.,
Sec. 17, NW¼SW¼;
Sec. 18, NE¼SW¼ and N½SE¼.

The water plant site and access road will be used in connection with a salt-water disposal well and will occupy 2.5 acres and 0.743 mile of national resource land in Eddy County, New Mexico.

The purpose of this notice is to inform the public that the Bureau will be proceeding with consideration of whether the application should be approved, and if so, under what terms and conditions.

Interested persons desiring to express their views should promptly send their name and address to the District Manager, Bureau of Land Management, P.O. Box 1397, Roswell, New Mexico 88201.

FRED E. PADILLA,
Chief, Branch of Lands and Minerals Operations.

OREGON

Order Providing for Opening of Public Lands

JANUARY 18, 1977.

1. In an exchange of lands made under the provisions of section 8 of the Act of June 28, 1934, 48 Stat. 1269, 1272, as amended and supplemented, 43 U.S.C. 315g (1970), the following lands have been reconveyed to the United States:

WILLAMETTE MERIDIAN

T. 30½ S., R. 34 E.,
Sec. 25, lots 1, 2, 3, and 4, SE¼NE¼, S½NW¼, E½SW¼, and E½SE¼;
Sec. 26, lots 1, 2, and 3 and S½NE¼;
Sec. 36, N½ and SW¼.
T. 31 S., R. 34 E.,
Sec. 3, NW¼SE¼;
Sec. 12, lots 1, 2, 3, and 4, SW¼NE¼, E½NW¼, SW¼NW¼, SW¼, and NW¼SE¼;
Sec. 13, lots 1 and 2, W½NE¼, and NE¼NW¼.
T. 32S., R. 34 E.,
Sec. 27, W½SW¼;
Sec. 28, NE¼SW¼ and SE¼;
Sec. 33, E½;
Sec. 34, W½W½.
T. 33 S., R. 34 E.,
Sec. 3, lots 3 and 4, S½NW¼, and E½SW¼;
Sec. 4, lots 1 and 2, S½NE¼, SE¼NW¼, and W½SW¼;
Sec. 5, lots 3, 4, 5, 6, and 7, SE¼NW¼, E½SW¼, and SE¼;
Sec. 8, lot 1, N½NE¼, and NE¼NW¼;
Sec.9, NW¼NW¼, S½N½, E½SW¼, and NW¼SE¼;
Sec. 16, lots 1, 2, 3, and 4;
Sec. 17, SW¼NE¼, SE¼NW¼, E½SW¼, and W½SE¼;
Sec. 20, SW¼;
Sec. 28, lot 1, E½NE¼, SW¼NE¼, E½NW¼, and N½SE¼;
Sec. 29, N½NE¼ and W½;
Sec. 30, E½SE¼;
Sec. 31, NE¼NE¼;
Sec. 32, NW¼NW¼ and E½W½.
T. 34 S., R. 34 E.,
Sec. 5, lot 2, SW¼NE¼, and W½SE¼;
Sec. 7, lot 3, SE¼NE¼, NE¼SW¼, and N½SE¼;
Sec. 8, NW¼NE¼, N½NW¼, SW¼NW¼, and N½SW¼.
T. 35 S., R. 34 E.,
Sec. 17, NE¼.
T. 30 S., R. 35 E.,
Sec. 17, W½;
Sec. 18, NE¼NE¼;
Sec. 19, lots 3 and 4 and SE¼SW¼;
Sec. 20, NW¼, NE¼SW¼, NW¼SE¼, and S½SE¼;
Sec. 28, SW¼NW¼ and N½SW¼;
Sec. 29, E½;
Sec. 30, lots 1, 2, and 4, NE¼, E½W½, N½SE¼, and SW¼SE¼;
Sec. 31, lots 2 and 3, W½NE¼, and E½W½;
Sec. 32, E½E½, and NW¼SW¼;
Sec. 33, SW¼, W½SE¼, and SE¼SE¼.
T. 31 S., R. 35 E.,
Sec. 4, lots 1, 2, 5, 6, and 7;
Sec. 5, lots 1, 8, 29, 36, 37, 38, and 39;
Sec. 6, lots 32, 33, and 40;
Sec. 7, lots 3 and 4;
Sec. 18, lot 1 and NE¼NW¼.
T. 32 S., R. 35 E.,
Sec. 6, SW¼NE¼, W½SE¼, and SE¼SE¼;
Sec. 7, lots 2, 3, 4, and 5, NW¼NE¼, and NE¼NW¼.

The areas described aggregate 10,003.37 acres in Harney County.

2. All the minerals in the following described lands were and continue to be in United States' ownership and open to operation of the mining laws (Ch. 2, Title 30 U.S.C.) and the mineral leasing laws:

WILLIAMETTE MERIDIAN

T. 30; S., R. 34 E.,
Sec. 25, W½NW¼ and E½SW¼;
Sec. 26, lots 1, 2, and 3, and S½NE¼.
T. 31 S., R. 34 E.,
Sec. 3, NW¼SE¼;
Sec. 12, lots 3 and 4, E½SW¼, and NE¼SE¼;
Sec. 13, lot 2 and SW¼NE¼.
T. 32 S., R. 34 E.,
Sec. 27, E½SW¼,
Sec. 28, NE¼SW¼ and SE¼;
Sec. 33, NW¼NE¼;
Sec. 34, W½N¼ and SW¼SW¼.
T. 33 S., R. 34 E.,
Sec. 3, lot 4 and SW¼NW¼;
Sec. 4, SW¼NE¼, SE¼NW¼, and W½SW¼;
Sec. 5, lots 3 and 4, SE¼NW¼, N½SE¼, and SE¼SE¼;
Sec. 8, NE¼NE¼;
Sec. 9, SW¼NE¼ and W½NW¼;
Sec. 17, SW¼NE¼, SE¼NW¼, E½SW¼, and W½SE¼;
Sec. 20, N½SW¼ and SW¼SW¼;
Sec. 28, lot 1, NE¼NE¼, S½NE¼, E½NW¼, and N½SE¼;
Sec. 29, W¼NW¼ and NW¼SW¼;
Sec. 30, E½SE¼;
Sec. 31, NE¼NE¼;
Sec. 32, E½W½ and NW¼NW¼.
T. 34 S., R. 34 E.,
Sec. 5, lot 2, SW¼NE¼, and W½SE¼;
Sec. 7, lot 3, SE¼NE¼, NE¼SW¼, and N½SE¼;
Sec. 8, NW¼NE¼, N½NW¼, SW¼NW¼, and N½SW¼.
T. 30 S., R. 35 E.,
Sec. 17, NE¼NW¼ and E½SW¼;
Sec. 20, NE¼, NE¼SW¼, NW¼SE¼, and S½SE¼;
Sec. 28, SW¼NW¼;
Sec. 29, NE¼ and SW¼SE¼;
Sec. 33, SW¼, W½SE¼, and SE¼SE¼.
T. 31 S., R. 35 E.,
Sec. 4, lots 2, 5, 6, and 7;
Sec. 5, lots 1, 8, 29, 36, 37, 38, and 39;
Sec. 6, lots 32, 33, and 40;
Sec. 7, lots 3 and 4.

3. The subject lands are located along the eastern side of Steens Mountain approximately 50 to 80 miles southeast of the City of Burns. Elevation ranges from 5,800 to 7,000 feet above sea level, and the topography varies from gently sloping meadows and basins to steep rocky bluffs. Vegetation consists primarily of sagebrush, native grasses, and juniper. In the past, the lands have been used for livestock grazing purposes. The lands will be managed, together with adjoining national resource lands, for multiple use.

4. Subject to valid existing rights, the provisions of existing withdrawals, and the requirements of applicable law, the lands described in paragraph 1 hereof are hereby open (except as already provided in paragraph 2 hereof) to operation of the public land laws, including the mining laws (Ch. 2, Title 30 U.S.C. and the mineral leasing laws. All valid applications received at or prior to 10 a.m. February 23, 1977, shall be considered as simultaneously filed at that time. Those received thereafter shall be considered in the order of filing.

5. Inquiries concerning the lands should be addressed to the Chief, Branch of Lands and Minerals Operations, Bureau of Land Management, P.O. Box 2965, Portland, Oregon 97208.

HAROLD A. BERENDS,
Chief, Branch of Lands and Minerals Operations.

OUTER CONTINENTAL SHELF OFFICE

Availability of Official Protraction Diagrams

1. Notice is hereby given that, effective with this publication, the following OCS Official Protraction Diagrams, last approved on the dates indicated, are available, for information only, in the New Orleans Outer Continental Shelf Office, Bureau of Land Management, New Orleans, Louisiana. In accordance with Title 43, Code of Federal Regulations, these protraction diagrams are the basic record for the description of mineral and oil and gas lease offers in the geographic areas they represent.

2. For the benefit of interested parties and in the public interest, and for their convenience, this publication constitutes a composite list of all official protraction diagrams now covering the Gulf of Mexico OCS. Prior purchasers of any of these diagrams should determine if they are current by comparing their respective approval dates with the approval dates listed herein.

WYOMING

Application

JANUARY 17, 1977.

Notice is hereby given that pursuant to Section 28 of the Mineral Leasing Act of 1920, as amended (30 U.S.C. 185), Northwest Pipeline Corporation of Salt Lake City, Utah, filed an application for a right-of-way to construct a cathodic protection station for the purpose of maintaining protection and safe operation of their natural gas pipeline system across the following described National Resource Lands:

SIXTH PRINCIPAL MERIDAN, WYOMING

T. 27 N., R. 114 W.
Sec. 13, SW¼SW¼.

The cathodic protection station will be used for the protection and safe operation of their natural gas pipeline system located in sec. 13, T. 27 N., R. 114 W., Sublette County, Wyoming.

The purpose of this notice is to inform the public that the Bureau will be proceeding with consideration of whether the application should be approved and, if so, under what terms and conditions.

Interested persons desiring to express their views should do so promptly. Persons submitting comments should include their name and address and send them to the District Manager, Bureau of Land Management, Highway 187 North, P.O. Box 1869, Rock Springs, Wyoming 82901.

Fish and Wildlife Service

DEVELOPMENT OF STANDARDS FOR TRANSPORT OF ENDANGERED WILDLIFE AND PLANT SPECIMENS

Public Hearing

The Director, U.S. Fish and Wildlife Service, hereby issues notice of an informal public hearing on February 16, 1977, 9:30 a.m. at 1717 H Street, N.W., Room 430, in accordance with provisions of the Endangered Species Act of 1973 (16 U.S.C. 1531–43).

The purpose of the hearing is to solicit information and public comment on guidelines for the proper and humane shipment of live plant and wildlife specimens in international commerce. This information will aid the U.S. Fish and Wildlife Service in adopting such guidelines to meet the requirements of the Convention on International Trade in Endangered Species of Wild Fauna and Flora. That Convention requires the Service, as U.S. Management Authority, be "* * * satisfied that any living specimen (for which an export permit is to be issued) will be so prepared and shipped as to minimize the risk of injury, damage to health, or cruel treatment; * * *"

The Convention came into effect July 1, 1975, when the first ten nations ratified it. Since that time, 24 more nations have become Parties to the Convention. The Parties, at a conference held in Berne, Switzerland, in November 1976, appointed a special committee to develop uniform international guidelines for the shipment of animal and plant specimens under the Convention. The proposed guidelines will be presented at future conferences of the Parties.

Because of probable delays in implementing international guidelines, the U.S. Fish and Wildlife Service believes it is desirable for the United States to establish its own set of guidelines and standards at this time. In order to obtain the widest possible range of opinions and the greatest amount of data, the comment of all public sectors in invited. The Service is particularly interested in obtaining biological and veterinary data on proper standards for shipment of various plant and animal specimens.

The hearing will be informal and may include discussion between the Chairman and various speakers. Summary records will be kept and written statements are invited. The record will remain open until February 23, 1977, for the submission of further written comments which may be submitted to the Director (FWS/WPO), U.S. Fish and Wildlife Service, Washington, D.C. 20240.

LYNN A. GREENWALT,
Director, U.S. Fish and Wildlife Service.

EMERGENCY CLOSURE OF SPECIAL SCAUP SEASON

Acting under the authority of 50 CFR 20.26 pertaining to the emergency closure of migratory bird seasons, I have determined, on January 20, 1977, not to permit the opening on January 21, 1977, of the Special Scaup Season in Virginia as described in the FEDERAL REGISTER of September 30, 1976 (41 FR 43176) under §20.105(h) because to do so would constitute an imminent threat to the safety of canvasback and redhead populations wintering in the designated Special Scaup Season area of Virginia.

This notification in the FEDERAL REGISTER is subsequent to the announcement of this action to the general public in the affected area via local radio, television and newspaper media.

Dated: January 21, 1977.

LYNN A. GREENWALT,
Director, U.S. Fish and Wildlife Service.

Sec. 2, W½SW¼;
Secs. 3 to 10, inclusive;
Sec. 11, SW¼NE¼, W½, W½SE¼;
Secs. 13 to 18, inclusive;
Sec. 19, lots 1 to 3, inclusive, E½, E½NW¼, NE¼SW¼;
Secs. 20 to 29, inclusive;
Sec. 30, NE¼, SE¼NW¼, N½SE¼, SE¼SE¼;
Secs. 32 to 36, inclusive.

T. 8 S., R. 92 W.,
Sec. 1;
Sec. 2, lots 1 and 2, S½NE¼, N½SE¼, SE¼SE¼;
Sec. 12, N½, E½SW¼, SE¼;
Sec. 13, NE¼, N½SE¼, SE¼SE¼;
Sec. 24, NE¼NE¼.

T. 9 S., R. 90 W.,
Secs. 1 and 2;
Sec. 3, N½NE¼, SE¼NE¼, E½SE¼;
Sec. 5, W½, W½SE¼, SE¼SE¼;
Secs. 6 to 8, inclusive;
Sec. 9, W½NW¼, S½;
Sec. 10, S½SW¼, SW¼SE¼;
Sec. 11, E½, N½NW¼, SE¼NW¼, NE¼SW¼, S½SW¼;
Sec. 12 to 18, inclusive;
Sec. 19, N½, N½SE¼, SE¼SE¼;
Secs. 20 to 28, inclusive;
Sec. 29, N½, E½SW¼, NW¼SW¼, SE¼;
Sec. 30, E½NE¼;
Sec. 32, NE¼, NE¼NW¼, SE¼;
Secs. 33 to 36 inclusive.

T. 9 S., R. 91 W.,
Secs. 1 to 3, inclusive;
Sec. 4, lots 1 to 5, inclusive, SW¼NW¼, E½SW¼, SE¼;
Sec. 5, lot 1, SE¼NE¼;
Sec. 9, lot 1, that part of H.E.S. 168, in the NE¼NE¼;
Sec. 10, lots 1 to 7, inclusive, NE¼NE¼, SW¼NE¼, NW¼SE¼, S½SE¼, that part of the H.E.S. 168 lies in W½NW¼;
Secs. 11 to 13, inclusive;
Sec. 14, lots 1 to 8, inclusive, NE¼NE¼, that part of H.E.S. 65 that lies in S½NW¼, N½SW¼, and W½SE¼, that part of H.E.S. 214 that lies in S½SE¼;
Sec. 15, N½NE¼, SE¼NE¼;
Sec. 24, lots 1 to 4, inclusive, NE¼NE¼, that part of H.E.S. 218 and 219 that lies on the N½; and H.E.S. 169, 178, 216, 217, 220, 222, 225, 226, and 236.

T. 9 S., R. 94 W.,
Sec. 30, lots 3 and 4;
Sec. 31, lots 1 to 4, inclusive, SE¼SW¼.

T. 10 S., R. 90 W.,
Sec. 4;
Sec. 5, NE¼ SW¼SW¼, E½SW¼, SE¼;
Sec. 8, N½, E½SW¼, SE¼;
Secs. 9 and 16;
Sec. 17, NE¼, NE¼NW¼, S½NW¼, N½SW¼, SE¼SW¼, SE¼;
Sec. 20, NE¼, E½NW¼, NE¼SW¼, SE¼;
Secs. 21 and 28;
Sec. 29, N½NE¼, SE¼NE¼, NE¼SE¼;
Sec. 31, NE¼SE¼, S½SE¼, that part of H.E.S. 268 that lies in the NE¼SE¼;
Sec. 32, S½, that part of H.E.S. 268 that lies in the W½S½;
Sec. 33.

T. 10 S., R. 94 W.;
Sec. 6, lots 3 to 7, inclusive, SE¼NW¼;
Sec. 7, lots 1 to 4, inclusive, E½W½, SW¼SE¼;
Sec. 18, lots 1 to 3, inclusive, E½, E½W½;
Sec. 19, N½NE¼, SW¼NE¼.

T. 11 S., R. 90 W.,

T. 11 S., R. 91 W.,
Sec. 2, SW¼SW¼;
Sec. 10, S½NE¼, that part of H.E.S. 281 in SE¼NE¼, SE¼NW¼, E½SW¼, that part of H.E.S. 279 in SE¼SW¼, SE¼;
Sec. 11, SW¼NE¼, NW¼NW¼, that part of H.E.S. 281 in NW¼NW¼, S½NW¼, S½;
Sec. 12, E½, W½SW¼;
Sec. 13;
Sec. 14, and that part of H.E.S. 128 in W½;
Sec. 15, NE¼, SE¼NW¼, NE¼SW¼, SE¼, that part of H.E.S. 128 in E½, and that part of H.E.S. 128 in SE¼NW¼;
Sec. 22, NE¼NE¼, S½NE¼, SE¼NW¼, NE¼SW¼, SE¼;
Secs. 23 to 25, inclusive;
Sec. 26, N½, E½SW¼, SE¼;
Sec. 27, NE¼NE¼;
Sec. 29, S½SW¼, that part of H.E.S. 347 in SW¼SW¼;
Sec. 30, S½NE¼, that part of H.E.S. 347 and 348 in S½NE¼, SE¼SW¼, SE¼, that part of H.E.S. 347 in E½SE¼, and that part of H.E.S. 348 in SE¼;
Sec. 31, E½, E½W½, SW¼SW¼;
Sec. 32, S½NE¼, NW¼, S½;
Sec. 33, SW¼NW¼, S½;
Sec. 34, S½S½;
Sec. 35, E½, NE¼NW¼, S½SW¼;
Sec. 36;
H.E.S. 64, 124, 126, 127, 130, 155, 157, 158, 159, 349, 373.

T. 12 S., R. 90 W.,
Secs. 1 to 18, inclusive;
Sec. 19, NE¼;
Sec. 20, N½;
Sec. 21, N½;
Sec. 22, N½;
Sec. 23, N½;
Sec. 24, N½;
H.E.S. 135, 136, 253.

RECLASSIFIED COAL LAND FROM NONCOAL LAND

Prior classification of the following subdivisions as noncoal is hereby revoked and the land is reclassified as coal land:

T. 6 S., R. 92 W.,
Sec. 34, SE¼SE¼;
Sec. 35, S½;
Sec. 36, S½NW¼, SW¼, S½SE¼.

T. 7 S., R. 91 W.,
Sec. 6, lots 4 and 5, SE¼SW¼, SW¼SE¼;
Sec. 7, lots 1 to 4, inclusive, W½NE¼, E½NW¼;
Sec. 16, SW¼SW¼;
Sec. 17, S½;
Sec. 18, lots 1 to 4, inclusive, W½NE¼, SE¼NE¼, E½W¼, SE¼;
Secs. 19 to 21, inclusive;
Sec. 27, W½, W½SE¼, SE¼SE¼;
Secs. 28 to 33, inclusive;
Sec. 34, W½E½, W½.

T. 7 S., R. 92 W.,
Secs. 1 and 2;
Sec. 3, lot 1, E½SW¼, SE¼;
Secs. 10 to 14, inclusive;
Sec. 15, E½, E½W½;
Sec. 22, NE¼, N½SE¼, SE¼SE¼;
Secs. 23 to 26, inclusive;
Sec. 27, E½E½;
Sec. 35, E½, N½NW¼, SE¼NW¼, E½SW¼;
Sec. 36.

T. 7 S., R. 96 W.,
Sec. 33, lots 5 to 8, inclusive, SE¼SE¼;
Sec. 34, lots 1 and 5, SW¼NE¼, SW¼W½SE¼.

T. 8 S., R. 89 W.,
Sec. 4, lot 4, SW¼NW¼, W½SW¼;
Sec. 5, lots 1 to 3, inclusive, S½NE¼, NE¼SE¼;
Sec. 8, SE¼NE¼, E½SE¼;
Sec. 9, W½W½;
Sec. 16, W½W½;
Sec. 17, E½NE¼, S½SW¼, NE¼SE¼, S½SE¼;
Sec. 18, lots 3 and 4, SE¼SW¼; S½SE¼;
Secs. 19 and 20;
Sec. 21, W½W½;
Sec. 28, W½W½;
Secs. 29 to 32, inclusive;
Sec. 33, W½W½.

T. 8 S., R. 96 W.,
Sec. 3, lots 2 to 4, inclusive, SW¼NE¼, S½NW¼, SW¼, W½SE¼;
Sec. 4, lots 1, 2, 3, and 5, S½N½, S½;
Sec. 5, lots 6 to 10, inclusive, lots 13 and 14, SE¼;
Sec. 7, lots 4 to 8, inclusive, SE¼SW¼, NE¼SE¼, S½SE¼;
Secs. 8 and 9;
Sec. 10, W½NE¼, NW¼, S½;
Sec. 14, NW¼SW¼, S½SW¼;
Secs. 15 to 22, inclusive;
Sec. 23, SW¼NE¼, W½, W½SE¼;
Sec. 26, NW¼NW¼, SW¼SW¼;
Sec. 27, N½NE¼, SW¼NE¼, NW¼, S½;
Secs. 28 to 33, inclusive;
Sec. 34, NE¼, NE¼NW¼, W½SW¼, E½SE¼;
Sec. 35, W½.

T. 8 S., R. 97 W.,
Sec. 13, that part south of Colorado River;
Sec. 23, that part south of Colorado River;
Sec. 24, that part south of Colorado River;
Secs. 25 and 26;
Sec. 27, that part south of Colorado River;
Sec. 28, that part south of Colorado River;
Sec. 33, that part east and south of the Colorado River;
Secs. 34 to 36, inclusive.

T. 9 S., R. 89 W.,
Sec. 4, lots 3 and 4, S½NW¼, SW¼, SW¼SE½;
Secs. 5 to 8, inclusive;
Sec. 9, W½E½, W½;
Sec. 16, W½NE¼, W½;
Secs. 17 to 19, inclusive;
Sec. 20, N½, NW¼SW¼;
Sec. 21, lots 1 and 2;
Sec. 30, lots 7 to 10, inclusive, lots 15 and 16.

T. 9 S., R. 95 W.,
Sec. 16, SW¼SW¼;
Sec. 17, SW¼SW¼, SE¼SE¼;
Sec. 18, SE¼SW¼, SE¼;
Secs. 19 and 20;

[Outer Continental Shelf Order No. 2]

GULF OF MEXICO AREA

Request for Comments

The Geological Survey hereby announces that written comments on revisions to OCS Order No. 2 for the Gulf of Mexico Area will be accepted until March 1, 1977. Proposed revisions to this document were published in the FEDERAL REGISTER on January 10, 1977 (42 FR 2137); however, the due date for comments was inadvertently omitted.

Written comments should be sent to the Acting Chief, Conservation Division, U.S. Geological Survey, National Center, Mail Stop 600. 12201 Sunrise Valley Drive, Reston. Virginia 22092.

W. A. RADLINSKI.
Acting Director.

Mining Enforcement and Safety Administration

NATIONAL MINE HEALTH AND SAFETY ACADEMY

Fees for Training and Use of Space

A notice of the proposed schedule of fees to be charged in connection with the training and use of the National Mine Health and Safety Academy, Beckley, West Virginia, was published in the FEDERAL REGISTER on November 2, 1976 (41 FR 48139). Interested persons were given until November 30, 1976, in which to submit comments in writing regarding the proposed fees. No written comments have been received and the proposed schedule of fees is hereby adopted without change, effective January 26, 1977.

Persons, other than employees of the Department of the Interior, permitted to attend training at the Academy under existing Federal statutes will be admitted on a reimbursable basis in accordance with the fees set forth in this Notice. The Secretary of the Interior may waive, in whole or in part, payments from, or in behalf of, State and local governments for the costs of their employees training at the Academy (42 U.S.C. 4222, 4742).

The daily fees, which are payable upon registration, are based upon identifiable actual costs for food, housekeeping, linens, utilities and miscellaneous expendable materials furnished by the Academy to students. These fees do not include depreciation of facilities and salaries which accrue whether the students attend the Academy or not (31 U.S.C. 483a and OMB Circular A-25). Daily fees will range from $2.35 per day for students who do not room and board at the Academy to $10.00 per day for students who will room and board at the Academy. The daily fee schedule is as follows:

Food	$5.90
Housekeeping	[1] 1.40
Linens	.35
Utilities	1.12
Miscellaneous expendable materials	[2] 1.23

[1] $0.70 per student if double occupancy.
[2] Routine supplies, materials, services and textbooks.

The cost of providing services will be reviewed periodically and fee adjustments will be made as necessary. Information on future adjustments will be published in the Academy's General Catalog.

The Secretary of the Interior may also permit the use of facilities at the Academy for meetings or performances, not directly related to the functions of Federal agencies or activities of employee groups, on a reimbursable actual cost basis provided such use does not adversely affect the interest of the Government (41 CFR Subpart 101-20.7).

Interested persons may write or call the National Mine Health and Safety Academy, P.O. Box 1166, Beckley, West Virginia 25801 (telephone 304-255-0451).

Dated: January 19, 1977.

HARRY C. MCKITTRICK,
Acting Assitant Secretary of the Interior.

National Park Service

ENVIRONMENTAL ASSESSMENT ON THE GENERAL MANAGEMENT PLAN FOR GREAT SMOKY MOUNTAINS NATIONAL PARK

Notice of Availability and Public Meetings

An Environmental Assessment considering alternatives for visitor use, development and resource management of Great Smoky Mountains National Park is available for inspection at courthouses and libraries in communities near the park, both in North Carolina and Tennessee; and at National Park Service Regional Offices in Philadelphia, Pennsylvania; Omaha, Nebraska; Washington, D.C.; Boston, Massachusetts; Seattle, Washington; Denver, Colorado; Atlanta, Georgia; Santa Fe, New Mexico; and San Francisco, California. (Consult your local telephone directory for addresses and telephone numbers.)

In addition copies are located at the National Park Service Headquarters in Washington, D.C. and at the following field offices: Field Assistant to Regional Director, Room 10-G-3 Fritz G. Lanham Federal Center, 819 Taylor Street, Fort Worth, Texas 76102; Gateway National Recreation Area Headquarters, Building 69, Floyd Bennett Field, Brooklyn, New York 11234; Great Smoky Mountains National Park, Gatlinburg, Tennessee 37738; and Assistant to Regional Director, Chicago Field Office, National Park Service, 2510 Dempster Street, Suite 214, Des Plaines, Illinois 60016.

In addition, as part of the Service's program for public participation in planning, public meetings will be held at 7 p.m. on February 7, 1977, at Southwestern Technical Institute on Webster Road, in Sylva, North Carolina; at 7 p.m. on February 8, 1977, at Asheville High School, 419 McDowell Street, in Asheville, North Carolina; at 7 p.m. on February 9, 1977, at the Sevier County High School, Sevierville, Tennessee; and at 7 p.m. on February 10, 1977, at the Second Presbyterian Church, 2829 Kingston Pike, Knoxville, Tennessee.

In addition to the alternatives, the assessment considers the nature of the resources, impacts of the various alternatives, mitigating measures to soften the effect of an alternative on the human environment and adverse effects that cannot be avoided should an alternative be implemented. Public comments on the assessment and the alternatives are solicited. Written and oral comments on the assessment and other planning alternatives will be received for consideration at the meetings. Written comments will be received at the Southeast Regional Office, National Park Service, 1895 Phoenix Boulevard, Atlanta, Georgia 30349, and Great Smoky Mountains National Park, Gatlinburg, Tennessee 37738 until March 14, 1977.

Dated: December 28, 1976.

L. BOYD FINCH,
Acting Regional Director, Southeast Region.

[FR Doc.77-2392 Filed 1-25-77;8:45 am]

NATIONAL CAPITAL MEMORIAL ADVISORY COMMITTEE

Notice of Meeting

Notice is hereby given in accordance with the Federal Advisory Committee Act that a meeting of the National Capital Memorial Advisory Committee will be held at 1:30 p.m. on Monday, February 14, 1977, in Room 234 at the National Capital Region Headquarters, 1100 Ohio Drive, SW., Washington, D.C.

The Committee was established for the purpose of preparing and recommending to the Secretary broad criteria, guidelines, and policies for memorializing persons and events on Federal lands in the National Capital Region (as defined in the National Capital Planning Act of 1952, as amended) through the media of monuments, memorials, and statues. It is to examine each memorial proposal for adequacy and appropriateness, make recommendations to the Secretary with respect to site location on Federal land in the National Capital Region and to serve as an information focal point for those seeking to erect memorials on Federal land in the National Capital Region.

The members of the Committee are as follows:

Mr. Gary E. Everhardt (Chairman), Director, National Park Service, Washington, D.C.
Mr. George M. White, Architect of the Capitol, Washington, D.C.
General Mark W. Clark, Chairman, American Battle Monuments Commission, Washington, D.C.
Mr. J. Carter Brown, Chairman, Fine Arts Commission, Washington, D.C.
Mr. David Childs, Chairman, National Capital Planning Commission, Washington, D.C.
Honorable Walter E. Washington, Mayor of the District of Columbia, Washington, D.C.
Mr. Nicholas, Panuzio, Commissioner, Public Buildings Service, Washington, D.C.

The purpose of this meeting is to consider:

1. Pedestal design for the memorial to Bernardo de Galvez.

2. Site locations for the American Legion Freedom Bell.

The meeting will be open to the public. Any person may file with the Committee a written statement concerning the matters to be discussed. Persons who wish to file a written statement or who want further information concerning the meeting may contact Mr. Richard L. Stanton, Associate Regional Director, Cooperative Activities, National Capital Region, at area code 202-426-6715. Minutes of the meeting will be available for public inspection 2 weeks after the meeting at the Office of National Capital Region, Room 208, 1100 Ohio Drive, SW., Washington, D.C.

Dated: January 14, 1977.

MANUS J. FISH, JR.,
Regional Director, National Capital Region.

Office of Hearings and Appeals

[Docket No. M 77-79]

REPUBLIC STEEL CORP.

Petition for Modification of Application of Mandatory Safety Standard

Notice is hereby given that in accordance with the provisions of section 301(c) of the Federal Coal Mine Health and Safety Act of 1969, 30 U.S.C. 861(c) (1970), Republic Steel Corporation has filed a petition to modify the application of 30 CFR 75.1710 to its Republic Mine, located in Pike County, Kentucky.

30 CFR 75.1710 provides:

An authorized representative of the Secretary may require in any coal mine where the height of the coalbed permits that electric face equipment, including shuttle cars, be provided with substantially constructed canopies, or cabs, to protect the miners operating such equipment from roof falls and from rib and face rolls.

A time schedule by which all mines must comply with § 75.1710 is specified by 30 CFR 75.1710-1(a) which provides:

(a) Except as provided in paragraph (f) of this section, all self-propelled electric face equipment including shuttle cars, which is employed in the active workings of each underground coal mine on and after January 1, 1973 shall, in accordance with the schedule of time specified in subparagraphs (1), (2), (3), (4), (5), and (6) of this paragraph (a), be equipped with substantially constructed canopies or cabs, located and installed in such a manner that when the operator is at the operating controls of such equipment he shall be protected from falls of roof, face, or rib, or from rib and face rolls. The requirements of this paragraph (a) shall be met as follows:

(1) On and after January 1, 1974, in coal mines having mining heights of 72 inches or more;

(2) On and after July 1, 1974, in coal mines having mining heights of 60 inches or more, but less than 72 inches;

(3) On and after January 1, 1975, in coal mines having mining heights of 48 inches or more, but less than 60 inches;

(4) On and after July 1, 1975, in coal mines having mining heights of 36 inches or more, but less than 48 inches;

(5) (i) On and after January 1, 1976, in coal mines having mining heights of 30 inches or more, but less than 36 inches,

(ii) On and after July 1, 1977, in coal mines having mining heights of 24 inches or more, but less than 30 inches, and

(6) On and after July 1, 1978, in coal mines having mining heights of less than 24 inches.

The substance of Petitioner's statement is as follows:

1. Petitioner requests modification of 30 CFR 75.1710-1 for its electric face equipment in the following areas of its Republic Mine:

A. The Lower Elkhorn Seam, specifically all areas driven under the boney coal. Coal heights are 42-48 inches.

B. The Upper Elkhorn Seam, specifically all areas driven after 1969. Coal heights are up to 53 inches.

C. The Clintwood Seam (a.k.a. Lick Creek Section), all areas. Coal heights are 37-44 inches.

2. The equipment to be used in the affected areas includes:

Lee Norse 285 continuous miner.
Joy 14 CM continuous miner.
Lee Norse 35Y continuous miner.
21 SC Joy shuttle cars.
No. 48 Torkar National Mine Service shuttle cars.
14 BU-10 Joy loading machine.
Lokar National Mine Service shuttle car.
Model UATTY Uni Trac battery scoop.
Model LTDO Fletcher roof bolter.
Model SDME Fletcher roof bolter.
Model DM Fletcher roof bolter.

3. Petitioner seeks to have application of 30 CFR 75.1710-1 modified so that cabs or canopies would not be required on the above-described equipment which is used in the specific areas of the Lower Elkhorn, Upper Elkhorn and Clintwood Seams.

4. Petitioner proposes as an alternative a continued strict compliance with applicable roof control plans and personal protective device regulations.

5. This modification is being requested because use of cabs or canopies on such equipment in the specific sections of the Mine results in a diminution of safety to the miners. The placing of a cab or canopy on any of the various pieces of equipment raises the height of such equipment to the point where the cab or canopy strikes the roof or roof supports. This striking against the roof or roof supports can cause weakening and/or collapse of such areas of the roof and this results in a diminution of safety to the miners.

6. The cab or canopy also causes a diminution of safety to the miners due to the blocked vision of the equipment operator. Due to the limited heights within the specific areas of the mine, the canopy not only blocks the operators' vision directly but also prevents him from moving to a position where he can better see. Obstructed vision increases the chances that the operator will run into or over miners, equipment ribs or walls, thus causing injury to miners or damage to equipment or property.

7. The cab or canopy further diminishes the safety of the miners by limiting the working quarters of the equipment operators. This causes premature fatigue and discomfort to the operator and increases the likelihood of unsafe practices.

8. Petitioner requests that this modification be granted and that it be allowed to operate electric face equipment in the specified areas of its Republic Mine without cabs or canopies as provided in 30 CFR 75.1710-1.

REQUEST FOR HEARING OR COMMENTS

Persons interested in this petition may request a hearing on the petition or furnish comments by February 25, 1977. Such requests or comments must be filed with the Office of Hearings and Appeals, Hearings Division, U.S. Department of the Interior, 4015 Wilson Boulevard, Arlington, Virginia 22203. Copies of the petition are available for inspection at that address.

Dated: January 14, 1977.

DAVID TORBETT,
Acting Director, Office of Hearings and Appeals.

[FR Doc.77-2494 Filed 1-25-77;8:45 am]

[Docket No. M 77-61]

ART COAL COMPANY, INC.

Petition for Modification of Application of Mandatory Safety Standard

Notice is hereby given that in accordance with the provisions of section 301(c) of the Federal Coal Mine Health and Safety Act of 1969, 30 U.S.C. 861(c)

(1970), Art Coal Company Inc., has filed a petition to modify the application of 30 CFR 75.1710 to its No. 4 Mine, located in Pike County, Kentucky.

30 CFR 75.1710 provides:

An authorized representative of the Secretary may require in any coal mine where the height of the coalbed permits that electric face equipment, including shuttle cars, be provided with substantially constructed canopies, or cabs, to protect the miners operating such equipment from roof falls and from rib and face rolls.

A time schedule by which all mines must comply with § 75.1710 is specified by 30 CFR 75.1710–1(a) which provides:

(a) Except as provided in paragraph (f) of this section, all self-propelled electric face equipment, including shuttle cars, which is employed in the active workings of each underground coal mine on and after January 1, 1973, shall, in accordance with the schedule of time specified in subparagraphs (1), (2), (3), (4), (5), and (6) of this paragraph (a), be equipped with substantially constructed canopies or cabs, located and installed in such a manner that when the operator is at the operating controls of such equipment he shall be protected from falls of roof, face, or rib, or from rib and face rolls. The requirements of this paragraph (a) shall be met as follows:

(1) On and after January 1, 1974, in coal mines having mining heights of 72 inches or more;

(2) On and after July 1, 1974, in coal mines having mining heights of 60 inches or more, but less than 72 inches;

(3) On and after January 1, 1975, in coal mines having mining heights of 48 inches or more, but less than 60 inches;

(4) On and after July 1, 1975, in coal mines having mining heights of 36 inches or more, but less than 48 inches;

(5) (i) On and after January 1, 1976, in coal mines having mining heights of 30 inches or more, but less than 36 inches,

(ii) On and after July 1, 1977, in coal mines having mining heights of 24 inches or more, but less than 30 inches, and

(6) On and after July 1, 1978, in coal mines having mining heights of less than 24 inches.

The substance of Petitioner's statement is as follows:

1. Petitioner operates a mine in the No. 1 seam of coal located at Little Branch. The coal height is 48–50 inches. Canopies block vision and create a dangerous condition. Petitioner's employees are refusing to operate the equipment simply because they cannot work under them in a cramped position. They are afraid they will either be injured or run over some of the other employees.

2. Without relief, Petitioner will have to close its mine. Petitioner has six employees.

REQUEST FOR HEARING COMMENTS

Persons interested in this petition may request a hearing on the petition or furnish comments by February 25, 1977. Such requests or comments must be filed with the Office of Hearings and Appeals, Hearings Division, U.S. Department of the Interior, 4015 Wilson Boulevard, Arlington, Virginia 22203. Copies of the petition are available for inspection at that address.

Dated: January 14, 1977.

DAVID TORBETT,
Acting Director,
Office of Hearings and Appeals.

[Docket No. M 77-73]

CARBON FUEL CO.

Petition for Modification of Application of Mandatory Safety Standard

Notice is hereby given that in accordance with the provisions of section 301 (c) of the Federal Coal Mine Health and Safety Act of 1969, 30 U.S.C. 861(c) (1970), Carbon Fuel Company has filed a petition to modify the application of 30 CFR 75.902 to its Morton Mine, located in Kanawha County, West Virginia.

30 CFR 75.902 provides:

On or before September 30, 1970, low- and medium-voltage resistance grounded systems shall include a fail-safe ground check circuit to monitor continuously the grounding circuit to assure continuity which ground check circuit shall cause the circuit breaker to open when either the ground or pilot check wire is broken, or other no less effective device approved by the Secretary or his authorized representative to assure such continuity, except that an extension of time, not in excess of 12 months, may be permitted by the Secretary on a mine-by-mine basis if he determines that such equipment is not available. Cable couplers shall be constructed so that the ground check continuity conductor shall be broken first and the ground conductors shall be broken last when the coupler is being uncoupled.

75.902–1—The maximum voltage used for such ground check circuits shall not exceed 40 volts.

75.902–2—Ground check systems not employing pilot check wires will be approved only if it is determined that the system includes a fail safe design causing the circuit breaker to open when ground continuity is broken.

75.902–4—In grounding equipment frames of all stationary, portable or mobile equipment receiving power from resistance grounded systems separate connections shall be used when practicable.

The substance of Petitioner's statement is as follows:

1. The coal mined in Petitioner's mine is transported from the working faces to a slope bottom area ("bin") where the coal is fed onto a belt which carries the coal up the slope and out of the mine. The slope bottom or bin area is constructed of steel columns, beams, struts, etc. All of the electrical equipment necessary for operation of the machinery in the bin area is mounted on the steel structure.

2. The entire steel structure on which all electric equipment is mounted in the bin area is grounded in three ways as shown in Exhibit A [1] and is described as follows:

a. A conduit runs from the power center to a control panel which is mounted on the steel frame. A piece of copper wire connects the power center to the steel structure. This copper wire provides a grounding medium for current to return to the neutral grounding resistor which is located in the power center.

b. A backup system is a ground current transformer around the ground resistor ground wire. If a ground fault occurs, this system operates and opens the contacts of a 50G relay which de-energizes the control power to all circuit breaker undervoltage releases.

c. A voltage relay is provided across the terminals of the grounding resistors. The relay has normally closed contacts but if a ground fault occurs, the contacts will open and de-energize the undervoltage releases on all circuit breakers. If the grounding resistor opens so there is not continuity, the voltage relay operates under fault condition opening the control circuit to the undervoltage releases.

3. On November 16, 1976, Federal Mine Inspector Roy A. Gray issued to Petitioner a "Notice" for an alleged violation of 30 CFR 75.902, a copy of which notice is attached hereto as Exhibit B.[2] Such notice requires that Petitioner provide a fail-safe ground check system to continuously monitor the grounding circuit for motors located at the slope bottom bin. The alleged violation is to be totally abated by 8:00 a.m. on December 31, 1976.

4. After a thorough investigation by Petitioner, it has been determined that its present grounding system as described above is an alternative method which achieves the same results of 30 CFR 75.902 and at all times guarantees no less than the same measure of protection afforded the miners of the Morton Mine by 30 CFR 75.902.

5. No danger is involved. Petitioner requests that in lieu of the mandatory standard contained in 30 CFR 75.902, that it be permitted to continue to ground the electric equipment in the slope bottom bin area in the manner described herein.

REQUEST FOR HEARING OR COMMENTS

Persons interested in this petition may request a hearing on the petition or furnish comments by February 25, 1977. Such requests or comments must be filed with the Office of Hearings and Appeals, Hearings Division, U.S. Department of the Interior, 4015 Wilson Boulevard, Arlington, Virginia 22203. Copies of the petition are available for inspection at that address.

Dated: January 14, 1977.

DAVID TORBETT,
Acting Director,
Office of Hearings and Appeals.

[1] The enclosed Exhibit is available for inspection at the address listed in the last paragraph of this notice.

[2] The enclosed Exhibit is available for inspection at the address listed in the last paragraph of this notice.

[Docket No. M 77-62]

LYNN COAL CO.

Petition for Modification of Application of Mandatory Safety Standard

Notice is hereby given that in accordance with the provisions of section 301 (c) of the Federal Coal Mine Health and Safety Act of 1969, 30 U.S.C. 861(c) (1970), Lynn Coal Company has filed a petition to modify the application of 30 CFR 75.1101 to its No. 32 Mine, located in Boone County, West Virginia.

30 CFR 75.1101 provides:

Deluge-type water sprays or foam generators automatically actuated by rise in temperature, or other no less effective means approved by the Secretary of controlling fire, shall be installed at main and secondary belt-conveyor drives.

The substance of Petitioner's statement is as follows:

1. Petitioner's mine uses a blowing ventilation system. Therefore, air will be traveling down the belt entry to the surface.

2. A fire sensor will be placed over the drive.

3. The mine will be no less safe than if the mandatory safety standard is applied.

4. Freezing problems would prevent the use of deluge type systems (presently on hand).

5. All other regulations will be complied with (fire sensors, fire resistant belt, belt control switches, etc.).

6. A self-explanatory map is enclosed.[1]

REQUEST FOR HEARING OR COMMENTS

Persons interested in this petition may request a hearing on the petition or furnish comments by February 25, 1977. Such requests or comments must be filed with the Office of Hearings and Appeals, Hearings Division, U.S. Department of the Interior, 4015 Wilson Boulevard, Arlington, Virginia 22203. Copies of the petition are available for inspection at that address.

Dated: January 14, 1977.

DAVID TORBETT,
Acting Director,
Office of Hearings and Appeals.

[FR Doc.77-2497 Filed 1-25-77;8:45 am]

[Docket No. M77-70]

TUNNELTON MINING CO.

Petition for Modification of Application of Mandatory Safety Standard

Notice is hereby given that in accordance with the provisions of section 301 (c) of the Federal Coal Mine Health and Safety Act of 1969, 30 U.S.C. 861(c) (1970), Tunnelton Mining Company has filed a petition to modify the application of 30 CFR 75.802(a) to its Marion Mine, located in Indiana County, Pennsylvania.

30 CFR 75.802 provides:

(a) Except as provided in paragraph (b) of this section, high-voltage circuits extending underground and supplying portable, mobile, or stationary high-voltage equipment shall contain either a direct or derived neutral which shall be grounded through a suitable resistor at the source transformers, and a grounding circuit, originating at the grounded side of the grounding resistor, shall extend along with the power conductors and serve as a grounding conductor for the frames of all high-voltage equipment supplied power from that circuit.

(b) Notwithstanding the requirements of paragraph (a) of this section, the Secretary or his authorized representative may permit ungrounded high-voltage circuits to be extended underground to feed stationary electric equipment if:

(1) Such circuits are either steel armored or installed in grounded, rigid steel conduit throughout their entire length; or,

(2) The voltage of such circuits is nominally 2,400 volts or less phase-to-phase and the cables used in such circuits are equipped with metallic shields around each power conductor, and contain one or more ground conductors having a total cross sectional area of not less than one-half the power conductor; and,

(3) Upon a finding by the Secretary or his authorized representative that the use of the circuits described in paragraph (b) (1) and (2) of this section does not pose a hazard to the miners.

(c) Within 100 feet of the point on the surface where high-voltage circuits enter the underground portion of the mine, disconnecting devices shall be installed and so equipped or designed in such a manner that it can be determined by visual observation that the power is disconnected, except that the Secretary or his authorized representative may permit such devices to be installed at a greater distance from such area of the mine if he determines, based on existing physical conditions, that such installation will be more accessible at a greater distance and will not pose any hazard to the miners.

The substance of Petitioner's statement is as follows:

1. The 7.2 KV system was installed at Petitioner's Mine prior to 1969. The source transformers are owned by the West Penn Power Company and are located about 4,300 feet by straight line away from the mine. The 7.2 KV distribution line from the source transformer to the mine is owned and maintained by the West Penn Power Company. The source transformers are located 4.3 miles by road (20 minutes by vehicle) away from the mine.

2. Petitioner proposes the use of an oil circuit recloser to disconnect the entire surface load (less the primary fan) for any phase to ground fault on the entire 7.2 KV system originating from the West Penn transformers.

3. Petitioner further proposes as a modification the following system:

(a) Two separate ground beds with impedance less than 2 ohms each. One ground bed will be for the underground system and will be connected to the ground side of the neutral resistor. The other ground bed will be separated at least 25 feet from the previous ground bed and will be connected to the West Penn skywire, all surface equipment grounds and frames, and all surface lightning arrestor installations.

(b) An oil circuit recloser (OCR) will be added to the 7.2 KV circuit immediately after the primary fan transformer and before any other mine surface load. The OCR will have appropriate load carrying and interrupting rating.

(c) A phase to ground fault sensing and indicating scheme will be added to sense a grounded phase and trip the OCR.

(d) The OCR will be tripped for all phase to ground faults on the surface 7.2 KV system. Tripping will be delayed slightly to coordinate with the ground fault protection on the underground breaker.

(e) A ground fault indicating light will be added at the OCR to indicate a ground fault anywhere on the 7.2 KV system.

(f) With the exception of (c) above, all operations of the OCR will be manual.

(g) The grounding conductor from the ground resistor will not serve as grounding medium for the surface high-voltage equipment frames; it will be the grounding medium for the underground high-voltage equipment frames and the resistor will not be at the source transformers.

(h) The underground high-voltage ground will not be connected to the frame of the high-voltage equipment supplying power to the system but the frames will be effectively grounded.

(i) All frames of surface high-voltage equipment shall be effectively grounded at the utilization point by both a local ground rod and be connected to the surface system ground wire.

(j) The neutral resistor ground conductor will not be connected to the surface high-voltage equipment frames; these frames will be effectively grounded to limit frame voltages to safe levels under fault conditions.

4. If Petitioner's existing system were modified to comply with Section 75.802, the entire surface load would become a delta ungrounded system.

5. Petitioner maintains that its proposed alternates system will be as safe as, or safer than the present system as required by 30 CFR 75.802(a) in that phase to ground faults on the surface systems will be cleared before a dual phase to ground fault can occur.

6. If Petitioner's modification is granted, the installation of the oil circuit recloser will not result in a diminution of safety to the miners at Petitioner's mine.

REQUEST FOR HEARINGS OR COMMENTS

Persons interested in this petition may request a hearing on the petition or furnish comments by February 25, 1977. Such requests or comments must be filed with the Office of Hearings and Appeals, Hearings Division, U.S. Department of the Interior, 4015 Wilson Boulevard, Arlington, Virginia 22203. Copies of the petition are available for inspection at that address.

Dated: January 14, 1977.

DAVID TORBETT,
Acting Director,
Office of Hearings and Appeals.

[FR Doc.77-2498 Filed 1-25-77;8:45 am]

[Docket No. M77-71]

TUNNELTON MINING CO.

Petition for Modification of Application of Mandatory Safety Standard

Notice is hereby given that in accordance with the provisions of section 301 (c) of the Federal Coal Mine Health and Safety Act of 1969, 30 U.S.C. 861(c) (1970), Tunnelton Mining Company has filed a petition to modify the application of 30 CFR 75.811 to its Marion Mine, located in Indiana County, Pennsylvania. 30 CFR 75.811 provides:

Frames, supporting structures, and enclosures of stationary, portable or mobile underground high-voltage equipment and all high-voltage equipment supplying power to such equipment receiving power from resistance grounded systems shall be effectively grounded to the high-voltage ground.

The substance of Petitioner's statement is as follows:

1. The 7.2 KV system was installed at Petitioner's mine prior to 1969. The source transformers are owned by the West Penn Power Company and are located about 4,300 feet by straight line away from the mine. The 7.2 KV distribution line from the source transformer to the mine is owned and maintained by the West Penn Power Company. The source transformers are located 4.3 miles by road (20 minutes by vehicle) away from the mine.

2. Petitioner proposes the use of an oil circuit recloser to disconnect the entire service load (less the primary fan) for any phase to ground fault on the entire 7.2 KV system originating from the West Penn transformers.

3. Petitioner further proposes as a modification the following system:

(a) Two separate ground beds with impedance less than 2 ohms each. One ground bed will be for the underground system and will be connected to the ground side of the neutral resistor. The other ground bed will be separated at least 25 feet from the previous ground bed and will be connected to the West Penn skywire, all surface equipment grounds and frames, and all surface lightning arrestor installations.

(b) An oil circuit recloser (OCR) will be added to the 7.2 KV circuit immediately after the primary fan transformer and before any other mine surface load. The OCR will have appropriate load carrying and interrupting rating.

(c) A phase to ground fault sensing and indicating scheme will be added to sense a grounded phase and trip the OCR.

(d) The OCR will be tripped for all phase to ground faults on the surface 7.2 KV system. Tripping will be delayed slightly to coordinate with the ground fault protection on the underground breaker.

(e) A ground fault indicating light will be added at the OCR to indicate a ground fault anywhere on the 7.2 KV system.

(f) With the exception of (c) above, all operations of the OCR will be manual.

(g) The grounding conductor from the ground resistor will not serve as grounding medium for the surface high-voltage equipment frames; it will be the grounding medium for the underground high-voltage equipment frames and the resistor will not be at the source transformers.

(h) The underground high-voltage ground will not be connected to the frame of the high-voltage equipment supplying power to the system but the frames will be effectively grounded.

(i) All frames of surface high-voltage equipment shall be effectively grounded at the utilization point by both a local ground rod and be connected to the surface system ground wire.

(j) The neutral resistor ground conductor will not be connected to the surface high-voltage equipment frames; these frames will be effectively grounded to limit frame voltages to safe levels under fault conditions.

4. If Petitioner's existing system were modified to comply with 30 CFR 75.802, the entire surface load would become a delta ungrounded system.

5. Petitioner maintains that its proposed alternate system will be as safe as, or safer than the present system as required by 30 CFR 75.811 in that phase to ground faults on the surface systems will be cleared before a dual phase to ground fault can occur.

6. If Petitioner's modification is granted, the installation of the oil circuit recloser will not result in a diminution of safety to the miners at Petitioner's mine.

REQUEST FOR HEARING OR COMMENTS

Persons interested in this petition may request a hearing on the petition or furnish comments by February 25, 1977. Such requests or comments must be filed with the Office of Hearings and Appeals, Hearings Division, U.S. Department of the Interior, 4015 Wilson Boulevard, Arlington, Virginia 22203. Copies of the petition are available for inspection at that address.

[Docket No. M77-72]

TUNNELTON MINING CO.

Petition for Modification of Application of Mandatory Safety Standard

Notice is hereby given that in accordance with the provisions of section 301 (c) of the Federal Coal Mine Health and Safety Act of 1969, 30 U.S.C. 861(c) (1970), Tunnelton Mining Company has filed a petition to modify the application of 30 CFR 75.802 to its Marion Mine, located in Indiana County, Pennsylvania.

30 CFR 75.802 provides:

(a) Except as provided in paragraph (b) of this section, high-voltage circuits extending underground and supplying portable, mobile, or, stationary high-voltage equipment shall contain either a direct or derived neutral which shall be grounded through a suitable resistor at the source transformers, and a grounding circuit, originating at the grounded side of the grounding resistor, shall extend along with the power conductors and serve as a grounding conductor for the frames of all high-voltage equipment supplied power from that circuit.

(b) Notwithstanding the requirements of paragraph (a) of this section, the Secretary or his authorized representative may permit ungrounded high-voltage circuits to be extended underground to feed stationary electric equipment if:

(1) Such circuits are either steel armored or installed in grounded, rigid steel conduit throughout their entire length; or,

(2) The voltage of such circuits is nominally 2,400 volts or less phase-to-phase and the cables used in such circuits are equipped with metallic shields around each power conductor, and contain one or more ground conductors having a total cross sectional area or not less than one-half the power conductor; and,

(3) Upon a finding by the Secretary or his authorized representative that the use of the circuits described in paragraph (b) (1) and (2) of this section does not pose a hazard to the miners.

(c) Within 100 feet of the point on the surface where high-voltage circuits enter the underground portion of the mine, disconnecting devices shall be installed and so equipped or designed in such a manner that it can be determined by visual observation that the power is disconnected, except that the Secretary or his authorized representative may permit such devices to be installed at a greater distance from such area of the mine if he determines, based on existing physical conditions, that such installations will be more accessible at a greater distance and will not pose any hazard to the miners.

The substance of Petitioner's statement is as follows:

1. The 7.2 KV system was installed at Petitioner's mine prior to 1969. The source transformers are owned by the West Penn Power Company and are located about 4,300 feet by straight line away from the mine. The 7.2 KV distribution line from the source transformer to the mine is owned and maintained by the West Penn Power Company. The source transformers are located 4.3 miles by road (20 minutes by vehicle) away from the mine.

2. Petitioner proposes the use of an oil circuit recloser to disconnect the entire surface load (less the primary fan) for any phase to ground fault on the entire 7.2 KV system originating from the West Penn transformers.

3. Petitioner further proposes as a modification the following system:

(a) Two separate ground beds with impedance less than 2 ohms each. One ground bed will be for the underground system and will be connected to the ground side of the neutral resistor. The other ground bed will be separated at least 25 feet from the previous ground bed and will be connected to the West Penn skywire, all surface equipment grounds and frames, and all surface lightning arrestor installations.

(b) An oil circuit recloser (OCR) will be added to the 7.2 KV circuit immediately after the primary fan transformer and before any other mine surface load. The OCR will have appropriate load carrying and interrupting rating.

(c) A phase to ground fault sensing and indicating scheme will be added to sense a grounded phase and trip the OCR.

(d) The OCR will be tripped for all phase to ground faults on the surface 7.2 KV system. Tripping will be delayed slightly to coordinate with the ground fault protection to the underground breaker.

(e) A ground fault indicating light will be added at the OCR to indicate a ground fault anywhere on the 7.2 KV system.

(f) With the exception of (c) above, all operations of the OCR will be manual.

(g) The grounding conductor from the ground resistor will not serve as grounding medium for the surface high-voltage equipment frames; it will be the grounding medium for the underground high voltage equipment frames and the resistor will not be at the source transformers.

(h) The underground high-voltage ground will not be connected to the frame of the high-voltage equipment supplying power to the system but the frames will be effectively grounded.

(i) All frames of surface high-voltage equipment shall be effectively grounded at the utilization point by both a local ground rod and be connected to the surface system ground wire.

(j) The neutral resistor ground conductor will not be connected to the surface high-voltage equipment frames; these frames will be effectively grounded to limit frame voltages to safe levels under fault conditions.

4. If Petitioner's existing system were modified to comply with 30 CFR 75.802, the entire surface load would become a delta ungrounded system.

5. Petitioner maintains that its proposed alternate system will be as safe as, or safer than the present system as required by 30 CFR 75.802 in that phase to ground faults on the surface systems will be cleared before a dual phase to ground fault can occur.

6. If Petitioner's modification is granted, the installation of the oil circuit recloser will not result in a diminution of safety to the miners at Petitioner's mine.

Office of the Secretary

LIVESTOCK GRAZING ON PUBLIC LANDS

Schedule of Fees, 1977

Pursuant to the Taylor Grazing Act of 1934 and the Federal Land Policy and Management Act of 1976, notice is hereby given of the schedule of fees for the 1977 fee year beginning March 1, 1977, and ending February 28, 1978, for livestock grazing on the public lands.

For the purpose of establishing charges, one animal unit month (AUM) shall be considered equivalent to grazing use by one cow, five sheep, or one horse for one month. The charge for one horse is at twice the rate for one cow.

Bills shall be issued in accordance with the rates prescribed in this notice.

INSIDE STATUTORY GRAZING DISTRICTS

Pursuant to Departmental regulations (43 CFR 4115.2-1(k)), as amended January 4, 1977 (FR 778), fees within districts, except as otherwise provided herein, shall be $1.51 per AUM of which 50 percent is credited to the range betterment account.

Exceptions to the above rates are hereby set as follows for certain LU project lands (Bankhead-Jones Title III lands) in order to continue the basis of fees that has heretofore been established:

Arizona. For the San Simon project (Cienega area) transferred to the Department by Executive Order 10322, the fees shall be $1.88 per AUM.

Colorado. For the Great Divide project transferred to the Department by Executive Order 10046, the fees shall be $1.62 per AUM.

Montana. For all LU lands within districts transferred to the Department by Executive Order 10787, the fees shall be $1.62 per AUM.

New Mexico. For the Hope Land project transferred to the Department by Executive Order 10787, the fees shall be $1.58 per AUM. The San Simon project (Cienega area) transferred to the Department by Executive Order 10322, the fees shall be $1.88 per AUM.

OUTSIDE STATUTORY GRAZING DISTRICTS (EXCLUSIVE OF ALASKA)

Pursuant to Departmental regulations (43 CFR 4125.1-1(m)), as amended January 4, 1977 (FR 778), the rate for grazing leases, except as otherwise provided herein, shall be $1.51 per AUM of which 50 percent is credited to the range betterment account.

Exceptions to the above rate are hereby set as follows for certain LU project lands and for all O&C (Revested Oregon and California Railroad), CBWR (Reconveyed Coos Bay Wagon Road Grant), and intermingled public domain lands in western Oregon in order to continue the basis of fees that has heretofore been established:

Montana. For those Milk River Land project lands outside districts transferred to the Department by Executive Order 18787, the fee shall be $1.62 per AUM.

Wyoming. For the northeast Wyoming project transferred to the Department by Executive Order 10046 and amended by Executive Order 10175, the fee shall be $1.62 per AUM.

Western Oregon. For western Oregon, the fee shall be $1.62 per AUM. Receipts from O&C and CBWR lands are not subject to the range betterment program account provisions of the Federal Land Policy and Management Act of 1976.

JACK O. HORTON,
Assistant Secretary
of the Interior.

INTERNATIONAL TRADE COMMISSION

GOVERNMENT IN THE SUNSHINE

Amendment of Meeting

In its notice for the meeting of February 1, 1977, the Commission indicated that its discussion of reorganization (agenda item No. 3) would be in open session. Such discussion will be in open session to the extent that the discussion does not involve selections of personnel to fill positions under the reorganization. The portion of the discussion under item No. 3 which concerns selections of personnel to fill positions under the reorganization will be held in closed session.

Pursuant to the specific exemptions of 5 U.S.C. 552b(c) (2) and (6), on the authority of 19 U.S.C. 1335, and in conformity with proposed 19 CFR 201.37(b) (2) and (6), Commissioners Parker, Moore, Bedell, and Ablondi voted to hold this portion of the discussion with respect to item No. 3 on reorganization in closed session. Commissioners Minchew and Leonard voted against closing this portion to the public.

A majority of the entire membership of the Commission felt that this portion of the meeting should be closed to the public since: (1) The discussion would only concern internal personnel practice and procedures; and (2) The information discussed in such portion would be likely to disclose information of a personal nature which could constitute a clearly unwarranted invasion of personal privacy.

Those persons expected to be present at this closed portion, and their corresponding affiliations, are listed as follows:

Daniel Minchew, Chairman.
Joseph O. Parker, Vice Chairman.
Will E. Leonard, Commissioner.
George M. Moore, Commissioner.
Catherine Bedell, Commissioner.
Italo H. Ablondi, Commissioner.
Kenneth R. Mason, Secretary.
E. Bernice Morris, Staff Assistant.
Charles R. Ramsdale, Acting Director, Personnel.
Norma H. Warbis, Personnel Management Specialist (if Mr. Ramsdale is not available).
Bruce N. Hatton, Assistant to Commissioner Leonard.

The General Counsel to the Commission certified that it is his opinion that the Commission's action in closing this portion of its discussion of reorganization was properly taken by a vote of a majority of the entire membership of the Commission pursuant to 5 U.S.C. 552b (d) (1) and in conformity with proposed 19 CFR 201.37(e). The discussion to be held in closed session is within the specific exemptions of 5 U.S.C. 552b(c) (2) and (6) and proposed 19 CFR 201.37(b) (2) and (6).

By order of the Commission.

Issued: January 21, 1977.

RUSSELL N. SHEWMAKER,
General Counsel.
KENNETH R. MASON,
Secretary.

[FR Doc.77-2546 Filed 1-25-77;8:45 am]

DEPARTMENT OF JUSTICE

Drug Enforcement Administration

CARLTON TURNER

Registration as Importer of Controlled Substances

By Notice dated November 18, 1976, and published in the FEDERAL REGISTER on November 29, 1976; (41 FR 52345), Carlton Turner, Department of Pharmacognosy, School of Pharmacy, University of Mississippi, University, MS 38677, made application to the Drug Enforcement Administration to be registered as an importer of marihuana, a basic class of controlled substance listed in Schedule I.

No comments or objections having been received, and, pursuant to section 1008(a) of the Comprehensive Drug Abuse Prevention and Control Act of 1970, and in accordance with 21 CFR 1311.42, the above firm is granted registration as an importer of the basic class of controlled substance listed above.

Dated: January 17, 1977.

DONALD E. MILLER,
Acting Deputy Administrator, Drug Enforcement Administration.

[FR Doc.77-2519 Filed 1-25-77;8:45 am]

KNOLL PHARMACEUTICAL CO. PRODUCTION CO.

Application for Manufacture of Controlled Substances

Section 303(a)(1) of the Comprehensive Drug Abuse Prevention and Control Act of 1970 (21 U.S.C. 823(a)(1)) states:

"The Attorney General shall register an applicant to manufacture controlled substances in schedule I or II if he determines that such registration is consistent with the public interest and with United States obligations under international treaties, conventions, or protocols in effect on the effective date of this part. In determining the public interest, the following factors shall be considered:

(1) Maintenance of effective controls against diversion of particular controlled substances and any controlled substance in schedule I or II compounded therefrom into other than legitimate medical, scientific, research, or industrial channels, by limiting the importation and bulk manufacture of such controlled substances to a number of establishments which can produce an adequate and uninterrupted supply of these substances under adequately competitive conditions for legitimate medical, scientific, research, and industrial purposes;"

Pursuant to § 1301.43 of Title 21 of the Code of Federal Regulations (CFR), notice is hereby given that on November 22, 1976, Knoll Pharmaceutical Company Production Department, 30 North Jefferson Road, Whippany, NJ 07981, made application to the Drug Enforcement Administration to be registered as a bulk manufacturer of hydromorphone, a basic class of controlled substance in schedule II.

Pursuant to Section 301 of the Controlled Substances Act (21 U.S.C. 821), and in accordance with 21 CFR 1301.43 (a), notice is hereby given that the above person has made application to the Drug Enforcement Administration to be registered as a bulk manufacturer of the basic class of controlled substance indicated, and any other such person, and any existing registered bulk manufacturer of hydromorphone, may file written comments on or objections to the issuance of such registration and may, at the same time, file a written request for a hearing on the application in accordance with 21 CFR 1301.54 in such form as prescribed by 21 CFR 1316.47. Such comments, objections and requests for a hearing may be filed no later than February 24, 1977.

Comments and objections may be addressed to the DEA Federal Register Representative, Office of Chief Counsel, Drug Enforcement Administration, Room 1203, 1405 Eye Street, N.W., Washington, D.C. 20537.

Dated: January 17, 1977.

DONALD E. MILLER,
Acting Deputy Administrator, Drug Enforcement Administration.

NATIONAL ADVISORY COMMITTEE ON OCEANS AND ATMOSPHERE

MEETING

JANUARY 24, 1977.

Pursuant to Sec 10(a)(2) of the Federal Advisory Committee Act, 5 U.S.C. App. I (Supp V, 1975), notice is hereby given that the National Advisory Committee on Oceans and Atmosphere (NACOA) will hold a two-day meeting on Monday and Tuesday, February 14–15, 1977. The sessions will be open to the public and will be held in Room 4830 of the U.S. Department of Commerce Building, 14th Street between Constitution Avenue and E Street, N.W. Washington, D.C. beginning at 9:00 a.m. on both days.

The Committee, consisting of 25 non-Federal members appointed by the President from State and local governments, industry, science and other appropriate areas, was established by Congress by Public Law 92-125, on August 16, 1971, as amended. Its duties are to (1) undertake a continuing review of national ocean policy, coastal zone management and the progress of the marine and atmospheric science and service programs of the United States, (2) submit a comprehensive annual report to the President and to the Congress setting forth an overall assessment of the status of the Nation's marine nad atmospheric activities on or before 30 June of each year, and (3) advise the Secretary of Commerce with respect to the carrying out of the purpose of the National Oceanic and Atmospheric Administration.

The general agenda includes the following topics:

FEBRUARY 14, 1977—MORNING—0900–1200

Induction of new members—Agency briefings on Coastal Zone Management Merchant Marine Issues.

AFTERNOON—1300–1700

Agency briefings on Ocean Engineering Working groups on marine transportation, ocean engineering, marine education, National Weather Service emergency operations, air pollution monitoring, national goals and objectives.

FEBRUARY 15, 1977—MORNING—0900–1330

World Oil and Gas Outlook. NACOA work in progress, plans for the future. Mr. E. H. Clark, NACOA. NACOA Members, Dr. William J. Hargis, Jr.

Adjournment at approximately 1330.

The public is welcome at these sessions and will be admitted to the extent of the seating available. Persons wishing to make formal statements should notify the Chairman in advance of the meeting.

The Chairman retains the perogative to place limits on the duration of oral statements and discussions. Written statements may be submitted before or after each session.

Additional information concerning this meeting may be obtained through the Committee's Executive Director, Dr. Douglas L. Brooks, whose mailing address is: National Advisory Committee on Oceans and Atmosphere, Department of Commerce Building, Room 5225, Washington, D.C. 20230. The telephone number is 377-3343.

DOUGLAS L. BROOKS,
Executive Director.

DEPARTMENT OF STATE

[Public Notice CM-7/21]

GOVERNMENT ADVISORY COMMITTEE ON INTERNATIONAL BOOK AND LIBRARY PROGRAMS

Meeting

The Government Advisory Committee on International Book and Library Programs will meet on Thursday, February 17, 1977 in open session.

The meeting will be divided into two separate parts: a morning session and an afternoon session.

The morning session will be a joint meeting with the U.S. Advisory Commission on International Educational and Cultural Affairs. It will be held in the Charles Suite of L'Enfant Plaza Hotel, 480 L'Enfant Plaza East, S.W., Washington, D.C. from 9:00 a.m. until 12:00 noon. There will be one item on the agenda: a discussion of U.S. implementation of the provisions of Basket III of the "Final Act" of the Conference on Security and Cooperation in Europe (the Helsinki agreement), with particular emphasis on the desirability of reinstituting a currency convertibility program to encourage the sales abroad of U.S. cultural materials.

The afternoon session will also be held in the Charles Suite from approximately 2:00 p.m. until 4:30 p.m.

The agenda will include:

1. Discussions on U.S. participation in international book fairs and U.S.-U.S.S.R. book and library exchanges.
2. Reports:
   a. On the November 1976 UNESCO General Conference.
   b. On the January 1977 Cairo International Book Fair.

Visitors to either session will be accommodated up to the capacity of the conference room; therefore, anyone wishing to attend either session must advise the Executive Secretary of the Committee by 5:30 p.m., February 15, 1977. Telephone: (202) 632-2841.

Dated: January 13, 1977.

CAROL M. OWENS,
Executive Secretary.

[Public Notice CM-7/20]

U.S. ADVISORY COMMISSION ON INTERNATIONAL EDUCATIONAL AND CULTURAL AFFAIRS

Meeting

The United States Advisory Commission on International Educational and Cultural Affairs will meet in open session on Thursday, February 17, 1977.

The meeting will be divided into two separate parts: A morning session and an afternoon session.

The morning session will be a joint meeting with the Government Advisory Committee on International Book and Library Programs. It will be held in the Charles Suite of L'Enfant Plaza Hotel, 480 L'Enfant Plaza East, S.W., Washington, D.C. from 9:00 a.m. until 12:00 noon. There will be one item on the agenda: A discussion of U.S. implementation of the provisions of Basket III of the "Final Act" of the Conference on Security and Cooperation in Europe (the Helsinki agreement), with particular emphasis on the desirability of reinstituting a currency convertibility program to encourage the sales abroad of U.S. cultural materials.

The afternoon session will be held in the Marquette Salon of L'Enfant Plaza Hotel, from approximately 2:00 p.m. until 4:30 p.m. There will be the following subjects on the agenda, in addition to any old or new business which any member may wish to raise.

1. Briefing by State Department representative on exchanges between U.S. and Canada.
2. Reports:
   a. By the Chairman and Mr. Smith on their trip to the Middle East.
   b. By the Chairman on his talks with President Ford, Congressman Slack, and Secretary-designate Vance.
   c. By Staff Director on financial status of Commission.
3. Old Business.
   a. Assignment of an economic professor to Japan under the Fulbright Program.
   b. New concepts for a North-South Center.

Visitors to either session will be accommodated up to the capacity of the conference rooms; therefore, anyone wishing to attend either session must advise the Staff Director of the Commission by 5:30 PM, February 15, 1977. He can be reached by telephone at (202) 632-2764.

Dated: January 13, 1977.

W. E. WELD, Jr.,
Staff Director, Commission Secretariat.

DEPARTMENT OF THE TREASURY

Office of the Secretary

INEDIBLE GELATIN AND ANIMAL GLUE FROM THE FEDERAL REPUBLIC OF GERMANY

Antidumping Proceeding

On December 23, 1976, information was received in proper form pursuant to Sections 153.26 and 153.27, Customs Regulations (19 CFR 153.26, 153.27), from counsel acting on behalf of Darling & Company, Chicago, Illinois; Milligan & Higgins Corporation, West Orange, New Jersey; and the Peter Cooper Corporation, Gowanda, New York, indicating a possibility that inedible gelatin and animal glue from the Federal Republic of Germany are being, or are likely to be, sold at less than fair value within the meaning of the Antidumping Act, 1921, as amended (19 U.S.C. 160 et seq.) (referred to in this notice as "the Act").

There is evidence on record concerning injury to or likelihood of injury to or prevention of establishment of an industry in the United States. This evidence indicates that imports from the Federal Republic of Germany have increased during the past year and that these imports are substantially underselling the domestic product. Available evidence further indicates that domestic prices, production, employment and capacity utilization may have suffered declines during the past year as a result of less than fair value imports from the Federal Republic of Germany.

Having conducted a summary investigation as required by § 153.29 of the Customs Regulations (19 CFR 153.29), and having determined as a result thereof that there are grounds for so doing, the U.S. Customs Service is instituting an inquiry to verify the information submitted and to obtain the facts necessary to enable the Secretary of the Treasury to reach a determination as to the fact or likelihood of sales at less than fair value.

A summary of price information received from all sources is as follows: the information received tends to indicate that the prices of the merchandise sold for exportation to the United States are less than the prices for home consumption.

This notice is published pursuant to Section 153.30 of the Customs Regulations (19 CFR 153.30).

Dated: January 19, 1977.

JOHN H. HARPER,
Acting Assistant Secretary of the Treasury.

INEDIBLE GELATIN AND ANIMAL GLUE FROM THE NETHERLANDS

Antidumping Proceeding

On December 23, 1976, information was received in proper form pursuant to Sections 153.26 and 153.27, Customs Regulations (19 CFR 153.26, 153.27), from counsel acting on behalf of Darling & Company, Chicago, Illinois; Milligan & Higgins Corporation, West Orange, New Jersey; and the Peter Cooper Corporation, Gowanda, New York, indicating a possibility that inedible gelatin and animal glue from the Netherlands are being, or are likely to be, sold at less than fair value within the meaning of the Antidumping Act, 1921, as amended (19 U.S.C. 160 et seq.) (referred to in this notice as "the Act").

There is evidence on record concerning injury to or likelihood of injury to or prevention of establishment of an industry in the United States. This evidence indicates that imports from the Federal Republic of Germany have increased during the past year and that these imports are substantially underselling the domestic product. Available evidence further indicates that domestic prices, production, employment and capacity utilization may have suffered declines during the past year as a result of less than fair value imports from the Federal Republic of Germany.

Having conducted a summary investigation as required by § 153.29 of the Customs Regulations (19 CFR 153.29), and having determined as a result thereof that there are grounds for so doing, the U.S. Customs Service is instituting an inquiry to verify the information submitted and to obtain the facts necessary to enable the Secretary of the Treasury to reach a determination as to the fact or likelihood of sales at less than fair value.

A summary of price information received from all sources is as follows: the information received tends to indicate that the prices of the merchandise sold for exportation to the United States are less than the prices for home consumption.

INTERSTATE COMMERCE COMMISSION

[Notice No. 311]

ASSIGNMENT OF HEARINGS

JANUARY 21, 1977.

Cases assigned for hearing, postponement, cancellation or oral argument appear below and will be published only once. This list contains prospective assignments only and does not include cases previously assigned hearing dates. The hearings will be on the issues as presently reflected in the Official Docket of the Commission. An attempt will be made to publish notices of cancellation of hearings as promptly as possible, but interested parties should take appropriate steps to insure that they are notified of cancellation or postponements of hearings in which they are interested.

MC 1 Sub 7, Eschenbach & Rodgers Trucking, Inc. now being assigned March 23, 1977 (3 days) at Philadelphia, Pennsylvania in a hearing room to be later designated.

MC 134958 Sub 9, Hams Express, Inc. now being assigned March 21, 1977 (2 days) at Philadelphia, Pennsylvania in a hearing room to be later designated.

MC–F 13016, Delta California Industrits—Control—I–5 Freightline, Inc. and Delta Lines, Inc.—Merge—I–5 Freightline, Inc., FD 28330, Delta California Industries-Notes and FD 28331, Delta Lines, Inc.—Assumption of Notes now being assigned March 15, 1977 (7 days) at Portland, Oregon and March 24, 1977 (2 days) for continued hearings at Medford, Oregon in hearing rooms to be later designated.

MC–F 12875, Delta Lines, Inc.—Purchase (Portion)—Ringsby Truck Lines, Inc., and Ringsby Pacific Ltd., FD 28245, Ringsby-Pacific Ltd., FD 28238, Ringsby Truck Lines, Inc. and FD 28337, North Pacific Forwarders, Inc. now being assigned March 15, 1977 (7 days) at Portland, Oregon and March 24, 1977 (2 days) for continued hearings at Medford, Oregon in hearing rooms to be later designated.

AB 31 (Sub-No. 3), Grand Trunk Western Railroad Company Abandonment between Imlay City and Caseville in Lapeer, Tuscoal and Huron Counties, Michigan now assigned January 31, 1977, at Cass City, Michigan will be held at the Culture Center, 6429 Main Street instead of Culture Center, 6737 Church Street.

NC 142107 (Sub-No. 1), H & M Trucking Co., now assigned January 25, 1977, at Chicago, Ill., is canceled and application dismissed.

MC 142174, Loiselle Transport Limited, now assigned February 8, 1977, at Helena, Mont., is canceled and application dismissed.

BALTIMORE AND OHIO RAILROAD CO.

Exemption Under Mandatory Car Service Rules

[Ex Parte No. 241; Twenty-second Revised Exemption No. 90]

It appearing, That the railroads named below own numerous 50-ft. plain boxcars; that under present conditions there are substantial surpluses of these cars on their lines; that return of these cars to the owners would result in their being stored idle; that such cars can be used by other carriers for transporting traffic offered for shipments to points remote from the car owners; and that compliance with Car Service Rules 1 and 2 prevents such use of these cars, resulting in unnecessary loss of utilization of such cars.

It is ordered, That pursuant to the authority vested in me by Car Service Rule 19, 50-ft. plain boxcars described in the Official Railway Equipment Register, I.C.C.-R.E.R. No. 401, issued by W. J. Trezise, or successive issues thereof, as having mechanical designation "XM," and bearing reporting marks assigned to the railroads named below, shall be exempt from the provisions of Car Service Rules 1. 2(a), and 2(b).

At a Session of the Interstate Commerce Commission, Division 1, held at its office in Washington, D.C., on January 21, 1977.

[Ex Parte No. MC–64; General Temporary Order No. 10]

EMERGENCY MOTOR CARRIER SERVICES UNDER SEVERE WINTER CONDITIONS

Order

The Interstate Commerce Commission having under consideration the urgent need for motor carrier services due to severe winter weather conditions, the national transportation policy, the public interest, and, among others, sections 202(a), 204(a)(6), and 210(a) of the Interstate Commerce Act, and

It appearing, That due to freezing temperatures, certain carriers are unable to transport passengers and property tendered to them; and that an emergency exists in all sections of the United States requiring immediate action on the part of the Commission to make provision for adequate transportation of essential commodities, including but not limited to those listed below, in the interest of the public and the national defense:

Food or kindred products, canned, preserved or otherwise prepared, including fresh, frozen or chilled meats and poultry; fresh eggs and milk; fresh or frozen fruits and vegetables; fresh or frozen fish and shell fish; feeds for animals and fowls.
Hospital and sick room supplies and equipment, including diagnostic devices and essential support utilities.
Pharmaceuticals, biologicals, surgical textiles and instruments.
Medical laboratory supplies and equipment.
Professional dental supplies and equipment.
Fuels required for the production of electric power and those used directly for heating residences and institutions essential for the public welfare.
Electrical power and communication systems repair materials and equipment required for the continued supply of essential electric power and communications.
Essential supplies and materials directly related to exploration, development and construction of energy-producing systems.
Material moving on Government or commercial bills of lading specifically certified as essential by Department of Defense, Energy Research and Development Administration or General Services Administration contract administrators.
All material moving on Government bills of lading issued by transportation officers of the military services.
U.S. mail in accordance with emergency orders issued by the Postmaster General.
Water and sewage processing and handling supplies and equipment, including chlorine, alum, lime, sulphate of iron, soda ash, and similar chemicals and equipment essential to the continuity of operation of water and sewage installations.
Items necessary to the continued smooth functioning of the financial system, i.e., movement of checks, currency and coins.
Federal Government personnel on agency-designated essential travel orders and non-Federal Government personnel on self-designated essential travel in support of items contained in this priority list.

It further appearing, That there exists an immediate and urgent need for additional motor carrier service to supplement temporarily the transportation facilities of the Nation for the movement of military and other freight, and passengers;

And it further appearing, That the present transportation emergency and immediate need for maximum utilization of motor carrier facilities, equipment, and service have made it necessary for the Commission to provide and authorize a more flexible method whereby motor carriers, and other persons, may obtain temporary authorizations to render the required motor service necessary in the public interest and to the national defense.

It is ordered, That pursuant to section 210a(a) of the Interstate Commerce Act (49 U.S.C. 310a(a)), all persons who shall apply to any regional operations director, assistant regional operations director, district supervisor, or their designees, of the Commission's Bureau of Operations are hereby granted temporary authority to transport passengers or property by motor vehicle for a period of not more than 30 days to the extent and scope that such regional operations director, assistant regional operations director, district supervisor, or their designees, shall certify that due to the existing transportation emergency, there is an immediate and urgent need for the service applied for, and there is no available carrier service capable of meeting such need;

It is further ordered, That the grant of such temporary authority be, and it is hereby, conditioned upon satisfying the said regional operations director, assistant regional operations director, district supervisor, or their designees, of full compliance by the grantee with all applicable statutory and Commission requirements concerning tariff publications, evidence of security for the protection of the public, and designation of agents for service of process, and further conditioned upon such tariff publications quoting rates, fares, and charges no lower than those of existing rail, water, or motor carriers in the territory in which the operations are to be authorized;

It is further ordered, That service performed under temporary authority granted pursuant to this order shall in no way constitute evidence or a showing warranting future issuance of a certificate of public convenience and necessity or permit, as provided in Section 207(a) of the Act (49 U.S.C. 307(a)) and section 209(b) of the Act (49 U.S.C. 309(b)).

It is further ordered, That temporary authority granted pursuant to this order shall expire as of the first midnight after the issuance of an order by this Commission revoking General Temporary Order No. 10 except as to passengers and property, the transportation of which was begun prior to that time;

It is further ordered, That this order shall become effective on the 22d of January, 1977, at 12:01-a.m.

And it is further ordered, That notice of this order shall be given to motor carriers, other parties of interest, and to the general public by depositing a copy thereof in the Office of the Secretary of the Commission, Washington, D.C., and by filing a copy thereof with the Director, Office of the Federal Register.

By the Commission, Division 1, Commissioners Murphy, Gresham and MacFarland.

ROBERT L. OSWALD,
Secretary.

[FR Doc.77-2565 Filed 1-25-77;8:45 am]

FOURTH SECTION APPLICATION FOR RELIEF

JANUARY 21, 1977.

An application, as summarized below, has been filed requesting relief from the requirements of section 4 of the Interstate Commerce Act to permit common carriers named or described in the application to maintain higher rates and charges at intermediate points than those sought to be established at more distant points.

Protests to the granting of an application must be prepared in accordance with Rule 40 of the General Rules of Practice (49 CFR 1100.40) and filed within 15 days from the date of publication of this notice in the FEDERAL REGISTER.

FSA No. 43308—*Fibreboard, Paperboard and Pulpboard Between North Coast Points and Group 19 (Los Angeles, California)*. Filed by Pacific Southcoast Freight Bureau, Agent, (No. 270), for and on behalf of the Union Pacific Railroad. Rates on fibreboard, paperboard, and pulpboard, in carloads, as described in the application, between North Coast points, and Group 19 (Los Angeles, California).

Grounds for relief—Market competition, rate relationship.

Tariff—Supplement 36 to Pacific Southcoast Freight Bureau, Agent, tariff 315–A, I.C.C. No. 1974. Rates are published to become effective on February 20, 1977.

By the Commission

ROBERT L. OSWALD,
Secretary.

[I.C.C. Order No. 17; Service Order No. 1252]

CHESAPEAKE AND OHIO RAILWAY CO.

In the opinion of Joel E. Burns, Agent, The Chesapeake and Ohio Railway Company is unable to transport traffic requiring movement through Bison Yard, located at Buffalo, New York, because of congestion caused by an accumulation of snow.

It is ordered, That: (a) *Rerouting traffic.* The Chesapeake and Ohio Railway Company, being unable to transport traffic requiring movement through Bison Yard, located at Buffalo, New York, because of congestion caused by an accumulation of snow, is hereby authorized to divert or reroute such traffic over any available route to expedite the movement.

(b) *Concurrence of receiving road to be obtained.* The Chesapeake and Ohio Railway Company, in rerouting cars in accordance with this order shall receive the concurrence of other railroads to which such traffic is to be diverted or rerouted, before the rerouting or diversion is ordered.

(c) *Notification to shippers.* The Chesapeake and Ohio Railway Company, when rerouting cars in accordance with this order, shall notify each shipper at the time each shipment is rerouted or diverted and shall furnish to such shipper the new routing provided under this order.

(d) Inasmuch as the diversion or rerouting of traffic is deemed to be due to carrier disability, the rates applicable to traffic diverted or rerouted by said Agent shall be the rates which were applicable at the time of shipment on the shipments as originally routed.

(e) In executing the directions of the Commission and of such Agent provided for in this order, the common carriers involved shall proceed even though no contracts, agreements, or arrangements now exist between them with reference

to the divisions of the rates of transportation applicable to said traffic; divisions shall be, during the time this order remains in force, those voluntarily agreed upon by and between said carriers; or upon failure of the carriers to so agree, said divisions shall be those hereafter fixed by the Commission in accordance with pertinent authority conferred upon it by the Interstate Commerce Act.

(f) *Effective date.* This order shall become effective at 8 a.m., January 14, 1977.

(g) *Expiration date.* This order shall expire at 11:59 p.m., January 18, 1977, unless otherwise modified, changed or suspended.

It is further ordered, That this order shall be served upon the Association of American Railroads, Car Service Division, as Agent of all railroads, subscribing to the car service and car hire agreement under the terms of that agreement, and upon the American Short Line Railroad Association; and that it be filed with the Director, Office of the FEDERAL REGISTER.

Issued at Washington, D.C., January 14, 1977.

LIFE SAFETY REQUIREMENTS

Proposed Regulations

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Social Security Administration

[20 CFR Part 405]

[Reg. No. 5]

FEDERAL HEALTH INSURANCE FOR THE AGED AND DISABLED

Medicare Standards for Hospitals and Skilled Nursing Facilities, Life Safety Code

Notice is hereby given, pursuant to the Administrative Procedure Act (5 U.S.C. 553), that the amendments to the regulations set forth in tentative form below, are proposed by the Commissioner of Social Security with the approval of the Secretary of Health, Education, and Welfare. The proposal, which does not have major program significance, would change the current requirement that skilled nursing facilities and hospitals participating in the Medicare and Medicaid programs must meet the fire safety provisions of the 1967 Life Safety Code of hte National Fire Protection Association. They would instead have to meet the fire safety provisions of the newer 1973 version of the Code. The 1973 version reflects the current scientific and technical approach to fire safety for institutional occupancies which places a stronger reliance on better systems for detecting and extinguishing fire and less emphasis on building construction requirements. The proposal, implementing Public Law 94-182 of December 31, 1975 as to skilled nursing facilities, and amending the conditions of participation for hospitals to conform to those for skilled nursing facilities, would also allow those providers which, at the specified time, met the 1967 Code requirements, or met State codes approved by the Secretary, to continue to participate in these programs by continuing to meet those pre-amendment reqiurements. The proposed amendments are of a technincal nature and, with respect to skilled nursing facilities, update the regulations to conform to the statutory enactment (Pub. L 94-182). With respect to hospitals they conform the requirements for hospitals to those mandated for skilled nursing facilities in the interests of uniform administration. It is believed publication of this notice requesting comments will provide ample and adequate opportunity for participation of all interested individuals and organizations. This is in keeping with the spirit and intent of the Secretary's regulation development policies announced on July 25, 1976. Interested parties are invited to submit comments within 45 days of this publication and any comments received on this proposal will be given consideration before the proposal is published as final regulations.

Specifically, the proposed amendments are intended to update the respective conditions of participation dealing with life safety from fire applicable to skilled nursing facilities and hospitals participating in the Medicare/Medicaid programs. With respect to skilled nursing facilities, the proposed changes implement section 106 of Pub. L. 94-182 (enacted December 31, 1975) which amends section 1861(j)(13) of the Social Security Act to require skilled nursing facilities to comply with the 1973 Edition of the Life Safety Code of the National Fire Protection Association, rather than the 1967 Edition of the Code currently specified in regulations. With respect to hospitals, current regulations require hospitals to meet the 1967 Edition of the Life Safety Code; and the proposed changes would require them to meet the 1973 Edition, in order to conform the life safety requirements for hospitals to those for skilled nursing facilities. The purpose of the proposal is to maintain consistency in the application of life safety requirements to all inpatient health care facilities in the Medicare program. A notice of proposed rule making and proposed amendments to 45 CFR Part 249 that would incorporate similar life safety requirements for intermediate care facilities participating in the Medicaid program are published by the Social and Rehabilitation Service elsewhere in this issue of the FEDERAL REGISTER.

Skilled nursing facilities that met the requirements of the 1967 Life Safety Code on May 31, 1976 (the day preceding the statutory effective date for imposition of the new standard), by compliance (subject to the provisions of § 405.1907 of Subpart S of Regulations No. 5, if applicable) or by waiver of specific requirements of the Life Safety Code will be considered to be in compliance with the provisions of section 1861(j)(13) of the Social Security Act for so long as the facilities continue to meet the requirements of the 1967 Life Safety Code. Also, skilled nursing facilities that met, on May 31, 1976, applicable requirements of a State fire and safety code imposed by State law and approved by the Secretary for use instead of the Life Safety Code prescribed herein, in accordance with the law and regulations, will be considered in compliance with the provisions of section 1861(j)(13) of the Act, for so long as such requirements of such State code are met. With respect to hospitals, the proposal contains similar provisions, but specifies the day before the effective date of final regulations as the date on which the hospital must be in compliance with the 1967 Code, or a State code approved by the Secretary, in order to be considered in compliance with the applicable requirement relating to life safety from fire.

These exceptions (whereby hospitals and skilled nursing facilities in compliance with the former life safety requirement are exempted from meeting the new requirements) are applicable to institutions that submitted acceptable plans of correction (with respect to the life safety requirement) prior to June 1, 1976, in the case of skilled nursing facilities, and prior to the effective date of this regulation in the case of hospitals, and are in the process of correcting, or have corrected, the deficiencies noted, so long as compliance with applicable requirements is achieved and maintained.

With respect to blind, ambulatory, or physically handicapped patients in skilled nursing facilities, the proposed amendments clarify the provisions of § 405.1134(a)(3) to conform to the 1967 and 1973 editions of the Life Safety Code. Specifically, the amendments add the words "fully sprinklered" as a requirement for buildings of 1-hour protected noncombustible construction where these patients are housed above the street floor.

If there are any questions about these amendments, you may contact Mrs. Janet Harryman, Branch Chief, 6401 Security Boulevard, Baltimore, Maryland 21235, telephone (301) 594-9712. Mrs. Harryman will respond to questions but will not accept comments on these amendments.

Prior to the final adoption of the proposed amendments to the regulations, consideration will be given to any data, views, or arguments pertaining thereto which are submitted in writing to the Commissioner of Social Security, Department of Health, Education, and Welfare, P.O. Box 1585, Baltimore, Maryland 21203, on or before March 14, 1977.

Copies of all comments received in response to this notice will be available for public inspection during regular business hours at the Washington Inquiries Section, Office of Information, Social Security Administration, Department of Health, Education, and Welfare, North Building, Room 4146, Independence Avenue, SW., Washington, D.C. 20201.

It is hereby certified that this proposal has been screened pursuant to Executive Order 11821, and does not require an Inflation Impact Evaluation.

Dated: September 15, 1976.

J. B. CARDWELL,
Commissioner of Social Security.

Approved: January 11, 1977.

MARJORIE LYNCH,
Acting Secretary of Health, Education, and Welfare.

Part 405 of Chapter III of Title 20 of the Code of Federal Regulations is amended as follows:

1. Section 405.1022(b) is revised to read:

§ 405.1022 Condition of participation—physical environment.

* * * * *

(b) *Standard: Life safety from fire.*

(1) The hospital meets such provisions of the Life Safety Code of the National Fire Protection Association, 1973 Edition (23rd Edition, 1973) as are applicable to hospitals, except that:

(i) The Secretary may waive, after consideration of State survey agency findings and recommendations, if any, for such periods as deemed appropriate, specific provisions of such Code which, if rigidly applied, would result in unreasonable hardship upon a particular hospital, but only if such waiver will not adversely affect the health and safety of the patients;

(ii) The provisions of the Life Safety Code applicable to hospitals shall not apply in any State if the Secretary makes a finding that in such State there is in effect a fire and safety code, imposed by State law, which adequately protects patients in hospitals;

(iii) Any hospital (or part of a hospital) which on (*the day before the effective date of final regulations*) complied (subject to the provisions of § 405.1907) with the applicable provisions of the Life Safety Code, 21st Edition, 1967, with or without waivers of specific provisions, or complied with the applicable provisions of a fire and safety code imposed by State law where the Secretary had made a finding that such fire and safety code adequately protected patients in hospitals, shall, so long as such compliance is achieved and maintained, be considered in compliance with this paragraph (b)(1).

(2) With respect to those hospitals subject to the provisions of paragraph (b)(1)(iii) of this section:

(i) The hospital is equipped with a grounding system, in conjunction with an isolation transformer in each anesthetizing location, adequate to minimize the difference in potential which can occur between any conductive surfaces that the patient or a person touching the patient can contact. This difference in potential, under conditions of the first fault between either isolated conductor and ground, shall be less than 5 millivolts. Anesthetizing areas where flammable anesthetics are used, shall have conductive flooring which complies with the provisions of section 252 of the National Fire Protection Association Standard No. 56A, Standard for the Use of Inhalation Anesthetics (1971); and

(ii) To the extent that inhalation therapy is provided and nonflammable medical gas systems such as oxygen and nitrous oxide are, or have been, installed, the hospital complies with the applicable provisions of National Fire Protection Association Standard No. 56B, Standard for the Use of Inhalation Therapy (1968), and National Fire Protection Association Standard No. 56F, Nonflammable Medical Gas Systems (1970).

(3) The hospital maintains written evidence of regular inspection and approval by State or local fire control agencies.

(4) The hospital has procedures for the proper routine storage and prompt disposal of trash.

(5) Written fire control plans contain provisions for prompt reporting of all fires; extinguishing fires; protection of patients, personnel, and guests; evacuation; and cooperation with firefighting authorities.

* * * * * *

2. Section 404.1134(a) is revised to read:

§ 405.1134 Condition of participation-physical environment.

* * * * * *

(a) *Standard: Life safety from fire.* (1) The skilled nursing facility meets such provisions of the Life Safety Code, 1973 Edition (23rd Edition, 1973) of the National Fire Protection Association as are applicable to nursing homes; except that:

(i) In consideration of a recommendation by the State survey agency, the Secretary may waive, for such periods as deemed appropriate, specific provisions of such Code which, if rigidly applied, would result in unreasonable hardship upon a skilled nursing facility, but only if such waiver will not adversely affect the health and safety of the patients;

(ii) The provisions of such Code shall not apply in any State if the Secretary finds, in accordance with applicable provisions of, section 1861(j)(13) of the Social Security Act, that in such State there is in effect a fire and safety code, imposed by State law, which adequately protects patients in skilled nursing facilities;

(iii) Any skilled nursing facility (or part of a skilled nursing facility) which on May 31 1976, complied (subject to the provisions of § 405.1907) with the applicable provisions of the Life Safety Code, 21st Edition, 1967, with or without waivers of specific provisions, or complied with the applicable provisions of a fire and safety code imposed by State law where the Secretary had made a finding that such fire and safety code adequately protected patients in skilled nursing facilities, shall, so long as such compliance is achieved and maintained, be considered in compliance with this paragraph (a)(1).

(2) With respect to those skilled nursing facilities subject to the provisions of paragraph (a)(1)(iii) of this section, to the extent that inhalation therapy is provided and nonflammable medical gas systems such as oxygen and nitrous oxide are, or have been, installed, the skilled nursing facility complies with the applicable provisions of National Fire Protection Association Standard No. 56B, Standard for the Use of Inhalation Therapy (1968), and National Fire Protection Association Standard No. 56F, Nonflammable Medical Gas Systems (1970).

(3) Where a skilled nursing facility is housed in an existing building of two or more stories which is not of at least 2-hour fire-resistive construction and waiver of this construction requirement is granted where appropriate, blind, nonambulatory, or physically handicapped patients are not housed above the street level floor unless the building is one of the following types:

(i) Fully sprinklered 1-hour protected noncombustible construction (as defined in National Fire Protection Association Standard No. 220);

(ii) Fully sprinklered 1-hour protected ordinary construction; or

(iii) Fully sprinklered 1-hour protected wood frame construction.

Social and Rehabilitation Service

[45 CFR Part 249]

MEDICAL ASSISTANCE PROGRAM

Life Safety Code Requirement for Intermediate Care Facilities

Notice is hereby given that the regulations set forth in tentative form below are proposed by the Administrator, Social and Rehabilitation Service, with the approval of the Secretary of Health, Education, and Welfare.

The purpose of these amendments is to update fire safety regulations with respect to intermediate care facilities, conforming them to the provision adopted for application to skilled nursing facilities under the Medicare and Medicaid programs published elsewhere in this issue. The changes would require, effective 30 days following the date of final publication, the use of the 1973 Life Safety Code of the National Fire Protection Association in the certification of intermediate care facilities.

However, the following exceptions would be made:

1. Intermediate care facilities that meet, with or without waivers, the provisions of the 1967 Life Safety Code on the day preceding the effective date of these regulations would not be required to meet any additional requirements of the 1973 Code.

2. A skilled nursing facility already certified as meeting the provision of the 1967 Code, which on or after the effective date of these regulations applies for certification also as an intermediate care facility, can be certified on the basis of the 1967 Code.

3. Intermediate care facilities with approved plans of correction under the 1967 Code prior to the effective date of these regulations will be exempt from application of the 1973 edition of the Code as long as compliance with the 1967 Code is achieved and maintained.

The following exceptions are in existing regulations and would be unchanged by the proposed regulations:

1. Specified facilities of 15 beds or less may meet the provisions of the Lodging or Rooming Houses section rather than the institutional provisions of the Code.

2. Specific provisions of the Code which would result in unreasonable hardship upon a facility may be temporarily waived.

3. Certified facilities that meet, on the day preceding the effective date of these regulations, applicable provisions of a State fire and safety code imposed by State law and approved by the Secretary, in accordance with law and regulation, will be considered in compliance with the

Medicaid fire safety requirements under the intermediate care facility program.

The change to the use of the 1973 Code from the 1967 Code with respect to skilled nursing facilities was mandated by section 106 of Public Law 94-182, December 31, 1975, and is being adopted by regulation for intermediate care facilities to maintain consistency in the application of fire safety requirements for long-term care facilities under the Medicaid program.

The basis for this proposal is the Secretary's belief that it is appropriate to apply the updated version of the Code to all long-term care facilities entering the Medicaid program on or after the effective date of this regulation.

Since a considerable number of institutions participate as both skilled nursing and intermediate care facilities under the Medicaid program, it would be unnecessarily complex for governing Federal regulations to provide different editions of the Life Safety Code for application of the same requirements under both programs. Also, confusion would be created for the State survey teams which inspect and certify both types of facilities against a standard which has always been uniform. No disadvantage for intermediate care facilities will result from the updated requirement since those facilities participating in the program prior to the effective date of the regulation may continue to be certified under the provisions of the 1967 edition of the Code.

Prior to the adoption of the proposed regulations, consideration will be given to written comments, suggestions, or objections thereto which are received by the Administrator, Social and Rehabilitation Service, Department of Health, Education, and Welfare, P.O. Box 2366, Washington, D.C. 20013, on or before March 14, 1977. In order to assure prompt handling of comments, please refer to MSA-184-P. Agencies and organizations are requested to submit their comments in duplicate.

Comments will be available for public inspection, beginning approximately two weeks after publication, in Room 5225 of the Department's offices at 330 C Street, S.W., Washington, D.C., on Monday through Friday of each week from 8:30 a.m. to 5 p.m. (202-245-0950). Answers to specific questions may be obtained by calling Robert Silva (202-245-0425).

(Sec. 1102, 49 Stat. 647 (42 U.S.C. 1302).)

(Catalog of Federal Domestic Assistance Program No. 13.714, Medical Assistance Program.)

The Social and Rehabilitation Service has determined that this document does not require preparation of an Inflationary Impact Statement under Executive Order 11821 and OMB Circular A-107.

Dated: January 10, 1977.

ROBERT FULTON,
Administrator, Social and Rehabilitation Service.

Approved: January 11, 1977.

MARJORIE LYNCH,
Acting Secretary.

Part 249, Chapter II, Title 45 of the Code of Federal Regulations is amended as set forth below:

1. Sections 249.12 (a) (5) and (a) (6) (ix) are revised to read as follows:

§ 249.12 Standards for intermediate care facilities.

(a) Standards for an intermediate care facility (as defined in § 249.10(b) (15) of this part) which are specified by the Secretary pursuant to section 1905 (c) and (d) of the Social Security Act and are applicable to all intermediate care facilities are as follows. The facility:

* * * * *

(5) (i) Meets such provisions of the Life Safety Code of the National Fire Protection Association, 1973 edition, as are applicable to institutional occupancies: except that:

(A) For facilities of 15 beds or less, the State survey agency may apply the Lodging or Rooming Houses section of the residential occupancy requirements of the Code for institutions for the mentally retarded or persons with related conditions and intermediate care facilities primarily engaged in the treatment of alcoholism and drug abuse, all of whose residents are currently certified by a physician or in the case of an institution for the mentally retarded or persons with related conditions by a physician or psychologist as defined in paragraph (c) (3) (i) of this section, as:

(*1*) Ambulatory;

(*2*) Engaged in active programs for rehabilitation which are designed to and can reasonably be expected to lead to independent living, or in the case of an institution for the mentally retarded or persons with related conditions, receiving active treatment; and

(*3*) Capable of following directions and taking appropriate action for self-preservation under emergency conditions;

(B) In accordance with criteria issued by the Secretary, the State survey agency may waive the application to any such facility of specific provisions of such Code, for such periods as it deems appropriate, which provisions if rigidly applied would result in unreasonable hardship upon a facility, but only if such waiver will not adversely affect the health and safety of the residents;

(C) The Life Safety Code shall not apply in any State if the Secretary makes a finding that in such State there is in effect a fire and safety code, imposed by State law, which adequately protects residents in intermediate care facilities;

(D) Any certified intermediate care facility which complied with the provisions of the 1967 Code on (the day preceding the effective date of these revisions) shall be considered to be in compliance with this standard for so long as such compliance is maintained. Compliance is maintained by meeting the applicable provision of the 1967 Code, with or without waivers of specific provisions, by implementing an approved plan of correction, or by meeting the applicable provision of a fire and safety code imposed by State law as provided for in paragraph (a) (5) (i) (C) of this section; and

(E) A skilled nursing facility certified in accordance with 20 CFR 405.1134(a) as meeting the provisions of the 1967 Code, which applies for certification as an intermediate care facility on or after (the effective date of these revisions) may be certified as an intermediate care facility on the basis of meeting the provisions of the 1967 Code.

(ii) In an existing facility of two or more stories which is not of at least 2-hour fire resistive construction, blind, nonambulatory or physically handicapped residents are not housed above the street level floor unless the facility is of fully sprinklered 1-hour protected non-combustible construction (as defined in National Fire Protection Association Standard #220), fully sprinklered 1-hour protected ordinary construction or fully sprinklered 1-hour protected wood frame construction.

* * * * *

2. Section 249.33(a) (2) (v) is amended to read as follows:

§ 249.33 Standards for payment for skilled nursing facility and intermediate care facility services.

(a) *State plan requirements.* A State plan for medical assistance under title XIX of the Social Security Act must:

* * * * *

(2) Provide that the single State agency will, prior to execution of an agreement with any facility (including hospitals and skilled nursing facilities) for provision of intermediate care facility services and making payments under the plan, obtain certification from the agency designated pursuant to § 250.100 (c) of this chapter that the facility meets the definition set forth under § 249.10(b) (15); except that in the case of an intermediate care facility determined to have deficiencies under the requirements for environment and sanitation (§ 249.12(a) (6)) or of the Life Safety Code (§ 249.12(a) (5)) it may be recognized for certification as an intermediate care facility in accordance with subparagraph (4) (iii) of this paragraph for a period not exceeding 2 years following the date of such determination provided that:

* * * * *

(v) At the completion of the period allowed for corrections, the intermediate care facility is in full compliance with the Life Safety Code requirements set forth under § 249.12(a) (5), and the requirements for environment and sanitation set forth under § 249.12(a) (6), except for any provisions waived in accordance with § 249.12.

HEAD START PROGRAM

Identification and Reporting of Child Abuse and Neglect; Policy Instruction

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Office of Human Development

HEAD START PROGRAM

Identification and Reporting of Child Abuse and Neglect; Policy Instruction

The Proposed Policy Instruction on Identification and Reporting of Child Abuse and Neglect was published in the FEDERAL REGISTER on January 20, 1976, prescribing instructions on the identification and the reporting of child abuse and neglect for Head Start and delegate agencies.

Interested persons and organizations were invited to submit comments on or before March 26, 1976. Eight-two (82) comments were received from thirty-seven (37) individuals and organizations in regard to the Proposed Policy Instruction. Of thirty-seven (37) individuals and organizations, thirty-five (35) concurred with the proposed policy, accompanied by some recommendations and comments. The other two (2) opposed the proposed policy on the grounds that child abuse was rare and that reporting of child abuse or neglect cases could jeopardize the trust relationship between Head Start staff and parents. Comments and recommendations were generally thoughtful and helpful and they covered primarily the following:

A. The definition of child abuse and neglect should be separated and distinguished considering the definition of child abuse as a "willful" act, while neglect is often an outcome of environmental or educational circumstances.

B. "Suspected" child abuse should be recognized as justifiable for reporting.

C. Head Start has already been playing a significant role in preventing and alleviating the problems of child abuse and neglect, and the proposed policy does not fully recognize this fact.

D. There is a concern over personal protection from physical or mental harassment that could occur as a result of reporting.

E. The admission of already "eligible" children on the grounds of abuse or neglect does not serve the purpose that the admission of "ineligible" children on these grounds would.

F. Parents and communities need to be made aware of the seriousness of child abuse and neglect, educated on laws governing it, as well as informed about agencies that are available to them to help prevent child abuse and the services Head Start offers in this area.

G. There is a desire and need by the staff and parents for training and education about child abuse and neglect and the laws concerning this issue.

H. When the Head Start program is located within the jurisdiction of an American Indian tribe, the reporting in accordance with tribal code should be accepted on the same basis as reporting in accordance with State law.

It was suggested that the definition of child abuse and neglect be separated and distinguished considering the definition of child abuse as a "willful" act, while neglect is often an outcome of environmental or educational circumstances. The reason for distinguishing the definition of the two seems to be based on an assumption that abuse is a willful act, whereas neglect is not, and that parents or guardians who abuse children are more responsible for their acts than those who neglect children. Yet, neglecting a child can be just as harmful in many instances as abusing a child, in our opinion. This policy requires the Head Start agencies to comply with the State law in identifying and reporting child abuse and neglect. Since many State laws do not distinguish the definitions of the two, it would be confusing to some Head Start agencies. Office of Child Development (OCD) did not revise the policy based on this comment.

It has been a concern to OCD that the reporting of child abuse and neglect may strain the relationship between Head Start and parents. However, this distressing social problem of child abuse and neglect must be dealt with, and it is our hope that it can be done without damaging the trust relationship with parents. We recognize the potential public relations problems inherent in implementing this policy, but must keep in mind the threat which abuse and neglect imposes on children who become victims. If Head Start did not report a child abuse or neglect case to preserve a trust relationship with parents, the credibility and viability of Head Start may be jeopardized with other parents, staff members, and the public. This kind of problem can be minimized or prevented if Head Start agencies provide an orientation session for parents where the nature of the problem, available treatment and resources, and the position of Head Start, can be discussed, accompanied by the social service coordinator's working closely with the parents throughout the year. OCD made no revision based on this comment.

It was pointed out that the admission of already "eligible" children on the grounds of abuse or neglect does not serve the purpose that the admission of "ineligible" children on these grounds would. OCD appreciated this comment. However, if this policy did change the eligibility by allowing Head Start to accept otherwise ineligible children, Head Start would become a child abuse and neglect treatment agency. This raises a series of issues in terms of the local Head Start's resources and working relationship with the State-designated agency as well as legal questions under the Headstart-Follow Through Act. OCD made no revision based on this comment.

While we concur with the desirability of requiring reporting of "suspected" child abuse and neglect, the reporting laws of several States do not mandate or authorize the making of reports on the basis of evidence of abuse and neglect which arouses only a suspicion. In such States the reporting statute would not grant immunity from civil and criminal liability to a reporter who based his report on suspicion. This policy, therefore, even though it requires reports by Head Start agencies and personnel in all cases reportable under State or local laws, whether mandatory or voluntary, does not impose a universal duty to report suspected child abuse and neglect. Thus, the phrase, "child abuse and neglect," as used herein, refers to both the definition of abuse and neglect under applicable State law, and the evidentiary standard required for reporters under applicable State law. OCD made no change based on this comment.

The following changes have been made on the Proposed Policy Instruction based on these comments:

A. "Applicable" is added immediately before "State", and "local" is added immediately after "State", where appropriate, to allow Indian tribes who do not follow the State laws to report in accordance with the tribal code.

B. The last paragraph of Section N-30-356-1-30, Policy—A. *General provisions*, was revised to recognize the role that Head Start has been playing in preventing child abuse and neglect.

C. *Training*, (2) under B. *Special provisions*, was strengthened to make communities aware of the seriousness of child abuse and neglect and to accommodate the needs and wants for training, by the Head Start staff members and parents, in child abuse and neglect.

This policy instruction is published pursuant to the requirements of section 517(d), Title V, Economic Opportunity Act of 1964, as amended by section 8(a) of the Headstart, Economic Opportunity, and Community Partnership Act of 1974.

The National Center on Child Abuse and Neglect has been established in the Office and Child Development to implement the Child Abuse Prevention and Treatment Act ("the Act"), Pub. L. 93-247. Although Head Start is not specially affected by the new child abuse and neglect Act, the establishment of the National Center has increased our awareness of the role that Head Start can end, in fact, has been playing in the effort to prevent and identify child abuse and neglect and find help for the child and his/her family. Thus, the establishment of the Center and increased Federal effort in child abuse and neglect prevention, identification, treatment, and reporting have prompted a careful reexamination of what Head Start has been doing about this most distressing problem and development of specific guidance to assist Head Start programs in dealing with it.

States set different requirements for pre-school and day care staff in reporting suspected child abuse and neglect cases. Twenty-nine (29) States mandate pre-school and day care staff to report suspected child abuse or neglect cases and twenty-five (25) States permit day care staff to report suspected child abuse or neglect cases. Therefore, Head Start agencies need policy guidance in dealing with suspected child abuse and neglect cases. This policy provides that guidance.

Effective date: This policy instruction shall be effective on January 26, 1977.

(Catalogue of Federal Domestic Assistance Programs No. 13,600 Child Development—Head Start.)

Dated: January 18, 1977.

JOHN H. MEIER,
Director,
Office of Child Development.

Approved: January 18, 1977.

STANLEY B. THOMAS, JR.,
Assistant Secretary for
Human Development.

The Chapter N-30-356-1 in the Head Start Policy Manual reads as follows:

N-30-356-1-00 Purpose.
10 Scope.
20 Applicable law and policy.
30 Policy.

AUTHORITY: 80 Stat. 2304 (42 U.S.C. 2928h).

N-30-356-1-00 *Purpose.* This chapter sets forth the policy governing the prevention, identification, treatment, and reporting of child abuse and neglect in Head Start.

N-30-356-1-10 *Scope.* This policy applies to all Head Start and delegate agencies that operate or propose to operate a Full-Year or Summer Head Start program, or experimental or demonstration programs funded by Head Start. This issuance constitutes Head Start policy and noncompliance with this policy will result in appropriate action by the responsible HEW official.

N-30-356-1-20 *Applicable law and policy.* Section 511 of the Headstart-Follow Through Act, P.L. 93-644, requires Head Start agencies to provide comprehensive health, nutritional educational, social and other services to the children to attain their full potential. The prevention, identification, treatment, and reporting of child abuse and neglect is a part of the social services in Head Start. In order for a State to be eligible for grants under the Child Abuse Prevention and Treatment Act (hereinafter called "the Act"), P.L. 93-247, the State must have a child abuse and neglect reporting law which defines "child abuse and neglect" substantially as that term is defined in the regulations implementing the Act, 45 CFR 1340.1-2(b). That definition is as follows:

A. "(b) 'Child abuse and neglect' means harm or threatened harm to a child's health or welfare by a person responsible for the child's health or welfare.

"1. 'Harm or threatened harm to a child's health or welfare' can occur through: Nonaccidental physical or mental injury; sexual abuse, as defined by State law; or neglectful treatment or maltreatment, including the failure to provide adequate food, clothing, or shelter. Provided, however, that a parent or guardian legitimately practicing his religious beliefs who thereby does not provide specified medical treatment for a child, for that reason alone shall not be considered a negligent parent or guardian; however, such an exception shall not preclude a court from ordering that medical services be provided to the child, where his health requires it.

"2. 'Child' means a person under the age of eighteen.

"3. 'A person responsible for a child's health or welfare' includes the child's parent, guardian, or other person responsible for the child's health or welfare, whether in the same home as the child, a relative's home, a foster care home, or a residential institution."

In addition, among other things, the State would have to provide for the reporting of known or suspected instances of child abuse and neglect.

It is to be anticipated that States will attempt to comply with these requirements. However, a Head Start program, in dealing with and reporting child abuse and neglect, will be subject to and will act in accordance with the law of the State in which it operates whether or not that law meets the requirements of the Act. Thus, it is the intention of this policy in the interest of the protection of children to insure compliance with and, in some respects, to supplement State or local law, not to supersede it. Thus, the phrase "child abuse and neglect," as used herein, refers to both the definition of abuse and neglect under applicable State or local law, and the evidentiary standard required for reporters under applicable State or local law.

N-30-356-1-30 *Policy*—A. *General provisions.* 1. Head start agencies and delegate agencies must report child abuse and neglect in accordance with the provisions of applicable State or local law.

a. In those States and localities with laws which require such reporting by pre-school and day care staff, Head Start agencies and delegate agencies must report to the State or local agencies designated by the State under applicable State or local Child Abuse and Neglect reporting law.

b. In those States and localities in which such reporting by pre-school and day care staff is "permissive" under State or local law, Head Start agencies and delegate agencies must report child abuse and neglect if applicable State or local law provides immunity from civil and criminal liability for goodfaith voluntary reporting.

2. Head Start agencies and delegate agencies will preserve the confidentiality of all records pertaining to child abuse or neglect in accordance with applicable State or local law.

3. Consistent with this policy, Head Start programs will not undertake, on their own, to treat cases of child abuse and neglect. Head Start programs will, on the other hand, cooperate fully with child protective service agencies in their communities and make every effort to retain in their programs children allegedly abused or neglected—recognizing that the child's participation in Head Start may be essential in assisting families with abuse or neglect problems.

4. With the approval of the policy council, Head Start programs may wish to make a special effort to include otherwise eligible children suffering from abuse or neglect, as referred by the child protective services agency.

However, it must be emphasized that Head Start is not nor is it to become a primary instrument for the treatment of child abuse and neglect. Nevertheless, Head Start has an important preventative role to play in respect to child abuse and neglect.

B. *Special provisions*—1. *Staff responsibility.* Directors of Head Start agencies and delegate agencies that have not already done so shall immediately designate a staff member who will have responsibility for:

a. Establishing and maintaining cooperative relationships with the agencies providing child protective services in the community, and with any other agency to which child abuse and neglect must be reported under State law, including regular formal and informal communication with staff at all levels of the agencies;

b. Informing parents and staff of what State and local laws require in cases of child abuse and neglect;

c. Knowing what community medical and social services are available for families with an abuse or neglect problem;

d. Reporting instances of child abuse and neglect among Head Start children reportable under State law on behalf of the Head Start program;

e. Discussing the report with the family if it appears desirable or necessary to do so;

f. Informing other staff regarding the process for identifying and reporting child abuse and neglect. (In a number of States it is a statutory requirement for professional child-care staff to report abuse and neglect. Each program should establish a procedure for identification and reporting.)

2. *Training.* Head Start agencies and delegate agencies shall provide orientation and training for staff on the identification and reporting of child abuse and neglect. They should provide an orientation for parents on the need to prevent abuse and neglect and provide protection for abused and neglected children. Such orientation ought to foster a helpful rather than a punitive attitude toward abusing or neglecting parents and other caretakers.

Office of Human Development

CHILD ABUSE AND NEGLECT RESEARCH AND DEMONSTRATION GRANTS PROGRAMS

General Information

This announcement contains general information regarding the Office of Child Development's Child Welfare and Child Abuse and Neglect Research and Demonstration Grants Programs, including legislation, regulations, policy and procedures governing the two programs.

A summary of program priorities and estimated funding levels for each fiscal year will be disseminated in separate announcements.

INTRODUCTION

The Office of Child Development (OCD) was established on July 1, 1969 within the Office of the Secretary of the Department of Health, Education, and Welfare to serve as the coordinating agency for Federal programs for children and youth.

In June 1973, the Office became part of the newly-created Office of Human Development, headed by an Assistant Secretary for Human Development.

OCD's functions are carried out through the Office of the Director and its two major bureaus: the Children's Bureau, authorized by the Children's Bureau Act of 1912 to investigate and report "upon all matters pertaining to the welfare of children and child life among all classes of our people," and the Head Start Bureau, which administers Project Head Start.

To accomplish its goals, the Office of Child Development has set for itself three major missions:

(1) To act as an advocate on behalf of children of all ages, and especially those children who are handicapped physically or emotionally, economically deprived, victims of the disruption of the family unit, or of child abuse and neglect, by bringing the needs of these children to the attention of other Government agencies and the public; by promoting beneficial changes in child and family development; and by planning new programs for children and their families;

(2) To coordinate the activities of Federal programs for children and their families as well as all Federal research in early child development;

(3) To ensure high quality services for children through effective administration of such programs as Head Start and Parent-Child Centers and through leadership in the development of standards, policies, and models in child welfare and other child-oriented programs.

TWO RESEARCH AND DEMONSTRATION GRANTS PROGRAMS

One of the significant ways in which the Office of Child Development carries out its objectives is through the support of high quality research and demonstration projects in the areas of child and family development, child welfare, services to children and families, and child abuse and neglect.

OCD is authorized by law to administer two grants programs, the Child Welfare and the Child Abuse and Neglect Research and Demonstration Grants Programs. These are administered jointly by the Research and Evaluation Division, located in the Office of the Director, and the Children's Bureau.

CHILD WELFARE RESEARCH AND DEMONSTRATION GRANTS PROGRAM

This program is authorized by 42 USC 626(a)(1)(A) and (B), (Section 426, Part B, Title IV of the Social Security Act). This legislation provided the Department of Health, Education, and Welfare with responsibility for conducting Child Welfare research, training, and demonstration projects.

Child Welfare services are defined in section 425 as "public social services which supplement, or substitute for, parental care and supervision for the purpose of:

(1) Preventing or remedying, or assisting in the solution of problems which may result in, the neglect, abuse, exploitation, or delinquency of children,

(2) Protecting and caring for homeless, dependent, or neglected children,

(3) Protecting and promoting the welfare of children of working mothers, and

(4) Otherwise protecting and promoting the welfare of children, including the strengthening of their own homes where possible, or, where needed, the provision of adequate care of children away from their homes in foster family homes or day care or other child care facilities."

The Child Welfare Research and Demonstration Grants Program is stated in section 426 as follows: "(a) There are hereby authorized to be appropriated for each fiscal year such sums as the Congress may determine—

(1) For grants by the Secretary—

(A) To public or other nonprofit institutions of higher learning, and to public or other nonprofit agencies and organizations engaged in research or child welfare activities, for special research or demonstration projects in the field of child welfare which are of regional or national significance and for special projects for the demonstration of new methods or facilities which show promise of substantial contribution to the advancement of child welfare;

(B) To State or local public agencies responsible for administering, or supervising the administration of, the plan under this part, for projects for the demonstration of the utilization of research (including findings resulting therefrom) in the field of child welfare in order to encourage experimental and special types of welfare services."

Within this general legislative authority, the Office of Child Development supports major research and demonstration efforts in selected areas of high impact and national concern where the utilization of findings is expected to make a substantial contribution to the development and welfare of children and their families.

Recent areas to receive support include demonstrations of the provision of comprehensive emergency services to maintain children in their homes in times of crisis, development of comprehensive day care models with an emphasis on child development, education in parenting which combines the study of child development and child care for teenagers with meaningful cross-age experiences, demonstrations to increase the number of adoptive and foster homes, demonstrations of methods to bring about changes in the institutional care of children, research on the impact of television as a socializing agent on the infant, preschool child and family, research on the effects of early intervention programs, research on child/family/institution interaction, and on the child welfare service delivery system.

Through the utilization and dissemination of findings of successful projects, a nationwide program of Education for Parenthood is ongoing in close to 3,000 of the nation's high schools and national voluntary organizations, and Comprehensive Emergency Services projects which have proved successful in maintaining children in their own homes in times of crisis through provision of services such as emergency homemakers are being replicated. Another successful demonstration project currently being replicated is one dealing with children in long-term foster care. Many of these children were returned to their biological homes, while in other cases, the parental relationship was terminated in order to provide nurturing adoptive homes for these children. Other significant ongoing programs are providing information which will lead to the development of a functional national policy on child and family development.

CHILD ABUSE AND NEGLECT RESEARCH AND DEMONSTRATION GRANTS PROGRAM

This program is authorized by 42 U.S. Code 5101, the Child Abuse Prevention and Treatment Act of 1974. The Act created the National Center on Child Abuse and Neglect within the Children's Bureau of the Office of Child Development.

The Act defines "child abuse and neglect" as the physical or mental injury, sexual abuse, negligent treatment, or maltreatment of a child under the age of eighteen by a person who is responsible for the child's welfare under circumstances which indicate that the child's welfare under circumstances which indicate that the child's health or welfare is harmed or threatened thereby, as determined in accordance with regulations prescribed by the Secretary." The authority of the Secretary has been delegated to OCD, and the program is in the Children's Bureau's National Center on Child Abuse and Neglect. Under paragraphs 2(b)(5) and 2(c), the Children's Bureau is authorized to "conduct research into the causes of child abuse and neglect, and into the prevention, identification, and treatment thereof."

Under section 4(a) of the Act, the Children's Bureau "is authorized to make grants to, and enter into contracts with, public agencies or nonprofit private organizations (or combinations thereof) for demonstration programs and projects designed to prevent, identify, and treat child abuse and neglect." Demonstrations constitute a major portion of activities conducted under the Act. Suggested areas of activity are: training of professionals and paraprofessionals in various disciplines involved in the prevention, identification, and treatment of child abuse and neglect; the establishment and maintenance of centers which provide a broad range of services related to child abuse and neglect; "and other innovative programs and projects that show promise of successfully preventing or treating cases of child abuse and neglect as the Secretary may approve."

Among the child abuse and neglect activities the Children's Bureau has been supporting under the Act are: demonstrations of the delivery of services to abused children and their families in general and specifically to military, rural, and Native American populations; demonstration resource projects, providing technical assistance and training to service providers through different models; demonstrations by State agencies and professional organizations of the use of the Children's Bureau-developed multidisciplinary staff training curriculum; and research into the causes of child abuse and neglect and into the relationship between drugs or alcohol abuse and child abuse and neglect.

ELIGIBILITY

Grants under both the Child Welfare and Child Abuse and Neglect Research and Demonstration Grants Program may be awarded to public or private nonprofit organizations. Grants are not made to individuals even though they may be affiliated with a public or private nonprofit institution. In certain cases, a specific program announcement may further define or limit eligibility. For example, a recent announcement of intent to fund projects dealing with foster care limited eligible applicants to the single State agency or organizational unit responsible for social services to children and families.

Support is available under both of these programs for both research and demonstration projects. Support is not available for the expansion of ongoing programs or services, such as the provision of day care services, or for projects that demonstrate a service that has already been established in other communities and is generally accepted as part of a comprehensive child welfare, child development, or child abuse and neglect program. Under the Child Welfare Research and Demonstration Grants Program, support is not available for staff training.

Research, both basic and applied, and demonstration are defined as follows:

Basic research refers to research directed primarily toward the increase of knowledge, the improvement of understanding, the provision of background information, and the discovery of basic relationships. It is not necessarily applicable to solutions of immediate problems, and may include theory building.

Applied research refers to research in which results are intended to be more directly applicable to immediate problems than basic research. It may be derived from basic research or theory or may be empirical. It may be aimed at showing how existing knowledge can be used in new and useful ways.

Demonstration and/or replication refer to activities designed specifically to show the method of operation or applicability of a research or program model.

HOW TO APPLY

Names of individuals and organizations will be added to mailing lists to either or both grants programs on request. Inquiries should be addressed to Research and Evaluation Division, Office of Child Development, P.O. Box 1182, Washington, D.C. 20013. Potential applicants should specify whether the request is related to the Child Welfare or Child Abuse and Neglect Research and Demonstration Grants Program.

Priority statements (program announcements) are disseminated by the Office of Child Development to inform the research community of the types of projects the Agency is most interested in supporting during that fiscal year. When priorities for the current fiscal year become available, they are sent along with an application kit, deadline information, and other pertinent materials, to the organizations and individuals on OCD's mailing list. This information is also published in the FEDERAL REGISTER.

OCD also supports a very small number of projects known as "unsolicited" projects, which while not specifically related to the issues and projects identified in the priority statements, nevertheless show promise of making a substantial contribution to our knowledge regarding the development and welfare of children, as consistent with the stated OCD goals.

All applications must be submitted on the forms supplied and in the manner prescribed by the Office of Child Development. Failure to do so might remove a proposal from consideration.

REVIEW AND AWARD PROCESS

Completed and eligible grant applications go through a series of steps which comprise the review process.

ADVISORY COMMITTEE

Most proposals are reviewed by members of the Child and Family Development Research Review Committee, a 20-member non-Federal Advisory Committee composed of experts in the fields of child development and child welfare. (Proposals submitted by an institution represented by a member of the Committee and therefore subject to a possible conflict of interest if reviewed by the Committee, will usually be reviewed by a non-Federal Ad Hoc Committee representing the same level of professional expertise and utilizing the same evaluation criteria.)

EVALUATION CRITERIA

All proposals reviewed by the Advisory Committee or an Ad Hoc Committee are evaluated at a minimum according to the following elements:

1. Appropriateness of cost to the government in view of anticipated results

2. Qualifications of project personnel and adequacy of organizational facilites and resources

3. Capability of proposed procedures (scientific or otherwise), if well executed, of attaining project objectives

4. Responsiveness to priority statement, i.e., capability of achieving specific program objectives defined in program announcement.

Additional criteria will be used by the Advisory Committee as is appropriate to a particular priority statement. The specific criteria will be published as part of the priority statement.

"Unsolicited" proposals, those which are not submitted in response to OCD priority statements, must meet all the standards of quality of the solicited proposals. They are evaluated on Items 1-3 (above) as well as the following criteria:

The research addresses problems of OCD target populations or identifies a new target group of concern to OCD, e.g., learning-disabled, Oriental-American.

The research is within the long-range goals of OCD

The research is a new approach to a problem or brings together a new configuration for addressing a problem.

FUNDING DECISIONS

The Child and Family Development Research Review Committee and Ad Hoc Committees function in an advisory capacity. They make their recommendations in the form of a numerical score and narrative critique for each proposal to the Director of the Office of Child Development, who makes the final funding decisions. These decisions are based upon the recommendations of the Committee, program priorities, availability of funds, and other relevant factors, such as equitable geographic distribution of funds, as is mandated in the Child Abuse and Neglect Research and Demonstration Grants Program.

NOTIFICATION OF DECISION

Notification of final decisions is made in writing to the person designated on the application as the official authorized to obligate the applicant agency. Applicants of approved projects will receive a "Notice of Grant Awarded," (NGA), the official grant award document that notifies the grantee and others of the award of the grant, contains or references all terms and conditions of the grant, and provides the documentary basis for recording the obligation of Federal funds in the Department's accounting system.

Unsuccessful applicants will receive a letter from the Office of Child Development which will include an explanation of the reasons for disapproval or indicate that an explanation may be obtained upon request.

POST AWARD MANAGEMENT OF GRANTS

I. Acceptance by an agency of a grant indicates that the agency agrees to be bound by DHEW, OHD and OCD legislation, regulations, and policies. There are several significant policy documents which the grantee agency should be aware of.

1. Part 205 of Title 42 of the Code of Federal Regulations, (42 CFR Part 205) entitled "Research Projects Relating to Maternal and Child Health Services and Crippled Children's Services, and Research or Demonstration Projects relating to Child Welfare Services," implements the Child Welfare Research and Demonstration Grants Program conducted by the Office of Child Development under section 426 of the Social Security Act.

2. Part 1340 of Title 45 of the Code of Federal Regulations (45 CFR Part 1340), entitled "Child Abuse and Neglect Prevention and Treatment Program," implements the research and demonstration programs conducted under the Child Abuse Prevention and Treatment Act of 1974.

3. Part 74 of Title 45 of the Code of Federal Regulations (45 CFR Part 74), entitled "Administration of Grants," implements for all of DHEW a single consistent body of administrative rules and contains uniform cost principles for all of the classes of grantees eligible to receive funds under the Child Welfare and Child Abuse and Neglect Research and Demonstration Grants Program. The policies of 45 CFR Part 74 supersedes all policy in other regulations cited above where the policies in 45 CFR 74 are not consistent with these other regulations.

4. *Department of Health, Education, and Welfare Staff Manual—Grants Administration (DHEW/GAM) contains* policies binding on grantees. It includes further guidance on the administrative regulations contained in 45 CFR Part 74. The *GAM* also contains additional DHEW policy which speaks to areas of administrative activity not described by regulation.

5. *Office of Human Development—Grants Administration Manual (OHD/GAM)* reflects the *DHEW/GAM* and discusses areas where governing policy for OHD programs varies from standard DHEW policy. These variances are generally due to specific legislative requirements.

6. *Special Conditions.* The Office of Child Development may apply special conditions to a grant prior to the acceptance of that grant. Where such conditions are imposed, they must be met by the grantee.

AVAILABILITY OF RULES AND MANUALS

The regulations implementing the two program authorities, 42 CFR Part 205 and 45 CFR Part 1340 are available on request from the Office of Child Development. Requests should be sent to the Research and Evaluation Division, Office of Child Development, P.O. Box 1182, Washington, D.C. 20013.

The *OHD/GAM* may be obtained from the Division of Grants and Contract Administration, Office of Administration and Management, Office of Human Development, HEW South Portal Building, Room 345F, Washington, D.C. 20013.

Part 74 of Title 45 of the Code of Federal Regulations and the *DHEW/GAM* are available for a reasonable charge from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

DURATION OF SUPPORT

The average duration of support for a project is three years. Generally, when more than one year is required to realize the objectives of a project, the grant is approved at the outset for continued support and the total project period indicated on the "Notice of Grant Awarded." However, applications for continuation of support must be submitted and approved annually. Approval beyond the first year is dependent upon satisfactory progress of the project as indicated in a progress report and by the availability of funds as determined by the Congressional appropriation for the current fiscal year.

PROJECT OFFICER

Each approved project is assigned to a staff member of the Division of Research and Evaluation or Children's Bureau who serves as project officer. The project officer facilitates the operation of the project in meeting its objectives, reviews applications for continuation, and makes site visits and consults with project staff as is appropriate. The project officer should be consulted when questions arise.

DEPARTMENT OF TRANSPORTATION

Office of the Secretary

INTERNATIONAL AIR TRANSPORTATION POLICY STATEMENT IMPLEMENTATION PLAN

Requests for Public Comment

DEPARTMENT OF TRANSPORTATION

Office of the Secretary

[Notice No. 77-1]

INTERNATIONAL AIR TRANSPORTATION POLICY STATEMENT IMPLEMENTATION PLAN

Request for Public Comment

The purpose of this notice is to set forth the Department of Transportation plan for implementing the International Air Transportation Policy Statement and to request public comment. On September 8, 1976, President Ford issued a new Statement of International Air Transportation Policy of the United States. This statement explicitly superseded the 1970 international aviation policy statement. The world of international aviation has changed substantially since 1970, and both the role and the philosophy of the United States have been challenged. The new policy reflects the changes that have taken place and the present U.S. positions.

The primary goal in formulating new policy has been the interest of the U.S. consumer in having available both regularly scheduled passenger and cargo services and low-cost charter service options. Another principal concern is to assure that well-managed, efficient U.S. airlines can earn a reasonable return on investment.

The policies contained in the Statement envision a revitalized U.S. international aviation system. Policies are truly meaningful, however, only when they are implemented. Accordingly, the group of government agencies and departments which developed the Policy Statement have listed the key actions, as shown below, that need to be applied in such areas as routes and competition, fares and rates, roles of scheduled and charter operations, excess capacity, unfair competitive practices, and safety and environmental considerations. These actions have been organized under five broad functions (actions before the Civil Aeronautics Board, bilateral negotiations, legislative and regulatory changes, research studies and projects, and coordination with air carriers and other organizations). The lead agency (which is underlined) and other agencies involved in the implementation are listed, as well as dates for action. It is anticipated that the lead agencies ultimately will develop a more definitive treatment of the specific issues and actions involved, as well as more precise timing for action. Actions having a high priority are designated with an asterisk.

There may be other issues which the Executive Branch of the Government should be addressing, or some of the tentative positions may not be the appropriate ones. Thus the need for comment and reactions. Air carriers, air travelers, and other interested parties are invited to comment on the implementation of the Policy Statement. Policy is an evolving process, and the evolution of international aviation policy will depend heavily upon the views, support, and efforts of U.S. airlines, air travelers, and the public. Written comments and requests for copies of the Statement of International Air Transportation Policy should be addressed to:

John B. Flynn, Director, Air Transportation Policy Staff, Department of Transportation, 400 Seventh Street, N.W., Room 10304, Washington, D.C. 20590 (202-426-4428)

Comments received before March 1, 1977, will be considered. Comments received after March 1, 1977, will be considered to the extent practicable.

Issued in Washington, D.C. on January 18, 1977.

WILLIAM T. COLEMAN, JR.,
Secretary of Transportation.

Implementation of the international air transportation policy statement

Actions	Action agencies	Action dates
A. Participation in CAB proceedings:		
1. Routes:		
*Establish and apply commercial (economic) viability standard in international route cases.	DOT	Early 1977.
*Participate in major international route cases, review CAB decisions and assess commercial viability of awards and their impact on the U.S. international route network.	DOT	1977.
Stress importance of new gateways and area service concepts in cases coming before the CAB.	DOT	1977.
Push for more expeditious handling of international route cases, particularly those routes negotiated in the 1974 United States-Canada bilateral agreement.	DOT.DOS	Early 1977.
Support U.S. carriers' applications for domestic fill-up rights..	DOT:DOS	Do.
2. Rates:		
(a) Support:		
*Establishment of cost-related scheduled and charter fares.	DOT:DOC/CIEP	1977.
Establishment of high-weight breaks.	DOT:DOC/CIEP	1977.
Full consideration of filings involving part-charter passenger and cargo tariffs.	DOT:DOC	1977.
Concept of off-peak pricing.	DOT:DOC	1977.
Full consideration of filings involving intermodality and all-cargo scheduling and routing flexibility.	DOT:DOC	Early 1977.
(b) Review:		
Major tariff filings and call for suspensions of tariffs which appear noncompensatory or attempt to increase the share of cargo moving on specific commodity rates.	DOT:DOC/CIEP	Do.
Administrative Law Judge's pending decision in Transatlantic, Transpacific and Latin American Mail Rates (docket 26487).	DOT	Do.
CAB order 76-10-11 denying temporary international mail rates.	DOT	Do.
3. Other		
(a) Support:		
Full consideration of blocked-space and equipment interchange agreements.	DOT	1977.
Relaxation of U.S. scheduled carrier off-route charter restrictions in docket 29808 rulemaking proceeding.	DOT	Early 1977.
Carrier establishment of independent commission structure through presentation of exhibits in the Travel Agency Commission investigation (docket 26672).	DOT	Do.
(b) Review:		
Capacity limitation agreements filed with CAB to determine that they meet the standards called for in the statement.	DOT	1977.
Carrier commission filings to determine full compliance with filing requirements (docket 28499).	DOT	Early 1977.
B. Bilateral negotiations:		
*Strive to prevent erosion of Bermuda principles in negotiations. Implementation includes conduct of economic analyses and exchange of economic papers.	DOS:DOT/DOC/CIEP	1977.
Stress the need to consider fair and equal opportunities to compete for benefits and not just the estimated balance of benefits.	DOS:DOT	1977.
Seek to obtain more liberal charter rights for U.S. carriers consistent with the need to assure that essential levels of scheduled service are maintained, and ensure equitable treatment of U.S. charters.	DOS:DOT	1977.
Avoid government negotiation of fares, but stress the importance of cost-related fares.	DOS:DOT	1977.
C. Changes in legislation and regulations.		
1. Legislation:		
Considered support of legislation similar to H.R. 7017 which would give public at least a 30-d notice of tariff changes.	DOT	Early 1977.
Testify regarding the merits of an anticipated travel agent self-regulation bill which is expected to be introduced during this session of Congress.	DOT	Do.
2. Regulations:		
Propose to CAB elimination of affinity charters and TGC's when it appears that ABC's and OTC's are viable concepts.	DOT	Late 1977.
File a petition for rulemaking with CAB to remove the prohibition against split charters.	DOT	Early 1977.
D. Studies and research projects:		
1. Routes:		
*Develop prototype of an economic and efficient U.S. international route network for guidance in bilateral negotiations.	DOT	Mid-1977.
*Conduct economic analysis to determine U.S. position in bilateral negotiations.	DOT; DOS/CIEP/DOC.	1977.
Determine whether charter services generally should be part of bilateral agreements and ways of preventing foreign charter restrictions.	DOT; DOS/CIEP	1977.
2. Costs: *Develop appropriate cost criteria for scheduled and charter fares and introduce in CAB proceedings.	DOT:DOC	Early 1977.
3. Capacity:		
*Develop criteria for determining what is excess capacity under Bermuda principles and how extensively the public interest requires 5th freedom operations.	DOT:DOS/CIEP	Do.
*Formalize position regarding extensive foreign carrier 6th-freedom capacity, including possible renegotiation of agreements, and implementation of pt. 213 (of CAB economic regulations) actions.	DOS:DOT/CIEP	Do.

Actions	Action agencies	Action dates
4. Discrimination:		
*Complete a review of the facts in serious discrimination cases to determine what action the Secretary of Transportation should take.	DOT:DOC	Do.
Study the economic impact of discriminatory practices by foreign carriers.	DOT:DOS	1977.
5. Other:		
Study the matter of IATA surcharges to adequately reflect currency exchange rates.	DOT.CIEP	Early 1977.
Develop a report on conclusions and recommendations resulting from an evaluation of a survey of U.S. diplomatic posts concerning airport security in host countries.	DOT.DOS	1977.
Monitor international airport/airway charges and determine whether to take steps to impose compensatory charges on foreign carriers failing to pay landing fees in home countries.	DOT.DOS	1977.
E. Coordination with carriers, U.S. Government agencies and international organizations:		
1. Carriers:		
*Encourage United States and foreign carriers to reduce any wasteful capacity on a voluntary basis.	DOT.DOS.CIEP.	1977.
Determine with U.S. carriers their need for subsidized traffic.	DOT.DOS.DOC/CIEP.	1977.
Encourage carrier filings of cost-related fares.	DOT	1977.
Meet with U.S. carriers to discuss ways to facilitate the carriage of mail on charters when scheduled capacity is unavailable.	DOT	Early 1977.
2. U.S. Government agencies:		
Meet with Postal Service on feasibility of utilizing U.S. charter service for carriage of mail when U.S. scheduled flights are not available.	DOT	1977.
Consider greater commitment of the military, to the extent practicable, to civilian aircraft cargo shipments.	DOD.DOT	Early 1977.
3. International organizations:		
Assist the development of ICAO standards and recommended practices as well as guidance materials pertaining to handling and transport of hazardous materials.	DOT	1977.
Participate fully with the United Kingdom and France in supporting the proposed sonic monitoring program of ICAO.	DOT	1977.
Seek agreement through ICAO of international aircraft noise standards which are compatible with U.S. requirements.	DOT	1977.
Participate in the comprehensive review of ICAO Aviation Security Manual contemplated in 1977.	DOT	1977.

LEGEND.—CIEP, Council on International Economic Policy; DOC, Department of Commerce; DOD, Department of Defense; DOS, Department of State; DOT, Department of Transportation; ICAO, International Civil Aviation Organization.

PART VI

DEPARTMENT OF TRANSPORTATION

Federal Railroad Administration

REGULATIONS GOVERNING PROPOSED TRANSACTIONS SUBMITTED TO SECRETARY OF TRANSPORTATION UNDER SECTION 5(3) OF THE INTERSTATE COMMERCE ACT

Establishment of Part

Title 49—Transportation

CHAPTER II—FEDERAL RAILROAD ADMINISTRATION, DEPARTMENT OF TRANSPORTATION

[FRA Economics Doc. 5, Notice 2]

PART 268—REGULATIONS GOVERNING PROPOSED TRANSACTIONS SUBMITTED TO SECRETARY OF TRANSPORTATION UNDER SECTION 5(3) OF THE INTERSTATE COMMERCE ACT

Establishment of Part

The purpose of these regulations is to set forth the procedures to be followed by railroads in preparing and submitting merger and consolidation proposals to the Administrator of the Federal Railroad Administration (the "Administrator") under section 5(3)(f) of the Interstate Commerce Act (the "Act"), 49 U.S.C. 5(3)(f).

Title IV of the Railroad Revitalization and Regulatory Reform Act of 1976, as amended (the "RRRRA"), significantly reformed the merger and consolidation procedural provisions of the Interstate Commerce Act (the "Act"). The existing procedural provisions contained in section 5(2) of the Act were streamlined by section 402 of the RRRRA, and a new expedited consolidation procedure was established in section 403, which added a new paragraph (3) to section 5 of the Act. The Secretary of Transportation (the "Secretary") has delegated his powers and duties under section 403 of the RRRRA to the Administrator.

Common carriers by railroad desiring to use the expedited procedure may propose a transaction to the Commission if, not less than six months prior to such submission, they submit the proposed transaction to the Administrator for evalution. New sections 5(3) (a) and (f) of the Act authorize common carriers by railroad in the period prior to December 31, 1981, to submit to the Administrator for his evaluation, proposals for a railroad merger, consolidation, unification or coordination project, joint use of tracks or other facilities, or acquisition or sale of assets (hereinafter collectively referred to as "consolidation").

Section 5(3) of the Act also permits the Administrator to propose a transaction to the Commission, with the consent of the railroads which are parties to the transaction. These regulations only apply to those proposals being made by railroads to the Commission. The Administrator anticipates promulgating a policy statement concerning proposals which he may initiate under section 5(3), when the Secretary issues his report setting forth the results of his comprehensive study of the rail system, prepared pursuant to section 901 of the RRRRA.

Proposed regulations governing the procedures to be used by railroads in submitting consolidation proposals to the Administrator under section 5(3)(f) of the Act, were published in the FEDERAL REGISTER on October 13, 1976 (41 FR 44954). Interested parties were invited to submit on or before November 12, 1976, their written data, views, or comments on the proposed regulations. The period for comments was extended to November 26, 1976, at the request of the American Association of Railroads (the "AAR") (41 FR 50303).

Several comments were filed in response to the proposed regulations, and each was given due consideration by the Federal Railroad Administration (the "FRA"). As a result of these comments, numerous significant changes have been made in both the format and substantive requirements of the regulations. These regulations are intended to be responsive to the comments received. They are designed to encourage utilization by the railroads of the section 5(3) consolidation procedure, while at the same time permitting the FRA to carry out its statutory responsibilities. Because these regulations represent a considerable restructuring and streamlining of the proposed regulations, the FRA will consider petitions for reconsideration from interested parties who believe there are significant problems with these final regulations. Such petitions should be filed in accordance with the new provisions of 49 CFR 211.29 (41 FR 54181 (1976)).

PUBLIC COMMENTS AND REVISIONS TO THE REGULATIONS

The public comments received in response to the publication of the proposed regulations related to the following general areas: (a) The role of the Administrator in the expedited merger procedure, and the amount and extent of data required to be submitted to the Administrator; (b) Informal public hearings; and (c) Availability to States of the data submitted to the Administrator. Each of these areas is discussed below.

A. THE ROLE OF THE ADMINISTRATOR AND THE DATA REQUIRED TO BE SUBMITTED

1. *Information required to be submitted.* The AAR contended that the Administrator's study and evaluation of a proposed transaction comes at a fairly early stage in the total review process, that his role is confined at this stage to a study and evaluation of the nine enumerated areas set forth in section 5(3)(f)(iv) and that he should, therefore, restrict his requests for data to the nine statutory concerns.

Section 5(3)(f)(iv) provides that each proposed transaction shall be studied with respect to:

(a) The needs of rail transportation in the geographical area affected;

(b) The effect of the proposed transaction on the retention and promotion of competition in the provision of rail and other transportation services in the geographical area affected;

(c) The environmental impact of such proposed transaction and of alternative choices of action;

(d) The effect of such proposed transaction on employment;

(e) The cost of rehabilitation and modernization of track, equipment, and other facilities, with a comparison of the potential savings or losses from other possible choices of action;

(f) The rationalization of the rail system;

(g) The impact of such proposed transaction on shippers, consumers, and railroad employees;

(h) The effect of such proposed transaction on communities in the geographical areas affected and on the geographical areas contiguous to such areas; and

(i) Whether such proposed transaction will improve rail service.

The AAR suggested that the Administrator should require only an abbreviated draft of the applicant's ultimate consolidation application to the Interstate Commerce Commission (the "Commission"). However, simply submitting an abbreviated draft of the formal consolidation application, as suggested by the AAR, would not provide the Administrator with information sufficient to make the nine statutory studies and to perform his other statutory duties. The Administrator has evaluated the AAR's comment, and agrees that the statutorily mandated analysis is based on the nine enumerated areas, and is not identical to the Commission's responsibilities under section 5(3) of the Act. In order to fulfill affirmatively his responsibilities, the Administrator believes a compromise between the AAR's proposal and our own originally proposed regulations is appropriate. The revised requirements are responsive to the AAR comments: They clearly focus on the nine statutory concerns, and are less cumbersome, better organized, and, we believe, within the capability of railroads to comply with.

2. *Conforming submission begins six month period.* The regulations provide that the Administrator reserves the right to reject those submissions which do not conform to the required form, content, and documentation, and that only a submission conforming to these requirements shall be considered a filing for the purpose of computation of the time period prescribed in section 5(3) of the Act. The AAR questioned whether the FRA had authority to delay the start of the six month period until a submission conformed to the requirements of the regulations.

The authority of the Administrator to promulgate such a provision derives from his mandate and obligation under section 5(3)(f) of the Act to evaluate and study all proposed transactions submitted to him. The Administrator must anticipate that he will be restricted to a six-month period within which to perform all of his responsibilities under section 5(3)(f) of the Act. He must be assured of receiving a complete submission in order to (1) publish a summary and detailed account of the proposed transaction, (2) prepare meaningful studies of the nine areas enumerated in section 5(3)(f)(iv), (3) submit a report to the Commission setting forth the results of each study within ten (10) days after an application is submitted to the Commission, and (4) submit the views of the Secretary with respect to the effect of the proposed transaction on the national transportation policy, as enunciated by the Secretary.

3. *The order in which information is required to be submitted.* Subparts A and C of these regulations are, for the most part, the same provisions as those proposed. Subpart B represents a complete reworking of the provisions relating to information required to be submitted to the Administrator. Subpart B delineates the information required to be submitted to the Administrator along the lines of the studies and summary required by section 5(3) of the Act.

Subpart B requests the information required to be submitted to the Administrator in an order different from that found in section 5(3)(f)(iv) of the Act. The nine factors are set up so that the explicit information gathered and findings made for the first six, §§ 268.19 through 268.29 will lead to general summations in the last three, §§ 268.31 through 268.35. The first six factors deal with specific concerns that are highly interactive and provide the foundation for the final three factors, which are intended to provide quantitative summations.

4. *Minimum information required, and additional information.* Section 268.13 clearly states that the requirements of subpart B are the minimum requirements: a filing of data with the Administrator is not effective, and, therefore, the six (6) month period referenced in section 5(3)(b)(ii) does not begin, unless these minimum requirements are met, waived or modified. The FRA is cognizant that numerous kinds of transactions are covered by section 5(3), and that not all information required by §§ 268.19 through 268.35 applies to every transaction that can be proposed, nor can all of the information required by §§ 268.19 through 268.35 always be provided by the submitting parties. Section 268.41 provides a mechanism by which an applicant may request that the Administrator waive or modify any requirement. On the other hand, occasions may also arise where the submission of additional information may be deemed necessary by the Administrator. Section 268.37 provides that the Administrator may require submission of such additional information as he may deem necessary.

Insofar as an applicant seeks the active support of the Secretary in promoting the proposed transaction at the Commission (rather than providing data sufficient to allow the Administrator to comply only with the narrow requirements of the Act), additional information and data may be needed. Applicants wishing such support should note § 268.9 of these regulations which provides that any information submitted which exceeds that required by this part, referred to as supplemental submissions, may be made by any applicant at the time of its initial submission, or at a later date. The Administrator encourages the use of supplemental submissions. The more the initial and supplemental submissions, taken as a whole, resemble the application required by the Commission, the more comprehensive the Administrator's report under section 5(3)(v) can be. If the applicant wants the Administrator to consider any supplemental submissions filed after the initial submission in making his study of the nine statutory factors, then § 268.9 provides for the applicant and the Administrator to agree on a date on which the applicant will file his application with the Commission to enable the Administrator to complete his report prior to that date.

5. *Terminology.* The terminology used in the proposed regulations has been changed so that it is clear that the Administrator does not require submission of the full application ultimately submitted to the Commission. The term "submission" is used to describe the data required to be filed with the Administrator, and the definition of "application" has been amended to refer to the data format required by the Commission. The term "applicant" is defined to refer to any railroad or railroads submitting a consolidation proposal for evaluation by the Administrator and all railroads with properties directly involved in the proposed transaction.

6. *Intent of regulations.* The National Industrial Traffic League filed comments stating that, as a matter of general policy, it supported the adoption of appropriate procedures to expedite the handling of railroad consolidations. The Administrator believes that these revised regulations meet the League's desire to have voluntary consolidations between rail carriers that will strengthen the transportation industry, produce improved service, establish or continue adequate competition in transportation service, and be consistent with the long-range public interest in the maintenance of an adequate common carrier system.

B. INFORMAL PUBLIC HEARINGS

Section 268.11 provides that there will be informal public hearings concerning all material submitted to the Administrator. The AAR suggested that the final regulations should contain a basic outline for participation at the informal hearings, in order to obtain meaningful comments given the short time allotted for the FRA evaluation process. The Administrator finds the comment to be a good one, but would prefer to provide such a basic outline in the notice for each informal hearing. This would afford the type of flexibility which is necessary to accommodate the hearing procedure to the nature of each proposed transaction, and which is implied by the informality of the hearing requirement.

C. AVAILABILITY OF SUBMISSIONS TO STATES

The New York State Department of Transportation recommended that the States receive copies of the submissions filed with the FRA in order to allow them to participate in the public hearings and to assess the effect of a proposed consolidation on the State's economy and transportation network.

The Administrator welcomes New York State's suggestion, and is eager to benefit from any designated State agency's comments concerning the impact of the proposed transaction on the State's economy, transportation system, communities generally, employment, environment, and rail assistance programs. Section 268.7(d) requires each applicant to make a copy of its submission to FRA available to any State Department of Transportation or designated State agency of any State in which any part of the rail facilities of the railroads involved in proposed transaction is situated.

The provision requires the State agency to request a copy of the submission from the applicant, rather than requiring each applicant to automatically file a copy with each affected State, in order to avoid requiring the applicant to duplicate and mail copies of its submission to State agencies that are not interested in studying the entire consolidation proposal. Governors of all States in which any part of the properties of railroads involved in the proposed transaction are situated, receive notice of the filing of the submission, pursuant to section 5(3)(f)(ii) of the Act. A summary and a detailed account of the contents of the proposed transaction will be published in the FEDERAL REGISTER, pursuant to section 5(3)(f)(i) of the Act.

Inflationary Impact Analysis. The Administrator has determined that the issuance of these regulations is not a major proposal under Executive Order 2050.4, February 2, 1976, requiring an inflationary impact evaluation.

Improved Analysis and Review of Regulations. The Administrator has evaluated the adoption of these regulations in accordance with the policies of the Department of Transportation which were stated in the public notice published on April 16, 1976, in the FEDERAL REGISTER (41 F.R. 16200). In response to the public comments received the regulations have been drafted to eliminate, to a substantial degree, the amount of documentation required of applicants. The revised requirements clearly focus on the nine statutory concerns, and are less cumbersome, better organized, and within the capability of railroads to produce. The preparation of the required data will assist applicants in their preparation of formal applications to the Commission, and will assist them and other interested parties in providing information to the Commission regarding factors which the Commission must consider in determining whether to approve the proposed transaction.

Therefore, the Administrator has determined that the adoption of this regulation will have such a minimal cost impact on the private sector, consumers, Federal, state, and local governments that an evaluation of the effects of this regulation is not warranted.

In consideration of the foregoing, 49 CFR Chapter II is amended by adding a new Part 268 to read as follows:

Subpart A—General Provisions

Sec.
268.1 Applicability.
268.3 Definitions.
268.5 Eligibility.
268.7 Filing procedure; notice of filing.
268.9 Supplemental submissions; time extension.
268.11 Informal public hearings.

Subpart B—Contents of Submissions

268.13 Form and content of consolidation submission.
268.15 Front covers.
268.17 Introductory statement, summary of proposed transaction, and map of applicant.
268.19 Needs of rail transportation.
268.21 Retention and promotion of competition.
268.23 Rationalization of rail system.
268.25 Cost of rehabilitation and modernization compared to alternative choices.
268.27 Impact on shippers, consumers, and railroad employees.
268.29 Effect on communities.
268.31 Improvement of rail service.
268.33 Effect on employment.
268.35 Environmental impact.
268.37 Administrator's request for additional information.

Subpart C—Miscellaneous Provisions

268.39 Access to information.
268.41 Waivers and modifications.

AUTHORITY: Sec. 5(3) Interstate Commerce Act, 49 U.S.C. 5(3)(f); Department of Transportation Act, 49 U.S.C. 1651 et seq., Regulations of the Office of the Secretary of Transportation, 49 CFR 1.49(u).

Subpart A—General Provisions

§ 268.1 Applicability.

This part prescribes the guidelines and procedures governing merger and consolidation proposals submitted to the Federal Railroad Administrator for evaluation pursuant to section 5(3)(f) of the Interstate Commerce Act, 49 U.S.C. 5(3)(f).

§ 268.3 Definitions.

As used in this part:

(a) "Act" means the Interstate Commerce Act, 49 U.S.C. 1 et seq.

(b) "Administrator" means the Federal Railroad Administrator, or the designee of the Administrator.

(c) "Applicant" means any railroad or railroads submitting a merger or consolidation proposal for evaluation by the Administrator pursuant to this part, and all common carriers by railroad subject to Part I of the Act with properties directly involved in the proposed transaction.

(d) "Application" means the form in which the Interstate Commerce Commission requires the proposed transaction to be submitted to it, following evaluation and study of the proposal by the Administrator.

(e) "Commission" means the Interstate Commerce Commission.

(f) "Consolidation" means all transactions subject to section 5(3) of the Act, including merger, consolidation, unification or coordination project (as described in section 5(c) of the Department of Transportation Act), joint use of tracks or other facilities, or acquisition or sale of assets, which involve any common carrier by railroad subject to Part I of the Act.

(g) "Including" means including but not limited to.

(h) "Railroad" means a common carrier by railroad as defined in section 1(3) of Part I of the Act.

(i) "RRRRA" means the Railroad Revitalization and Regulatory Reform Act of 1976, Pub. L. 94-210, as amended.

(j) "Secretary" means the Secretary of the Department of Transportation.

(k) "Submission" means the form and content in which data concerning the proposed transaction is to be submitted to the Administrator for evaluation and study, as set forth in this part.

§ 268.5 Eligibility.

Any railroad may, in the period prior to December 31, 1981, submit to the Administrator a consolidation proposal for evaluation pursuant to this part.

§ 268.7 Filing Procedure.

(a) Each submission shall bear the date of execution, be signed by or on behalf of the applicant, and shall bear the corporate seal in the case of an applicant which is a corporation. Execution shall be by all partners if a partnership, unless satisfactory evidence is furnished of the authority of a partner to bind the partnership, or if a corporation, an association or other similar form of organization, by its president or other executive officer having knowledge of the matters therein set forth. Persons signing the submission on behalf of the applicant shall also sign a certificate in form as follows:

_____ certifies that
(Name of official)
(he) (she) is the _____
(Title of official)
of the _____, authorized
(Name of applicant)
on the part of the applicant to sign and file with the Administrator this submission; that (he) (she) has carefully examined all of the statements contained in such submission relating to the aforesaid _____
(Name of applicant); that (he) (she) has knowledge of the matters set forth therein and that all such statements made and matters set forth therein are true and correct to the best of (his) (her) knowledge, information, and belief.

_____
(Name of official)

_____
(Date)

(b) The original submission and supporting papers, including any data deemed relevant by the applicant which are not specifically requested by this part, and ten copies thereof for the use of the Administrator shall be filed with the Associate Administrator for Policy and Program Development of the Federal Railroad Administration, 400 Seventh Street, S.W., Washington, D.C. 20590. Each copy shall bear the dates and signatures that appear in the original and shall be complete in itself, except to the extent otherwise provided in this part, but the signature on the copies may be stamped or typed.

(c) Each applicant shall file a copy of the submission with each regional office of the Federal Railroad Administration responsible for the area(s) affected by the proposed transaction. The five regional offices, with their locations, are:

Eastern Region, Independence Bldg., Room 1020, 434 Walnut Street, Philadelphia, Pa 19106.
Southern Region, Suite 216B, 1568 Willingham Drive, College Park, Georgia 30337.
Central Region, 536 S. Clark St., Room 210, Chicago, Illinois 60605.
Southwest Region, Room 11A234, Federal Office Building, 819 Taylor Street, Fort Worth, Texas 76102.
Western Region, No. 2 Embarcadero Center, Suite 630, San Francisco, California 94111.

(d) Each applicant shall make available to any state Department of Transportation or similar state agency of any state in which any rail facilities of applicant are located, a copy of its submission under this part upon request by such agency.

(e) Each applicant shall retain a copy of its submission, and shall make the submission available for public inspection in a reasonable manner at the executive offices of the applicant.

(f) The applicant shall submit such additional information to support its submission as the Administrator may request.

(g) The Administrator reserves the right to reject those submissions which do not conform to the regulations prescribed herein regarding the form, content and documentation. Upon the filing of a submission, the Administrator will review the submission and determine whether it conforms with all applicable regulations. If the submission is incomplete, or otherwise defective, the Administrator may reject said submission by written notice to the applicant, specifying the reasons for the rejection, within 30 days from the date of filing of the submission. Thereafter a revised submission may be submitted, and the Administrator will determine whether the resubmitted submission conforms with all prescribed regulations. The resubmission or refiling of a submission shall be considered a de novo filing for the purpose of computation of the time period prescribed in section 5(3) of the Act, provided that such resubmitted submission is deemed complete.

§ 268.9 Supplemental submissions; time extension.

(a) Sections 268.15 through 268.37 inclusive set forth the minimum data requirements, subject to modification or waiver, for filing an effective submission under this part. Supplemental information may be filed along with the initial submission, or at a later time. Applicants are urged to make their supplemental submissions as similar in form and content to the anticipated application to the Commission as is reasonably possible. The Administrator will use any supplemental information submitted in preparing his report for the Commission. To the extent that the supplemental submissions correspond to the filing requirements established by the Commission for section 5(3) applications, the Administrator will be able to comment to a greater degree on the merits of the entire proposed transaction.

(b) If an applicant decides to make a supplemental submission to the Administrator and wishes the submission to be considered by the Administrator in his findings pursuant to section 5(3)(f)(iv) and (v) of the Act, then the applicant and the Administrator will reach agreement on the date on which the applicant will file his application with the Commission. This provision is designed to afford the Administrator sufficient additional time to study the supplemental submission, to conduct any necessary public hearings, and to prepare his report.

§ 268.11 Informal public hearings.

(a) Informal public hearings will be conducted with respect to all submissions, and may be held with respect to any supplemental submissions made pursuant to § 268.9.

(b) Notice of all informal public hearings, together with a basic outline for participation at the informal hearing, will be published in the FEDERAL REGISTER at least 15 days prior to each hearing.

Subpart B—Contents of Submissions

§ 268.13 Form and content of consolidation submissions.

Each submission shall contain in the order indicated and identified by reference to heading and section numbers, the information required by §§ 268.15 through 268.35. In the event that full responses to the information requirement of one section in Subpart B are contained elsewhere in the submission, the response should reference the portion of the submission where the requested information is contained.

§ 268.15 Front covers.

(a) The front cover shall list—

(1) The full and correct name of the applicant;

(2) The nature of the transaction (e.g., merger, control, coordination project, trackage rights, etc.); and

(3) If a consolidation or merger is proposed, the proposed name of the resulting company.

(b) An inside front cover listing—

(1) The business address of the applicant (street and number, city, county, state and zip code);

(2) The name, title, business address and telephone number of the officer or offices to whom correspondence with respect to the submission should be addressed; and

(3) The name, business address and phone number of the applicant's attorney.

§ 268.17 Introductory statement, summary of proposed transaction, and map of applicant.

Each submission shall contain—

(a) A section, written in a narrative form, entitled "Introductory Statement", describing applicant and including the following information concerning applicant:

(1) Whether applicant is an individual, firm, partnership, corporation, company, association, joint stock company, trustee, receiver, assignee, or other personal representative, and trade name or style, if any, under which applicant is doing business;

(2) Depending upon whether the applicant is a corporation, partnership, or other form of organization or entity, the date and place of incorporation, of partnership formation, of organization, or the name and address of the court, if any, under direction of which applicant is acting, as applicable.

(3) Whether applicant is a railroad subject to Part I of the Act;

(4) If applicant is not a railroad, the type of business in which it is engaged, the length of time so engaged, and particulars of its present activities which are or may be related to transportation subject to the Act;

(5) Whether applicant or any subsidiary is affiliated with a motor or water carrier subject to the Act; also the following information with respect to rail, motor or water operations, where applicable: The date of the certificate, permit, or temporary authority; and the number of the Commission's docket assigned to the application upon which such certificate, permit, or temporary authority was issued or granted; or if application to engage in interstate or foreign commerce has been made but is still pending, the date of the application and the docket number.

(6) Whether applicant is controlled by any other corporation or corporations, and, if so, the name(s) of the controlling corporation(s), the form of control, whether sole or joint, direct or indirect, and its extent;

(7) The measure of control or ownership, if any, now exercised by applicant over any other railroad subject to the Act, or over the properties of such railroad;

(8) Whether there are any intercorporate relationships, not disclosed in responses to prior instructions, through holding companies, ownership of securities, or otherwise, direct or indirect between applicant and any railroad or person affiliated with applicant and any railroad or person affiliated with any railroad, at the time of making the application; if so, the nature and extent of such relationship; and, if applicant owns securities of a railroad corporation or corporations subject to the Act, the name of the corporation, a description of securities, the par value of each class of securities held, and the percentage of total ownership.

(b) The submission shall also contain a narrative summary including—

(1) A description of the general nature of the entire proposed transaction;

(2) A brief description of the line or lines of railroads involved in the transaction, the principal points of interchange, city or county and state location, and major terminals and classification points.

(3) Briefly, the terms and conditions of the contract or agreement pursuant to which the proposed transaction is to be effected, including the manner in which the parties propose to consummate the transaction;

(4) A brief geographical description (including as applicable, route descriptions) of (i) operations sought to be performed and (ii) other operations presently performed;

(5) The state or states in which any part of the properties of the railroads involved in the proposed transaction are situated; and

(6) The public interest factors involved.

(c) At the conclusion of the narrative summary, a general or key map indicating clearly the line or lines of applicant, parts of the line or lines of applicant in their true relation to each other, short-line connections, other rail lines in the territory and the principal geographic points of the region transversed. The map may be drawn using any appropriate scale or key system, so long as it is clear, can be easily reproduced, and effectively presents the required information. Three additional copies of the map shall be furnished, unbound, for the use of the Administrator.

§ 268.19 Needs of rail transportation.

Each submission shall contain—

(a) A discussion and analysis of the present demand for rail transportation, both freight and passenger, in the geographical area affected by the proposed transaction, and how the proposed transaction would better meet such demands or would result in improved rail freight or passenger service. The discussion shall include:

(1) Revenue carload data from true origin station or city to final destination station or city (for the lines affected by the proposed transaction);

(2) The present service patterns from true origin station or city to final destination station or city, and the current routings of the existing traffic described in subsection (1); and

(3) Trends in growth, direction or traffic pattern, and modal split of the existing traffic described in subsection (1), to the best of applicant's knowledge.

(b) A description and analysis of future rail freight and passenger transportation needs that the proposed transaction is designed to meet (such as freight transportation presently handled by other modes, new industries likely to locate in the geographical area affected, new mineral traffic, etc.). If the future rail freight traffic is anticipated to result from anything other than continued growth in existing rail traffic, describe—

(1) The type of traffic (e.g., by commodity);

(2) The anticipated amount of rail freight traffic;

(3) Estimated revenue carload data from true origin station or city to final destination station or city; and

(4) How the proposed transaction enables applicant to meet this need.

(c) A traffic study detailing estimated gains and losses in traffic and revenues expected to result from the consummation of the proposed transaction, for any

changes in freight or passenger usage or traffic flow, etc., as discussed in paragraphs (b)(1) and (2) of this section. Traffic studies are not required in submissions involving the acquisition of a line of a railroad where the line to be acquired has been authorized by the Commission to be abandoned or the line to be acquired connects with no carrier other than the applicant. The traffic study shall be prepared in conformity with the following instructions:

(1) The period covered by the traffic study shall be the latest three calendar years preceding the filing of the submission. A different time period may be used if reasonable under the circumstances of the proposed transaction, so long as the reasons therefor are specifically set forth; and

(2) The traffic studies shall be based upon all data available to applicant in abstract or machine-sensible form. Data for the movements relied upon in the traffic studies shall be totally reproduced, together with all other information relied upon for determining the gains or losses in traffic and revenue. The amount of such gains or losses shall be shown for each movement abstract on which a gain or loss has been determined.

(d) A discussion and analysis of financial strengths and weaknesses of the applicant, including a discussion of—

(1) The improved financial performance expected to be achieved as a result of the proposed transaction; and

(2) The funds that will be available for investment in improvements, as a result of the proposed transaction.

(e) Any additional facts necessary to establish that the proposed transaction will be consistent with the needs of rail transportation in the geographical area affected.

(f) A full explanation of the methodology and reasoning used in making estimates and projections called for by this section.

§ 268.22 Retention and promotion of competition.

Each submission shall contain—

(a) A discussion and analysis of the present intermodal competition for the traffic originated and terminated on the lines affected by the proposed transaction, from true origin station or city to final destination station or city of the shipments. Among other factors, this discussion should include:

(1) The extent and scope of motor and water carrier ability to meet the service needs, as compared to the existing railroad network; and

(2) The identification of the motor and water carriers that compete with the applicant and the applicant's best estimate of the tonnage, ton-miles and freight revenues of such carriers.

(b) A discussion and analysis of the present rail competition for the traffic originated and terminated on the lines affected by the proposed transaction, from true origin station or city to final destination station or city of the shipments. Among other factors, this discussion should include the identification of the railroads competing with the applicant for the same traffic from true origin station or city to final destination station or city of that traffic, and the applicant's best estimate of the tonnage, ton-miles and freight revenues of such carriers.

(c) For all transactions involving railroads serving substantially the same geographical area, a listing of all of the communities on lines affected by the proposed transaction which are served by more than one railroad and an estimate of the share of the rail traffic possessed by each railroad. The listing will indicate the following—

(1) Whether the railroads serve the same patrons (i.e., whether some form of competition exists) or whether patrons are isolated on one line;

(2) The effect of the proposed transaction on a reduction or increase in such competition; and

(3) An indication of those points served by more than one railroad that can receive better service by only one railroad, if any.

(d) Applicant's best estimate of the percentage of traffic handled by competitors, if any, which applicant would reasonably expect to attract as a result of the proposed transaction, and a projection of the total rail market share before and after the proposed transaction would take effect, describing the relative market shares of competing modes.

(e) A discussion of any overhead traffic, that is, traffic which neither originates nor terminates on the lines affected by the proposed transaction but which passes over the lines affected by the proposed transaction, if any, including—

(1) The extent and scope of intermodal competition for this traffic;

(2) A discussion of existing railroad competition for this traffic;

(3) A listing of the true origin city and railroad and final destination city and railroad of the overhead traffic, to the best of applicant's ability; and

(4) An explanation of what steps could and are planned to be taken, if any, to enable applicant to originate or terminate such overhead traffic.

(f) Any additional facts necessary to show the effect of the proposed transaction on the retention and promotion of competition in the provision of rail and other transportation services in the geographical areas affected.

(g) A full explanation of the methodology and reasoning used in making estimates and projections called for by this section.

§ 268.23 Rationalization of the rail system.

Each submission shall contain—

(a) A discussion and analysis of the proposed transaction in the context of the findings or facts contained in the reports prepared under sections 503, 504, and 901 of the RRRRA, as those reports are issued.

(b) To the extent altered by the proposed transaction, a description of service presently performed. All significant service improvements and downgradings (e.g., changes in scheduling, service frequency, blocking plans, etc.) will be listed. Shippers affected by proposed service improvements and/or downgrading will be listed, and located by point of shipment. For the purposes of this listing, the shippers to be listed will be any that have used rail service in the year preceding the date of submission.

(c) A description of the effect the proposed transaction will have on the total funding needs (Federal, state, and local) of the applicant, examining all programs including those for rail line rehabilitation and improvements, grade crossing needs, highway bridge construction plans, passenger or commuter lines, etc.

(d) An identification of all lines of the applicant in the geographical area affected by the proposed transaction which serve no rail patrons except at junctions with other carriers. A discussion of the practicality of serving all such rail patrons at such points by only one railroad, and a recommendation as to which railroad this should be is required.

(e) An analysis and discussion of the operating savings expected from any service or route changes, following consummation of the proposed transaction, including a breakdown of the significant components of these savings and a discussion of the quantitative effect of these savings on present operating costs.

(f) An estimate of the additional net revenue to be derived as a result of any longer hauls and increased single-line service.

(g) Any additional information necessary to show the effect of the proposed transaction on the achievement of a more efficient or adequate rail system.

(h) A full explanation of the methodology and reasoning used in making estimates and projects called for by this section.

§ 268.25 Cost of rehabilitation and modernization compared to alternative choices.

Each submission shall contain—

(a) For those lines affected by the proposed transaction, a description and analysis of the maintenance and rehabilitation needs, slow orders in effect, class of track, rail facilities subject to deferred maintenance, equipment and other facilities involved in the proposed transaction in the context of the informational findings or facts contained in the reports prepared by the Secretary pursuant to sections 504 and 901 of the RRRRA, when issued.

(b) A discussion of the means by which accelerated maintenance and rehabilitation needs for any lines identified and discussed in subsection (a) are to be met, including—

(1) The amount and availability of private sources of funds, including internally generated fund; and

(2) The availability of public sources of funds from all levels of governments, describing in detail the amounts and timing of any public funds anticipated.

(3) Identification and discussion of possible alternative courses of action available if such maintenance and rehabilitation needs are not met in the amount or time frame proposed, and a projection of the costs of such alternative courses of action.

(4) A description of those lines, or portions thereof, on which maintenance and rehabilitation is to take place, if any, which have shippers located thereon who have service options from connecting or intersecting railroads.

(c) If the applicant has applied or intends to apply for financial assistance under Title V of the RRRRA, full details should be provided regarding the relationship of the request for financial assistance to the proposed transaction, including the nature, amount, timing and purpose of such assistance, and the steps which have been taken to secure such financial assistance. Any applications filed in the last three (3) years or to be filed for state or local assistance should be similarly discussed, to the extent they relate to the proposed transaction, including tax relief, grade crossing programs, etc.

(d) Any additional facts necessary to show the cost of rehabilitation and modernization of track, equipment, and other facilities associated with the proposed transaction with a comparison of the potential savings or losses from other possible choices of action.

(e) A full explanation of the methodology and reasoning used in making estimates and projections called for by this section.

§ 268.27 Impact on shippers, consumers, and railroad employees.

Each submission shall contain—

(a) A description of any service improvements on specific lines which would result from the proposed transaction. As a part of the discussion—

(1) All shippers along these lines shall be identified. Identification of such shippers for the purpose of this subsection may be made by group, locality, or other reasonable method of classification.

(2) The type of service improvement (e.g., single-line service, better operating plan, scheduling, rate effects) that would result from the proposed transaction shall be described and an analysis which quantifies the benefits shall be submitted.

(b) A discussion noting any lines which, as a result of the proposed transaction, would handle less through traffic or would be abandoned within the next three (3) years, including—

(1) Identification (as in subsection (a)(1) above) of all shippers located along such lines.

(2) A description of the service effect on these shippers, if any, as a result of the reduction in through traffic. Indicate the existence, if any, of service guarantees made to shippers.

(3) A description of the remaining freight transportation alternatives for shippers, if any, along lines proposed for abandonment.

(4) If an application to abandon a line or discontinue a service is contemplated, describe such lines or services and state the reasons for the contemplated abandonment or discontinuance.

(5) To the extent the proposed transaction leads or will likely lead to abandonments in the geographical area, a statement of the degree of the applicant's commitment to cooperate with the financial assistance mechanisms established in Title VIII of the RRRRA and to meet the rules and regulations established under that statute, and a statement of the commitment of any connecting carrier that could provide subsidized service at a lower cost.

(c) To the extent related to, or directly affected by, the proposed transaction, a listing of any selected rate changes anticipated to result from the proposed transaction over the three years following consummation of the proposed transaction. Explain the consequences of any such rate changes on general consumers. This discussion shall include possible rate and service packages, anticipated frequency of service, distinct service pricing, peak-load pricing, and similar pricing, rate and service concerns.

(d) With regard to rail employees of the applicant—

(1) A description of all projected changes in employment as a result of the proposed transaction.

(2) A list of any increases in rail employment resulting from the creation of any service improvements (e.g., single-line service).

(3) For any projected employment decreases, an explanation of how they will be handled and an estimate of the total costs of labor protection associated with the proposed transaction.

(4) A copy of any agreement or agreements with employee organizations entered into as a result of, or as part of, the proposed transaction.

(5) A discussion regarding the effect, if any, any consolidation of management and personnel that would result from the proposed transaction would have in improving the present and future rail needs of the geographical area affected.

(e) An analysis which quantifies—

(1) The effect of rehabilitation programs, as discussed under section 268.25 on individual shippers.

(2) The amount of rail employment to be derived directly from the proposed rehabilitation program and any secondary rail employment which would result after completion of the proposed rehabilitation program.

(3) The effect of rationalization efforts, as discussed under section 268.23 on the quality of service on individual lines and shippers, addressing upgrading and improved services as well as downgrading or abandonments.

(f) Any additional facts necessary to show the effect of the proposed transaction on shippers, consumers and railroad employees.

(g) A full explanation of the methodology and reasoning used in making estimates and projections called for by this section.

§ 268.29 Effect on communities.

Each submission shall contain—

(a) For the lines described in section 268.27, if any, identification of all governing bodies (e.g., states, counties, townships, cities, towns, etc.) on such lines.

(b) A description of the effect of service improvements, downgradings, or abandonments resulting from the proposed transaction, if any, on the communities served and on areas adjacent to those communities.

(c) A description of any new industrial development opportunities or losses resulting from the proposed transaction.

(d) If commuter or other passenger services, Amtrak, Autotrain or the like intercity passenger service are operated over the lines of the applicant, a detailed discussion of any impact anticipated on such services, such as delays which may be occasioned because a line is scheduled to handle increased traffic due to route consolidation or improvements resulting from the rehabilitation or rationalization program.

(e) An identification and location of any existing shops, repair facilities, yards, or major installations facility, whenever such operations are or would become significant employers in the community where they are or would be located as a result of the proposed transaction.

(f) A description of the effect of the proposed transaction on property taxes. Show how the total property taxes relate to net income of applicant. List any branch lines estimated to be unprofitable for which reduction or elimination of property taxes would result in profitability.

(g) Any additional facts necessary to show the effect of the proposed transaction on the communities in the geographical areas affected and on the geographical areas contiguous to such areas.

(h) A full explanation of the methodology and reasoning used in making estimates and projections called for by this section.

§ 268.31 Improvement of rail service.

Each submission shall contain—

(a) A narrative discussion of all the factors noted in sections 268.19 through 268.29, qualifying all of the benefits and costs of, and assessing the tradeoffs related to, the proposed transaction, to the extent rail service improvements are anticipated. The discussion will include coverage of the following issues:

(1) Single-line service opportunities met;

(2) Competitive gains and losses;

(3) Rehabilitation and rationalization that would be achieved;

(4) Rail employment gains and losses;

(5) Effect on shippers and communities;

(6) Effect on passenger services; and

(7) Other services improved or lost.

(b) Any additional facts necessary to show whether the proposed transaction will improve rail services.

(c) A full explanation of the methodology and reasoning used in making estimates and projections called for by this section.

§ 268.33 Effect on employment.

Each submission shall contain—

(a) A narrative discussion of all the factors discussed in §§ 268.19 through 268.29, estimating the amount of new employment (other than rail employment), both direct and secondary, to be gained or lost as a result of the proposed transaction, and estimating the value to the economy of the geographical area affected by the proposed transaction, of the consummation and implementation of the proposed transaction. The discussion will include coverage of the following issues:

(1) Single-line service opportunities met;

(2) Competitive gains and losses;

(3) Rehabilitation and rationalization that would be achieved;

(4) Effect on shippers and communities;

(5) Effect on passenger services; and

(6) Other services improved or lost.

(b) Any additional facts necessary to show the effect of the proposed transaction on employment in the geographical areas effected by the proposed transaction.

(c) A full explanation of the methodology and reasoning used in making estimates and projections called for by this section.

§ 268.35 Environmental impact.

Each submission shall contain—

(a) A description of the environment in the geographical area to be affected by the proposed transaction, together with a statement of Federal activities in the same geographical area which are known or should be known to the applicant. As part of the description, applicant will—

(1) Include maps which are sufficient to identify the communities and land uses (farm, industry, forest, etc.) adjacent to any affected properties, together with the number of grade crossings in each affected community;

(2) Indicate speed and frequency of current rail traffic and note how long grade crossings are blocked during a typical day on affected lines;

(3) Indicate the air quality in the affected region, as found in the State Implementation Plans to meet ambient air quality standards; and

(4) Indicate derailments and fatalities and/or injuries resulting from accidents involving trains and motor vehicles and/or pedestrians along the affected rights of way, which are reported to the Federal Railroad Administration pursuant to part 225 of Title 49, Code of Federal Regulations, as revised.

(b) A discussion of the relationship of the proposed transaction to any applicable Air Quality Implementation Plan promulgated under the Clean Air Act, 42 U.S.C. 1857. In preparing this discussion, applicant—

(1) Should refer to state air quality agencies or to the Regional Offices of the U.S. Environmental Protection Agency (the "EPA") for guidance.

(2) Document whether the proposed transaction is consistent with any state plans and demonstrate whether the proposed transaction would violate National Ambient Air Quality Standards, as set forth in part 50 of Title 40, Code of Federal Regulations.

(c) A discussion of the proposal's relationship to proposed land use plans, policies, and controls of affected areas. The discussion should consider the impacts of abandonments, increased traffic and new construction, as appropriate.

(d) If the proposed transaction would lead to an application for Federal funding, a statement of any impact on public parks, recreational areas, wildlife refuges, historic sites, and similar areas referenced in section 4(f) of the Department of Transportation Act, 49 U.S.C. 1653(f).

(e) A statement as to whether the proposed transaction (including proposed abandonments) would affect any districts, sites, buildings, structures, or objects that are included in the National Register of Historic Places, or are eligible for including in the National Register of Historic Places, as defined in 36 CFR 800.3(f). The National Register of Historic Places, which is a register of districts, sites, buildings, structures, and objects significant in American history, architecture, archeology, and culture, is maintained by the Secretary of the Interior under authority of section 2(6) of the Historic Sites Act of 1935 (16 U.S.C. 461) and section 101(a)(1) of the National Historic Preservation Act (16 U.S.C. 470). The National Register is published in its entirety in the Federal Register each year in February, with addenda published on the first Tuesday of each month. 36 CFR 800.3(d). Applicants may consult with officials designated by their Governors to act as State Historic Preservation Officers responsible for state activities under the National Historic Preservation Act. A listing of these state officials may be found at 36 CFR 60.5(d), or may be obtained from the Director, National Park Service, U.S. Department of the Interior, Washington, D.C. 20240. The Secretary of the Interior will advise, upon request, whether properties are eligible for the National Register.

(f) A review of all the factors discussed in §§ 268.19 through 268.33 in a narrative form, quantifying the positive and negative effects of the proposed transaction on the environment in the affected communities, including effects on air and water, soil quality, and noise levels, and listing measures which can be taken to mitigate adverse impacts. This discussion should include—

(1) *Impacts.* Examples of impacts are increases in noise, dust, erosion, solid waste disposal, use of herbicides, water pollution, congestion, and delays in the provision of essential services. Traffic impacts might include changes in exposure to noise, changes in level of noise or vibration (as associate with higher speed operations on welded rail), delays in provision of essential services (police, fire, ambulance), congestion of street traffic in adjacent communities; and anticipated changes in accident patterns. In considering noise levels, applicants should note any conflicts between current or projected noise levels from rail operations and HUD standards for noise at sensitive sites, such as schools, hospitals, parks, and residential locations. (U.S. Department of Housing and Urban Development, *Noise Abatement and Control: Department Policy, Implementation Responsibilities, and Standards*, Departmental Circular 1390.2, Chart: External Noise Exposure Standards for New Construction (August 4, 1971)).

(2) *Mitigation measures.* Examples include control of hours of operation, coordination of street blockages with adjacent communities, dust and erosion controls measures, and proposed methods of tie disposal and maintenance of way. Applicants should also refer to the EPA "Levels" document (U.S. Environmental Protection Agency, *Information on Levels of Noise Requisite to Protect Public Health and Welfare with an Adequate Margin of Safety*). This document provides a system of measuring day and night noises on a weighted average.

(g) A description of any alternatives to the proposed transaction that have been enumerated and discussed in §§ 268.23 and 268.25 of this part, with respect to impact on the environment. This discussion should include—

(1) Continuation of rail service without the proposed transaction;

(2) Abandonment of rail service;

(3) Relocation or construction of grade separations at conflict points; and

(4) Costs of such alternatives.

(h) A full explanation of the methodology and reasoning used in making estimates and projections called for by this section. Applicant should reference sources used as the basis for comparisons. For energy comparisons, a possible source is Oak Ridge National Laboratory Report, "Energy Intensiveness of Passenger and Freight Transport Modes" by Dr. Eric Hirst, April, 1973. For analyzing community impacts, the following report may be useful: "The Impacts on Communities of Abandonment of Railroad Service," July, 1975, prepared for the U.S. Railway Association by the Public Interest Economics Center, Washington, D.C. In examining the environmental effects of highway transport as an alternative to rail service, applicants may wish to use the following publication: "A Study of the Environmental Impact of Projected Increases in Intercity Freight Traffic, August, 1971, prepared for the Association of American Railroads by Battelle, Columbus, Ohio.

§ 268.37 Administrator's request for additional information.

Applicant shall submit any additional information which the Administrator may deem necessary concerning a submission filed under this part.

Subpart C—Miscellaneous Provisions

§ 268.39 Access to information.

If an applicant wishes any information filed in a submission or in a supplemental submission not be released by the Administrator upon request from a member of the public, the applicant must so state and must set forth the reasons why such information should not be released, including particulars as to any competitive harm which should result from release of such information. The Administrator will keep such information confidential as permitted by law.

§ 268.41 Waiver or modification.

The Administrator, upon good cause shown, may waive or modify any requirement of this part, or make any additional requirements deemed necessary.

Dated: January 19, 1977.

ASAPH H. HALL,
Administrator, Federal Railroad Administration.

PART VII

FEDERAL COMMUNICATIONS COMMISSION

■

COMMERCIAL TELEVISION NETWORK PRACTICES

Notice of Inquiry

FEDERAL COMMUNICATIONS COMMISSION

[FCC 77-53; Docket No. 21049 (RM-2749)]

COMMERCIAL TELEVISION NETWORK PRACTICES

Notice of Inquiry

Adopted: January 14, 1977.

Released: January 14, 1977.

1. Notice is hereby given of the institution of an inquiry into commercial television network practices and policies regarding the acquisition and distribution of television programming. Almost two decades have elapsed since the Commission completed its last overall study of network practices.[1] Developments in recent years suggest that a new inquiry is warranted.

2. This inquiry will encompass a number of subjects surrounding the matter of alleged dominance of the nation's commercial television industry by the three major commercial networks, but will focus most specifically on the relationship between these networks and their affiliated stations. In this regard, the Commission has consistently emphasized that it is the individual licensee who has the right and the responsibility to program his station:

> • • • the Commission in administering the Act and the Courts in interpreting it, have consistently maintained that responsibility for the selection and presentation of broadcast material ultimately devolves upon the individual station licensee and that fulfillment of such responsibility requires the free exercise of his independent judgment. En Banc Programming Policy Report, 20 R.R. 1901, 1911 (1960).

It is clear, furthermore, that this responsibility for the independent exercise of programming judgment cannot be delegated to a network or to any other entity or individual.[2] Accordingly, we propose to carefully examine whether particular network practices may improperly compromise or restrict the programming discretion of the broadcast station licensee.

3. In giving proper consideration to this question, it is not possible to limit our inquiry simply to an examination of the contractual relations which exist directly between a network and its affiliated stations. The networks play a central role in our commercial television industry and their activities have a direct bearing on the entire market relating to the production and distribution of television entertainment programming. Station discretion can be meaningful and effectively exercise only in circumstances where this market is in a healthy, competitive state and is in a position to offer alternative sources of programming. For this reason, our inquiry will encompass the question of whether the networks have maintained anticompetitive policies which unduly restrict the development of other programming sources.

Preliminary Observations

4. This study is prompted, in part, by a rulemaking petition brought before us by Westinghouse Broadcasting Company, Inc. (RM-2749) and by allegations contained in antitrust complaints which the Department of Justice filed against the networks in the Central District of California.[3] The Westinghouse petition called for a "comprehensive inquiry and rulemaking proceeding to review the changing role and function of the three national television networks." Westinghouse Petition in RM-2749, September 3, 1976, p. 1. The Justice Department filed comments in support of this petition but, in a supplemental letter, emphasized that its comments "should not be construed as suggesting that the inquiry encompass those issues now being litigated in the Federal District Court in California," and that neither this letter nor the Department's formal comments were intended "to preclude either the Commission or the Department of Justice from taking any action consistent with its respective responsibilities." Letter from the Honorable Donald I. Baker, Assistant Attorney General, Antitrust Division, December 3, 1976, pp. 1 and 2.

5. We would like to make it clear that, in instituting the present inquiry, we have neither the power nor the desire to foreclose the Department in its antitrust action. While it is inevidentable that thorough inquiry into network practices will encompass many of the questions raised in the antitrust suit, we do not believe that our inquiry should in any way preclude the Department from prosecuting its case or from arranging an appropriate settlement. See *United States* v. *Radio Corporation of America*, 358 U.S. 334 (1958). In concurrently examining similar issues, the Department of Justice has a direct responsibility for the enforcement of the Sherman Act, whereas the Commission's inquiry will focus on public interest questions affecting communications policy pursuant to our responsibilities under the Communications Act of 1934. In this connection, we note that in mid-November 1976 a proposed consent decree was agreed to by the Department and by NBC in one of the three antitrust actions mentioned (Case No. 74-3601—RJK), and is now pending before the Federal District Judge handling the case. See 41 Fed. Reg. 51991 (November 24, 1976). This is discussed below, in connection with the general subject of network-producer relationships.

6. In the discussion of specific topics below, there is extensive reference to allegations raised in the Westinghouse petition, statements in response to that petition filed by public interest groups and other parties, the Department of Justice antitrust complaints, and the proposed NBC consent decree. The networks vigorously oppose most of these allegations, as to their relevance and materiality and in some cases their accuracy. They also advance counter-arguments, both in respects mentioned below and otherwise. We have carefully considered the networks' positions, just as we have carefully noted assertions made by Westinghouse, the Department of Justice, and public interest groups. Given the networks' highly important role in the commercial television industry, allegations regarding abuses of power, and the lapse of 20 years since the last overall network study and investigation, we believe that this Inquiry is appropriate at the present time. This is true not only in connection with consideration of possible Commission regulation by rule or adjudication, but also in connection with possible legislative recommendations to Congress. The Commission hastens to point out, however, that we have not reached any conclusions, even of a tentative nature, regarding these issues discussed below. What we contemplate at this time is solely a fact gathering inquiry designed to provide the Commission with information necessary to a thorough understanding of television networking.

7. The Commission is, of course, cognizant of the vital contributions which the networks have made to the development of the television medium. As pointed out in the 1960 Program Policy Statement, supra, (20 R.R. 1914):

> The programs provided first by "chains" of stations and then by networks has always been recognized by this Commission as of great value to the station licensee in providing a well-rounded community service. The importance of network programs need not be reemphasized as they have constituted an integral part of the well-rounded program service provided by the broadcast business in most communities.

While it is certainly not our intention to adopt any regulatory measures which would impair the ability of the networks to serve the public interest, we must assure ourselves that the networks are not engaging in practices which might unduly encroach on the discretion of our licensees, or unnecessarily restrict the development of new sources of television programming.

8. As a matter of convenience, this Notice has been divided into three sections. (1) background on the role of the networks; (2) questions concerning the relationship between networks and their affiliated stations; and (3) questions concerning the relationships between the networks and program producers and suppliers. It is obvious, of course, that the categories of questions concerning network-affiliate relations and network-program supplier relations are far from being mutually exclusive. Developments in one area can and generally do impact on the other. Nevertheless, we believe that this division of questions will be useful for the purposes of discussion and inquiry. Commenting parties should be careful, however, to keep in mind the fact that to a very large extent these categories are inextricably intertwined. The fact that we are studying various particular aspects of commercial television broadcasting does not mean that these are viewed as problem areas. It simply means that information pertaining to these activities is indispensable to a thorough understanding of network practices. In this regard, our inquiry addresses the identification of problems, not the consideration of possible remedies for any abuses that may be identified.

Background: The Role of the Networks

9. Ever since the demise of the Du-Mont Network in the mid-1950's, there have been only three "national" television networks: the American Broadcasting Companies, Inc. (ABC), Columbia Broadcasting System, Inc. (CBS) and National Broadcasting Company, Inc. (NBC). Recent years have witnessed the development of a number of specialized networks offering sports or movies, but the pre-eminent position of the three national networks remains unchallenged. Their affiliates number well over 75% of all U.S. commercial television stations (approximately 600 out of slightly more than 700) and, outside the major markets, network affiliation is virtually indispensable to successful station operations.[4] As discussed below, it appears that about sixty percent of the broadcast programs currently presented by affiliates are supplied directly by their network. In addition to their ability to reach nearly all American households through their affiliated stations, all three networks own VHF stations in each of the nation's three largest television markets (New York, Los Angeles and Chicago), and two in other major markets (ABC, Detroit and San Francisco, the 6th and 7th markets; CBS, Philadelphia and St. Louis, the 4th and 12th markets; and NBC, Cleveland and Washington, the 8th and 9th markets). Each of these 5-station "owned and operated" (O and O) groups reaches about 22 percent of the U.S. audience.[5] The networks are actively involved as brokers or middlemen connecting the program producers and national advertisers with local stations and their viewers. It is, therefore, not surprising that the networks play a very important role in the development, selection, and distribution of television programming.

10. This role, with respect to program development and selection, has not remained unchanged. Twenty years ago, more than half of the programs carried by the networks were either produced or purchased by major advertisers who acquired the necessary amount of network time to broadcast their programs. Today, for a variety of economic reasons, virtually all regularly scheduled network programs are either obtained by the networks directly from an independent producer or produced by themselves. With this development, the ability to determine what types of television programming will be made available to the American public has largely shifted from the advertising community to the networks.

11. This change is largely attributable to increases in the costs of producing programming as well as the costs of network advertising time. Between 1960 and 1976, the average cost of a single half-hour episode of a new prime-time program increased by about 237 percent from nearly $49,000 to approximately $165,000.[6] Network program expenditures reflected this trend, rising from $376,948,000 in 1960 to $1,273,241,000 in 1975, an increase of 238 percent. The average cost of a thirty-second network TV advertising spot rose by 153 percent during the same period. Cost increases have also been accompanied by a general recognition that shorter commercial messages are, for the most part, more cost effective than longer TV advertisements. That is, a 20 or 30-second spot, in many instances, is thought to be as nearly effective as a 60-second spot besides being less expensive. Given these developments, it is not surprising that advertisers have become increasingly inclined to spread their commercials over a larger number of programs. Consequently, they no longer produce their own regularly scheduled programming but, rather, purchase a number of commercial spots which are usually placed in a variety of programs. While this development has shifted almost exclusive control over the development and selection of programs to the networks, it has also permitted more businesses, particularly smaller ones, to use television as an advertising medium.

12. Network control over access to the medium has also coincided with rather extraordinary increases in profits. Between 1960 and 1975, total combined network expenditures rose from $461 million to $1,465 million, for an average annual increase of 13.6 percent. Total net broadcast revenues, on the other hand, increased more rapidly; from $495 million in 1960 to $1,673 million in 1975, which was equivalent to an average annual increase of 15 percent. Net income (total combined profits before taxes) earned by the networks has risen at an annual rate of 32 percent; increasing from $33.6 million in 1960 to $208 million in 1975. According to the Internal Revenue Service, pretax profits accruing to all businesses in the United States increased at an average anual rate of approximately 12 percent between 1960 and 1974.[7]

13. Westinghouse alleges that increases in network profits have partially resulted from expanded program schedules and relative reductions in station compensation payments. It is stated that between 1960 and 1976 the networks increased the length of their program schedules from 434 to 516 half-hours, or by 19 percent.[8] It is further argued that these increases occurred at the expense of local station time which has declined by 25 percent since 1960. Additionally, Westinghouse maintains that network programming currently occupies up to two-thirds of the available time on affiliated stations. The networks, it is claimed, have also reduced the proportion of their total revenues devoted to station compensation which, of course, has also enhanced their profits. Westinghouse further maintains that between 1964 and 1975, station payments as a percent of network revenues declined from 23.1 to 13.4 percent. Similarly, it is contended that station compensation payments as a percent of station receipts decreased from 19.8 to 10.7 percent during the same period. It is suggested that these and related developments have adversely affected the ability of affiliated stations to meet their public service responsibilities.

14. When the allegations of Westinghouse and other parties are considered against this background of significant change in the commercial television industry, it appears that an inquiry is warranted. In order to protect the interest of the public in receiving the best possible programming service, the Commission must take a careful look at the question of whether the networks may have engaged in conduct which hampers the independent judgment of the affiliated station, and which restricts effective competition in the programming market.

Network-Affiliate Relations

15. In the paragraphs which follow, we will briefly discuss three areas of network-affiliate relationships which appear to be particularly pertinent in connection with this inquiry, and as to which comments are specifically invited, although, of course, parties may wish to discuss others. These are: (1) clearance of network programming and the

---

[1] Between 1955 and 1957, a special network study staff conducted a broad-ranging inquiry into network practices. This study resulted in the release of the "Barrow Report." *Network Broadcasting*, H. Rep. No. 1297, 85th Cong., 2nd Sess. (1958). (Hereinafter cited as the "Barrow Report.")

[2] As also stated in the Programming Policy Report (20 R.R. 1901, 1914), the broadcaster is obligated to provide programming to meet the needs and interests of his local community and this "is a duty personal to the licensee and may not be avoided by delegation of responsibility to others." See also Broadcast Licensees and Public Agreement, 57 FCC 2d 42, 49-51 (1975).

[3] *United States* v. *American Broadcasting Companies, Inc.*, Civil Action No. 74-3600—RJK (C.D. Cal.); *United States* v. *CBS Inc.*, Civil Action No. 74-3599—RJK (C.D. Cal.); *United States* v. *National Broadcasting Company, Inc.*, Civil Action No. 74-3601—RJK (C.D. Cal.).

[4] There are only ten commercial independent stations (in the conterminous U.S.) outside the top 50 markets.

[5] In terms of "ADI households" (households located in the market stations' "area of dominant influence") the figure was 22.82% for ABC, 22.76% for CBS and 21.91% for NBC. See Broadcasting Yearbook 1976, p. B-80, American Research Bureau (ARB) estimates for 1975-76.

[6] The average cost of a prime time network episode was obtained from Arthur D. Little, Television Program Production, Procurement, Distribution and Scheduling, (April 21, 1969) p. 41. Production costs are based on individual program production fees published in Variety, September 15, 1976, pp. 50-54.

[7] According to the Statistics Division of the Internal Revenue Service, net income earned by proprietorships, partnerships and corporations increased from $79,809 million in 1960 to $225,120 million in 1974. Statistics are not available for 1975.

[8] "Clearance" of network programs by affiliate stations is usually very high; ABC shows it as 95% or more for prime time and Monday-Friday daytime programming (though less in other parts of the week)

expansion of network program schedules, (2) previewing of network programming by affiliated stations, and (3) the relationship between station compensation plans and the independence of affiliate stations. While we are confident that larger licensees will supply comments, we particularly urge affiliates in smaller markets and independent stations to provide us with their views. With respect to each of these matters, we would hope that commenting parties will support their arguments, as completely as is possible, with relevant statistics and other factual information. This will facilitate our assessment of the merits of these arguments as well as assist the staff in its fact-finding efforts.

16. *Clearance of Network Programs and the Expansion of Network Schedules.* Westinghouse has estimated that, in 1960, network schedules filled only about one-half of the total hours broadcast by affiliate stationss, but that today network programs occupy approximately two thirds of these hours. It is argued that this increase has caused a corresponding decrease in the opportunities for independent programming decisions by station licensees. Implicit in this argument is an assumption that affiliated stations really do not wish to clear additional network programming, but that circumstances compel them to accept these programs anyway. In response to these claims, the networks argue that the overall figures on network program expansion are misleading and that regardless of the amount of increase, affiliates have supported and benefited from the additional programs.[9] We specifically invite comments on the extent to which such clearances are other than voluntary and the nature of any contractual provisions or other economic relationships which might serve to undermine the independent judgment of the station licensee.[10]

17. In addition, we seek comments on the likelihood of further expansion of network schedules and whether this would impact on the financial performance of local stations as well as their ability to serve the interests of the local community.[11] We invite additional comments regarding any relationships between the length of network schedules, and the supply and demand for syndicated programming, particularly first-run material, available to affiliated and independent stations. With regard to the latter questions, we have noted various reports indicating that the networks, at some time in the near future, may increase the total amount of available commercial minutes per hour in prime time. We ask for comments on whether this would significantly impede the development of additional networks, specialized networks, and other syndicated program offerings in competition with network programming.

18. *Previewing of Network Programs by Affiliate Stations.* Westinghouse has also alleged that the networks do not afford affiliated stations a reasonable opportunity to review network programming before it is shown to local audiences, thereby making it difficult for station licensees to exercise independent judgment concerning the suitability of particular episodes for their communities. With regard to this issue, it is suggested that audiences will become confused or angered if a program is cancelled after it has been promoted over-the-air or has been published as part of an announced program listing. Westinghouse contends that prescreening opportunities are commonly delayed until after this promotional material has been provided to the public. Network comments in response to the Westinghouse petition contain extensive descriptions of present (in the case of NBC, recently amended) procedures for informing affiliates in advance of network program content, procedures which the networks claim are "adequate."[12] We invite comments on the nature and adequacy of the information which is presently provided to affiliates concerning up-coming programs, and the extent to which improvements may be needed so as to allow the effective exercise of licensee discretion. We also invite comments on the cost and inconvenience which may be associated with the provision of additional, or more timely, program information. Finally, we encourage comments regarding the extent to which affiliates currently prescreen network programs as well as their willingness to make use of additional prescreening opportunities if made available.

19. *Station Compensation Plans.* Traditionally, the networks have paid their affiliated stations for clearing network programming, or more precisely, for clearing the network commercials which are associated with that programming. While the methods used to determine these payments are rather complicated, they are directly related to the size of a station's audience and constitute an important ingredient contributing to the financial health of affiliated stations. While the Commission is not concerned with the earnings of stations per se, we do become interested when financial arrangements detract from the ability of these stations to live up to their responsibilities as public trustees. In 1963, for example, we found that a proposed CBS compensation plan would discourage affiliates from rejecting network programs which they believed to be unsatisfactory or contrary to the public interest. CBS Network Compensation Plan, 24 R.R. 520a; 1 RR 2d 696 (1963). In this instance, the Commission stated that:

> Any graduated payment plan wherein the average hourly rate of compensation varies greatly with or is heavily influenced by the number of hours taken and which as a practical matter, requires an affiliate to take the majority of its programs from the same network without regard to the merits of the programming offered, is barred by our rules.

Id. at 698.[13] We invite comments on the extent to which the networks' present compensation plans are consistent with this principle. These contracts variously call for affiliates to carry up to an equivalent of 24 hours of prime time programming per month without compensation or for dollar discounts which amount in substance to roughly the same thing. We are specifically interested in the effect these provisions have on the independent discretion of our licensees and on the ability of syndicators and other program suppliers to compete with the networks by dealing directly with affiliated stations.[14] We are further interested in (1) whether and to what extent uncompensated prime time represents a

[9] It is further argued that these increases are largely attributable to ABC which accounted for more than half of the overall expansion of combined network schedules since 1960. Moreover, the networks maintain that the expansion was part of a "long process of building ABC into a fully competitive network." CBS and NBC, on the other hand, only expanded their schedules by 9 and 5 percent, respectively. Furthermore, the new network material has largely been late night, early morning (cleared, ABC and CBS note, by only about 80 percent of their affiliates) and weekend sports programming which has meant increased station compensation and/or made possible station broadcasts at times when the affiliates were previously off the air.

[10] Westinghouse has also suggested that the lack of joint efforts by affiliates in dealing with their network with respect to program clearances and other matters may have impeded their ability to serve the public. Some parties may wish to comment on the need for, legality, and propriety of such joint efforts.

[11] With regard to this specific question, Westinghouse has estimated that an expansion of network news to one hour would cost affiliate stations a total of $75 million annually and would increase total network income (including 0 and 0's) to 50 percent of all industry income.

[12] All three networks provide affiliates with written materials summarizing future programs. Policies on allowing actual previews of programs are: ABC—up to 15 hours per week (9 on the average), including all programs which carry a parental guidance advisory; CBS—no hour per week figures, but provides programs of particular interest "virtually on a daily basis" and theatrical movies approximately 4 weeks in advance where practical; NBC—up to 20 hours per week (series episodes, theatrical and made-for-television movies, specials), programs with parental guidance adivsories and any available program requested by in affiliate ABC and NBC both refer to their program standards departments as one way of insuring that programs are "acceptable" to affiliates (although Westingthouse points out that licensees must determine acceptability based on local, not national standards). Other network policies in this area include showing pilot programs to affiliates at annual meetings and during the preceding season and permitting affiliates to invite newspaper television critics to previews. Finally, it is said that there are practical problems in providing affiliates with programs 4 weeks in advance, as Westinghouse requests—production schedules and editing, MPAA classifications and dealing with the creative community.

[13] Aside from this concept, network control over a station's network rate has the potential for use by the network to influence the station's clearance decisions and also the level of its national spot advertising rates. See American Broadcasting Company, 17 R.R. 458, 462–463; Columbia Broadcasting System, Inc., 17 R.R. 447, 449; National Broadcasting Company, Inc., 17 R.R. 449, 452–453 (all 1958).

[14] A brief discussion of this issue may be found in the "Barrow Report," supra. pp. 463–66.

justifiable means of sharing the overhead expenses associated with network program procurement and (2) the extent to which the average amount of compensation for each half hour of network programming cleared by a station varies depending on the total amount of network programming cleared by that station.

20. In its petition, Westinghouse states that between 1964 and 1975 the net income of the networks increased by 246%, whereas compensation payments to stations increased only 20%. It is argued that, by virtue of their powerful economic position, the networks have been able to limit compensation payments and thus realize a rather dramatic increase in their profits. This argument suggests that the advantages of networking, as opposed to syndication, are very substantial. That is, in the absence of anti-competitive practices, artificially depressed levels of station compensation would be expected to provide a fertile opportunity for entry by non-network program sources. We are most interested in comments on the question of whether the economic picture painted by Westinghouse is complete and accurate and, if so, what factors exist which discourage vigorous competitive activities by syndicators or the creation of a "fourth network." Comments are also invited on the effects which various changes in compensation plans might have on the health and viability of networking and the viability of networking and the ability of the networks to contribute to programming in the public interest. We would encourage comments, particularly from our licensees, regarding relationships between compensation payments and expenditures to serve local programming needs (including locally produced material) as well as their ability to compete effectively with networks for national spot advertising. With regard to the latter two questions, it is alleged that relative decreases in compensation have forced stations to increase prices for national spots, while at the same time, permitting the networks to reduce commercial rates charged to national advertisers. This, according to Westinghouse, has afforded the networks a substantial competitive advantage which has adversely impacted on station revenues and on the quantity and quality of local service. Finally, parties are free to comment on any other aspect of network compensation plans or contractual relations which may be inconsistent with legitimate public interest objectives. We stress again, however, our unwillingness to become involved in the amount of station compensation per se i.e., without reference to practices which are anti-competitive or contrary to the public interest).

NETWORK-PROGRAM SUPPLIER RELATIONS

21. Our discussion of the relationships between the networks and program producers and suppliers is divided into the following six categories: (1) network interests in syndicated programs produced by independent suppliers, (2) network produced entertainment programming, (3) contractual tying agreements relating to production facilities and program options, (4) exclusive exhibition rights to new programs, (5) exhibition rights to network reruns, and (6) relations between network owned and operated stations and program suppliers. Once again, parties are free to comment on other matters which may be relevant to this Inquiry. All parties are urged, however, to make every effort to support their arguments with factual information.

22. *Network Interests in Syndicated Programs Produced by Independent Suppliers.* The proposed NBC consent decree contains terms prohibiting NBC from acquiring distribution rights or profit shares in programs produced by outside producers, and from engaging in syndication of such programs anywhere, and from all syndication in the U.S. These particular terms appear virtually identical to rules adopted by the Commission in 1970 (§ 73.658(j)), prohibiting such activities, including the acquisition of any interest in a program produced by an outside party beyond the right to network exhibition. We invite interested parties to comment on the adequacy of our present rules and to propose alternatives if that appears to be warranted. Parties may wish to comment, particularly, on programs such as the current Dinah program—created originally by CBS, produced for its 5 owned and operated stations by an outside entity, and syndicated nationally by a different company but often, according to Westinghouse, carried by CBS-affiliated stations. Westinghouse and NAITPD claim that this violates the spirit if not the letter of the 1970 rules, particularly in light of Dinah Shore's other contractual relations with CBS.[15]

23. *Network "In-House" Production of Entertainment Programs.* Although most network entertainment programs are acquired from outside producers, a small number have been and are produced entirely by the networks themselves. This was one subject of the Department of Justice's antitrust action. The Department's position (as set forth in its competitive impact statement filed with the NBC consent decree) is that, just as with programs produced by others but in which the network acquires subsidiary rights, there arises a network predisposition to use such material regardless of its merit, and independent producers are thus unduly excluded from the network program market. Other parties have alleged that the unlimited network potential for producing their own entertainment programs can be used to obtain first-run programming at unreasonably low prices. While we are not concerned with the profits of program producers as such, we are interested in the question of whether this factor gives the networks an anti-competitive advantage over potential competitors, and whether the advantage works to limit the supply of independently produced programs. Parties addressing the possibility of Commission regulation in this area should attempt to assess the possible effects of such restrictions on: (1) network programming schedules, as to quality and type of programming; (2) prices paid for network exhibition rights; and (3) the cost and supply of syndicated programming available to local stations.

24. *Contractual Tying Agreements Relating to Production Facilities and Program Options.* Independent production companies have periodically maintained that the networks agree to purchase a particular program on the condition that the producer grant the networks other rights or interests which are not incidental to network exhibition of that program. These interests, it is said, sometimes include a commitment to use network-owned production facilities to produce the program. We suggest that commenting parties address themselves to the question of whether such arrangements to the extent that they exist, may affect competition in the offering of program production facilities. We are further interested in obtaining information regarding the following questions: (1) what proportion of all network programs are produced using network owned facilities or that of other networks, (2) how does the cost of leasing these facilities compare with the cost of leasing facilities owned by others, (3) what percentage of total production costs is attributable to the cost of leasing facilities, and (4) does that percentage vary by type of program?

25. It is also alleged that the networks commonly demand options on exhibition rights for as much as five to seven years following the development of a script or program pilot, thereby precluding the producer in bidding for the rights to a program which develops into a highly successful series. We invite comments on the effects which such practices could have on competition, and, more specifically, on the supply of programs available to local stations through the syndication market, and also on the extent to which these clauses may limit the life expectancy of a first-run series. Comment is also invited on (1) the extent to which extended options may be necessary to cover a network's heavy expenses in developing and promoting program series, (2) whether the terms and conditions of options differ for various types of programs, (3) their impact on the profitability of an investment by a producer in independently produced entertainment series, (4) the relationship between program options and the life expectancy of a new series and the subsequent availability of that series in the syndication markets and (5) the extent to which changes in program options would or could affect station compensation payments.

26. *Exclusive Exhibition Rights for Program Pilots.* In a given year, the networks typically purchase exhibition rights to a far greater number of new programs than they can possibly use.

[15] Westinghouse also mentions the fact that the program is produced by CBS facilities (see para. 25, below). While not mentioned by Westinghouse, other pertinent factors in this connection could be: (1) the proportion of guests on the show which are CBS "talent"; and (2) whether or not CBS advanced financing for the program.

In large measure, such purchases are necessary to enable the network to select an attractive line-up of programs and to replace those which generate relatively small audiences. Nevertheless, we believe that it is appropriate to seek comments on whether some present practices unduly restrict the release of a significant number of pilots for further development and thereby limit the amount of first-run material available for syndication, and whether this programming might, in some instances, provide viable competition to network offerings. More specifically we invite comments regarding (1) the extent to which networks have eventually used programs which were initially rejected for regularly scheduled distribution; (2) the amount of elapsed time between initial rejection and eventual acceptance of these programs during the past 10 television seasons; and (3) any differences in the duration of exclusive rights to new series which depend on the type of program (e.g. prime-time series as opposed to daytime, situation comedy as opposed to drama etc.). Finally, parties are invited to comment on whether these rights influence the diversity of network schedules or the availability of first-run syndicated programs.

27. *Exhibition Rights to Network Reruns.* The Department of Justice has raised a question as to whether limitations should be placed on the ability of networks to secure exclusive rights to rebroadcast episodes originally shown in a previous television season. Specifically, the consent decree contains a provision that negotiations for exhibition rights to repeats, originally broadcast in a preceding season, must be separated from negotiations for rights to first-run exhibition.[9] We invite comments regarding the need for such restrictions and their effect on (1) the cost of repeats to the network and local stations, (2) network use of repeats in day-time, prime-time and fringe hours, (3) investment opportunities in new first-run network and syndicated programming and (4) the demand for new as well as repeated syndicated material available to local stations. Parties are invited to comment on any other aspect of this issue which warrants our attention. It is not our wish to reopen here the issues regarding same-year repeat episodes which were dealt with in the Commission's inquiry concerning the networks' use of reruns in prime-time entertainment programming (Docket No. 20203, 37 RR 2d 1435).

28. *The Relations Between Network Owned and Operated Stations and Program Suppliers.* The networks also participate in the programming market as station owners. It has been alleged by Westinghouse that certain practices used by the networks in acquisition of programming for the owned and operated stations have adversely influenced the quantity and quality of syndication offerings. It would be helpful to the Commission to know the extent of block buying of programming for each network owned station group (i.e., the purchase of the same programs for exhibition on all of the stations in that group.) The Commission is also interested in whether any relationship exists between the purchase of first-run programs for O and O exhibition and the leasing of network owned facilities for the production of those programs. Comments are invited on whether a "network deal" in the form of a contract for exhibition on an O and O group is a prerequisite for the success of a first-run program sold in the syndication market. Parties are also free to address other issues concerning the impact which network practices with respect to owned and operated stations may have on the programming market and, in particular, the impact which such practices might have on the successful syndication of programming in direct competition with network offerings. While this inquiry concerns the business practices of the networks as they may impact on industry competition, and while attention, thus, must be paid to network practices with respect to the O and O's, we wish to make it clear that this is not a multiple or "group" ownership proceeding.

29. *The Nature of this Proceeding.* Comments and other information filed in connection with this inquiry will be evaluated by a special staff composed of economists, attorneys, and others with relevant experience and expertise. This staff will be under the direct supervision of the full Commission.[16] The staff's analysis of the comments and reply comments may be followed by the issuance of questionnaires or inquiries designed to provide a complete factual record. If at any point it appears that these procedures are inadequate, the special staff will be authorized to initiate compulsory processes under Section 403 of the Act. It is hoped that a report concluding this inquiry can be completed within one year following receipt of the comments.

30. *It is ordered,* That the petition for inquiry, rule making and immediate temporary relief, filed September 3, 1976, by Westinghouse Broadcasting Company, Inc. IS GRANTED to the extent indicated herein and IS DENIED in all other respects.

31. Authority for the institution of this proceeding is contained in sections 4(i), 303 (g), (i) and (r) and 403 of the Communications Act of 1934, as amended. Pursuant to applicable procedures set out in § 1.430 of the Commission's Rules, interested persons may file comments on or before May 2, 1977 and reply comments on or before June 1, 1977. All relevant and timely comments and reply comments will be considered by the Commission before final action is taken herewith. In reaching its decision in this proceeding, the Commission may also take into account other relevant information before it, in addition to the specific comments invited by this Notice. We recognize that some parties may wish to file comments which include confidential financial information or other material which they may be reluctant to make public. In a manner consistent with the Freedom of Information Act (5 U.S.C. 552) we will consider requests for confidential treatment made under § 0.459 of our Rules. As set forth in that section such requests may be made in advance.

32. In accordance with the provisions of § 1.419 of the Rules, an original and 5 copies of all comments, replies pleadings, briefs, and other documents shall be furnished the Commission. Material filed will be available for public inspection during regular business hours in the Commission's Broadcast and Docket Reference Room at its headquarters in Washington, D.C.

FEDERAL COMMUNICATIONS COMMISSION,[17]
VINCENT J. MULLINS,
Secretary.

[FR Doc.77-2338 Filed 1-25-77;8:45 am]

[16] The special staff which conducted the 1955-57 inquiry was under the supervision of a committee of four Commissioners. In the present instance, however, we see no need for the establishment of such a committee.

[17] Separate Statement of Commissioner Joseph R. Fogarty, filed as part of the original document.

WEDNESDAY, JANUARY 26, 1977

PART VIII

DEPARTMENT OF THE TREASURY

Bureau of Alcohol, Tobacco and Firearms

TAXATION OF LARGE CIGARS

Title 27—Alcohol, Tobacco Products and Firearms

CHAPTER I—BUREAU OF ALCOHOL, TOBACCO AND FIREARMS, DEPARTMENT OF THE TREASURY

[T.D. ATF-40; Reference No. 305]

LARGE CIGAR

Taxation; Revision of Procedures

On December 3, 1976, there was published in the FEDERAL REGISTER (41 FR 53055) a notice of proposed rulemaking setting forth proposed amendments to the above-captioned regulations. The purpose of the amendments is to revise procedures relating to the taxation of large cigars (cigars weighing more than three pounds per thousand). The amendments are required by section 2128 of Pub. L. 94-455 (Tax Reform Act of 1976), which was approved on October 4, 1976. Section 2128 changed the basis for taxation of large cigars from seven tax classes, divided according to retail price, to a percentage tax based on the wholesale price. The new tax rate is 8½ percent of the wholesale price, with a maximum rate of $20 per thousand cigars.

Interested persons have been afforded an opportunity to participate in the making of these amendments by submission of views, comments, and suggestions. Due consideration has been given to all these expressions of public opinion. Some suggestions have been adopted; others have not. The reasons for the Bureau's decisions in each instance are discussed below. Except as specifically discussed in this document, the amendments as adopted are the same as those contained in the notice.

(1) *Editorial changes.* The statutory citation following § 275.81 has been amended to conform to FEDERAL REGISTER standards. The definitions of "ATF officer", "regional regulatory administrator", and "region", have been modified where they appear in §§ 270.11, 275.11, 290.11, 295.11, and 296.72 as part of a program to standardize these definitions throughout regulations of the Bureau of Alcohol, Tobacco and Firearms. Other minor editorial and conforming changes have also been made.

(2) *TSUSA schedules.* The proposals contained a definition in § 275.11 of "TSUS" (Tariff Schedules of the United States), but the U.S. International Trade Commission has informed us that this should be "TSUSA" (Tariff Schedules of the United States Annotated). Accordingly, this change has been made. Furthermore, the Commission indicated that it will amend these schedules to add new items 170.7225 through 170.7290, corresponding to the new ATF statistical classes A through H. This will remove the necessity of providing for a combination, under certain circumstances, of classes G and H, in § 297.37. Section 275.37 is therefore changed to reflect this development.

(3) *Determination of wholesale price.* A number of comments were received, from both government and industry, regarding the proposed rules for determination of wholesale price in §§ 270.22 and 275.39. Some minor changes have been made as a result of these comments. In paragraph (a) of each of these sections, the next-to-last sentence is re-worded for improved clarity. In paragraph (f), the second sentence is made into a separate paragraph (g) entitled "Removals for sales to retailers only". Paragraphs (g) and (h) are accordingly re-numbered as paragraphs (h) and (i).

One comment from industry, relating to the paragraph entitled "Change in wholesale price", suggested that the wholesale price tax base should not change until the actual effective date of the price change. If the change proposed by this comment were to be adopted, a manufacturer or importer would be able to remove and taxpay a large quantity of cigars during the period immediately preceding an intended wholesale price increase, thereby taking advantage of the lower tax rate. The cigars could then be sold after the effective date of the price increase, and the manufacturer or importer would obtain a tax advantage. Another industry suggestion with respect to this issue proposed that the tax rate should change as of the date a price change is announced, with an exception for cigars "removed to a distribution warehouse, controlled by the manufacturer, in anticipation of the change". This suggestion avoids some difficulties of the other suggestion discussed above, but it is still unacceptable because it would in effect permit the manufacturer to unilaterally determine the time of change in tax rate. The Bureau believes that the intent of Pub. L. 94-455 (and the predecessor statutory provisions) is that large cigars be taxed on the basis of the taxable price at which they will in fact be sold, to the best of the taxpayer's ability to determine or predict that price at the time of the taxable removal. Under the regulations as proposed and adopted, cigars removed even before the announcement or effective date of an intended price change, which the manufacturer or importer has reason to know will not be sold to retailers until after the effective date, are taxed according to the new wholesale price. The Bureau feels that the rule as adopted is in harmony with the intent of Congress and adequately protects the public revenue while not imposing any unusual administrative burden on the taxpayer. Furthermore, the rule as adopted is patterned after Revenue Ruling 69-470 (Internal Revenue Cumulative Bulletin 1969-2, 274), which provided a similar rule regarding retail price changes under the former system of taxation.

Another industry comment was made that the rule as proposed was unclear and therefore "legally defective under the 'void for vagueness' doctrine". The Bureau disagrees with this contention. As mentioned above, a basically similar rule has been in effect since 1969, under Revenue Ruling 69-470, without any known difficulties of interpretation by either government or industry. Nevertheless, in the interest of maximum public understanding, this paragraph has been re-written in what is hoped will be perceived as clearer language.

(4) *Marks on packages.* Several industry comments objected to the requirement that wholesale price be marked on the cigar packages. The most significant objection was that the cost of this requirement would be excessive to industry without corresponding benefits to the government. The Bureau feels that more time will be required to study the industry claims. Consequently, the effective date of the price marking requirements in §§ 270.214, 275.73, 290.186, 290.253, and 295.44 will be postponed for at least six months. If the Bureau decides, after thorough study, to make these requirements effective, notification in the FEDERAL REGISTER will be published at least 90 days prior to the effective date. In the interim period, manufacturers and importers will be permitted to use up existing stocks of packaging materials imprinted with the previously required information, without any additional package markings. Consequently, after February 1, 1977, and until further notice, no wholesale price information will be required on packages. During the next three or four months, the Bureau will conduct a study to determine what problems are experienced without such package information, and the relative significance of the problems in relation to operational problems and costs of including wholesale price information on the packages. Additional input from interested members of the public which would be useful to this study is solicited. Because a notice of proposed rulemaking has already been published, and because the present document in effect extends the public comment period with respect to this subject, no additional notice of proposed rulemaking will be published unless the Bureau decides to propose requirements that are substantially different from those published in the notice of December 3, 1976.

(5) *Manufacturers' records.* A manufacturer of cigars commented that, because of multiple wholesale prices, the record of removals subject to tax set forth in § 270.183(e) would present a significant burden for him. He stated that many of his sales are of private label cigars to retailers, and it would be relatively easy for him to calculate the total billing price for each day, but it would not be so easy to compute the number of cigars removed at each wholesale price. Part of this complexity he attributes to the myriad of private brand cigars and variations he produces. Consequently, he suggested as an alternative to the proposed requirement that only the total wholesale price of each day's removals be required to be shown in the record. The Bureau recognizes that record-keeping under the new system of taxation may be more detailed for some manufacturers because there will be more wholesale prices than there were tax classes under the former system. However, it is not felt that there is sufficient basis at present for a major change in record-keeping procedure such as the one proposed. The requirement for removals to be shown separately by wholesale price is expected to be important for auditing purposes, and is essential if statistics in the proposed form are to be provided. On the other hand, this industry comment does call attention to a possible simplification for manufacturers which should receive further consideration. If study indicates that a change such as the one proposed is practical and would be beneficial, a notice of proposed rulemaking on this subject may be published in the future. Public comments which would be helpful in this study are solicited.

Another industry comment pointed out that in § 270.183(e), the exception to permit cigars with a wholesale price of more than $235.294 per thousand to be shown without further price breakdown, was omitted. This omission was deliberate. The purpose of requiring exact wholesale price in this instance is to facilitate audit of records, since it is expected that commercial records of removals will indicate exact wholesale prices. The situation in § 270.183(i) is different, since in that case package markings without specific information for wholesale prices above $235.294 per thousand may be the only source of the required information. During the period of suspension of package marking requirements, as discussed above, only the total number of tax determined large cigars need be shown under § 270.183(i). Section 270.183(i) is amended accordingly.

(6) *Claims by manufacturers and importers.* Because of the period of suspension of package marking requirements, claims by manufacturers and importers for refund or credit of tax on large cigars withdrawn from the market must be for the lowest tax rate on that brand and size of cigar established during the record retention period (three to four years), unless a higher amount can be clearly demonstrated by specific documentation. This provision will cover situations when the absence of package markings indicating wholesale price may make it impossible to determine the exact amount to be refunded or credited. Sections 270.311, 275.170, and 275.172 are amended to include this new provision.

(7) *Export warehouses.* During the period of suspension of package marking requirements, the records, reports, and inventories under §§ 290.142, 290.143, and 290.147 need only show the total number of large cigars. Wholesale price need not be shown, since the absence of packag emarkings may make it impossible to determine the applicable wholesale price. Section 290.143 is amended because it contains a specific reference to wholesale price. When it is necessary for export warehouse proprietors to establish tax liability on large cigars, the liability will be at the maximum rate of $20 per thousand unless a lower tax liability can be clearly demonstrated. This provision applies to completion of Form 2150 and to establishment of tax liabilities on shortages and losses. Section 290.67 is amended to include this new provision.

(8) *Wholesale price of imported cigars.* The U.S. Customs Service pointed out that there might be procedural problems under the proposed § 275.39, as it related to liquidation of import entries. Consequently, slight modifications have been made in § 275.39(i) as adopted.

(9) *Effective date.* Several industry comments stressed the need for a minimum of thirty days between publication and effective date, in order to comply with anticipated package marking requirements. Since these package marking requirements are being suspended for at least another six months, this objection to a February 1 effective date is no longer relevant. The proposed amendments not related to package markings are being adopted in virtually the same form as published in the FEDERAL REGISTER on December 3, 1976. All interested parties have had constructive notice of the amendments since that time, and the Bureau believes that most interested persons have had actual notice. Since the amendments are necessary to implement section 2128 of Pub. L. 94-455, which permits the cigar industry to take advantage of the reduced tax rate effective February 1, 1977, it is found that there is good cause, within the meaning of 5 U.S.C. 553(d)(3), for making the amended regulations effective less than thirty days from the date of publication. Accordingly, these regulations shall become effective on February 1, 1977, which is the effective date of section 2128 of Pub. L. 94-455.

The following regulations are issued under the authority contained in 28 U.S.C. 7805 (68A Stat. 917).

PART 270—MANUFACTURE OF CIGARS AND CIGARETTES

PARAGRAPH A. The regulations in 27 CFR Part 270 are amended as follows:

1. Section 270.11 is amended (1) to reflect the change in taxation of large cigars, (2) to improve clarity, and (3) to reflect the establishment of the Bureau of Alcohol, Tobocco and Firearms. Definitions of "wholesale price", "Assistant Director (Regulatory Enforcement)", "regional regulatory administrator", and "ATF officer" are added; the introductory language is re-worded; the definitions of "Commissioner" and "regional commissioner" are deleted; and the definitions of "assistant regional commissioner", "determined or determination", "Director", "internal revenue officer", and "region" are revised. As amended, § 270.11 reads as follows:

§ 270.11 Meaning of terms.

When used in this part and in forms prescribed under this part, the following terms shall have the meanings given in this section, unless the context clearly indicates otherwise. Words in the plural form shall include the singular, and vice versa, and words indicating the masculine gender shall include the feminine. The terms "includes" and "including" do not exclude things not listed which are in the same general class.

Assistant Director (Regulatory Enforcement). The Assistant Director for regulatory enforcement activities in the Bureau of Alcohol, Tobacco and Firearms, who is responsible to, and functions under the direction and supervision of, the Director.

Assistant regional commissioner. A regional regulatory administrator as defined in this section.

ATF officer. An officer of the Bureau of Alcohol, Tobacco and Firearms (ATF) authorized to perform any function relating to the administration or enforcement of this part.

• • • • • •

Cigarette. • • •

Determined or determination. When used with respect to the tax on cigars and cigarettes, determined or determination means that the quantity and kind (small cigars, large cigars, small cigarettes, large cigarettes) of cigars and cigarettes and wholesale price of large cigars to be removed subject to tax have been established as prescribed by this part so that the tax payable with respect thereto may be calculated.

Director. The Director, Bureau of Alcohol, Tobacco and Firearms, Washington, D.C.

• • • • • •

Internal revenue officer. An ATF officer as defined in this section.

• • • • • •

Region. A geographical region of the Bureau of Alcohol, Tobacco and Firearms.

Regional regulatory administrator. The principal regional official responsible for administering regulations in this part.

• • • • • •

Wholesale price. The manufacturer's or importer's suggested delivered price at which the cigars are to be sold to retailers, inclusive of the tax imposed by 26 U.S.C. chapter 52 or section 7652, but exclusive of any State or local taxes imposed on cigars as a commodity, and before any trade, cash, or other discounts, or any promotion, advertising, display, or similar allowances. Where the manufacturer's or importer's suggested delivered price to retailers is not adequately supported by bona fide arm's length sales, or where the manufacturer or importer has no suggested delivered price to retailers, the wholesale price shall be the price for which cigars of comparable retail price are sold to retailers in the ordinary course of trade as determined by the Assistant Director (Regulatory Enforcement), as provided in § 270.22(i).

2. Section 270.21 is amended to reflect the new large cigar tax rate of 8½ percent of the wholesale price, which replaces the old system of tax classes based on the retail price. As amended, § 270.21 reads as follows:

§ 270.21 Cigar tax rates.

(a) *Present rates.* On cigars, manufactured in or imported into the United States, the following taxes are imposed by law:

(1) *Small cigars.* 75 cents per thousand.

(2) *Large cigars.* 8½ percent of the wholesale price, but not more than $20 per thousand.

Cigars not exempt from tax under 26 U.S.C. chapter 52 and the provisions of this part which are removed but not intended for sale, are taxed at the same rate as similar cigars removed for sale.

(b) *Previous rates for large cigars.* Prior to February 1, 1977, the following tax rates were in effect for large cigars:

(1) If removed to retail at not more than 2½ cents each, $2.50 per thousand;

(2) If removed to retail at more than 2½ cents each and not more than 4 cents each, $3 per thousand;

(3) If removed to retail at more than 4 cents each and not more than 6 cents each, $4 per thousand;

(4) If removed to retail at more than 6 cents each and not more than 8 cents each, $7 per thousand;

(5) If removed to retail at more than 8 cents each and not more than 15 cents each, $10 per thousand;

(6) If removed to retail at more than 15 cents each and not more than 20 cents each, $15 per thousand; and

(7) If removed to retail at more than 20 cents each, $20 per thousand.

(Sec. 202, Pub. L. 85–859, 72 Stat. 1414, as amended by sec. 2128, Pub. L. 94–455, 90 Stat. 1921 (26 U.S.C. 5701).)

3. Section 270.22 is completely revised to set out rules for properly determining the wholesale price of large cigars. As revised, § 270.22 reads as follows:

§ 270.22 Determination of wholesale price of large cigars.

(a) *General rule.* All cigars of the same brand, size, and packaging are taxed at the same rate except where otherwise specifically provided. When the manufacturer establishes a suggested delivered price to retailers (wholesale price), he shall do so according to the principles in the definition of "wholesale price" in § 270.11 and in this section. "Suggested delivered price" is the price at which the manufacturer intends for the cigars to be sold to retailers, and based on which the manufacturer's price to distributors and wholesalers is established through the usual trade discount. The price at which a cigar is in fact usually sold to retailers in transactions at arm's length from the manufacturer is the best evidence of whether the manufacturer's suggested delivered price is properly set. While it is not expected that a manufacturer will exercise any control over the prices actually paid by retailers in transactions with independent distributors, it is the manufacturer's responsibility to exercise reasonable care to assure that his suggested price to retailers (wholesale price) used as the basis for tax determination is consistent with prices actually paid by retailers. (Where there is no suggested delivered price adequately supported by actual sales to retailers, see paragraph (i) of this section).

(b) *Pricing for different packaging.* If different bona fide wholesale prices are applicable to different types of packaging (e.g., boxes of 25 and boxes of 50), then the cigars in each type of packaging are taxed on the basis of their respective wholesale prices.

(c) *Pricing of seconds.* If some of an otherwise identical cigar brand and size (1) Are distinctive from other such cigars because of physical imperfections, (2) Are offered to the consumer through clear labeling as "imperfects", "seconds", "throw-outs", or a comparable commonly understood term, and (3) The manufacturer has a separate wholesale price for such cigars, then they are taxed on the basis of this separate wholesale price.

(d) *Combination packages.* If a manufacturer has a wholesale price for a combination package containing cigars of different sizes, the cigars are taxed based on that combination wholesale price. If there is no wholesale price for the combination, then the cigars are taxed based on their individual wholesale prices.

(e) *Promotional pricing.* Special promotional pricing arrangements, whether applicable to all or only a part of removals, do not alter the taxable wholesale price of large cigars. For the purposes of applying this rule, any temporary reduction in price is presumed to be for promotional purposes.

(f) *Removals for another person.* If a manufacturer makes taxable removals of a brand and size of cigar only for distribution by others who establish the suggested delivered price to retailers (wholesale price), then the tax is based on such wholesale price irrespective of the fact that it is not directly established by the manufacturer making the taxable removals.

(g) *Removals for sale to retailers only.* If a manufacturer makes taxable removals of a brand and size of cigars for arm's length sales to retailers only, the tax is based on the manufacturer's selling price, applying the principles of inclusion and exclusion contained in the definition of "wholesale price" in § 270.11.

(h) *Change in wholesale price.* When a manufacturer decides to change the wholesale price of a brand and size of large cigars, there may be some of these cigars which were removed before the price change decision and were tax determined on the basis of the old wholesale price, which in fact are later sold to retailers under the new wholesale price. In this situation, the cigars will be considered to have been properly tax determined, unless at the time of removal the manufacturer had reason to believe that the cigars would be sold under the new wholesale price, considering all information which was or should have been available to him. After the price change decision, cigars may properly be removed and tax determined on the basis of the old wholesale price if the manufacturer has reason to know, at the time of removal, that they will be sold to retailers before the new wholesale price is effective. Conversely, cigars removed after a price change decision which can reasonably be expected to be sold to retailers under the new wholesale price must be tax determined on the basis of the new wholesale price, even if the removal takes place before the new wholesale price is announced or becomes effective. A price change decision is held to be made at the earliest time during the price change considerations when it might reasonably be concluded that the decision to change the price had in fact been reached.

(i) *Determination of wholesale price by Assistant Director (Regulatory Enforcement).* The Assistant Director (Regulatory Enforcement) will determine the wholesale price for tax purposes where the manufacturer has no suggested delivered price to retailers as contemplated by the definition of "wholesale price" in § 270.11 and as discussed in paragraph (a) of this section. Listings of such wholesale prices and their comparable retail prices will be published as necessary in the official Bulletin of the Bureau of Alcohol, Tobacco and Firearms for use by manufacturers in properly determining the tax on removals of large cigars for which there is no suggested delivered price to retailers. If a manufacturer has cigars which are not covered by the existing published listing, and for which he has no suggested delivered price to retailers, the manufacturer shall submit a written request to the Assistant Director (Regulatory Enforcement) for a determination of the wholesale price applicable to such cigars for tax purposes. If any of these cigars are removed before such determination, the manufacturer shall ascertain the wholesale price to the best of his ability based on the prices which are included in the published listing and other pertinent information available to him, and shall use that price for calculation and payment of the tax and for other tax purposes under this part, pending the determination by the Assistant Director (Regulatory Enforcement). If the wholesale price used by the manufacturer for tax payment differs from that subsequently determined by the Assistant Director (Regulatory Enforcement) to be the wholesale price for tax purposes, then the manufacturer shall make an adjustment in his tax return to correct the amount of tax paid. Any tax adjustment shall be made on the return covering the date on which notification of the wholesale price determination was received from the Assistant Director (Regulatory Enforcement).

4. Section 270.162 is amended to show that the tax on large cigars is now based on the wholesale price rather than the tax class, with a maximum tax of $20 per thousand on cigars with a wholesale price of more than $235.294 per thousand. A change in terminology is also made which reflects the establishment of the Bureau of Alcohol, Tobacco and Firearms. The amended portions of § 170.162 read as follows:

§ 270.162 Semimonthly tax return.

(a) *Requirement for filing.* Every manufacturer of tobacco products shall file, for each of his factories, a semimonthly tax return on Form 3071, in triplicate, with the district director of the internal revenue district in which the factory is located, for each return period, including any period during which a manufacturer begins or discontinues business. He shall file the return at the time specified in § 270.165 regard-

less of whether cigars or cigarettes are removed or whether tax is due for that particular return period. However, where the manufacturer requests by letter, in duplicate, and the regional regulatory administrator grants specific authorization, the manufacturer need not during the term of such authorization file a tax return for any period for which tax is not due or payable. The manufacturer shall retain the receipted copy of each tax return transmitted to him by the district director.

(b) *Information to be included.* The manufacturer shall show on the return (1) His employer identification number, (2) The numbers of small cigarettes, large cigarettes, and small cigars removed subject to tax during the return period, (3) The number and the total wholesale price of all large cigars with a wholesale price of not more than $235.294 per thousand which were removed subject to tax during the return period, (4) The number of large cigars with a wholesale price of more than $235.294 per thousand which were removed subject to tax during the return period, and (5) The tax due. The manufacturer shall serially number each return on Form 3071, commencing with the number "1" on the first return filed in any calendar year, and shall make a written declaration that the return is made under penalties of perjury.

* * * * *

(Sec. 202, Pub. L. 85–859, 72 Stat. 1417 (26 U.S.C. 5703); sec. 2128(c), Pub. L. 94–455, 90 Stat. 1921 (26 U.S.C. 5741).)

5. Section 270.183 is amended to require that large cigars be recorded by wholesale price rather than by the former tax classes, and to provide a breakdown of products removed for "export purposes" to show the respective quantities removed for export directly from the factory and transferred to export warehouses. During the suspension of package marking requirements, only the total number of large cigars on which the tax has been determined need be shown. As amended, § 270.183 reads as follows:

§ 270.183 Record of cigars and cigarettes.

The record of a manufacturer of tobacco products shall show the date and total quantity of all cigars and cigarettes, by kind (small cigars—large cigars; small cigarettes—large cigarettes);

(a) Manufactured;
(b) Received in bond by—
(1) Transfer from other factories,
(2) Release from customs custody, and
(3) Transfer from export warehouses;
(c) Received by return to bond;
(d) Disclosed as an overage by inventory;
(e) Removed subject to tax (by wholesale price for large cigars);
(f) Removed, in bond, for—
(1) Export,
(2) Transfer to export warehouses,
(3) Transfer to other factories,
(4) Use of the United States,
(5) Experimental purposes off factory premises;
(g) Otherwise disposed of, without determination of tax, by—
(1) Consumption by employees on factory premises,
(2) Consumption by employees off factory premises, together with the number of employees to whom furnished,
(3) Use for experimental purposes on factory premises,
(4) Loss,
(5) Destruction, and
(6) Reduction to tobacco;
(h) Disclosed as a shortage by inventory; and
(i) On which the tax has been determined (by wholesale price for large cigars, except that those over $235.294 per thousand may optionally be shown as if the wholesale price were $236 per thousand) and which are—
(1) Received, and
(2) Disposed of.

However, due to the suspension of requirements for wholesale price to be shown on packages of large cigars (see § 270.214(d)), the record under paragraph (i) of this section relating to large cigars on which the tax has been determined need only show the total number of these cigars, until notification in the FEDERAL REGISTER.

(Sec. 2128(c), Pub. L. 94–455, 90 Stat. 1921 (26 U.S.C. 5741).)

6. Section 270.184 is amended to require the records supporting removals of large cigars subject to tax to show the wholesale price, rather than the tax class under the former system of taxation. As amended, § 270.184 reads as follows:

§ 270.184 Record in support of removals subject to tax.

Every manufacturer of tobacco products shall keep a supporting record of cigars and cigarettes removed from his factory subject to tax and shall make entries in the record at the time of removal. The supporting record shall show, with respect to each removal, the date of removal, the name and address of the person to whom shipped or delivered, and the kind and quantity of cigars or cigarettes removed. In the case of large cigars the wholesale price shall also be shown, except that if the price is more than $235.294 per thousand, an indication in the supporting record to that effect will suffice. Where the cigars or cigarettes are delivered within the factory directly to the consumer, the name and address of the person to whom delivered need not be shown. Where the manufacturer keeps, at the factory, copies of invoices or other commercial records containing the information required as to each removal, in such manner that the information may be readily ascertained therefrom, such copies will be considered the supporting record required by this section. Such invoices or other commercial records which do not show specifically the tax classification of cigars or cigarettes (including wholesale price of large cigars) will be acceptable if they contain adequate information to readily enable an ATF officer to ascertain the applicable tax.

(Sec. 2128(c), Pub. L. 94–455, 90 Stat. 1921 (26 U.S.C. 5741).)

7. A new § 270.187 is added to require that manufacturers keep records of the wholesale prices of large cigars. The new § 270.187 reads as follows:

§ 270.187 Record of large cigar wholesale prices.

Every manufacturer of tobacco products who removes large cigars from his factory shall keep the records required by this section.

(a) *Basic record of wholesale prices.* The manufacturer shall keep a record to show each wholesale price (suggested delivered price to retailers or wholesale price as determined by the Assistant Director (Regulatory Enforcement) under § 270.22(h)), which is applicable to large cigars removed. No later than the tenth business day in January of each year the manufacturer shall prepare such a record to show the wholesale price in effect on the first day of that year for each brand and size of his large cigars. However, for the year 1977 the record shall be prepared no later than the tenth business day in February, to show the prices in effect as of February 1, 1977. The manufacturer shall thereafter enter in the record the wholesale price and its effective date for any large cigar removed which was not previously entered in the record, and any change in a price from that shown in the record, within ten business days after such removal or change in price. The record shall be a continuing one for each brand and size of cigar (and type of packaging, if pertinent), so that the taxable price on any date may be readily ascertained.

(b) *Copies of price announcements.* The manufacturer shall retain a copy of each general announcement which he issues within his organization or to the trade about establishment or change of large cigar wholesale prices. If the copy does not show the actual date when issued it shall be annotated to show that information, and it shall also be annotated to show the date on which a copy was submitted to the Assistant Director (Regulatory Enforcement) in accordance with § 270.202(b).

8. The existing material in § 270.202 is designated as paragraph (a), and a new paragraph (b) is added to require reports concerning wholesale prices of large cigars. As revised, § 270.202 reads as follows:

§ 270.202 Reports.

(a) *Monthly report.* * * *

(b) *Report of wholesale prices for large cigars.* Every manufacturer of tobacco products who removes large cigars from his factory, and who issues announcements such as those described in this paragraph, shall make a report of each establishment or change of wholesale price (suggested delivered price to retailers) for large cigars. The report shall consist of a copy of each general announcement that the manufacturer issues within his organization or to the trade about establishment or changes of wholesale prices. Only one copy of an announcement need be submitted even if it relates to cigars removed subject to

tax from more than one factory. If this copy does not show the actual date when the announcement was issued, or identify the factory or factories from which removals of the cigars covered by the announcement are made, then the copy shall be annotated to show this information. The factory or factories shall be identified either by permit number(s) or by name, city and state. If an intra-organizational announcement involves a forthcoming price change or new product which at the time of issuance is to remain confidential until a later date, the manufacturer may include a statement to this effect on the copy submitted. The copy shall be submitted to the Assistant Director (Regulatory Enforcement), Attn: Industry Control Division, Bureau of Alcohol, Tobacco and Firearms, Washington, D.C. 20226, within five business days after the day issued.

(Sec. 202, Pub. L. 85-859, 72 Stat. 1422 (26 U.S.C. 5722).)

9. A new § 270.203 is added to provide statistical classes of large cigars, based on wholesale prices, which will replace the former tax classes based on retail prices. New § 270.203 reads as follows:

§ 270.203 Statistical classification of large cigars.

Large cigars are divided into eight classes for statistical purposes, according to the wholesale price. The eight classes are as follows:

(a) *Class A.* large cigars with a wholesale price of not more than $33.00 per thousand.

(b) *Class B.* large cigars with a wholesale price of more than $33.00 per thousand but not more than $51.00 per thousand.

(c) *Class C.* large cigars with a wholesale price of more than $51.00 per thousand but not more than $66.00 per thousand.

(d) *Class D.* large cigars with a wholesale price of more than $66.00 per thousand but not more than $105.00 per thousand.

(e) *Class E.* large cigars with a wholesale price of more than $105.00 per thousand but not more than $120.00 per thousand.

(f) *Class F.* large cigars with a wholesale price of more than $120.00 per thousand but not more than $154.00 per thousand.

(g) *Class G.* Large cigars with a wholesale price of more than $154.00 per thousand but not more than $235.294 per thousand, and

(h) *Class H.* Large cigars with a wholesale price of more than $235.294 per thousand.

10. Section 270.214 is revised to include requirements that packages of large cigars show information relating to wholesale price. However, application of these new requirements for large cigars is suspended pending further notification in the FEDERAL REGISTER. Other requirements of this section, not related to wholesale price markings, are effective as of the effective date of this document. As amended, § 270.214 reads as follows:

§ 270.214 Notice for cigars.

(a) *General requirement.* Every package of cigars shall, before removal subject to tax, have adequately imprinted thereon, or on a label securely affixed thereto, the designation "cigars", the quantity of such product contained therein, and the classification of the product for tax purposes, i.e., for small cigars, either "small" or "little", and for large cigars, the wholesale price.

(b) *Expression of wholesale price.* The price to be shown is the wholesale price for each thousand cigars, except that for cigars with a wholesale price of more than $235.294 per thousand the wholesale price may be either specifically expressed or expressed as if it were $236 per thousand. Such price shall be expressed either in arabic numerals or according to the code: A=1, B=2, C=3, D=4, E=5, F=6, G=7, H=8, J=9, K=0; and in either case shall be preceded by the identifying letters "MP". If the wholesale price is in even dollars then no decimal or cents information need be shown. Thus, for a cigar with a wholesale price of $80.00 per thousand the wholesale price would be expressed as "MP80" or as "MPHK"; for a cigar with a wholesale price of $65.20 per thousand, the wholesale price would be expressed as "MP65.20" or as "MPFE.BK"; and for a cigar with a wholesale price for $450 per thousand, the wholesale price would be expressed as either "MP450," "MPDEK", "MP236", or "MPBCF".

(c) *Packages with cigars of more than one price.* If a combination package includes large cigars of more than one wholesale price and they are taxable on the basis of the individual wholesale prices of the cigars and not on the basis of an established wholesale price for the combination package (see § 270.22(d)), the numbers of cigars at each wholesale price and a brief description of those cigars shall be shown with the applicable wholesale price information. For example, if a package contained 30 Blunts with a wholesale price of $80 per thousand and 20 Panatelas with a wholesale price of $100 per thousand, the wholesale price would be shown as "30 Blunts—MP80, 20 Panatelas—MP100", or "30 Blunts—MPHK, 20 Panatelas—MPAKK".

(d) *Application of wholesale price regulations.* The application of regulations in this section relating to the imprinting, on packages of large cigars, of information relating to wholesale price is suspended until notification in the FEDERAL REGISTER. This notification shall be published in the FEDERAL REGISTER not less than 90 days prior to the date when the wholesale price marking regulations shall begin to apply.

(Sec. 202, Pub. L. 85-895, 72 Stat. 1422 (26 U.S.C. 5723).)

10a. Section 270.311 is amended to indicate that during the suspension of package marking requirements (see § 270.214(d)), the schedule of products on Form 3069, as well as claims filed on the basis of this schedule, must show large cigars at the lowest wholesale price for that brand and size of cigar established during the record retention period, unless a higher amount can be clearly demonstrated by specific documentation. The existing material is designated as paragraph (a), and the new material is contained in a new paragraph (b). As amended, § 270.311(b) reads as follows:

§ 270.311 Action by claimant.

(a) • • •

(b) After February 1, 1977, information on large cigar packages will not adequately evidence the amount of tax paid on the contents, because of the suspension of package notice requirements as provided in § 270.214(d), and because packages indicating the former tax classes may continue to be removed without alteration. Consequently, refund or credit of tax on large cigars withdrawn from the market after February 1, 1977, will be limited to the minimum amount applicable to that brand and size of cigar during the required record retention period (see § 270.185) except where the manufacturer establishes that a greater amount was actually paid. For each claim involving large cigars withdrawn from the market the manufacturer shall include a certification on either ATF Form 3069, ATF Form 2635, or IRS Form 843, to read as follows: "The amounts claimed relating to large cigars are based on the lowest wholesale prices applicable to such cigars during the required record retention period, except where specific documentation is submitted with the claim to establish that any greater amount of tax claimed was actually paid."

(Sec. 202, Pub. L. 85-859, 72 Stat. 1419, as amended (26 U.S.C. 5705).)

PART 275—IMPORTATION OF CIGARS, CIGARETTES, AND CIGARETTE PAPERS AND TUBES

PAR. B. The regulations in 27 CFR Part 275 are amended as follows:

1. Section 275.11 is amended (1) to reflect the change in taxation of large cigars, (2) to improve clarity, and (3) to reflect changes in Customs Service organization and the establishment of the Bureau of Alcohol, Tobacco and Firearms. Definitions of "wholesale price", "Assistant Director (Regulatory Enforcement)", "ATF officer", "Chief, Puerto Rico Operations", "regional regulatory administrator", and "TSUSA" are added; the introductory language is re-worded; and the definitions of "assistant regional commissioner", "collector of customs", "computation or computed", "determination or determined", "internal revenue officer", and "regional director" are modified. As amended, § 275.11 reads as follows:

§ 275.11 Meaning of terms.

When used in this part and in forms prescribed under this part, the following terms shall have the meanings given in this section, unless the context clearly indicates otherwise. Words in the plural form shall include the singular, and vice versa, and words indicating the masculine gender shall include the feminine. The terms "includes" and "including" do not exclude things not listed which are in the same general class.

Assistant Director (Regulatory Enforcement). The Assistant Director for regulatory enforcement activities in the Bureau of Alcohol, Tobacco and Firearms, who is responsible to, and functions under the direction and supervision of, the Director.

Assistant regional commissioner. A regional regulatory administrator as defined in this section.

ATF officer. An officer of the Bureau of Alcohol, Tobacco and Firearms (ATF) authorized to perform any function relating to the administration or enforcement of this part.

• • • • •

Chief, Puerto Rico Operations. The primary representative in Puerto Rico of the Bureau of Alcohol, Tobacco and Firearms.

• • • • •

Collector of customs. A district director of customs as defined in this section.

Computation or computed. When used with respect to the tax on cigars and cigarettes of Puerto Rican manufacture, computation or computed shall mean that the bonded manufacturer has ascertained the quantity and kind (small cigars, large cigars, small cigarettes, large cigarettes) of cigars and cigarettes and wholesale price of large cigars being shipped to the United States; that the payment, in Puerto Rico, of the tax on such products is to be deferred under Subpart G of this part; that the tax imposed on such products by 26 U.S.C. 7652(a) has been calculated, that the bonded manufacturer has executed an agreement to pay the internal revenue tax which will become due with respect to such products, as provided in this part; and that an ATF officer has verified and executed a certification of such calculation.

Determined or determination. When used with respect to the internal revenue tax on cigars, cigarettes, and cigarette papers and tubes, determined or determination shall mean that the quantity and kind (small cigars, large cigars, small cigarettes, large cigarettes) of cigars and cigarettes and wholesale price of large cigars, or the number of books or sets of cigarette papers of each different numerical content, or the number of cigarette tubes, to be removed subject to internal revenue tax, has been established as prescribed by this part so that the internal revenue tax payable with respect thereto may be calculated.

• • • • •

Internal revenue officer. An ATF officer as defined in this section.

• • • • •

Region. A geographical region of the Bureau of Alcohol, Tobacco and Firearms.

Regional director. A regional regulatory administrator as defined in this section.

Regional regulatory administrator. The principal regional official responsible for administering regulations in this part.

• • • • •

TSUSA. The Tariff Schedules of the United States Annotated, as published by the United States International Trade Commission.

• • • • •

Wholesale price. The manufacturer's or importer's suggested delivered price at which the cigars are to be sold to retailers, inclusive of the tax imposed by 26 U.S.C. chapter 52 or section 7652, but exclusive of any State or local taxes imposed on cigars as a commodity, and before any trade, cash, or other discounts, or any promotion, advertising, display, or similar allowances. Where the manufacturer's or importer's suggested delivered price to retailers is not adequately supported by bona fide arm's length sales, or where the manufacturer or importer has no suggested delivered price to retailers, the wholesale price shall be the price for which cigars of comparable retail price are sold to retailers in the ordinary course of trade as determined by the Assistant Director (Regulatory Enforcement) under § 275.39(i).

2. Section 275.31 is amended to reflect the new tax rate on large cigars, which is 8½ percent of the wholesale price. The old system of tax classes has been changed by statute. As amended, § 275.31 reads as follows:

§ 275.31 Cigars.

(a) *Present rates.* On cigars imported or brought into the United States, the following internal revenue taxes are imposed by law:

(1) *Small cigars.* 75 cents per thousand.

(2) *Large cigars.* 8½ percent of the wholesale price, but not more than $20 per thousand.

Cigars not exempt from tax under this part which are removed but not intended for sale are taxed at the same rate as similar cigars removed for sale.

(b) *Previous rates for large cigars.* Prior to February 1, 1977, the following tax rates were in effect for large cigars:

(1) If removed to retail at not more than 2½ cents each, $2.50 per thousand;

(2) If removed to retail at more than 2½ cents each and not more than 4 cents each, $3 per thousand;

(3) If removed to retail at more than 4 cents each and not more than 6 cents each, $4 per thousand;

(4) If removed to retail at more than 6 cents each and not more than 8 cents each, $7 per thousand;

(5) If removed to retail at more than 8 cents each and not more than 15 cents each, $10 per thousand;

(6) If removed to retail at more than 15 cents each and not more than 20 cents each, $15 per thousand; and

(7) If removed to retail at more than 20 cents each, $20 per thousand.

(68A Stat. 907, as amended (26 U.S.C. 7652); sec. 202, Pub. L. 85-859, 72 Stat. 1414, as amended by sec. 2128, Pub. L. 94-455, 90 Stat. 1921 (26 U.S.C. 5701).)

3. Section 275.37 is revised to provide statistical classes of large cigars, based on wholesale prices, which will replace the former tax classes based on retail prices. Also, the center heading above § 275.37 is modified to reflect the change from tax classes to statistical classes. As amended, the center heading and § 275.37 read as follows:

CLASSIFICATION OF LARGE CIGARS AND CIGARETTES

§ 275.37 Statistical classification of large cigars.

Large cigars are divided into eight classes for statistical purposes, according to the wholesale price. The eight classes are as follows:

(a) *Class A.* Large cigars with a wholesale price of not more than $33.00 per thousand,

(b) *Class B.* Large cigars with a wholesale price of more than $33.00 per thousand but not more than $51.00 per thousand,

(c) *Class C.* Large cigars with a wholesale price of more than $51.00 per thousand but not more than $66.00 per thousand,

(d) *Class D.* Large cigars with a wholesale price of more than $66.00 per thousand but not more than $105.00 per thousand,

(e) *Class E.* Large cigars with a wholesale price of more than $105.00 per thousand but not more than $120.00 per thousand,

(f) *Class F.* Large cigars with a wholesale price of more than $120.00 per thousand but not more than $154.00 per thousand,

(g) *Class G.* Large cigars with a wholesale price of more than $154.00 per thousand but not more than $235.294 per thousand, and

(h) *Class H.* Large cigars with a wholesale price of more than $235.294 per thousand.

4. A new § 275.39 is added to set out rules for properly determining the wholesale price of large cigars. New § 275.39 reads as follows:

§ 275.39 Determination of wholesale price of large cigars.

(a) *General rule.* All cigars of the same brand, size, and packaging are taxed at the same rate except where otherwise specifically provided. When the importer establishes a suggested delivered price to retailers (wholesale price), he shall do so according to the principles in the definition of "wholesale price" in § 275.11 and in this section. "Suggested delivered price" is the price at which the importer intends for the cigars to be sold to retailers and based on which the importer's price to distributors and wholesalers is established through the usual trade discount. The price at which a cigar is in fact usually sold to retailers in transactions at arm's length from the importer is the best evidence of whether the importer's suggested delivered price is properly set. While it is not expected that an

importer will exercise any control over the prices actually paid by retailers in transactions with independent distributors, it is the importer's responsibility to exercise reasonable care to assure that his suggested price to retailers (wholesale price) used as the basis for tax determination is consistent with prices actually paid by retailers. (Where there is no suggested delivered price adequately supported by actual sales to retailers, see paragraph (i) of this section.)

(b) *Pricing for different packaging.* If different wholesale prices are applicable to different types of packaging (e.g., boxes of 25 and boxes of 50), then the cigars in each type of packaging are taxed on the basis of their respective wholesale prices.

(c) *Pricing of seconds.* If some of an otherwise identical cigar brand and size (1) Are distinctive from other such cigars because of physical imperfections, (2) Are offered to the consumer through clear labeling as "imperfects", "seconds", "throw-outs", or a comparable commonly understood term, and (3) The importer has a separate wholesale price for such cigars; then they are taxed on the basis of this separate wholesale price.

(d) *Combination packages.* If an importer has a wholesale price for a combination package containing cigars of different sizes, the cigars are taxed based on that combination wholesale price. If there is no wholesale price for the combination, then the cigars are taxed based on their individual wholesale prices.

(e) *Promotional pricing.* Special promotional pricing arrangements, whether applicable to all or only a part of removals, do not alter the taxable wholesale price of large cigars. For the purposes of applying this rule, any temporary reduction in price is presumed to be for promotional purposes.

(f) *Removals for another person.* If an importer makes taxable removals of cigars for exclusive distribution by others who establish the suggested delivered price to retailers (wholesale price), then the tax is based on such wholesale price irrespective of the fact that it is not directly established by the importer making the taxable removals.

(g) *Removals for sales to retailers only.* If an importer makes taxable removals of cigars exclusively for arm's length sales to retailers only, the tax is based on the importer's selling price applying the principles of inclusion and exclusion contained in the definition of "wholesale price" in § 275.11.

(h) *Change in wholesale price.* When an importer decides to change the wholesale price of a brand and size of large cigars, there may be some of these cigars which were removed before the price change decision and were tax determined on the basis of the old wholesale price, which in fact are later sold to retailers under the new wholesale price. In this situation, the cigars will be considered to have been properly tax determined, unless at the time of removal the importer had reason to believe that the cigars would be sold under the new wholesale price, considering all information which was or should have been available to him. After the price change decision, cigars may properly be removed and tax determined on the basis of the old wholesale price if the importer has reason to know, at the time of removal, that they will be sold to retailers before the new wholesale price is effective. Conversely, cigars removed after a price change decision must be tax determined on the basis of the new wholesale price, even if the removal takes place before the new wholesale price is announced or becomes effective. A price change decision is held to be made at the earliest time during the price change considerations when it might reasonably be concluded that the decision to change the price had in fact been reached.

(i) *Determination of wholesale price by Assistant Director (Regulatory Enforcement).* The Assistant Director (Regulatory Enforcement) will determine the wholesale price for tax purposes where the importer has no suggested delivered price to retailers as contemplated by the definition of "wholesale price" in § 275.11 and as discussed in paragraph (a) of this section. Listings of such wholesale prices and their comparable retail prices will be published as necessary in the official Bulletin of the Bureau of Alcohol, Tobacco and Firearms for use by importers in properly determining the tax on removals of large cigars for which there is no suggested delivered price to retailers. If an importer has cigars which are not covered by the existing published listing, and for which he has no suggested delivered price to retailers, the importer shall submit a written request to the Assistant Director (Regulatory Enforcement) for a determination of the wholesale price applicable to such cigars for tax purposes. If any of these cigars are removed before such determination, the importer shall ascertain the wholesale price to the best of his ability based on the prices which are included in the published listing and other pertinent information available to him, and shall use that price for calculation and payment of the tax and for other tax purposes under this part pending the determination by the Assistant Director (Regulatory Enforcement). On each entry document on which the importer so estimates the tax, he shall include a conspicuous statement on all copies as follows: "Request this entry not be liquidated until ATF has ruled on the taxable wholesale price of these cigars." If the wholesale price used by the importer for taxpayment differs from that subsequently determined by the Assistant Director (Regulatory Enforcement) to be the wholesale price for tax purposes, then the importer shall pay any additional amount due or make claim for overpayment by advising the district director of customs of the additional amount due or overpaid, in accordance with customs procedure. If the wholesale price used by the importer is the same as that determined by the Assistant Director (Regulatory Enforcement), the importer shall so notify the district director of customs and request that liquidation of the entry proceed. The importer shall take the appropriate action within fifteen calendar days following the date on which notification of the wholesale price determination was received from the Assistant Director (Regulatory Enforcement).

5. Section 275.73 is received to include requirements that packages of large cigars show information relating to wholesale price. However, application of these new requirements for large cigars is suspended pending further notification in the FEDERAL REGISTER. Other requirements of this section, not related to wholesale price markings, are effective as of the effective date of this document. As amended, § 275.73 reads as follows:

§ 275.73 Notice for cigars.

(a) *General requirement.* Every package of cigars, except as provided in § 275.75, shall, before removal subject to internal revenue tax, have adequately imprinted thereon, or on a label securely affixed thereto, the designation "cigars", the quantity of such product contained therein, and the classification of the product for tax purposes, i.e., for small cigars, either "small" or "little", and for large cigars, the wholesale price.

(b) *Expression of wholesale price.* The price to be shown is the wholesale price for each thousand cigars, except that for cigars with a wholesale price of more than $235.294 per thousand the wholesale price may be either specifically expressed or expressed as if it were $236 per thousand. Such price shall be expressed either in arabic numerals or according to the code: A=1, B=2, C=3, D=4, E=5, F=6, G=7, H=8, J=9, K=0; and in either case shall be preceded by the identifying letters "IP". If the wholesale price is in even dollars then no decimal or cents information need be shown. Thus, for a cigar with a wholesale price of $80.00 per thousand the wholesale price would be expressed as "IP80" or as "IPHK"; for a cigar with a wholesale price of $65.20 per thousand, the wholesale price would be expressed as "IP65.20" or as "IPFE.BK"; and for a cigar with a wholesale price of $450 per thousand, the wholesale price would be expressed as either "IP450", "IPDEK", "IP236", or "IPBCF".

(c) *Packages with cigars of more than one price.* If a combination package includes large cigars of more than one wholesale price and they are taxable on the basis of the individual wholesale prices of the cigars and not on the basis of an established wholesale price for the combination package (see § 275.39(d)), the number of cigars at each wholesale price and a brief description of those cigars shall be shown with the applicable wholesale price information. For example, if a package contained 30 Blunts with a wholesale price of $80 per thousand and 20 Panatelas with a wholesale price of $100 per thousand, the wholesale price would be shown as "30 Blunts—IP80, 20 Panatelas—IP100", or "30 Blunts—IPHK, 20 Panatelas—IPAKK".

(d) *Application of wholesale price regulations.* The application of regulations in this section relating to the imprinting, on packages of large cigars, of information relating to wholesale price is suspended until notification in the FEDERAL REGISTER. This notification shall be published in the FEDERAL REGISTER not less than 90 days prior to the date when the wholesale price marking regulations shall begin to apply.

(Sec. 202, Pub. L. 85-859, 72 Stat. 1422 (26 U.S.C. 5723).)

6. Section 275.81(c)(4) is amended to require importers to show, on the customs entry form, information about the wholesale price of large cigars which is necessary for computation of the internal revenue tax. As amended, § 275.81(c)(4) reads as follows:

§ 275.81 Taxpayment.

* * * * * * *

(c) *Required information.* * * *

* * * * * * *

(4) *For cigars.* The importer will show:

(i) The number imported under each TSUSA item number;

(ii) For large cigars with a wholesale price of not more than $235.294 per thousand, the number and total wholesale price of such cigars;

(iii) For large cigars with a wholesale price of more than $235.294 per thousand, the number of such cigars;

(iv) The applicable tax rate ($0.75 per thousand for small cigars, 8½ percent of the wholesale price for large cigars with a wholesale price of not more than $235.294 per thousand, and $20.00 per thousand for large cigars with a wholesale price of more than $235.294 per thousand); and

(v) The tax due.

* * * * * * *

(68A Stat. 907, as amended (26 U.S.C. 7652); Sec. 202, Pub. L. 85-859, 72 Stat. 1417 (26 U.S.C. 5703).)

7. Section 275.105 is amended to replace "class of large cigars" with the information about wholesale price required by the new system of taxation, and to make nomenclature changes to reflect the establishment of the Bureau of Alcohol, Tobacco and Firearms. As amended, § 275.105 reads as follows:

§ 275.105 Prepayment of tax.

To prepay, in Puerto Rico, the internal revenue tax imposed by 26 U.S.C. 7652(a), on cigars, cigarettes, and cigarette papers and tubes of Puerto Rican manufacture which are to be shipped to the United States, the shipper shall file, or cause to be filed, with the Officer-in-Charge, a tax return, Form 3073, in triplicate, with full remittance of tax which will become due on such cigars, cigarettes, and cigarette papers and tubes. The Officer-in-Charge will present a receipted copy of the return to the person filing the return and paying the tax, retain one copy, and forward the remaining copy to the Regional Regulatory Administrator, Bureau of Alcohol, Tobacco and Firearms, New York, N.Y. The person who filed the return and prepaid the tax shall present the receipted copy of the return to the ATF officer assigned by the Chief, Puerto Rico Operations, to inspect the cigars, cigarettes, and cigarette papers and tubes to be shipped to the United States. Such officer will endorse the receipted copy of the return to show release of the cigars, cigarettes, and cigarette papers and tubes, or, if less than the quantity of cigars, cigarettes, and cigarette papers and tubes covered by the return is released, to show (a) The numbers of small cigarettes, large cigarettes, and small cigars, (b) The number and total wholesale price of large cigars with a wholesale price of not more than $235.294 per thousand, (c) The number of large cigars with a wholesale price of more than $235.294 per thousand, (d) The number of books or sets of cigarette papers of each different numerical content, and (e) The number of cigarette tubes, in fact released and will return such copy to the taxpayer.

(68A Stat. 907, as amended (26 U.S.C. 7652); sec. 202, Pub. L. 85-859, 72 Stat. 1417 (26 U.S.C. 5703).)

8. Section 275.106 is amended to replace the detailed instructions for completion, by the ATF officer, of Form 3074 (including an instruction for "class of large cigars") with a simplified instruction for completion of "other information required by that form." Preparation of Form 3075 will be required of the shipper, rather than the ATF officer, although the ATF officer must still certify that the tax has been prepaid. Nomenclature changes are also made to reflect the establishment of the Bureau of Alcohol, Tobacco and Firearms. As amended, § 275.106 reads as follows:

§ 275.106 Inspection of shipment and certification of prepayment by ATF officer.

The ATF officer, assigned to inspect Puerto Rican cigars, cigarettes, and cigarette papers and tubes to be shipped to the United States in accordance with § 275.105, will prepare, for each shipping container, a statement on Form 3074 that the tax has been prepaid, and show the other information required by that form. The shipper shall affix the completed Form 3074 to the outside of each shipping container in which the articles are packed. Such statement, Form 3074, shall be affixed to the outer container used in the shipment of freight in bulk (crate, packingbox, van, trailer, etc.) and not on the individual cartons, cases, etc., included in such outer container. In addition, the shipper will prepare Form 3075, in quintuplicate, identifying the cigars, cigarettes, and cigarette papers and tubes released in each shipment, for certification by the ATF officer that the tax has been prepaid thereon. The ATF officer will then (a) Present one copy to the taxpayer for attachment to the bill of lading to accompany the shipment (in custody of the carrier) for presentation to the district director of customs at the port of entry; (b) Promptly mail two copies to the district director of customs at the port of entry; (c) Mail one copy to the regional regulatory administrator of the region wherein the customs collection headquarters is located; and (d) Retain the remaining copy. Noncommercial mail shipments of cigars, cigarettes, and cigarette papers and tubes to the United States are exempt from the provisions of this section, except that the ATF officer in Puerto Rico receiving a payment of internal revenue tax on mail shipments of such articles will prepare a certificate to be affixed to the container stating that the United States internal revenue tax has been prepaid on the articles contained therein.

9. Section 275.107 is amended to replace "class of large cigars" with the information about wholesale price required by the new system of taxation, and to make nomenclature changes reflecting changes in Customs Service organization and the establishment of the Bureau of Alcohol, Tobacco and Firearms. As amended, § 275.107 reads as follows:

§ 275.107 Procedure at port of entry.

The district director of customs at the port of entry will inspect the shipment to determine whether the quantity specified on the Form 3075 is contained in the shipment. He will then execute his certificate on the three copies of the Form 3075 in his possession, and indicate on each copy any exceptions found at the time of release. The statement of exceptions shall identify each shipping container which sustained a loss; the cigars, cigarettes, and cigarette papers and tubes reported shipped in such container; and the cigars, cigarettes, and cigarette papers and tubes lost from such container. Losses occurring as the result of missing packages, cases, or shipping containers shall be listed separately from losses caused by damage. Where the statement is made on the basis of cigars, cigarettes, or cigarette papers or tubes missing or damaged, the district director of customs shall show (a) The numbers of small cigarettes, large cigarettes, and small cigars, (b) The number and total wholesale price of large cigars with a wholesale price of not more than $235.294 per thousand, (c) The number of large cigars with a wholesale price of more than $235.294 per thousand, (d) The number of books or sets of cigarette papers of each different numerical content, and (e) The number of cigarette tubes. If the district director of customs finds that the full amount of the tax has not been prepaid, he will require the difference due to be paid to him prior to release of the cigars, cigarettes, and cigarette papers and tubes. When the inspection of the shipment has been effected, and any additional tax found to be due has been paid to the district director of customs, the shipment may be released.

10. Section 275.110 is amended to replace "class of large cigars" with the information about wholesale price required by the new system of taxation, and to

make nomenclature changes reflecting the establishment of the Bureau of Alcohol, Tobacco and Firearms. As amended, § 275.110 reads as follows:

§ 275.110 Computation of tax and execution of agreement to pay tax.

Where cigars or cigarettes are to be shipped to the United States on computation of internal revenue tax in Puerto Rico (involving deferred taxpayment), the bonded manufacturer shall calculate the tax and shall prepare an original and six copies of Form 2987. He shall enter on such form under the penalties of perjury (a) The numbers of small cigarettes, large cigarettes, and small cigars to be shipped, (b) The number and total wholesale price of large cigars with a wholesale price of not more than $235.294 per thousand to be shipped, (c) The number of large cigars with a wholesale price of more than $235.294 per thousand to be shipped, (d) The amount of the tax to be paid on such products under the provisions of this subpart, and (e) The name and address of the consignee in the United States to whom such products are being shipped; and shall date and execute the agreement to pay the amount of tax which shall be computed on such products covered by the Form 2987. The Form 2987 shall be serially numbered by the bonded manufacturer beginning with the number "1" on January 1 of each year. The bonded manufacturer shall then request the Chief, Puerto Rico Operations, to assign an ATF officer to inspect the cigars and cigarettes, verify the tax calculation with respect to such products, and release such products for shipment in accordance with § 275.111. The bonded manufacturer shall present all copies of the prepared Form 2987 to the ATF officer assigned. The date of certification of Form 2987 by the ATF officer shall be treated as the date of computation of tax. Cigars and cigarettes may be released for shipment to the United States in accordance with the provisions of this section only after computation of tax.

11. Section 275.111 is amended to rephrase the instructions for completion, by the ATF officer, of Form 2989. The phrase, "quantity and kind of cigars and cigarettes and class of large cigars" is replaced with the simpler phrase, "other information required by that form." Nomenclature changes are also made to reflect changes in Customs Service organization and the establishment of the Bureau of Alcohol, Tobacco and Firearms. As amended, § 275.111 reads as follows:

§ 275.111 Inspection of shipment and certification by ATF officer.

On receipt of the original and six copies of the Form 2987 completed and executed by the bonded manufacturer in accordance with § 275.110, an ATF officer will inspect the cigars and cigarettes covered by the form, verify the tax calculation made with respect to such products, date and execute the certification on such form, and release the cigars and cigarettes for shipment to the United States. Such officer will then promptly distribute the certified Form 2987 by (a) Mailing the original to the Officer-in-Charge; (b) Mailing two copies to the district director of customs at the port of entry; (c) Mailing one copy to the regional regulatory administrator of the region wherein the customs collection headquarters is located; (d) Returning two copies to the bonded manufacturer who will attach one copy to the bill of lading to accompany the shipment (in custody of the carrier) for presentation to the district director of customs at the port of entry; and (e) Submitting one copy to the Chief, Puerto Rico Operations. The ATF officer will also prepare, for each shipping container, a statement on Form 2989 that the tax on the cigars and cigarettes to be shipped to the United States has been computed and show the name and address of the bonded manufacturer, date of tax computation, and the other information required by that form. The bonded manufacturer shall affix the completed Form 2989 to the outside of each shipping container in which the products are packed. Such statement, Form 2989, shall be affixed to the outer container used in the shipment of freight in bulk (crate, packing box, van, trailer, etc.) and not on the individual cartons, cases, etc., included in such outer container.

12. Section 275.112 is amended to replace "class of large cigars" with the information about wholesale price required by the new system of taxation, and to make nomenclature changes reflecting the establishment of the Bureau of Alcohol, Tobacco and Firearms. As amended, § 275.112 reads as follows:

§ 275.112 Tax return.

The internal revenue taxes imposed by 26 U.S.C. 7652(a), with respect to cigars and cigarettes manufactured in Puerto Rico and shipped to the United States on computation of tax under the provisions of this subpart shall be paid on the basis of a semimonthly tax return. The bonded manufacturer of such products shall file with the Officer-in-Charge a tax return, Form 2988, in triplicate, for each semimonthly return period. The bonded manufacturer shall show on the return (a) The serial numbers of all Forms 2987 certified during the return period, (b) The numbers of small cigarettes, large cigarettes, and small cigars upon which the tax has been computed during the return period, (c) The number and total wholesale price of large cigars with a wholesale price of not more than $235.294 per thousand upon which the tax has been computed during the return period, (d) The number of large cigars with a wholesale price of more than $235.294 per thousand upon which the tax has been computed during the return period, and (e) The tax due. The bonded manufacturer shall execute the return, Form 2988, under the penalties of perjury. He shall file a return for each return period at the time specified in § 275.113, regardless of whether tax is due for that return period. However, where the Regional Regulatory Administrator, Bureau of Alcohol, Tobacco and Firearms, New York, N.Y., grants specific authorization, the bonded manufacturer need not file a tax return during the term of such authorization for any period in which tax liability was not incurred under the provisions of this subpart.

13. Section 275.117 is amended to replace "class of large cigars" with the information about wholesale price required by the new system of taxation, and to make nomenclature changes reflecting the establishment of the Bureau of Alcohol, Tobacco and Firearms. As amended, § 275.117 reads as follows:

§ 275.117 Procedure at port of entry.

The district director of customs at the port of entry will inspect the shipment to determine whether the quantity specified on the Form 2987 is contained in the shipment. He will then execute his certificate on the three copies of the Form 2987 in his possession, and indicate on each copy any exceptions found at the time of release. The statement of exceptions shall identify each shipping container which sustained a loss, the cigars and cigarettes reported shipped in such container, and the cigars and cigarettes lost from such container. Losses occurring as the result of missing packages, cases, or shipping containers shall be listed separately from losses caused by damage. Where the statement is made on the basis of cigars and cigarettes missing or damaged, the district director of customs shall show (a) The numbers of small cigarettes, large cigarettes, and small cigars, (b) The number and total wholesale price of large cigars with a wholesale price of not more than $235.294 per thousand, and (c) The number of large cigars with a wholesale price of more than $235.294 per thousand. If the district director of customs finds that the full amount of tax due has not been computed, he will require the difference due to be paid to him prior to release of the cigars and cigarettes. When the inspection of the shipment has been effected, and any additional tax found to be due has been paid to the district director of customs, the shipment may be released.

14. Section 275.139 is amended to replace "class" of large cigars with "wholesale price", and to add a qualification that if the wholesale price is more than $235.294 per thousand, it may be shown as if it were $236 per thousand. During the suspension of package marking requirements (see § 275.73(d)), only the total number of large cigars received need be shown. As amended, § 275.139 reads as follows:

§ 275.139 Records.

Every manufacturer of tobacco products and cigarette papers and tubes in the United States who receives cigars, cigarettes, or cigarette papers or tubes of Puerto Rican manufacture, without payment of internal revenue tax, under his bond, shall keep a separate record which will show the date and quantity and kind of cigars and cigarettes, the wholesale price of large cigars (if not more than $235.294 per thousand; if more than this, the wholesale price may be shown as if it were $236 per thousand), the date and number of books or sets of cigarette papers of each different numerical content, and the number of cigarette tubes: (a) Received, (b) Removed subject to tax, (c) Removed for tax-exempt purposes, and (d) Otherwise disposed of. However, due to the suspension of requirements for wholesale price to be shown on packages of large cigars (see § 275.73(d)), the record under (a) of large cigars received need only show the total number of these cigars, until notification is given in the FEDERAL REGISTER.

(Sec. 2128(c), Pub. L. 94-455, 90 Stat. 1921 (26 U.S.C. 5741).)

15. A new § 275.153 is added to require that proprietors of customs class 6 manufacturing warehouses, who remove large cigars for consumption in the United States, keep records and submit reports concerning the wholesale prices for such cigars. As added, § 275.153 reads as follows:

§ 275.153 Records and reports.

A proprietor of a customs bonded manufacturing warehouse, class 6, who removes cigars for sale or consumption in the United States, shall keep records and make reports as prescribed in §§ 275.181-183.

15a. Section 275.170 is amended to indicate that during the suspension of package marking requirements (see § 275.73(d)), the schedule of products on Form 3069, as well as claims filed on the basis of this schedule, must show large cigars at the lowest wholesale price for that brand and size of cigar established during the record retention period, unless a higher amount can be clearly demonstrated by specific documentation. The existing material is designated as paragraph (a), and the new material is contained in a new paragraph (b). As amended, § 275.170 reads as follows:

§ 275.170 Destruction or reduction to tobacco, action by taxpayer.

(a) * * *

(b) After February 1, 1977, information on large cigar packages will not adequately evidence the amount of tax paid on the contents, because of the suspension of package notice requirements as provided in § 275.73(d), and because packages indicating the former tax classes may continue to be removed without alteration. Consequently, refund or credit of tax on large cigars withdrawn from the market after February 1, 1977, will be limited to the minimum amount applicable to that brand and size cigar during the required record retention period (see § 275.22) except where the importer establishes that a greater amount was actually paid. For each claim involving large cigars withdrawn from the market the importer shall include a certification on either ATF Form 3069, ATF Form 2635, or IRS Form 843, to read as follows: "The amounts claimed relating to large cigars are based on the lowest wholesale prices applicable to such cigars during the required record retention period, except where specific documentation is submitted with the claim to establish that any greater amount of tax claimed was actually paid."

(Sec. 202, Pub. L. 85-859, 72 Stat. 1419, as amended (26 U.S.C. 5705).)

15b. Section 275.172 is amended to indicate that during the suspension of package marking requirements (see § 275.73(d)), the schedule of products on Form 3069, as well as claims filed on the basis of this schedule, must show large cigars at the lowest wholesale price for that brand and size of cigar established during the record retention period, unless a higher amount can be clearly demonstrated by specific documentation. The existing material is designated as paragraph (a), and the new material is contained in a new paragraph (b). As amended, § 275.172 reads as follows:

§ 275.172 Return to nontaxpaid status, action by taxpayer.

(a) * * *

(b) After February 1, 1977, information on large cigar packages will not adequately evidence the amount of tax paid on the contents, because of the suspension of package notice requirements as provided in § 275.73(d), and because packages indicating the former tax classes may continue to be removed without alteration. Consequently, refund or credit of tax on large cigars withdrawn from the market after February 1, 1977, will be limited to the minimum amount applicable to that brand and size of cigar during the required record retention period (see § 275.22) except where the importer establishes that a greater amount was actually paid. For each claim involving large cigars withdrawn from the market the importer shall include a certification on either ATF Form 3069, ATF Form 2635, or IRS Form 843, to read as follows: "The amounts claimed relating to large cigars are based on the lowest wholesale prices applicable to such cigars during the required record retention period, except where specific documentation is submitted with the claim to establish that any greater amount of tax claimed was actually paid."

(Sec. 202, Pub. L. 85-859, 72 Stat. 1419, as amended (26 U.S.C. 5705).)

16. A new Subpart J is added immediately following § 275.174, to require that importers of large cigars keep records and submit reports concerning the wholesale prices and taxpayment of large cigars imported for sale within the United States. As added, the new Subpart J reads as follows:

Subpart J—Records and Reports

Sec.

275.181 Records of large cigars.
275.182 Availability of records.
275.183 Report of wholesale prices for large cigars.

Subpart J—Records and Reports

§ 275.181 Records of large cigars.

Every person who imports large cigars for sale within the United States shall keep the records required by this section.

(a) *Basic record of wholesale prices.* The importer shall keep a record to show each wholesale price (suggested delivery price to retailers or wholesale price as determined by the Assistant Director (Regulatory Enforcement) under § 275.39(i)), which is applicable to large cigars removed (entered or withdrawn). No later than the tenth business day in January of each year the importer shall prepare such a record to show the wholesale price in effect on the first day of that year for each brand and size of his large cigars. However, for the year 1977 the record shall be prepared no later than the tenth business day in February, to show the prices in effect as of February 1, 1977. The importer shall thereafter enter in the record the wholesale price and its effective date for any large cigar removed (entered or withdrawn) which was not previously entered in the record, and any change in a price from that shown in the record, within ten business days after such removal or change in price. The record shall be a continuing one for each brand and size of cigar (and type of packaging, if pertinent), so that the taxable price on any date may be readily ascertained.

(b) *Copies of price announcements.* The importer shall retain a copy of each general announcement which he issues within his organization or to the trade about establishment or change of large cigar wholesale prices. If the copy does not show the actual date when issued it shall be annotated to show this information, and it shall also be annotated to show the date on which a copy was submitted to the Assistant Director (Regulatory Enforcement) in accordance with § 275.183.

(c) *Copies of entry and withdrawal forms.* The importer shall keep a copy of each customs entry or withdrawal form on which internal revenue tax for large cigars is declared pursuant to § 275.81.

(d) *Alternative record.* If an importer has so few import transactions and/or brands and sizes of large cigars that retention of an appropriate copy of each entry and withdrawal form required under paragraph (c) of this section will provide an adequate record of wholesale prices, then the record required under paragraph (a) of this section need not be kept. In such case the entry and withdrawal forms must identify the brands and sizes of cigars covered and show the corresponding quantity and wholesale price for each. If such information was not originally entered on the form it may be included by annotation. Whenever the regional regulatory administrator finds that alternative records being kept pursuant to this paragraph are inadequate for the intended purpose, he may so notify the importer in writing, after which time the importer shall keep the record required under paragraph (a) of this section.

§ 275.182 Availability of records.

The records required under § 275.181 shall be kept by the importer at his usual place of business unless otherwise authorized in writing by the regional regulatory administrator, and shall be made

available for inspection by any ATF officer upon his request. (For retention period, see § 275.22.)

§ 275.183 Report of wholesale prices for large cigars.

Every person who imports large cigars for sale within the United States and who issues announcements such as those described in this section shall make a report of each establishment or change of wholesale price (suggested delivered price to retailers) for large cigars. The report shall consist of a copy of each general announcement that the importer issues within his organization or to the trade about establishment or change of wholesale prices. If this copy does not show the actual date when issued, it shall be annotated to show this information. If an intraorganizational announcement involves a forthcoming price change or new product which at the time of issuance is to remain confidential until a later date, the importer may include a statement to this effect on the copy submitted. The copy shall be submitted to the Assistant Director (Regulatory Enforcement), Attn: Industry Control Division, Bureau of Alcohol, Tobacco and Firearms, Washington, D.C. 20226, within five business days after the day issued. (See § 275.181 for requirement to keep records of large cigar wholesale prices.)

PART 290—EXPORTATION OF CIGARS, CIGARETTES, AND CIGARETTE PAPERS AND TUBES, WITHOUT PAYMENT OF TAX, OR WITH DRAWBACK OF TAX

PAR. C. The regulations in 27 CFR Part 290 are amended as follows:

1. The Table of Contents is amended to delete §§ 290.12 through 290.54 and to group all definitions into a single section, § 290.11. The amended portion of the Table of Contents reads as follows:

* * * * *

Subpart B—Definitions

Sec.
290.11 Meaning of terms.

Subpart C—General

* * * * *

§§ 290.12–290.54 [Deleted]

2. Sections 290.12 through 290.54 are deleted. The definitions are grouped together into one section, § 290.11, for the sake of conformity to other regulations. Further, the definitions of "assistant regional commissioner", "Director, Alcohol, Tobacco and Firearms Division", "director of customs" and "internal revenue officer" are modified and the definition of "regional commissioner" is dropped to reflect changes in Customs Service organization and the establishment of the Bureau of Alcohol, Tobacco and Firearms. Definitions of "Assistant Director (Regulatory Enforcement)", "ATF officer", "district director of customs", "regional regulatory administrator", and "wholesale price" are added. As amended, § 290.11 reads as follows:

§ 290.11 Meaning of terms.

When used in this part and in forms prescribed under this part, the following terms shall have the meanings given in this section, unless the context clearly indicates otherwise. Words in the plural form shall include the singular, and vice versa, and words indicating the masculine gender shall include the feminine. The terms "includes" and "including" do not exclude things not listed which are in the same general class.

Assistant Director (Regulatory Enforcement). The Assistant Director for regulatory enforcement activities in the Bureau of Alcohol, Tobacco and Firearms, who is responsible to, and functions under the direction and supervision of, the Director.

Assistant regional commissioner. A regional regulatory administrator as defined in this section.

ATF officer. An officer of the Bureau of Alcohol, Tobacco and Firearms (ATF), authorized to perform any function relating to the administration or enforcement of this part.

Cigar. Any roll of tobacco wrapped in leaf tobacco or in any substance containing tobacco (other than any roll of tobacco which is a cigarette within the definition of "cigarette" given in this section).

Cigarette. (a) Any roll of tobacco wrapped in paper or in any substance not containing tobacco, and

(b) Any roll of tobacco wrapped in any substance containing tobacco which, because of its appearance, the type of tobacco used in the filler, or its packaging and labeling, is likely to be offered to, or purchased by, consumers as a cigarette described in paragraph (a) of the section.

Cigarette paper. Paper, or other material except tobacco, prepared for use as a cigarette wrapper.

Cigarette papers. Taxable books or sets of cigarette papers.

Cigarette tube. Cigarette paper made into a hollow cylinder for use in making cigarettes.

Customs warehouse. A customs bonded manufacturing warehouse, class 6, where cigars are manufactured of imported tobacco.

Director, or Director, Alcohol, Tobacco and Firearms Division. The Director, Bureau of Alcohol, Tobacco and Firearms, Washington, DC 20226

Director of customs. A district director of customs as defined in this section.

District director of customs. The district director of customs at a headquarters port of the district (except the district of New York, N.Y.); the area directors of customs in the district of New York, N.Y.; and the port director at a port not designated as a headquarters port.

Exportation or export. A severance of cigars, cigarettes, or cigarette papers or tubes from the mass of things belonging to the United States with the intention of uniting them to the mass of things belonging to some foreign country. For the purposes of this part, shipment from the United States to Puerto Rico, the Virgin Islands, or a possession of the United States, shall be deemed exportation, as will the clearance from the United States of cigars, cigarettes, and cigarette papers and tubes for consumption beyond the jurisdiction of the internal revenue laws of the United States, i.e., beyond the 3-mile limit or international boundary, as the case may be.

Export warehouse. A bonded internal revenue warehouse for the storage of cigars, cigarettes, and cigarette papers and tubes, upon which the internal revenue tax has not been paid, for subsequent shipment to a foreign country, Puerto Rico, the Virgin Islands, or a possession of the United States, or for consumption beyond the jurisdiction of the internal revenue laws of the United States.

Export warehouse proprietor. Any person who operates an export warehouse.

Factory. The premises of a manufacturer of cigars, cigarettes, or cigarette papers and tubes in which he carries on such business.

Foreign-trade zone. A foreign-trade zone established and operated pursuant to the Act of June 18, 1934, as amended.

In bond. The status of cigars, cigarettes, and cigarette papers and tubes, which come within the coverage of a bond securing the payment of internal revenue taxes imposed by 26 U.S.C. 5701 or 7652, and in respect to which such taxes have not been determined as provided by regulations in this chapter, including (a) Such articles in a factory or an export warehouse, (b) Such articles removed, transferred, or released, pursuant to 26 U.S.C. 5704, and with respect to which relief from the tax liability has not occurred, and (c) Such articles on which the tax has been determined, or with respect to which relief from the tax liability has occurred, which have been returned to the coverage of a bond.

I.R.C. The Internal Revenue Code of 1954, as amended.

Internal revenue officer. An ATF officer as defined in this section.

Manufacturer of cigarette papers and tubes. Any person who makes up cigarette paper into books or sets containing more than 25 papers each, or into tubes, except for his own personal use or consumption.

Manufacturer of tobacco products. Any person who manufactures cigars or cigarettes, except that such term shall not include (a) A person who produces cigars or cigarettes solely for his own personal consumption or use; or (b) A proprietor of a customs bonded manufacturing warehouse with respect to the operation of such warehouse.

Package. The container in which cigars, cigarettes, or cigarette papers or tubes are put up by the manufacturer and offered for sale or delivery to the consumer.

Person. An individual, partnership, association, company, corporation, estate, or trust.

Region. A geographical region of the Bureau of Alcohol, Tobacco and Firearms.

Regional regulatory administrator. The principal regional official responsible for administering regulations in this part.

Removal or remove. The removal of cigars, cigarettes, or cigarette papers or tubes from either the factory or the export warehouse covered by the bond of the manufacturer or proprietor.

State. "State" shall, for the purposes of this part, be construed to include the District of Columbia.

Tobacco products. Cigars and cigarettes. The term does not include smoking tobacco, chewing tobacco, or snuff.

United States. "United States" when used in a geographical sense shall include only the States and the District of Columbia.

U.S.C. The United States Code.

Wholesale price. The manufacturer's or importer's suggested delivered price at which the cigars are to be sold to retailers, inclusive of the tax imposed by 26 U.S.C. chapter 52 or section 7652 but exclusive of any State or local taxes imposed on cigars as a commodity, and before any trade, cash, or other discounts, or any promotion, advertising, display, or similar allowances. Where the manufacturer's or importer's suggested delivered price to retailers is not adequately supported by bona fide arm's length sales, or where the manufacturer or importer has no suggested delivered price to retailers, the wholesale price shall be the price for which cigars of comparable retail price are sold to retailers in the ordinary course of trade as determined by the Assistant Director (Regulatory Enforcement).

Zone operator. The person to whom the privilege of establishing, operating, and maintaining a foreign-trade zone has been granted by the Foreign-Trade Zones Board created by the Act of June 18, 1934, as amended.

2a. Section 290.67 is amended to provide that, during the suspension of package marking requirements (see §§ 290.186 (d) and 290.253(d)), tax liability on large cigars must be based on the maximum tax rate of $20 per thousand, unless a lower rate can be clearly demonstrated. The existing material in § 290.67 is redesignated as paragraph (a), and the new provision is placed in a new paragraph (b). As amended, § 290.67 reads as follows:

§ 290.67 Payment of tax.

(a) * * *

(b) After February 1, 1977, information on large cigar packages will not adequately evidence the amount of tax liability on the contents, because of the suspension of package notice requirements as provided in §§ 290.186(d) and 290.253 (d), and because packages indicating the former tax classes may continue to be used without alteration. Consequently, the amount of tax liability shall be based on the maximum tax rate of $20 per thousand unless the person liable for the tax establishes that a lower tax rate is applicable.

2b. Section 290.143 is amended to replace "taxable class" with "wholesale price" in relation to large cigars, and to change terminology to reflect the establishment of the Bureau of Alcohol, Tobacco and Firearms. During the suspension of package marking requirements (see §§ 290.186(d) and 290.253(d)), only the total number of all large cigars held need be shown. As amended, § 290.143 reads as follows:

§ 290.143 General.

Every export warehouse proprietor shall make a true and accurate inventory on Form 3373 to the regional regulatory administrator, of the numbers of (a) Small cigars, (b) Large cigars at each wholesale price of not more than $235.294 per thousand, (c) Large cigars with a wholesale price of more than $235.294 per thousand, (d) Small cigarettes, (e) Large cigarettes, (f) Cigarette papers, and (g) Cigarette tubes held by him at the times specified in this subpart. Due to the suspension of requirements for wholesale price to be shown on packages (see §§ 290.186(d) and 290.253(d)), only the total number of large cigars held need be shown on the inventory, until notification is given in the FEDERAL REGISTER. This inventory shall be subject to verification by an ATF officer. A copy of each inventory shall be retained by the export warehouse proprietor for 2 years following the close of the calendar year in which the inventory is made and shall be made available for inspection by any ATF officer upon his request.

(Sec. 202, Pub. L. 85–859, 72 Stat. 1422 (26 U.S.C. 5721))

3. Section 290.181 is amended to change "class designation" to "tax classification", reflecting the change in taxation of large cigars now that the tax is based on the wholesale price rather than on the retail price class. As amended, § 290.181 reads as follows:

§ 290.181 Packages.

All cigars, cigarettes, and cigarette papers and tubes shall, before removal, be put up by the manufacturer in packages which shall bear the label or notice, tax classification, and mark, as required by this subpart.

(Sec. 202, Pub. L. 85–859, 72 Stat. 1422 (26 U.S.C. 5723).)

4. Section 290.186 is amended to include requirements that packages of large cigars show information relating to wholesale price. However, application of these new requirements for large cigars is suspended pending further notification in the FEDERAL REGISTER. Other requirements of this section, not related to wholesale price markings, are effective as of the effective date of this document. As amended § 290.186 reads as follows:

§ 290.186 Tax classification for cigars.

(a) *General requirement.* Every package of cigars shall, before removal from a factory under this subpart, have adequately imprinted thereon, or on a label securely affixed thereto, the designation "cigars", the quantity of such product contained therein, and the classification of the product for tax purposes. For small cigars such classification shall be either "small" or "little", and for large cigars, the wholesale price applicable to similar cigars removed for taxable purposes in the United States.

(b) *Expression of wholesale price.* The price to be shown is the wholesale price for each thousand cigars, except that for cigars with a wholesale price of more than $235.294 per thousand the wholesale price may be either specifically expressed or expressed as if it were $236 per thousand. Such price shall be expressed either in arabic numerals or according to the code: A=1, B=2, C=3, D=4, E=5, F=6, G=7, H=8, J=9, K=0; and in either case shall be preceded by the identifying letters "MP". If the wholesale price is in even dollars then no decimal or cents information need be shown. Thus, for a cigar with a wholesale price of $80.00 per thousand, the wholesale price would be expressed as "MP80" or as "MPHK"; for a cigar with a wholesale price of $65.20 per thousand, the wholesale price would be expressed as "MP65.20" or as "MPFE.BK"; and for a cigar with a wholesale price of $450 per thousand, the wholesale price would be expressed as "MP450", "MPDEK", "MP 236", or "MPBCF".

(c) *Packages with cigars of more than one price.* If a combination package includes large cigars of more than one wholesale price and they are taxable on the basis of the individual wholesale prices of the cigars and not on the basis of an established wholesale price for the combination package (see § 270.22(d) of this chapter), the numbers of cigars at each wholesale price and a brief description of those cigars shall be shown with the applicable wholesale price information. For example, if a package contained 30 Blunts with a wholesale price of $80 per thousand and 20 Panatelas with a wholesale price of $100 per thousand, the wholesale price would be shown as "30 Blunts—MP80, 20 Panatelas—MP100", or "30 Blunts—MPHK, 20 Panatelas—MPAKK".

(d) *Application of wholesale price regulations.* The application of regulations in this section relating to the imprinting, on packages of large cigars, of information relating to wholesale price is suspended until notification in the FEDERAL REGISTER. This notification shall be published in the FEDERAL REGISTER not less than 90 days prior to the date when the wholesale price marking regulations shall begin to apply.

(Sec. 202, Pub. L. 85–859, 72 Stat. 1422 (26 U.S.C. 5723).)

5. Section 290.248 is amended to replace "class designation" with "tax classification" to reflect the different taxation of large cigars now that the tax is based on the wholesale price rather than on the retail price class. As amended, § 290.248 reads as follows:

§ 290.248 Packages.

Cigars shall, before withdrawal under this part, be put up by the customs warehouse proprietor in packages which shall bear the label or notice, tax classification, and mark, as required by this subpart.

(Sec. 202, Pub. L. 85–859, 72 Stat. 1422 (26 U.S.C. 5723).)

6. Section 290.253 is amended to include requirements that packages of large cigars show information relating to wholesale price. However, application of

these new requirements for large cigars is suspended pending further notification in the FEDERAL REGISTER. Other requirements of this section, not related to wholesale price markings, are effective as of the effective date of this document. As amended, § 290.253 reads as follows:

§ 290.253 Tax classification for cigars.

(a) *General requirement.* Every package of cigars shall, before withdrawal from a customs warehouse under this subpart, have adequately imprinted thereon or on a label securely affixed thereto the designation "cigars", the quantity of such product contained therein, and the classification of the product for tax purposes. For small cigars, such classification shall be either "small" or "little", and for large cigars, the wholesale price applicable to similar cigars removed for taxable purposes in the United States.

(b) *Expression of wholesale price.* The price to be shown is the wholesale price for each thousand cigars, except that for cigars with a wholesale price of more than $235.294 per thousand the wholesale price may be either specifically expressed or expressed as if it were $236 per thousand. The price shall be expressed either in arabic numerals or according to the code: A=1, B=2, C=3, D=4, E=5, F=6, G=7, H=8, J=9, K=0, and in either case shall be preceded by the identifying letters "IP". If the wholesale price is in even dollars then no decimal or cents information need be shown. Thus, for a cigar with a wholesale price of $80.00 per thousand, the wholesale price would be expressed as "IP80" or as "IPHK"; for a cigar with a wholesale price of $65.20 per thousand, the wholesale price would be expressed as "IP65.20" or as "IPFE.BK"; and for a cigar with a wholesale price of $450 per thousand, the wholesale price would be expressed as "IP450", "IPDEK", IP236", or "IPBCF".

(c) *Packages with cigars of more than one price.* If a combination package includes large cigars of more than one wholesale price and they are taxable on the basis of the individual wholesale prices of the cigars and not on the basis of an established wholesale price for the combination package (see § 275.39(d) of this chapter), the numbers of cigars at each wholesale price and a brief description of those cigars shall be shown with the applicable wholesale price information. For example, if a package contained 30 Blunts with a wholesale price of $80 per thousand and 20 Panatelas with a wholesale price of $100 per thousand, the wholesale price would be shown as "30 Blunts—IP80, 20 Panatelas—IP100", or "30 Blunts—IPHK, 20 Panatelas—IPAKK".

(d) *Application of wholesale price regulations.* The application of regulations in this section relating to the imprinting, on packages of large cigars, of information relating to wholesale price is suspended until notification in the FEDERAL REGISTER. This notification shall be published in the FEDERAL REGISTER not less than 90 days prior to the date when the wholesale price marking regulations shall begin to apply.

(Sec. 202, Pub. L. 85-859, 72 Stat. 1422 (26 U.S.C. 5723).)

PART 295—REMOVAL OF CIGARS, CIGARETTES, AND CIGARETTE PAPERS AND TUBES, WITHOUT PAYMENT OF TAX, FOR USE OF THE UNITED STATES

PAR. D. The regulations in 27 CFR Part 295 are amended as follows:

1. Section 295.11 is amended to improve clarity and to reflect the change in taxation of large cigars and the establishment of the Bureau of Alcohol, Tobacco and Firearms. Definitions of "Assistant Director (Regulatory Enforcement)", "ATF officer", "regional regulatory administrator" and "wholesale price" are added; the definitions of "Commissioner" and "regional commissioner" are deleted; the introductory language is rephrased; and the definitions of "assistant regional commissioner", "Director", "internal revenue officer", and "region" are modified. As amended, § 295.11 reads as follows:

§ 295.11 Meaning of terms.

When used in this part and in forms prescribed under this part, the following terms shall have the meanings given in this section, unless the context clearly indicates otherwise. Words in the plural form shall include the singular, and vice versa, and words indicating the masculine gender shall include the feminine. The terms "includes" and "including" do not exclude things not listed which are in the same general class.

* * * * *

Assistant Director (Regulatory Enforcement). The Assistant Director for regulatory enforcement activities in the Bureau of Alcohol, Tobacco and Firearms, who is responsible to, and functions under the direction and supervision of, the Director.

Assistant regional commissioner. A regional regulatory administrator as defined in this section.

ATF officer. An officer of the Bureau of Alcohol, Tobacco and Firearms (ATF) authorized to perform any function relating to the administration or enforcement of this part.

* * * * *

Director. The Director, Bureau of Alcohol, Tobacco and Firearms, Washington, DC 20226.

* * * * *

Internal revenue officer. An ATF officer as defined in this section.

* * * * *

Region. A geographical region of the Bureau of Alcohol, Tobacco and Firearms.

Regional regulatory administrator. The principal regional official responsible for administering regulations in this part.

* * * * *

Wholesale price. The manufacturer's or importer's suggested delivered price at which the cigars are to be sold to retailers, inclusive of the tax imposed by 26 U.S.C. chapter 52 or section 7652, but exclusive of any State or local taxes imposed on cigars as a commodity, and before any trade, cash, or other discounts, or any promotion, advertising, display, or similar allowances. Where the manufacturer's or importer's suggested delivered price to retailers is not adequately supported by bona fide arm's length sales, or where the manufacturer or importer has no suggested delivered price to retailers, the wholesale price shall be the price for which cigars of comparable retail price are sold to retailers in the ordinary course of trade as determined by the Assistant Director (Regulatory Enforcement).

2. Section 295.44 is amended to include requirements that packages of large cigars show information relating to wholesale price. However, application of these new requirements for large cigars is suspended pending further notification in the FEDERAL REGISTER. Other requirements of this section, not related to wholesale price markings, are effective as of the effective date of this document.

As amended § 295.44 reads as follows:

§ 295.44 Notice for cigars.

(a) *General requirement.* Every package of cigars shall, before removal under this part, have adequately imprinted thereon, or on a label securely affixed thereto, the designation "cigars," the quantity of such product contained therein, and the classification of the product for tax purposes, i.e., for small cigars, either "small" or "little", and for large cigars, the wholesale price.

(b) *Expression of wholesale price.* The price to be shown is the wholesale price for each thousand cigars, except that for cigars with a wholesale price of more than $235.294 per thousand the wholesale price may be either specifically expressed or expressed as if it were $236 per thousand. Such price shall be expressed either in arabic numerals or according to the code: A=1, B=2, C=3, D=4, E=5, F=6, G=7, H=8, J=9, K=0; and in either case shall be preceded by the identifying letters "MP". If the wholesale price is in even dollars then no decimal or cents information need be shown. Thus, for a cigar with a wholesale price of $80.00 per thousand, the wholesale price would be expressed as "MP80" or as "MPHK"; for a cigar with a wholesale price of $65.20 per thousand, the wholesale price would be expressed as "MP65.20" or as "MPFE.BK"; and for a cigar with a wholesale price of $450 per thousand, the wholesale price would be expressed as either "MP450", "MPDEK", "MP236", or "MPBCF".

(c) *Packages with cigars of more than one price.* If a combination package includes large cigars of more than one wholesale price and they are taxable on the basis of the individual wholesale prices of the cigars and not on the basis of an established wholesale price for the combination package (see § 270.22(d) of this chapter), the numbers of cigars at each wholesale price and a brief description of those cigars shall be shown with the applicable wholesale price information. For example, if a package contained 30 Blunts with a wholesale price of $80 per thousand and 20 Panatelas with a wholesale price of $100 per thousand, the wholesale price would be shown as "30 Blunts—MP80, 20 Panatelas—MP100", or "30 Blunts—MPHK, 20 Panatelas—MPAKK".

(d) *Application of wholesale price regulations.* The application of regulations in this section relating to the imprinting, on packages of large cigars, of information relating to wholesale price is suspended until notification in the FEDERAL REGISTER. This notification shall be published in the FEDERAL REGISTER not less than 90 days prior to the date when the wholesale price marking regulations shall begin to apply.

(Sec. 202, Pub. L. 85-859, 72 Stat. 1422 (26 U.S.C. 5723).)

3. Section 295.51 is amended to change "class" of large cigars to "wholesale price," and to change "internal revenue officer" to "ATF officer." As amended, § 295.51 reads as follows:

§ 295.51 Supporting record.

Every manufacturer who removes cigars, cigarettes, and cigarette papers and tubes under this part shall, in addition to the records kept under Part 270 of this chapter, keep a supporting record of such removals and shall make appropriate entries therein at the time of removal. The supporting record shall show, with respect to each removal, the date of removal, the name and address of the Federal agency to which shipped or delivered, the quantity and, with respect to large cigars, wholesale price for tax purposes. Appropriate entries shall also be made in the supporting record of any cigars, cigarettes, or cigarette papers or tubes removed under this part which are returned to the factory. Where the manufacturer keeps, at the factory, copies of invoices or other commercial records containing the information required as to each removal, in such manner that the information may be readily ascertained therefrom, such copies will be considered the supporting record required by this section. The supporting record shall be retained by the manufacturer for 3 years following the close of the year covered therein and shall be made available for inspection by any ATF officer upon his request.

(Sec. 2128(c), Pub. L. 94-455, 90 Stat. 1921 (26 U.S.C. 5741).)

PART 296—MISCELLANEOUS REGULATIONS RELATING TO CIGARS, CIGARETTES, AND CIGARETTE PAPERS AND TUBES

PAR. E. The regulations in 27 CFR Part 296 are amended as follows:

1. Section 296.72 is amended to rephrase the introductory language, to delete the definition of "Commissioner", to add definitions of "wholesale price", "region", and "regional regulatory administrator", and to modify the definitions of "assistant regional commissioner" and "Commissioner of Customs" to reflect the change in the name of the U.S. Customs Service and the establishment of the Bureau of Alcohol, Tobacco and Firearms. As amended, § 296.72 reads as follows:

§ 296.72 Meaning of terms.

When used in this subpart, the following terms shall have the meanings given in this section, unless the context clearly indicates otherwise. Words in the plural form shall include the singular, and vice versa, and words indicating the masculine gender shall include the feminine. The terms "includes" and "including" do not exclude things not listed which are in the same general class.

* * * * *

Assistant Director (Regulatory Enforcement). The Assistant Director for regulatory enforcement activities in the Bureau of Alcohol, Tobacco and Firearms, who is responsible to, and functions under the direction and supervision of, the Director, Bureau of Alcohol, Tobacco and Firearms.

Assistant regional commissioner. A regional regulatory administrator as defined in this section.

* * * * *

Commissioner of Customs. The Commissioner of Customs, U.S. Customs Service, the Department of the Treasury, Washington, D.C.

* * * * *

Region. A geographical region of the Bureau of Alcohol, Tobacco and Firearms.

Regional regulatory administrator. The principal regional official responsible for administering regulations in this part.

* * * * *

Wholesale price. The manufacturer's or importer's suggested delivered price, at which the cigars are to be sold to retailers, inclusive of the tax imposed by 26 U.S.C. chapter 52 or section 7652 but exclusive of any State or local taxes imposed on cigars as a commodity, and before any trade, cash, or other discounts, or any promotion, advertising, display, or similar allowances. Where the manufacturer's or importer's suggested delivered price to retailers is not adequately supported by bona fide arm's length sales, or where the manufacturer or importer has no suggested delivered price to retailers, the wholesale price shall be the price for which cigars of comparable retail price are sold to retailers in the ordinary course of trade as determined by the Assistant Director (Regulatory Enforcement).

2. Section 296.74 is amended to replace "tax class" of large cigars with "wholesale price," to change the examples to reflect the new tax structure imposed by legislation, and to make terminology changes to reflect the establishment of the Bureau of Alcohol, Tobacco and Firearms. As amended, § 296.74 reads as follows:

§ 296.74 Execution and filing of claims.

Claims under this subpart shall be executed on Internal Revenue Service Form 843 in accordance with the applicable instructions on the form, and filed with the regional regulatory administrator of the region in which the cigars, cigarettes, or cigarette papers or tubes were lost, rendered unmarketable, or condemned, within 6 months after the date on which the President makes the determination that the disaster has occurred. The claim shall state all the facts on which the claim is based, and shall set forth the numbers of small cigars, large cigars (itemized separately as to taxable wholesale price), small cigarettes, large cigarettes, cigarette papers, and cigarette tubes, as the case may be, and the rate of tax and the amount claimed with respect to each article set forth, substantially in the form as shown in the example below.

Example

Quantity	Article	Rate of tax	Amount
20,000	Small cigars	$0.75 per thousand.	$15.00
1,000	Large cigars—Wholesale price $100 per thousand.	8½ pct of wholesale price.	8.50
500	Large cigars—Wholesale price $236 per thousand.	$20 per thousand.	10.00
10,000	Small cigarettes	$4 per thousand.	40.00
5,000	Large cigarettes	$8.40 per thousand.	42.00
2,000 sets	Cigarette papers—50 each set.	$0.005 per set.	10.00
1,000 sets	Cigarette papers—100 each set.	$0.01 per set.	10.00
1,000	Cigarette tubes	$0.01 per 50 tubes.	.20
Total claimed			135.70

The claimant shall certify on the claim to the effect that no amount of internal revenue tax or customs duty claimed therein has been or will be otherwise claimed under any other provision of law or regulations.

Signed: January 14, 1977.

REX D. DAVIS,
Director.

Approved: January 19, 1977.

JOHN H. HARPER,
Acting Assistant Secretary of the Treasury.

PART IX

FEDERAL ENERGY ADMINISTRATION

DOMESTIC CRUDE OIL ALLOCATION PROGRAM

Entitlement Notice for November 1976

FEDERAL ENERGY ADMINISTRATION

DOMESTIC CRUDE OIL ALLOCATION PROGRAM

Entitlement Notice for November 1976

In accordance with the provisions of 10 CFR §211.67 relating to FEA's domestic crude oil allocation program the monthly notice specified in § 211.67(l) is hereby published.

Based on reports submitted to FEA by refiners and other firms as to crude oil receipts, crude oil runs to stills and eligible product imports for November 1976, imported naphtha utilized as a petrochemical feedstock in Puerto Rico, application of the entitlement adjustment for residual fuel oil production for sale in the East Coast market provided in § 211.67(d)(4), and application of the entitlement adjustment for small refiners provided in § 211.67(e), the national domestic crude oil supply ratio for November 1976 is calculated to be .273071.

In accordance with § 211.67(b)(2), to calculate the number of barrels of deemed old oil included in refiner's adjusted crude oil receipts for the month of November 1976, each barrel of old oil is equal to one barrel of deemed old oil and each barrel of upper-tier crude is equal to .177464 of a barrel of deemed old oil.

The issuance of entitlements for the month of November 1976 to refiners and other firms is set forth in the Appendix to this notice. The Appendix lists the name of each refiner or other firm to which entitlements have been issued, the number of barrels of deemed old oil included in each such refiner's adjusted crude oil receipts, the number of entitlements issued to each such refiner or other firm, and the number of entitlements required to be purchased or sold by each such refiner or other firm.

Pursuant to 10 CFR 211.67(l)(4), FEA hereby fixes the price at which entitlements shall be sold and purchased for the month of November 1976 at $7.90, which is the exact differential as reported for the month of November between the weighted average per barrel costs to refiners of old oil and of imported and exempt domestic crude oil, less the sum of 21 cents.

In accordance with 10 CFR 211.67(b), each refiner that has been issued fewer entitlements for the month of November 1976 than the number of barrels of deemed old oil included in its adjusted crude oil receipts is required to purchase a number of entitlements for the month of November 1976 equal to the difference between the number of barrels of deemed old oil included in those receipts and the number of entitlements issued to and retained by that refiner. Refiners which have been issued a number of entitlements for the month of November 1976 in excess of the number of barrels of deemed old oil included in their adjusted crude oil receipts for that month and other firms issued entitlements shall sell such entitlements to refiners required to purchase entitlements. In addition, certain refiners are required to purchase or sell entitlements to effect corrections for reporting errors for the months September 1975 through October 1976 pursuant to 10 CFR 211.67(j)(1).

Pursuant to § 211.67(j)(2), the November 1976 installments of the amounts representing corrections for reporting errors for months prior to September 1975 are shown in a separate column in the listing and these installments will continue to be shown in entitlement notices through the notice for February 1977. As set forth in the revised special correction notice issued on September 21, 1976, the total dollar amounts of the special corrections have been divided into eight substantially equal installments for reflection in each firm's entitlement position for each of the months July 1976 through February 1977, based on the particular month's entitlement price.

The listing of refiners' old oil receipts contained in the Appendix reflects any adjustments made by FEA pursuant to §211.67(h).

The listing contained in the Appendix identifies in a separate column additional entitlements issued to refiners pursuant to relief granted by FEA's Office of Exceptions and Appeals. Also set forth in this column are the adjustments for relief granted by the Office of Exceptions and Appeals for 1975, which adjustments are being reflected in monthly installments commencing with the September 1976 entitlement notice. The number of installments is dependent on the magnitude of the adjustment to be made. For a full discussion of the issues involved, see *Beacon Oil Company*, et al, 4 FEA par. 87,024 (November 5, 1976).

The listing in the Appendix does not reflect an entitlement obligation of $379,965.42 (or 48,097 entitlements) of Delta Refining Company for the month November 1976 that is attributable to adjustments for exception relief received by Delta in 1975. This obligation has been temporarily stayed by the United States District Court for the District of Columbia until 10 days from the date of issuance of a final order in Case No. FXA-1052.[1] FEA will reflect, in the earliest practicable entitlement notice, the entitlement obligation as determined by the final order.

For purposes of the adjustments to refiners' crude run volumes under § 211.67(d)(4), total production of residual fuel oil for sale in the East Coast market (in excess of the first 5,000 barrels per day thereof for each refiner reporting such production) was 16,597,963 barrels for November 1976. For that month, imports of residual fuel oil eligible for entitlement issuances totaled 35,062,448 barrels.

The total number of entitlements required to be purchased and sold under this notice is 21,809,856.

Payment for entitlements required to be purchased under 10 CFR 211.67(b) for November 1976 must be made by January 31, 1977.

On or prior to February 10, 1977, each firm which is required to purchase or sell entitlements for the month of November 1976 shall file with FEA the monthly transaction report specified in 10 CFR 211.66(l) certifying its purchases and sales of entitlements for the month of November. FEA has mailed the monthly transaction report forms for the month of November to reporting firms. FEA requests that firms which have been unable to locate other firms for required entitlement transactions by January 31, 1977 contact FEA at 202-254-6296 to expedite consummation of these transactions. For firms that have failed to consummate required entitlement transactions on or prior to January 31, 1977, FEA may direct sales and purchases of entitlements pursuant to the provisions of 10 CFR 211.67(k).

This notice is issued pursuant to Subpart G of FEA's regulations governing its administrative procedures and sanctions, 10 CFR Part 205. Any person aggrieved hereby may file an appeal with FEA's Office of Exceptions and Appeals in accordance with Subpart H of 10 CFR Part 205. Any such appeal shall be filed on or before February 25, 1977.

Issued in Washington, D.C. on January 21, 1977.

DAVID G. WILSON,
Acting General Counsel.

[1] This supersedes the statement in last month's notice regarding the implementation of the Court's order. It remains the intent of FEA to exclude the obligation from the entitlements list solely during the effective period of the Court's order. The matter of interest on such obligations is subject to the terms of the Court's order.

APPENDIX

reminders

(The items in this list were editorially compiled as an aid to FEDERAL REGISTER users. Inclusion or exclusion from this list has no legal significance. Since this list is intended as a reminder, it does not include effective dates that occur within 14 days of publication.)

Rules Going Into Effect Today

DOT/FAA—Standard instrument approach procedures; changes and additions. 54166; 12–13–76

Standard instrument approach procedures..... 55333; 12–20–76

FCC—Class D Stations in Citizen Radio Services..... 56068; 12–23–76

Noncommercial educational broadcast stations; program logs..... 56648; 12–29–76

List of Public Laws

NOTE: No public bills which have become law were received by the Office of the Federal Register for inclusion in today's LIST OF PUBLIC LAWS.

AGENCY PUBLICATION ON ASSIGNED DAYS OF THE WEEK

The six-month trial period ended August 6. The program is being continued on a voluntary basis (see OFR notice, 41 FR 32914, August 6, 1976). The following agencies have agreed to remain in the program:

Monday	Tuesday	Wednesday	Thursday	Friday
NRC	USDA/ASCS		NRC	USDA/ASCS
DOT/COAST GUARD	USDA/APHIS		DOT/COAST GUARD	USDA/APHIS
DOT/NHTSA	USDA/FNS		DOT/NHTSA	USDA/FNS
DOT/FAA	USDA/REA		DOT/FAA	USDA/REA
DOT/OHMO	CSC		DOT/OHMO	CSC
DOT/OPSO	LABOR		DOT/OPSO	LABOR
	HEW/FDA			HEW/FDA

Documents normally scheduled on a day that will be a Federal holiday will be published the next work day following the holiday.

Comments on this program are still invited. Comments should be submitted to the Day-of-the-Week Program Coordinator, Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408.

ATTENTION: For questions, corrections, or requests for information please see the list of telephone numbers appearing on opposite page.

federal register

Area Code 202 Phone 523–5240

Published daily, Monday through Friday (no publication on Saturdays, Sundays, or on official Federal holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C., Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The FEDERAL REGISTER provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for $5.00 per month or $50 per year, payable in advance. The charge for individual copies is 75 cents for each issue, or 75 cents for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER.

rules and regulations

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

Title 10—Energy

CHAPTER II—FEDERAL ENERGY ADMINISTRATION

PART 212—MANDATORY PETROLEUM PRICE REGULATIONS

Amendments to the Refiner Price Regulations; Increased Non-Product Costs and Allocation of Increased Costs To Exempt Products

I. Introduction

On July 27, 1976, the Federal Energy Administration ("FEA") issued a notice of proposed rulemaking and public hearing (41 FR 31863, July 30, 1976) to consider proposals to amend the refiner price regulations (10 CFR, Part 212, Subpart E) regarding the passthrough of increased non-product costs and the method of allocating increased costs to exempt products.

Written comments with respect to the July 30 notice were received from interested parties and a public hearing was held on August 24, 1976 at which oral statements were presented. After consideration of all the written and oral presentations, FEA has determined to modify in part and adopt certain of the proposed amendments. This rulemaking proceeding is continued with respect to the proposed amendments on which action is not being taken in today's notice. The amendments adopted and issued today are effective with respect to increased costs incurred beginning January 1, 1977, and with respect to maximum allowable prices beginning February 1, 1977.

II. Summary

FEA price regulations have always included provisions with respect to the passthrough of increased non-product costs by refiners. Initially, increased non-product costs could be passed through generally according to the increase in the rate at which the costs were incurred, subject to a prenotification procedure and FEA approval. (§ 212.82(b)(2); 39 FR 6533, February 20, 1974) Such prenotification and approval procedures proved complex and cumbersome and were therefore eliminated by amendments to the regulations, effective December 1, 1974. The amended regulations provided that specific increased non-product costs, defined in eight categories, could be calculated by refiners and passed through automatically, without the need for prenotification. (§ 212.83(c)(2)(E); 39 FR 42368, December 5, 1974)

Comments received since the eight defined categories of increased non-product costs were adopted and the comments and testimony presented in this proceeding indicate that FEA should expand the eight defined categories to include significant additional categories of non-product cost increases.

The regulations issued today therefore adopt additional categories of non-product cost increases, revise the definitions of certain existing categories, and generally standardize the computation of the amount of increase in each category of non-product costs in a manner that is analogous to the method for computing the amount of increased crude oil costs. Also, the regulations issued today require that the allocation of increased crude oil costs and increased non-product costs to covered products be based on volume refined rather than sales volume. Several issues discussed in the July 30 notice, such as treatment of "processing fees," methods of allocating non-product cost increases among petroleum product categories, and adjustments to May 1973 non-product costs to reflect changes in business operations are being further considered by FEA. Final amendments to the regulations may be hereafter adopted regarding certain of these issues; further notices of proposed rulemaking may be appropriate for certain other of these issues.

III. Increased Non-Product Costs

A. Method of computation of increased non-product costs

The July 30 notice proposed two principal alternative methods for standardized computation of all categories of increased non-product costs. The first or "simple method" was based upon a comparison of the dollar amounts of non-product costs incurred in May 1973 and in the month for which the amount of non-product cost increase was being measured, and did not require any adjustment in the result until any month in which refinery output exceeded the May 1973 output by more than 10%. The second, or "output adjusted method" was based upon a comparison of the non-product cost per unit of refinery output in May 1973 with the non-product cost per unit of refinery output in the month for which the amount of non-product cost increase was being measured, multiplied by the total volume of refinery output in the month of measurement. The "output adjusted method" was proposed to be required for computation of increased non-product costs beginning with any month in which refinery output exceeded the May 1973 output by more than 10%. Once a refiner was required to use the "output adjusted method" it was proposed that this method would then be required to be used throughout the remainder of that calendar year.

FEA has concluded that the benefits of simplicity, which led it to propose the method of computing increased non-product costs without any adjustment for volume for refiners with output not in excess of 110% of their May 1973 output, are counterbalanced by the negative consequences such a regulation would have. In particular, adoption of the simplified method would have tended to discourage refinery expansion. Although it would have afforded cost passthrough benefits to the extent that current refinery output was in excess of May 1973 levels, those benefits would have been lost if current refinery output amounted to 110% or more of May 1973 output.

FEA has therefore concluded that all refiners shall be required to use only the proposed standardized "output adjusted method" for the computation of all increased non-product costs.

The "output adjusted method" for computation of increased non-product costs adopted today is similar to the method for computation of increased crude oil costs currently prescribed in § 212.83(c)(2)(iii)(C). The amount of increase in each category of non-product cost shall be computed by determining the difference between the amount of that cost in the month of measurement per unit of refinery output and the amount of that cost in May 1973 per unit of refinery output, multiplied by the amount of refinery output in the month of measurement. This amendment simplifies in certain respects the former regulations, which provided for different computational methods for the various categories of increased non-product costs.

It was suggested by some commentors that the "output adjusted method" for computation of increased non-product costs should not be adopted. They stated that, because refinery operating costs, except for fuel, are not directly tied to refinery output, computation of increased non-product costs by a method based upon a cost increment per unit of refinery output tends to interfere with free market pricing patterns of incremental production. Such pricing would not necessarily reflect the per unit reduction in non-product costs which results when a relatively fixed total amount of non-product costs is spread over a larger volume of production. It was further suggested that the "output adjusted method" of computation of increased non-product costs would result in artificially low prices and would tend to stifle incentives to decrease costs by requiring refiners to pass on to consumers all savings engendered by such reductions.

FEA is aware that levels of all non-product costs are not directly tied to levels of refinery output and that the

"output adjusted method" for computation of increased non-product costs adopted today does not permit the pricing of incremental production according to free market conditions. FEA has concluded, however, that this method of computation, which generally operates to require decreases in per unit costs associated with increased refinery output to be passed through in the form of lower prices, is appropriate. Although this method may operate to some extent to reduce incentives for refiners to decrease costs, prices of approximately half of the volume of refined petroleum products are no longer regulated. Moreover, to the extent that cost reductions are required to be passed through in the form of lower prices, there are potential benefits to the refiner concerned of increased sales volumes. Accordingly, FEA has concluded that the "output adjusted method" of computing increased non-product costs, required by the regulations adopted today, is an appropriate price control mechanism which does not unduly revide in the definition of "E'" in § 212.83 strict the incentives to decrease refinery non-product costs.

FEA recognizes that non-product costs in certain categories are typically paid or incurred on an irregular basis. Accordingly, the amended regulations pro- (c) (2) (iii) (E), as was proposed in the July 30 notice, for averaging such costs. Costs paid or incurred less frequently than monthly during the firm's fiscal year which included May 1973 must be averaged over such year (and costs paid or incurred each month during the firm's fiscal year which included May 1973 but in significantly different amounts independent of output variation must be averaged over such year) to calculate non-product costs for May 1973. Such costs must also be averaged over the firm's current fiscal year for each month of measurement, if they are accrued according to generally accepted accounting practices historically and consistently applied by the firm concerned.

The requirement to average such costs over the firm's fiscal year means generally that if, pursuant to generally accepted accounting practices historically and consistently applied by the firm concerned, costs such as maintenance costs are accrued, such costs may also be accrued for purposes of calculating non-product cost increases. However, in such instances appropriate corrective adjustments must be made to reflect the costs actually incurred.

In the ordinary case, except for costs which typically occur at intervals of greater than one year (such as the maintenance costs of major refinery shutdowns, in which case the costs incurred must be averaged over the period to which they apply), the costs treated as incurred during a firm's fiscal year under the accrual provision of § 212.83(c)(2)(iii)(E) must not exceed the amounts of such costs actually paid or incurred during that fiscal year. Furthermore, as discussed below, in computing the newly adopted categories of "maintenance cost increase" and "Federal, State, and local tax increase" FEA has provided for adjustments to May 1973 costs so that they reflect levels averaged over an appropriate period of time.

B. ADDITIONAL CATEGORIES OF INCREASED NON-PRODUCT COSTS

The regulations issued today adopt the three proposed additional categories of increased non-product costs that may be used in the computation of total increased non-product costs under § 212.83 (c)(2)(iii)(E), with certain modifications, plus another category on which FEA invited comments. The new categories are: "depreciation cost increase," "maintenance cost increase," "federal, state and local tax increase," and "overhead cost increase."

1. *Depreciation cost increase.* The addition of a "depreciation cost increase" category to § 212.83(c)(2)(iii)(E) enables refiners to recover increased depreciation costs. The July 30 notice proposed that refiners be permitted to pass through as a non-product cost increase

> • • • all depreciation associated with capital investment undertaken since May 15, 1973 for refining and storage of covered products including investment to expand refinery capacity, to produce lower sulphur refined petroleum products, to institute energy conservation measures, and to increase storage capacity. Both equipment and facility expansion would be included. (41 FR at 31864)

FEA proposed to permit a passthrough of these depreciation costs as increased non-product costs in order to permit recovery of costs of capital investments to expand domestic refining capacity, to achieve energy conservation, and for equipment installed to produce lower-sulfur products which enable users of such products to conform to pollution control standards applicable to them. These have been identified as important national objectives by the Congress, and current FEA regulations tend to discourage investments for such purposes by not permitting full recovery of their costs in prices of covered products.

The comments generally supported the addition of the "depreciation cost increase" category to the existing categories of non-product cost increases.

FEA has concluded, however, that the "depreciation cost increase" should be computed in accordance with the standardized "output adjusted method" discussed above, rather than the method that was proposed. The proposed method would simply have treated as depreciation cost increase all costs "attributable to the depreciation of refinery equipment and storage capacity acquired and installed and facility expansion since May 15, 1973," without regard to the level of depreciation costs that was incurred in May 1973 and reflected in prices on May 15, 1973. Hence, the proposal would not accurately have reflected net increases in depreciation costs since May 1973 because it would only have measured certain added depreciation costs, without regard to any reductions in depreciation costs which may also have occurred.

By computing the amount of increase in this category through a comparison of depreciation per unit of output in the month of measurement with depreciation per unit of output in May 1973, the need to determine whether a particular asset was "acquired and installed since May 15, 1973" is obviated. Also, this modification to the proposal is appropriate to insure that only net increases in depreciation costs over May 1973 levels are permitted to be passed through. Because May 15, 1973 sales prices reflected the May 1973 level of depreciation costs, FEA has concluded that any increases in those price levels based on the passthrough of increased depreciation costs should reflect only the net increase in such costs since May 1973.

Accordingly, the regulations adopted today provide that all increases in depreciation costs per unit of output in a month of measurement over May 1973 levels per unit of output may be included in increased non-product costs and used to determine a refiner's maximum allowable selling price under the refiner price regulations, except as discussed in section III.C.1. below. The separate category for "pollution control cost increase" has been deleted as no longer necessary, as the costs which formerly fell into that category will now generally fall within the new depreciation cost increase category.

FEA has decided in these amendments to require each refiner to calculate depreciation cost increase pursuant to that refiner's customary accounting practices generally accepted and consistently and historically applied for purposes of its certified annual financial statements filed with the Securities and Exchange Commission or a comparable state regulatory agency. If no certified financial statements are so filed, depreciation cost increase must be calculated according to generally accepted accounting practices historically and consistently applied by the firm concerned for certified annual financial reports prepared by an independent accounting firm.

2. *Maintenance cost increase.* The "maintenance cost increase" category of increased non-product costs adopted today includes all increased costs associated with the maintenance and repair of refinery equipment, except direct labor cost associated with maintenance and repair of refinery equipment, which is to be reflected under the labor cost increase category. The maintenance cost increase category includes contract maintenance.

Refiners that, pursuant to generally accepted accounting practices historically and consistently applied by the firm concerned, treat maintenance costs such as those associated with major anticipated and unanticipated refinery shutdowns (maintenance costs incurred at greater than monthly intervals) on an accrual basis and prorate such costs over an appropriate period shall accrue such costs for purposes of calculating per unit non-product costs for the month of May 1973 and the month of measurement.

Refiners that, pursuant to generally accepted accounting practices historically and consistently applied by the firm concerned, do not treat the maintenance costs associated with anticipated and unanticipated refinery shutdowns on an accrual basis shall compute the May 1973 per unit maintenance costs by adding all maintenance costs incurred during an appropriate period approved or required by FEA including May 1973 (such as one or two years) and dividing by output during that period. Such refiners, shall, however, compute the maintenance cost increase for the month of measurement according to the generally accepted accounting practices historically and consistently applied by the firm concerned.

For example, a refiner that, pursuant to generally accepted accounting practices historically and consistently applied by that firm, during the month of May 1973 and during the month of measurement accrued the costs of anticipated and unanticipated major refinery shutdowns shall compute the maintenance non-product cost increase per unit of refinery output by computing the difference between (1) the total cost of the standard maintenance (ordinary daily repair and minor emergency maintenance) per unit of refinery output incurred in the month of measurement plus the accured cost for anticipated and unanticipated major refinery shutdowns per unit of refinery output for the month of measurement and (2) the total cost of such standard maintenance per unit of refinery output incurred in May 1973 plus the accrued cost for anticipated and unanticipated major refinery shutdowns per unit of refinery output for May 1973.

However, a refiner that, pursuant to generally accepted accounting practices historically and consistently applied by that firm, during the month of May 1973 and during the month of measurement did not accrue the costs of anticipated or unanticipated major refinery shutdowns shall compute the maintenance non-product cost increase per unit of refinery output by computing the difference between (1) the total actual cost incurred for maintenance per unit of refinery output in the month of measurement and (2) the total actual cost incurred for maintenance per unit of refinery output during an appropriate period approved or required by FEA including May 1973 (such as one or two years).

3. *Federal, State and local tax increase.* The "federal, state and local tax increase" category of increased non-product costs adopted today includes costs incurred in payment of new types of property, excise, franchise and other similar taxes such as license fees imposed since May 1973, as well as increases in the actual dollar amount of such taxes per unit of output incurred in the month of measurement over the amount per unit of output incurred in May 1973. As was proposed, federal, state or local income taxes are excluded from this category of increased non-product costs. Passthrough of the $2 per barrel tax imposed by the Commonwealth of Puerto Rico on each barrel of petroleum imported into and consumed in Puerto Rico is discussed separately in section V, below.

Refiners that, pursuant to generally accepted accounting practices historically and consistently applied by the firm concerned, treat taxes incurred at greater than monthly intervals on an accrual basis and prorate such costs over an appropriate period shall accrue such costs for purposes of calculating per unit non-product costs for the month of May 1973 and the month of measurement. Costs of taxes treated as incurred during a firm's fiscal year under the accrual provision of § 212.83(c)(2)(iii)(E) must not exceed the amounts of such costs actually paid or incurred during the fiscal year which includes May 1973 or which includes the month of measurement.

Refiners that, pursuant to generally accepted accounting practices historically and consistently applied by the firm concerned, do not treat the costs of taxes incurred on an accrual basis and do not prorate such costs shall compute the May 1973 per unit tax costs by adding all taxes incurred during the firm's fiscal year which included May 1973 and dividing by output during that period. Such refiners shall, however, compute the per unit tax cost for the month of measurement according to generally accepted accounting practices historically and consistently applied by the firm concerned.

For example, a refiner that, pursuant to generally accepted accounting practices historically and consistently applied by that firm, during the month of May 1973 and during the month of measurement accrued the costs of taxes incurred over its fiscal year shall compute "federal, state, and local tax increase" per unit of refinery output by computing the difference between (1) the accrued cost of taxes incurred per unit of refinery output for the month of measurement and (2) the accrued cost of taxes incurred per unit of refinery output for May 1973.

However, a refiner that, pursuant to generally accepted accounting practices historically and consistently applied by that firm, during the month of May 1973 and during the month of measurement did not accrue the costs of taxes incurred shall compute "federal, state, and local tax increase" per unit of refinery output by computing the difference between (1) the total actual cost incurred for taxes per unit of refinery output in the month of measurement and (2) the total actual cost incurred for such taxes per unit of refinery output during the firm's fiscal year which included May 1973.

4. *Overhead cost increase.* In its July 30 notice FEA indicated its intention to amend the regulations to permit the passthrough of as many types of increased non-product costs as would be easily auditable as directly related to refining operations. Based on its analysis of the comments received, FEA has decided to adopt another category of increased non-product costs: "overhead cost increase." This category includes increased costs of insurance, outside legal and accounting fees, and inter-refinery transportation costs directly attributable to refining operations.

C. REVISION OF CURRENT CATEGORIES OF NON-PRODUCT COST INCREASES

The regulations issued today adopt amendments to the current "refinery fuel cost increase" and "labor cost increase" categories of increased non-product costs. These amendments conform the computations in these categories to the standardized "output adjusted method," discussed above.

1. *Refinery fuel cost increase.* Prior to the regulations issued today, refinery fuel non-product cost increases were required to be calculated in terms of the rate of fuel usage (e.g., Btu's to refine one barrel of crude oil) during May 1973. A refiner that used fewer units of energy currently to refine a barrel of crude oil than in May 1973 was permitted to pass through a dollar amount of refinery fuel cost increase based upon its current per unit cost of refinery fuel and its May 1973 rate of fuel usage. This method of computing the amount of increased cost of refinery fuel was adopted to provide an incentive for fuel conservation. Thus, for refiners that have reduced their rate of fuel usage, this method permits an increased cost passthrough which is greater than the actual increased expenditure for refinery fuel. On the other hand, for refiners that have increased their rate of fuel usage, this method operates to prevent the passthrough of the full amount of the actual increased expenditure for refinery fuel.

The earlier basis for adoption of this method of computing "refinery fuel cost increase" was noted and the reason for for the proposed modification of the computation was explained in the July 30 notice, which stated in part:

> FEA's intent in using the rate of May 1973 fuel usage in lieu of the fuel usage in the month of measurement was to encourage refiners to use fewer btu's to refine a barrel of crude oil. Refiners were thus provided with an economic incentive to install equipment or make other capital investments to conserve energy used for refinery fuel. However, the proposed addition of "depreciation cost increase," should encourage energy conservation by permitting a dollar-for-dollar passthrough of such investment costs. It does not therefore appear any longer to be appropriate to permit refiners also to have an opportunity to recoup a bonus for increased efficiencies in refinery fuel usage in the refinery fuel cost increase category. Also, because use of desulfurization equipment typically requires increased rate of refinery fuel usage, the cost of which cannot currently be recovered to the extent that the current rate exceeds the rate in May 1973, the current regulations have tended to discourage installation of such equipment. (41 FR at 31865)

The regulations adopted today, as discussed above, adopt a new category of depreciation cost increase, which removes an aspect of the regulations that formerly discouraged investments for the purpose of fuel conservation. Accordingly, the amendments adopted today

generally provide for the computation of "refinery fuel cost increase" under § 212.83(c)(2)(iii)(E)(I) as the actual increased cost of refinery fuel per unit of current output, multiplied by units of current output. The former conservation incentive method of computing refinery fuel cost increase is, however, retained as an option for refiners that choose to exclude from their calculation of depreciation cost increase all depreciation associated with investments which effect fuel conservation.

Comments urging the retention of the refinery fuel conservation incentive suggested that a requirement to pass through refinery fuel cost savings to the market place, even with the addition of the "depreciation cost increase" category, would result in a decrease in the incentive to save fuel. Comments suggested that the elimination of the "refinery fuel incentive" would discourage refiner investment in fuel economy in light of alternative investment possibilities and that the removal of this incentive was not consistent with the intent of section 381 (a) of the Energy Policy and Conservation Act (Pub. L. 94–163, "EPCA") which directs the FEA to promote increased energy conservation and efficiency. Finally, it was urged that the removal of the refinery fuel incentive would be unfair to those refiners which had taken measures to conserve fuel in reliance on the regulatory incentive which had been afforded.

FEA believes that the adoption today of a "depreciation cost increase" category to enable refiners to recover increased depreciation costs provides generally an incentive to expend capital funds both to increase refinery output and efficiency, as discussed above. However, because of the special considerations that exist with respect to refinery fuel—particularly the higher priority of fuel conservation as opposed to other types of efficiency measures and the reliance which has been placed on the refinery fuel incentive regulations—FEA has concluded that refiners should be afforded an option to continue to calculate refinery fuel cost increase based on the refinery fuel conservation incentive.

In such cases, however, the "depreciation cost increase" category of increased non-product costs adopted today shall be calculated exclusive of any depreciation for capital investments which have operated to reduce the rate of refinery fuel usage below the May 1973 rate.

2. *Labor cost increase.* Prior to the regulations adopted today, refiners were permitted to recover a "labor cost increase" equal to the ratio of the wage rates paid in the month of measurement to the wage rates paid in May 1973, multiplied by the May 1973 payroll, or "base labor cost," and multiplied by a "productivity offset factor" to adjust for the increase in labor productivity since May 1973. (§ 212.83(c)(2)(iii)(E)(11))

Refiners were thus permitted to reflect in prices average wage rate increases since May 1973. However, because the total amount of increased labor costs was computed as though the number of employees was the same as in May 1973, no increased costs resulting from increasing numbers of employees could be reflected. This method of "labor cost increase" computation was adopted on the theory that new employees were generally associated with increased refinery production, which would offset associated payroll increases through increased sales volumes. As indicated in the July 30 notice

> • • • it now appears that more complex refinery facilities, with desulfurization equipment and complicated pollution control equipment, require refiners now to have more employees than they had for an equivalent level of output in May 1973. (41 FR at 31866)

Also, as labor efficiency can generally be increased only by capital investments, the "productivity offset factor" may have discouraged such investment by precluding a full return of the costs thereof.

The regulations issued today adopt a method of computation based on the increase in labor costs per unit of output in the month of measurement over the May 1973 labor costs per unit of output and, accordingly, eliminate the "productivity offset factor" as unnecessary. As amended, the labor cost increase computation will reflect increases in the number of employees since May 1973, as well as wage rate increases.

IV. Allocation of Increased Costs To Exempt Products

Under current regulations either of two alternative volumetric cost allocation formulae is permitted to be used to compute the amount of increased costs of crude oil attributable to prices for particular products or product categories.

One formula, adopted initially by FEA, allocates such costs according to the relative sales volumes of the products concerned, including sales attributable to products purchased as well as to products refined by the refiner concerned. This method of allocation requires generally that the amount of increased costs allocable each month to prices for a particular product or product category be determined by multiplying the total amount of increased cost of crude oil for a month of measurement by a ratio that consists of the volume of the product or product category in question estimated to be sold in the current month ("V_i^t"), divided by the volume of all petroleum products estimated to be sold in the current month ("V^t"), or "V_i^t/V^t".

The allocation of increased cost of crude oil by sales volume pursuant to the "V_i^t/V^t" cost allocation formula has the virtue of being easily calculated and audited, but it also has the effect of allocating a greater proportion of increased crude oil costs to those products where a refiner supplements its production with product purchased for resale than would be allocated if the refiner made no such purchases.

Due in part to certain price distortions resulting from use of this cost allocator, FEA on January 7, 1976 proposed to amend the regulations to require the increased cost of crude oil to be allocated to products on the basis of the relative volumes of such products refined by the refiner concerned to be sold in the current month ("R_i^t/R^t"). (41 FR 1680, January 9, 1976)

A number of comments were received from refiners objecting to the proposed mandatory use of the proposed method. They opposed the added complexity the new method would introduce, stated that the difference between the results obtained under the two methods was negligible, or maintained that it was not possible to segregate sales volumes in a particular month according to source—whether refined or purchased. Other refiners, however, maintained that the sales volume method of allocation had a negative impact on their pricing policies.

Based on the comments received, FEA decided in the rulemaking proceeding initiated by the January 9, 1976 notice to afford refiners the option of allocating the increased cost of crude oil to prices for particular products or product categories either by sales volume in the current month or by volume refined in the month of measurement. The alternative volume refined method of allocation, as adopted, requires generally that the amount of increased cost of crude oil allocable each month to a particular product or product category be determined by multiplying the total amount of increased cost of crude oil for a month of measurement by a ratio that consists of the volume of the product or product category in question refined by the refiner in the month of measurement ("R_i^t") divided by the volume of all products refined by the refiner in the month of measurement ("R^t"), or "R_i^t/R^t." Refiners were required, beginning with the allocation of the increased cost of crude oil incurred in January 1976 (for purposes of determining maximum allowable prices in February 1976), to make a one-time choice between the two methods of cost allocation. (41 FR 5111, February 4, 1976).

As FEA stated in the January 9, 1976 and July 30, 1976 notices, use of the term "V_i^u/V^u" introduces a certain amount of distortion into the allocation of increased costs of crude oil among products, particularly for refiners which purchase relatively large volumes of refined products. The amount of product purchased for resale increases both the numerator and the denominator of the "V_i^u/V^u" cost allocator fraction, and has the effect of allocating a greater proportion of increased crude oil costs to those products where a refiner supplements its production with product purchased for resale than would be allocated if the refiner made no such purchases.

During the period before exemption from regulation of any refined petroleum products, whether the "R" or "V" term was used did not substantially affect the extent to which increased costs were allocated to covered products, as opposed to exempt products. However, because of the distortions inherent in the use of the "V_i^u/V^u" cost allocator, which were discussed by FEA in proposing and adopting the alternative "R_i^t/R^t" cost allocator, and because the relative volume of exempt products to covered products in a refiner's output is now so great, in its July 30 notice FEA proposed to require that the allocation of increased crude oil costs and increased non-product costs to covered products produced by a refiner be computed only by use of the "R_i^t/R^t" cost allocated (that is, the total volume of a covered product category refined by the refiner from crude oil in the period "t" divided by the total volume of all covered products refined by the refiner from crude oil and all products other than covered products refined by the refiner from crude oil in the period "t").

As was generally proposed, the regulations adopted today will, as of March 1, 1977, require that the allocation of increased crude oil costs be computed only on the basis of the use of the volume refined, or the "R_i^t/R^t" cost allocation. This adoption of this allocator for increased crude oil costs will eliminate the distortions inherent in the allocation of crude oil costs by sales volume between covered products and an expanded list of exempt products which would otherwise result simply because a refiner purchases products for resale.

Increased non-product costs have been allocated only by the "V" factor since the adoption of the defined categories in December 1974. (39 FR 42368, December 5, 1974) FEA proposed the use of the "R" factor only for increased crude oil costs in January 1976 because increased costs of crude oil were the major share of all increased costs. However, FEA has concluded that the same allocator shall now be required to be used for increased non-product costs as is used for the increased cost of crude oil. Use of the "R" factor to allocate increased non-product costs as of March 1, 1976 will also eliminate distortions resulting from product purchases in allocating non-product costs between covered products and exempt products.

In order to facilitate the transition from the "V" to the "R" factor for product and non-product costs, refiners presently using the "V" allocator may continue to use that allocator through the month of February 1977, but may convert to the use of the "R" factor as of any time beginning with June 1976, when the first covered product was deregulated (residual fuel oil). This option to use the volume refined cost allocator as of June 1976 or thereafter, even if it were not chosen on February 1, 1976, is provided in order to insure that no refiner is precluded from allocating at least a pro rata volumetric share of its increased crude oil costs to the prices of products which remain under controls. Thus, to the extent that since June 1976 a refiner has purchased proportionately more exempt products than products which remain under controls, selection of the volume refined cost allocator will serve to avoid the disproportionate allocation of increased crude oil costs to exempt products which would otherwise result.

It was suggested that prices computed by the "R_i^t/R^t" cost allocator will be distorted by seasonal fluctuations in refinery output and by disruptions in refinery operations for maintenance or other reasons. The "R_i^t/R^t" cost allocator is adopted, however, in order generally to assure a more representative allocation of the increased cost of crude oil and to remove the artificial incentives for the purchase of products by refiners which are inherent in the use of a sales volume allocator. FEA believes that use of the volume refined allocator, together with the carryover of increased product and non-product costs provided for in § 212.83(e)(2), should serve generally to accomplish the allocation of such costs in a manner that should permit fairly uniform pricing practices to continue to be followed on a month-to-month basis, regardless of variations in refinery output or variations in sales volumes.

It was further suggested that the allocation of increased costs according to volumes of product refined does not allocate sufficient increased crude oil costs to higher value products, particularly gasoline, and therefore tends to distort historical pricing practices and inhibit recovery of increased costs. FEA finds merit in this suggestion. FEA has, however, proposed deregulation of gasoline. (41 FR 51832, November 24, 1976) If gasoline is not deregulated, FEA will consider issuance of a notice of proposed rulemaking to address this issue. Even if gasoline is deregulated, FEA will consider addressing this issue to be incorporated in the standby price regulations.

V. The Commonwealth of Puerto Rico Tax on Imported Crude Oil and Petroleum Products

On January 23, 1975, the President of the United States issued Proclamation 4341 that imposed supplemental import fees on crude oil and petroleum products imported into the United States. On March 27, 1975, the Commonwealth of Puerto Rico passed the Commonwealth of Puerto Rico Act No. 6 ("Act No. 6") that levied supplemental taxes substantially equivalent to the import fees provided by the United States Proclamation 4341. Both the import fees imposed by the United States Proclamation 4341 and the taxes imposed by Act No. 6 were in addition to a $.21 per barrel duty on crude oil and $.63 per barrel duty on petroleum products imposed on imports not brought in under duty free licences.

The Commonwealth of Puerto Rico decision to adopt Act No. 6, in the form of a "tax" based on the Commonwealth of Puerto Rico's constitutional powers to tax territorial business and consumption, was reached following a determination that license fees collected on imports into the Commonwealth of Puerto Rico pursuant to Presidential Proclamation 3279 could not lawfully be rebated to the Puerto Rican Treasury, as had been the case with respect to tariffs imposed by the United States on imports into the Commonwealth of Puerto Rico

As stated in the July 30 notice, FEA regulations do not specifically address the passthrough by refiners of the Puerto Rican supplemental taxes. However, as long as the Puerto Rican supplemental taxes and the United States supplemental fees were concurrently in force, the Puerto Rican taxes "took the place of" the United States fees. During that time the Puerto Rican levies, although legally "taxes" and not import "fees," were treated for purposes of FEA price regulations as the equivalent of import "fees" and includable in the cost of crude oil and petroleum products under §§ 212.82 and 212.83.

The President of the United States repealed Proclamation 4341, effective December 21, 1975. However, on December 22, 1975 the Commonwealth of Puerto Rico enacted the Commonwealth of Puerto Rico Department of Treasury Resolution No. 4 ("Resolution No. 4") that extended the supplemental portion of the Puerto Rican tax as imposed by Puerto Rican Act No. 6. Accordingly, since December 21, 1975 the Puerto Rican supplemental tax, as extended by Resolution No. 4, has not taken the place of a commensurate United States import fee.

FEA has determined that from December 21, 1975 through December 31, 1976 the taxes extended by Resolution No. 4 shall be treated as a continuation of the import "fees" which they were intended to replace when first enacted. Therefore, during that period such tax costs are properly regarded as an inceased cost of crude oil or petroleum products under §§ 212.82 and 212.83, to refiners that have paid such taxes.

Beginning with February 1977, refiners may pass through increased tax costs incurred beginning in January 1977 as an increased non-product cost, under § 212.83(c)(2)(iii)(E) of the regulations as amended today.

FEA proposed in this proceeding that the Puerto Rican supplemental taxes be treated as special local taxes on local consumption, to be passed through only in the prices of crude oil and petroleum products sold in the Commonwealth of Puerto Rico. More generally, FEA also requested comments on whether the regulations should be modified to permit taxes levied in a locality to be passed through in prices charged in that locality. FEA has tentatively concluded that the Puerto Rican supplemental tax is essentially a tax on consumption similar to a sales tax and that it would be appropriate for the tax to be passed through in the Commonwealth of Puerto Rico. Adoption of such an amendment is, however, being deferred in light of the proposal to exempt gasoline from price controls which, if it becomes effective, would largely moot this issue, and because, as discussed below, no amendment to provide generally for local passthrough of local taxes is being adopted at this time. Instead, the passthrough of local taxes in local prices will continue to be handled on a case-by-case basis through the exceptions process.

FEA acknowledges the burden that would be placed upon Puerto Rican consumers by a local passthrough of the supplemental tax and recognizes the extent to which the Commonwealth of Puerto Rico has stated that it relies upon the continued receipt of the revenue engendered by the tax, as extended by Resolution No. 4. It appears that the allocation of the Commonwealth of Puerto Rico supplemental tax, as extended in Resolution No. 4, to the prices of all products produced by refiners which incur the Puerto Rican tax, including products sold in the United States and in the Commonwealth of Puerto Rico, would tend to result in mainland United States consumers bearing the burden of taxes imposed by the Commonwealth of Puerto Rico. However, as a general matter, FEA is still considering whether the price regulations should regulate the price of refinery products so as to restrict the extension of the territorial effect of taxes imposed by one jurisdiction unduly into other jurisdictions.

VI. Allocation to Local Prices of Increased Local Taxes

As noted above, in its July 30, 1976 notice FEA invited comments on whether the equal application rule in § 212.83(h) of the regulations should be modified to permit taxes levied by a locality to be passed through in prices charged in that locality (or in prices charged for all products produced in a facility in that locality). FEA has concluded that, although such an amendment may be appropriate, action on this matter will be deferred at least until a determination concerning the exemption of gasoline from FEA price regulations has been made. Since such an exemption would largely moot this issue, an amendment does not appear to be warranted at this time in light of audit and other difficulties which such an amendment would entail.

Also, during July 1976 FEA amended the equal application rule in § 212.83(h) to permit "regional pricing" of gasoline with a differential of up to three cents per gallon permitted among regions (41 FR 30021, July 21, 1976), and this amendment provides some flexibility in this regard.

VII. Allocation of Other Increased Non-Product Costs

FEA also requested comments on whether some or all increased non-product costs should be permitted or required to be allocated directly to the specific product or product category with respect to which they are incurred. Since gasoline is the only major product remaining subject to regulation, FEA issued a notice of proposed rulemaking which considers that issue separately for gasoline. (41 FR 54774, December 15, 1976).

(Emergency Petroleum Allocation Act of 1973, Pub. L. 93-159, as amended, Pub. L. 93-511, Pub. L. 94-99, Pub. L. 94-133, Pub. L. 94-163, and Pub. L. 94-385; Federal Energy Administration Act of 1974, Pub. L. 93-275, as amended, Pub. L. 94-385; Energy Policy and Conservation Act, Pub. L. 94-163, as amended, Pub. L. 94-385; E.O. 11790, 39 FR 23185.)

In consideration of the foregoing, Part 212 of Chapter II, Title 10 of the Code of Federal Regulations are amended as set forth below, effective January 1, 1977.

Issued in Washington, D.C., January 19, 1977.

David G. Wilson,
Acting General Counsel,
Federal Energy Administration.

1. Section 212.83(c)(2) is amended by revising the formula for "A_i'" in paragraph (c)(2)(iii)(C) and the "N" factor in (c)(2)(iii)(E) to read as follows:

§ 212.83 Price rule.

* * * * *

(c) *Allocation of increased costs.* * * *
(2) *Formulae.* * * *
(iii) *Definitions.* * * *
(C) *The "A" factor.*

* * * * *

(I) Until March 1, 1977 but not thereafter:

$$A_i{}^t = Q^t\left(\frac{C^t}{Q^t} - \frac{C^o}{Q^o}\right)\left(\frac{V_i{}^u}{V^u}\right)$$

and

(II) Beginning not later than March 1, 1977 or, at the option of each refiner, beginning as of any month prior thereto but not before June 1, 1976:

$$A_i{}^t = Q^t\left(\frac{C^t}{Q^t} - \frac{C^o}{Q^o}\right)\left(\frac{R_i{}^t}{R^t}\right)$$

* * * * *

(E) *The "N" factor.*

$$N_i = N_i{}^t + N_i{}^o + N_i{}^r$$

"N_i" is, for i=1, i=2, i=3, and i=4, the increased nonproduct costs attributable to the specific covered product or products of the type "i" incurred on or after January 1, 1976 and prior to or during the period "s" and not recovered in sales of that product through the period "t" and the increased non-product costs attributable to the specific covered product or products of the type "i" incurred on or after January 1, 1976 in the period "t."

(I) Until March 1, 1977 but not thereafter:

$$N_i{}^t = E^t\left(\frac{V_i{}^u}{V^u}\right) + F_i{}^t$$

and

(II) Beginning not later than March 1, 1977 or, at the option of each refiner, beginning as of any month prior thereto but not before June 1, 1976:

$$N_i{}^t = E^t\left(\frac{R_i{}^t}{R^t}\right) + F_i{}^t$$

"$N_i{}^t$" is the total increased non-product costs attributable to the specific covered product or products of the type "i" incurred in the period "t."
Where:

E^t=the total increased non-product costs (excluding marketing cost increase, which is included in "$F_i{}^t$") incurred during the period "t"; provided that such costs are included only to the extent that such costs are attributable to refining operations during the period "t" under the generally accepted accounting procedures historically and consistently applied by the firm concerned, and are not included in computing May 15, 1973 prices or in computing increased product costs. Costs paid or incurred periodically but less frequently than monthly must be charged as incurred over the entire period to which they apply in computing non-product costs for May 1973 and must be charged according to the generally accepted accounting practices historically and consistently applied by the firm concerned in computing month of measurement increased costs. Costs paid or incurred each month but in significantly different amounts independent of output variations must be charged over the entire period to which they apply in computing non-product costs for May 1973 and must be charged according to the generally accepted accounting practices historically and consistently applied by the firm concerned in computing month of measurement costs. Except for costs which are determined by FEA to typically occur at intervals of greater than one year, the costs treated as incurred during a firm's fiscal year shall not exceed the amounts of such costs actually paid or incurred during that fiscal year.

$V_i{}^u$=The total volume of a specific covered product or products of the type "i" (other than propane, which shall be included to the extent that it was refined by the refiner from crude oil) estimated to be sold in the period "u."

V^u=The total volume of all covered products (other than propane, which shall be included to the extent that it was refined by the refiner from crude oil) and all products refined from crude oil other than covered products estimated to be sold in the period "u."

$R_i{}^t$=The total volume of a specific product of the type "i" refined by the refiner from crude oil in the period "t."

R^t=The total volume of all products refined by the refiner from crude oil in the period "t."

As of January 1, 1977 refiners shall compute "E^t" (for costs incurred during January 1977 and thereafter and used in calculating maximum allowable prices during February 1977 and thereafter) by adding the amounts calculated by applying the following formula separately to § 212.83(c)(2)(iii)(E) paragraphs (I) through (X) below.

$$E_n{}^t = R^t\left(\frac{C_n{}^t}{R^t} - \frac{C_n{}^o}{R^o}\right)$$

$E_n{}^t$ is the total increased non-product costs (excluding marketing cost increase, which is included in "$F_i{}^t$") of the type "n" incurred during the period "t"; provided that such costs are included only to the extent that such costs are attributable to refining operations during the period "t" under the generally accepted accounting practices historically and consistently applied by the firm concerned or as otherwise provided in this § 212.83(c)(2)(iii)(E) and are not included in computing May 15, 1973 prices or in computing increased product costs.
Where:

"n" references the particular types of increased non-product costs, and for purposes of paragraphs (I) through (X) is respectively refinery fuel, labor, additive, utility, interest, container, tax, maintenance, depreciation, and overhead cost increase.

R^t=The total volume of all products refined by the refiner from crude oil in the period "t."

R^o=The total volume of all products refined by the refiner from crude oil in the period "o."

$C_n{}^t$=The total dollar amount of the particular increased non-product cost of the type "n" incurred in the period "t."

$C_n{}^o$=The total dollar amount of the particular increased non-product cost of the type "n" incurred in the period "o."

(I) *Refinery fuel cost increase.* As of January 1, 1977 (for costs incurred during January 1977 and thereafter and used in calculating maximum allowable prices during February 1977 and thereafter) each refiner shall elect to compute the refinery fuel cost increase according to paragraph (I)(aa) below and depreciation cost increase according to paragraph (IX)(aa) below or to compute refinery fuel cost increase according to paragraph (I)(bb) below and depreciation cost increase according to paragraph (IX)(bb) below. *Provided,* That once such election of a computation method is made, such method shall continue to be used.

(aa) Refinery fuel cost increase for refiners that elect to include in the computation of total increased non-product costs the depreciation costs associated with capital investments which effect fuel conservation is computed by applying the formula for "$E_n{}^t$" above. For purposes of this computation "C" refers to the dollar amount of costs incurred for refinery fuel.

(bb) Refinery fuel cost increase for refiners that elect to exclude from the computation of total increased non-product costs the depreciation costs associated with capital investments which effect fuel conservation is the base refinery fuel usage multiplied by the throughput for the month of measurement, and multiplied by the amount which represents the difference between the average refinery fuel cost rate in the month of measurement and the average refinery fuel cost rate in the month of May 1973, where:

"Average refinery fuel cost rate" means the weighted average cost of refinery fuel per unit of energy (e.g., dollars per million British Thermal Units (Btu)). If the calculation of refinery fuel costs is not feasible in energy units, a refiner may substitute a method that is more reasonably consistent with the data available. In such case, however, the refiner must prepare a schedule justifying the alternative method of calculation and explaining why the results represent the average refinery fuel cost rate;

"Base refinery fuel usage"' means the amount of refinery fuel, in units of energy (e.g., million Btu's) used per barrel of refinery throughput during the month of May 1973. If the calculation of refinery fuel costs is not feasible in energy units, the refiner may substitute a method that is more reasonably consistent with the data available. In such cases, however, the refiner must prepare a schedule justifying the alternative method of calculation and explaining why the results represent the base refinery fuel usage; and

"Throughput"·means the volume of crude oil, unfinished oils, and natural gas liquids refined during the time period specified.

Refiners shall maintain records of the volume and cost of covered products purchased or landed that are consumed as refinery fuel.

(II) *Labor cost increase.* Labor cost increase is computed by applying the formula for "$E_n{}^t$" above. For purposes of this computation "C" refers to the total dollar amount of direct and indirect remuneration or inducement for personal services which are reasonably subject to valuation for those personnel employed at the refinery or those personnel directly involved in refinery operations, including that portion of the costs of any contract between a refiner and an outside entity attributable to personnel other than employees that perform such services. No amount included in maintenance cost increase may be included in labor cost increase. The calculation must be based on the historical accounting practices employed by the refiner and must be substantiated by a supporting document which summarizes the personnel considered in the calculation and the date of any remuneration increases.

(III) *Additive cost increase.* Additive cost increase is computed by applying the formula for "$E_n{}^t$" above. For purposes of this computation "C" refers to the total dollar amount of costs incurred for materials and compounds, including catalyst and process chemicals which were not covered products as of May 31, 1976 and which are added to or blended with crude oil or covered products during the refining process.

(IV) *Utility cost increase.* Utility cost increase is computed by applying the formula for "$E_n{}^t$" above. For purposes of this computation "C" refers to the dollar amount of costs incurred for utilities.

(V) *Interest cost increase.* Interest cost increase is computed by applying the formula for "$E_n{}^t$" above. For purposes of this computation "C" refers to the dollar amount of costs incurred for interest.

(VI) *Container cost increase.* Container cost increase is computed by applying the formula for "$E_n{}^t$" above. For purposes of this computation "C" refers to the dollar amount of costs incurred for containers, such as barrels, drums, tubes, cans, jars, or bottles, used by the refiner for storing or packaging products which were covered products as of May 31, 1976.

(VII) *Federal, state, and local tax cost increase.* (aa) Federal, state and local tax cost increase is computed by applying the formula for "$E_n{}^t$" above. For purposes of this computation "C" refers to the dollar amount of federal, state, and local property, excise, franchise and other similar taxes incurred. Federal, state, and local income taxes are not includable in this amount.

(bb) The tax cost increase ("$E_n{}^t$") for taxes that are paid or incurred at greater than monthly intervals shall be computed as follows:

(AA) Taxes that are paid or incurred at greater than monthly intervals and are treated, pursuant to generally accepted accounting practices historically and consistently applied by the firm concerned, on an accrual basis and are prorated shall be accrued and prorated for purposes of calculating per unit non-product costs for the month of May 1973 ("$C_n{}^o/R^o$") and the month of measurement ("$C_n{}^t/R^t$").

(BB) Taxes that are paid or incurred at greater than monthly intervals and are not treated on an accrual basis and prorated over an appropriate period shall be computed for purposes of calculating per unit non-product costs for the month of May 1973 ("$C_n{}^o/R^o$") by adding all such taxes paid or incurred during the firm's fiscal year which includes May 1973 and dividing by the firm's output during that period. Taxes that are paid or incurred at greater than monthly intervals and are not treated on an accrual basis and prorated over an appropriate period shall be computed for purposes of calculating per unit non-product costs for the month of measurement ("$C_n{}^t/R^t$") according to the generally accepted accounting practices historically and consistently applied by the firm concerned.

(cc) The Commonwealth of Puerto Rico supplemental $2 tax shall be treated as a cost of crude oil or petroleum products under §§ 212.82 and 212.83 from December 21, 1975 through December 31, 1976.

(VIII) *Maintenance cost increase.* Maintenance cost increase is computed by applying the formula for "$E_n{}^t$" above. For purposes of this computation "C" is the dollar amount of operating cost attributable to refinery maintenance operations. Maintenance cost increase includes the cost of contract maintenance. The maintenance cost increase for maintenance expenses that are paid or incurred at greater than monthly intervals shall be computed as follows:

(aa) Maintenance expenses that are paid or incurred at greater than monthly intervals and are not treated on an accrual basis and prorated over an appropriate period shall be computed for purposes of calculating per propriate period, as permitted or required in unit non-product costs for the month of May 1973 ("$C_n{}^o/R^o$") by adding all maintenance expenses paid or incurred during the appropriate period, as permitted or required in writing by the director of compliance for the FEA region in which each firm is located, and dividing by output during that period. Maintenance expenses that are paid or incured at greater than monthly intervals and are not treated on an accrual basis and prorated over an appropriate period shall be computed for purposes of calculating per unit non-product costs for the month of measurement ("$C_n{}^t/R^t$") according to the generally accepted accounting practices historically and consistently applied by the firm concerned.

(IX) *Depreciation cost increase.* (aa) Depreciation cost increase is computed by applying the formula for "$E_n{}^t$" above. For purposes of this computation "C" is the cost attributable to the depreciation of refinery and storage capacity and equipment installed; provided that such costs are computed according to the generally accepted accounting practices historically and consistently applied by the firm concerned and are included only to the extent that such costs are not otherwise covered by this section. If Form 10-K is filed with the Securities and Exchange Commission or an analogous report is filed with a state regulatory agency, the amount computed for depreciation cost increase must be consistent with the figures used in preparing Form 10-K or such analogous report. Accounting procedures used to compute depreciation cost increase by refiners which do not file such form or report, or on whose behalf such form or report is not filed, must be calculated according to generally accepted accounting practices historically and consistently applied by the firm concerned for certified annual financial reports prepared by an independent accounting firm. No capital investments may be included in non-product costs as expenses; all such investments must be capitalized and depreciated and included in the computation of "E_n" for depreciation cost increase.

(bb) Refiners that elect to compute the refinery fuel cost increase according to paragraph (I)(bb) above shall compute depreciation cost increase according to paragraph (IX)(aa) above but must exclude from "$C_n{}^t$" the depreciation costs associated with capital investments which effect fuel conservation.

(X) *Overhead cost increase.* Overhead cost increase is computed by applying the formula for "$E_n{}^t$" above. For purposes of this computation "C" is the dollar amount of costs of insurance, outside legal and accounting fees, and inter-refinery transportation costs directly attributable to refinery operations, provided that such costs are computed according to the generally accepted accounting practices and historically and consistently applied by the firm for certified annual reports.

PART 212—MANDATORY PETROLEUM PRICE REGULATIONS

Pricing of Leaded and Unleaded Gasoline by Refiners

I. INTRODUCTION

On December 13, 1976, the Federal Energy Administration ("FEA") issued a notice of proposed rulemaking and public hearing (41 FR 54774, December 15, 1976) in which the FEA proposed to amend the price regulations (10 CFR Part 212, Subparts E and H) regarding the pricing by refiners of leaded and unleaded gasoline. Twenty-three written comments were received in response to the notice of proposed rulemaking, and oral presentations were made by ten persons at the public hearing held on January 5, 1977. All of these comments and presentations were considered by the FEA, as well as other information available to the FEA, in arriving at the amendments adopted today, which become effective February 1, 1977.

Certain of the amendments which were proposed on the pricing of gasoline are being adopted and others are not. Those which are adopted are largely unchanged from the proposed amendments. The formula for calculating increased costs for gasoline, No. 2 oils and aviation jet fuel is being amended so it will conform to that used for general refinery products and will result in a total dollar amount of increased costs permitted to be recovered through sales of each product. The amendment to permit the total amount of increased costs attributable to gasoline to be allocated without restriction among types and grades of gasoline is also adopted.

The proposal with respect to a separate calculation of increased costs of purchased product for each type and grade of gasoline is not being adopted and action on the proposed amendment with respect to increased non-product costs attributable to unleaded gasoline is deferred.

Although the FEA continues to believe that the exemption of motor gasoline from the Mandatory Petroleum Allocation and Price Regulations represents the best solution to the problems in this area, these amendments should provide greater flexibility in the pricing of gasoline should an exemption not become effective. If an exemption does become effective, the amendments will form part of the stand-by regulatory framework.

II. CALCULATION OF PRICES FOR GASOLINE

Application of the current pricing formula for No. 2 oils, gasoline and aviation jet fuel, found in § 212.83(c)(2)(i), results in a single per unit increment which may be applied in determining maximum allowable prices, rather than in a total dollar amount of increased costs which may be recovered through sales of the product, or product category, as is the case under the formula for general refinery products. One reason that the current formula for No. 2 oils, gasoline, and aviation jet fuel was originally written in this manner (for No. 2 oils and gasoline) was that, with the rule which then limited price increases for those products to one per month, a single application of the formula yielded the maximum lawful price for the product concerned for each month. Because that rule has since been deleted, the per unit increment formula is no longer appropriate on that basis.

A second reason for requiring a single per unit calculation of increased costs was that the products to which this formula applied each represented a single product to which the same per unit increment of increased costs was to be applied, rather than a group of products among which a total amount of increased costs could be freely allocated. With today's amendment to § 212.83(c)(1)(i)(B), discussed more fully below, which permits unrestricted allocation of increased costs among types and grades of gasoline, the category gasoline becomes analogous to the category of general refinery products, and increased costs for gasoline therefore should be calculated accordingly, as a total dollar amount.

The FEA therefore amends the pricing formula for No. 2 oils, aviation jet fuel, and gasoline found in § 212.83(c)(2)(i) to conform to the formula for general refinery products found in § 212.83(c)(2)(ii). This means that each covered product or group of covered products will be priced according to the same formula. A separate calculation will continue to be made for each product or group of products. Although increased costs will now be calculated according to the same formula for all products, the two separate sections (§§ 212.83(c)(2)(i) and 212.83(c)(2)(ii)) will be retained in order to avoid the need to redesignate existing cross-references in other sections of the regulations.

As noted above, the rule providing for equal application of increased costs as applied to the pricing of various types and grades of gasoline is also amended to permit a refiner to designate specific product categories within gasoline which reflect different types (unleaded gasoline as opposed to leaded gasoline) and grades (gasoline with different octane numbers) and to apportion increased costs among these categories of gasoline as it deems appropriate. This amendment will permit greater flexibility in gasoline pricing and should permit a restructing of gasoline pricing which is more consistent with today's market. The general provisions of the equal application rule in § 212.83(h) will continue to apply to each specific category of gasoline.

In this rulemaking proceeding, it was also proposed to amend § 212.83(c)(2)(iii)(D) to permit a separate calculation of increased costs for each type and grade of gasoline purchased by refiners. The purpose of this proposal was to more accurately reflect levels of increased costs where a shift in the product mix being purchased, from the mix that was being purchased in May 1973, might otherwise result in distortions. Comments received in the rulemaking proceeding, however, have led FEA to conclude that distortions resulting from use of the present formula are minimal, if any, and that adoption of the proposed amendment would have resulted in unwarranted additional complexity.

III. PRICING OF UNLEADED GASOLINE

FEA also proposed two amendments which, taken together, would have replaced the current rule for the pricing of unleaded gasoline. The revised interim price rule now in effect provides, for refiners which did not sell unleaded gasoline on May 15, 1973 or within the 30-day period preceding that date, that for purposes of determining maximum allowable prices of unleaded gasoline, the weighted average price at which unleaded gasoline was sold to the class of purchaser concerned on May 15, 1973 is deemed to be not in excess of the weighted average price at which leaded gasoline of the same or nearest octane number had been sold to the same class of purchaser, plus one cent per gallon.

The FEA proposed to amend the refiner price regulations to fix the May 15, 1973 "imputed price" for unleaded gasoline at the weighted average price to the class of purchaser concerned of leaded gasoline of the same or nearest octane number. In addition, it was proposed to permit all of the increased non-product costs specifically attributable to the refining of unleaded gasoline to be allocated directly to gasoline prices. This, in conjunction with the proposal to permit free allocation of increased costs attributable to gasoline among types and grades of gasoline, would have permitted the price of unleaded gasoline to more accurately reflect the additional costs of refining unleaded gasoline.

Both the written comments and the oral presentations objected to the removal of the one cent per gallon increment in the imputed May 15, 1973 price for unleaded gasoline. The basis for the objection was that the proposal would reduce the historic profitability of gasoline, more particularly so in light of the continuing shift from premium gasoline, with its historically higher profit margin. The comments also brought out the fact that on May 15, 1973, some refiners were selling unleaded gasoline at prices equal to or less than the price of leaded regular gasoline because of pricing decisions involving test marketing considerations rather than cost data, while most refiners who were selling unleaded gasoline on May 15, 1973, were selling it at a price in excess of the price of leaded gasoline of the same or nearest octane number plus one cent.

There was widespread support for the proposal to permit the allocation to gasoline of increased non-product costs attributable to unleaded gasoline. Specific comments were also requested on whether increased non-product costs attributable to all types and grades of gasoline should be permitted to be allocated to gasoline, and there was also substantial support for this alternative.

However, opinion varied widely on the best mechanism for achieving this goal. Additionally, many of the comments suggested extending the reallocation of increased costs to gasoline to include reallocation of increased product costs; i.e., to increase the proportion of increased costs permitted to be allocated to gasoline.

Because of the importance and complexity of the issues raised, the FEA has determined not to adopt the proposed amendment, but instead to consider making it the subject of a further rulemaking in order that all of the issues concerning the allocation of increased costs to gasoline may be addressed directly.

Therefore, the imputed May 15, 1973 price for unleaded gasoline will remain at no more than one cent per gallon over the May 15, 1973 price of leaded gasoline of the same or nearest octane number, as that amount was initially chosen as an estimate of the additional costs associated with refining unleaded gasoline. However, that regulation is being modified to provide refiners the option of using this imputed May 15, 1973 price or their actual weighted average May 15, 1973 price to the class of purchaser concerned, in the interest of greater uniformity in the pricing of unleaded gasoline, and to remove the anomalies which have resulted for refiners that were test marketing unleaded gasoline in May 1973.

(Emergency Petroleum Allocation Act of 1973, Pub. L. 93-159, as amended, Pub. L. 93-511, Pub. L. 94-99, Pub. L. 94-133, Pub. L. 94-163, and Pub. L. 94-385; Federal Energy Administration Act of 1974, Pub. L. 93-275, as amended, Pub L. 94-385; Energy Policy and Conservation Act, Pub. L. 94-63, as amended, Pub. L. 94-385; E.O. 11790, 39 FR 23185).

In consideration of the foregoing, Part 212 of Chapter II of Title 10 Code of Federal Regulations is amended as follows, effective February 1, 1977.

Issued in Washington, D.C., January 19, 1977.

DAVID G. WILSON,
Acting General Counsel,
Federal Energy Administration.

1. Section 212.83(c)(1)(i) is renumbered § 212.83(c)(1)(i)(A) and a new § 212.83(c)(1)(i)(B) is added, paragraph (c)(2)(i) is amended, and (c)(2)(iii)(B) is amended as follows:

§ 212.83 Price rule.

* * * * *

(c) *Allocation of increased costs.* * * *

(1) *Allocation of increased costs incurred in the period "t"-(i) No. 2 oils, aviation jet fuel and gasoline.* * * *

(i) * * *

(B) Notwithstanding any other provision of this Subpart, for purposes of this section, a refiner, upon notice to and unless and until disapproved by the FEA, may designate as categories within the product gasoline different types (unleaded gasoline as differentiated from leaded gasoline) and grades (differentiated by octane number), if the categories so designated by the refiner represent discrete gasoline types and grades that have been consistently and historically differentiated by that refiner. In apportioning the total amount of increased costs allocable to gasoline among categories of gasoline, a refiner may apportion amounts of increased costs to a particular category of gasoline in whatever amounts it deems appropriate. The notice required by this paragraph shall be sent to the Deputy Assistant Administrator for Compliance.

(2) *Formulae—(i) No. 2 oils, aviation jet fuel, and gasoline.* For No. 2 oils, aviation jet fuel, and gasoline (i=1, i=2, and i=3):

$$d_i^u = A_i + B_i + N_i - G_i' \pm H_i^u$$

* * * * *

(iii) *Definitions* * * *

(B) *The "D" factors.*

d_i^u = The total dollar amount a refiner may apportion in the period "u" to No. 2 oils (i=1); aviation jet fuel (i=2); or gasoline (i=3). The formula for d_i^u must be computed separately for i=1, for i=2, and for i=3.

* * * * *

2. Section 212.112 (a) and (b)(1) are amended to read as follows:

§ 212.112 Unleaded gasoline.

(a) *Scope.* This section prescribes the method for calculating the maximum price which may be charged in sales of unleaded gasoline by all refiners, and by resellers, reseller-retailers and retailers which did not sell unleaded gasoline on May 15, 1973, or within the 30-day period prior thereto.

* * * * *

(b) *Rule.* * * *

(1) for purposes of determining the weighted average price at which unleaded gasoline was lawfully priced in transactions with the class of purchaser concerned on May 15, 1973 in order to calculate the "maximum allowable price" as defined in § 212.82 a refiner shall use either a price not in excess of the weighted average price at which leaded gasoline of the same or nearest octane number was lawfully priced by it in transactions with that class of purchaser on May 15, 1973, computed in accordance with the provisions of § 212.83(a), plus 1 cent per gallon; or the weighted average price at which unleaded gasoline was lawfully priced in transactions with the class of purchaser concerned on May 15, 1973, computed in accordance with the provisions of § 212.83(a); and

[FR Doc.77-2431 Filed 1-21-77;11:47 am]

PART 211—MANDATORY PETROLEUM ALLOCATION REGULATIONS

Emergency Amendment of Refinery Yield Control Program

The Federal Energy Administration ("FEA") hereby adopts on an emergency basis an amendment, effective immediately, to § 211.71 of the Mandatory Petroleum Allocation Regulations (10 CFR Part 211). The purpose of this amendment is to provide FEA the regulatory authority to require refiners that refine and supply kerosene-base jet fuel to areas of the country either experiencing or having the potential to experience shortages of No. 1 fuel oil to adjust their yield of kerosene-base jet fuel so as to reduce their allocation fraction for that product, thereby increasing their yields and supplies of No. 1 fuel oil. This authority would be exercised by FEA through the issuance of orders to specific refiners.

Severely cold weather conditions throughout the nation this winter have produced a record level demand for middle distillates, particularly No. 1 fuel oil, which is used primarily for heating homes equipped with outdoor fuel storage facilities exposed to cold temperatures and for blending with No. 2 fuel oil when temperatures are below 25° F. The industry's ability to respond to the heavy demand for No. 1 fuel oil, particularly in the North Central region, has been impeded by the freezing of the Mississippi and Ohio Rivers and Lake Michigan, which are the principal barge distribution routes; a shortage of railroad tank cars; and a reduction in Canadian exports of crude oil to the Northern Tier states. Stocks of No. 1 fuel oil in the affected region have been declining at a precipitous rate, causing or having the potential to cause spot shortages in some areas. The situation appears most acut in Minnesota, Wisconsin, Michigan and North Dakota, where temperatures have been eighteen percent colder than normal and thirty-three percent colder than last winter, requiring an earlier and faster drawdown of inventories. These states are potentially threatened with serious shortages of No. 1 fuel oil which FEA believes could create severe hardships for users of this product if the current colder than normal weather continues.

Due to this situation, the state energy offices in Minnesota, Wisconsin, Michigan and North Dakota have requested that FEA take action to increase the supply of No. 1 fuel oil in their areas. Additionally, FEA has received information from most refiners that supply the affected states with kerosene-base jet fuel, which may be substituted for No. 1 fuel oil, that, if ordered to reduce their production of kerosene-base jet fuel, the result would be an immediate increase in production and available supplies of No. 1 fuel oil.

Current FEA regulations do not authorize FEA to issue direct orders to specified refiners to increase their yields of a particular product to alleviate the type of supply conditions that have arisen this winter with respect to No. 1 fuel oil. This emergency amendment is, therefore, being promulgated to provide FEA with the additional authority needed to deal in the most effective manner with the serious situation which presently exists. In particular, this amendment will allow FEA to order a specific refiner to adjust its yield of kerosene-base jet fuel to a level that permits it to supply that product at a specified allocation fraction, thereby permitting an increase in its current production of light fuel oil.

FEA believes that civil air carriers and other users of kerosene-base jet fuel will

not, on balance, be adversely affected to any significant degree by the measures contemplated by this amendment because of their ability to purchase jet fuel in other geographical regions of the country not experiencing shortage conditions. Although minor short-term supply difficulties could occur, FEA believes that overall supply levels for users of kerosene-base jet fuel can be generally maintained so as to avert most problems, particularly in light of the substantially greater degree of flexibility as to supply sources available to these users compared to users of No. 1 fuel oil. In light of these considerations, FEA believes that this action is required to provide for the protection of the public health, safety and welfare, and to assure the equitable distribution of petroleum products among all regions and areas of the country and among all users.

FEA is adopting this emergency amendment pursuant to its authority to exercise direct controls on refinery operations under section 14 of Emergency Petroleum Allocation Act of 1973, as amended ("EPAA"), which was added to the EPAA by section 457 of the Energy Policy and Conservation Act (Pub. L. 94-163). Section 14 of the EPAA provides as follows:

Sec. 14. The President may by amendment to the regulation under section 4(a) of this Act or by order, as may be consistent with the attainment, to the maximum extent practicable, of the objectives specified in section 4(b)(1) of this Act, require adjustments in the operations of any refinery in the United States with respect to the proportions of residual fuel oil or any refined petroleum product produced through such operations if he determines such adjustments are necessary to assure the production of residual fuel oil or any refined petroleum product in such proportions as are necessary or appropriate to provide for the attainment, to the maximum extent practicable, the objectives specified in section 4(b)(1).

FEA is also considering the advisability of issuing regulations to extend its authority to cover refinery yield of No. 2 heating oil, under procedures similar to those made effective today as to No. 1 heating oil. In this connection, therefore, FEA requests that comments address whether further amendments in this regard would be appropriate to authorize FEA to meet any potential regional shortages of No. 2 heating oil for this heating season.

This amendment is being issued on an emergency basis so that FEA may respond expeditiously to the critical shortages or potential shortages of No. 1 fuel oil in certain areas of the nation. If this amendment were not adopted until after notice and a hearing, it could not be effective until after the coldest portion of the heating season, long after potential shortages of No. 1 fuel oil could have created hardships which could have been prevented or minimized by an immediate effective date. FEA therefore finds that strict compliance with the notice requirements of section 7(i)(1)(B) of the Federal Energy Administration Act of 1974, as amended ("FEAA"), Pub. L. 93-275, Pub. L. 94-385, could cause serious harm and injury to the public health, safety and welfare, and the notice requirements of that section are hereby waived.

Section 7(c)(1) of the FEAA provides that FEA shall, before promulgating proposed regulations affecting the quality of the environment, provide a period of not less than five working days during which the Administrator of the Environmental Protection Agency ("EPA") may provide written comments concerning the impact of such regulations on the quality of the environment. Such comments are required to be published concurrently with or as part of the notice of proposed rulemaking.

Under section 7(c)(2) of the FEAA, the prior review required by section 7(c)(1) may be waived for a period of 14 days if there is an emergency situation which requires taking action at a date earlier than would permit the EPA the five day opportunity for prior comment required under section 7(c)(1). Notice of any such waiver must be given to the EPA and filed with the FEDERAL REGISTER with the notice of proposed or final FEA action and must include an explanation of the reasons for such waiver together with supporting data and factual background information.

Pursuant to section 7(c)(2) of the FEAA, FEA hereby waives the requirements of section 7(c)(1) of the FEAA concerning prior review by EPA of the environmental impact of this emergency rulemaking. This waiver is based on an emergency situation which, as explained above, mandates that FEA be able immediately to act to divert production of kerosene-base jet fuel for use as No. 1 fuel oil in areas of the country experiencing severe or potentially severe shortages of that product. A copy of this emergency amendment has been sent concurrent with its issuance to the Administrator of the EPA for his comments.

In accordance with Executive Order 11821 and OMB Circular A-107, FEA is considering the inflationary impact of this proposal.

Because this amendment is being issued on an emergency basis, an opportunity for oral presentation of views is not possible prior to its implementation. A public hearing, however, will be held beginning at 9:30 a.m., e.s.t., on Tuesday, February 8, 1977, in Room 2105, 2000 M Street, NW., Washington, D.C., to receive comments from interested persons. Any person who has an interest in the subject of the hearing, or who is a representative of a group or class of persons which has an interest in the subject of the hearing, may make a written request for an opportunity to make an oral presentation. Such a request should be directed to Executive Communications, FEA, 1200 Pennsylvania Avenue, NW., Washington, D.C. 20461, and must be received before 4:30 p.m., e.s.t., on Thursday, February 3, 1977. Such a request may be hand delivered to Room 3309, Federal Building, 1200 Pennsylvania Avenue, NW., Washington, D.C., between the hours of 8:00 a.m. and 4:30 p.m., e.s.t., Monday through Friday, except Federal holidays. The person making the request should be prepared to describe the interest concerned; if appropriate, to state why he or she is a proper representative of a group or class of persons which has such an interest; and to give a concise summary of the proposed oral presentation and a phone number where he or she may be contacted through Friday, February 4, 1977. Each person selected to be heard will be so notified by FEA before 5:30 p.m., e.s.t., Friday, February 4, 1977, and must submit 50 copies of his or her statement to the Office of Allocation Regulation Development, FEA, Room 2214, 2000 M Street, NW., Washington, D.C. 20461, before 9:00 a.m., e.s.t., Tuesday, February 8, 1977.

FEA reserves the right to select the persons to be heard at the hearing, to schedule their respective presentations, and to establish the procedures governing the conduct of the hearing. Each presentation may be limited, based on the number of persons requesting to be heard.

An FEA official will be designated to preside at the hearing. It will not be a judicial or evidentiary-type hearing. Questions may be asked only by those conducting the hearing, and there will be no cross-examination of persons presenting statements. At the conclusion of all initial oral statements, each person who has made an oral statement will be given the opportunity, if he or she so desires, to make a rebuttal statement. The rebuttal statements will be given in the order in which the initial statements were made and will be subject to time limitations.

Any interested person may submit questions, to be asked of any person making a statement at the hearing, to Executive Communications, FEA, before 4:30 p.m., e.s.t., Monday, February 7, 1977. Any person who makes an oral statement and who wishes to ask a question at the hearing may submit the question, in writing, to the presiding officer. FEA or the presiding officer, if the question is submitted at the hearing, will determine whether the question is relevant, and whether time limitations permit it to be presented for response.

Any further procedural rules needed for the proper conduct of the hearing will be announced by the presiding officer.

A transcript of the hearing will be made and the entire record of the hearing, including the transcript, will be retained by FEA and made available for inspection at the FEA Freedom of Information Office, Room 2107, Federal Building, 1200 Pennsylvania Avenue, NW., Washington, D.C., between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays. Anyone may purchase a copy of the transcript from the reporter.

Interested persons are invited to submit data, views, or arguments with respect to this emergency amendment to Executive Communications, FEA, Box KT, Washington, D.C. 20461.

Comments should be identified on the outside envelope and on documents submitted to Executive Communications, FEA, with the designation "Refinery Yield of No. 1 Fuel Oil." Fifteen copies should be submitted. All comments received by Friday, February 11, 1977, and all relevant information, will be considered by FEA.

Any information or data considered by the person furnishing it to be confidential must be so identified and submitted in writing, in accordance with the procedures stated in 10 CFR 205.9(f). FEA reserves the right to determine the confidential status of the information or data and to treat it according to its determination.

(Emergency Petroleum Allocation Act of 1973, Pub. L. 93-159, as amended, Pub. L. 93-511, Pub. L. 94-99, Pub. L. 94-133, Pub. L. 94-163, and Pub. L. 94-385; Federal Energy Administration Act of 1974, Pub. L. 93-275, as amended, Pub. L. 94-332 and Pub. L. 94-385; Energy Policy and Conservation Act, Pub. L. 94-163, as amended, Pub. L. 94-385; E.O. 11790, 39 FR 23185; E.O. 11933, 41 FR 36641.)

In consideration of the foregoing, Part 211 of Chapter II, Title 10 of the Code of Federal Regulations, is amended as set forth below, effective immediately.

Issued in Washington, D.C., January 24, 1977.

DAVID G. WILSON,
Acting General Counsel,
Federal Energy Administration.

Section 211.71 is amended by adding a new paragraph (e) as follows:

§ 211.71 Mandatory refinery yield control program.

* * * * *

(e) *Adjustments in production levels of kerosene-base jet fuel and No. 1 fuel oil.* (1) Whenever FEA determines that No. 1 fuel oil is or potentially will be in short supply in any region or area of the United States, FEA may require one or more specified refiners, which produce kerosene-base jet fuel and supply or are capable of supplying No. 1 fuel oil in or into those regions or areas experiencing shortage conditions, to adjust their yields of kerosene-base jet fuel to levels that permit them to supply that product at an allocation fraction specified in such order or orders and to increase production and supplies of No. 1 fuel oil.

(2) Any such order may by its terms apply only to one or more refineries specified in the order and owned by the refiner to which the order is issued and shall be effective for the period specified in the order.

(3) The terms of any order issued under the authority of this paragraph shall be subject to review and comment by the refiner and the other principal parties affected thereby prior to the issuance thereof, if the FEA determines that the shortage situation in response to which the order is to be issued permits these review and comment procedures to take place without adversely affecting supplies of No. 1 fuel oil in the particular region or area. Any such order shall be appealable pursuant to Subpart H of Part 205 of this chapter.

[FR Doc.77-2632 Filed 1-24-77;11:39 am]

PART 211—MANDATORY PETROLEUM ALLOCATION REGULATIONS

Emergency Amendment to Allocation Levels for Propane and Adoption of Special Rule No. 1 to Subpart D

The Federal Energy Administration ("FEA") hereby adopts on an emergency basis an amendment to the Mandatory Petroleum Allocation Regulations, 10 CFR Part 211, with respect to the allocation levels provided for residential use and plant protection use of propane. FEA also adopts on an emergency basis Special Rule No. 1 to Subpart D of Part 211 (the "Special Rule"), altering allocation levels and suppliers' method of allocation in certain emergency situations prior to March 31, 1977. The amendment and Special Rule adopted today are effective immediately.

BACKGROUND

In light of the severely cold winter weather that many parts of the nation are experiencing, FEA believes that the relatively low allocation levels currently accorded to residential use and plant protection use of propane are insufficient. In addition, gas utilities are faced with extremely large demand for natural gas and are encountering difficulties in meeting the requirements of their residential customers.

The amendments and the Special Rule adopted today are intended to assure maintenance of service at the highest possible level for essential human needs and for essential minimal protection against property loss. These rules apply to maintain these critical uses of propane regardless whether the purchasers are direct users of propane or are customers of gas utilities which use propane to supplement supplies of natural gas. However, increased allocations of propane for gas utilities are conditioned by FEA by the requirement that gas utilities may use any propane supplied under the Special Rule adopted today only for meeting specified high priority needs and that suppliers must provide an equivalent level of priority for direct users of propane for the same needs. In this manner, FEA believes that available supplies of propane will be most equitably distributed for the remainder of the current heating season.

ALLOCATION LEVELS FOR RESIDENTIAL AND PLANT PROTECTION USE

To accomplish these purposes, FEA is today adopting amendments to its propane allocation levels raising the allocation levels accorded residential use and plant protection fuel use to one hundred percent of current requirements subject to the supplier's allocation fraction. FEA has determined that the previous allocation levels of ninety-five percent of base period use and one hundred percent of base period use subject to an allocation fraction, respectively, are no longer appropriate because the severity of weather this heating season has made historical usage an inadequate level for these high priority uses. In particular, the facts that the base period of April 1, 1972—March 31, 1973 was significantly warmer than the current winter and that upward adjustments to base use levels have not been permitted since mid-1974 have caused these current allocation levels to bear little relationship to the needs of individual priority purchasers. Therefore, to avoid potential serious hardships these allocation levels are being changed to a current requirements basis. It should be noted that since these amendments provide current requirements for residential and plant protection use, purchasers under these allocation levels will be subject to the requirements of 10 CFR 211.21, requiring purchasers to certify to their suppliers that they have an energy conservation program in effect.

Since these amendments take effect in the middle of a period corresponding to a base period, suppliers may have to compute a new allocation fraction for the remainder of the base period. Suppliers should estimate their supply obligation according to 10 CFR 211.10(b)(2) using the new allocation levels for residential use and plant protection fuel use, and their allocable supply for the remainder of the base period to compute their applicable allocation fraction.

SPECIAL RULE NO. 1—EMERGENCY ALLOCATION LEVELS AND SUPPLIERS' METHOD OF ALLOCATION

Because the severe winter weather threatens natural gas service, FEA is also adopting Special Rule No. 1 to Subpart D (the "Special Rule") on an emergency basis. The Special Rule provides for an adjustment to base period use for peak shaving by gas utilities in certain emergency situations, for new priorities of allocation levels and for a new suppliers' method of allocation applicable when such an adjustment is granted. The Special Rule is effective through March 31, 1977.

The Special Rule provides that when a gas utility's need for propane for peak shaving to maintain gas service for essential human needs and property protection exceeds one hundred percent of its base period use or when a utility has no supplier or base period use, it may apply to the FEA National Office pursuant to Subpart G of Part 205, FEA's Administrative Procedures and Sanctions, for an assignment of supplier or adjustment to base period use. In its application the utility is required to state in full the circumstances surrounding its request for additional propane, including the names and addresses of its suppliers of propane and natural gas, its inventory levels of propane and natural gas, its requirements of propane and present and anticipated levels of curtailments in the absence of a grant of its application. The utility must also provide a description of the priority-of-service categories imposed for use during periods of curtailment by the State regulatory

body to whose jurisdiction the utility is subject.

FEA will evaluate the application in light of all surrounding circumstances, taking into account the most equitable means of distributing propane among direct users and utility customers for high priority needs, and may issue an order assigning a supplier and a base period use or an order adjusting the base period use of the utility, in order to specify, in effect, a volume of propane which the utility may purchase and use for the remainder of the current period corresponding to a base period. A copy of the order will be served immediately upon the utility's propane supplier.

A gas utility receiving increased supplies of propane under the Special Rule is required to certify to FEA within seven days of receiving increased supplies and every seven days thereafter the priority-of-use categories to which it delivered natural gas during the previous reporting period.

Upon receipt of an order to supply increased volumes of propane to a gas utility, the supplier must apply the emergency allocation levels and method of allocation provided in the Special Rule. The emergency allocation levels are divided into first and second priority categories. The first priority category includes agricultural production, Department of Defense use, the priorities currently set forth in 10 CFR 211.83(c)(1) (as amended by this rule to include residential and plant protection fuel use), synthetic natural gas plant feedstock use and the peak shaving allocation for the gas utility. The latter two uses are accorded an allocation level of one hundred percent of base period use, while all others are assigned an allocation level of one hundred percent of current requirements. All these allocation levels, while the Special Rule is in effect for that supplier, are subject to the allocation fraction.

In addition, for purposes of this Special Rule, FEA is amending the definition of peak shaving previously set forth in 10 CFR 211.83(c)(2)(v) to provide that peak shaving use of propane by gas utilities is accorded an allocation level of one hundred percent of base period use only if peak shaving occurs to maintain gas service to essential human needs and property protection. 10 CFR 211.82 is amended by addition of a definition of "gas service for essential human needs and property protection" as

> • • • distribution of natural gas to residential and small commercial users with no alternate fuel capability which use less than 50,000 cubic feet of natural gas on a peak day, to industrial plants for plant protection fuel, and to apartment buildings and medical and nursing buildings with no alternate fuel capability.

The supplier will estimate its allocable supply for the remainder of the period corresponding to a base period and using the first priority allocation levels provided in the Special Rule calculate a new allocation fraction. If the fraction is less than one, the supplier must supply only the first priority customers according to the fraction. If the fraction exceeds one, the supplier must supply first priority customers at an allocation fraction of one and using the volume represented by the portion of the fraction in excess of one calculate a second fraction for second priority purchasers. Those purchasers will then be supplied at the levels allowed by application of the second fraction for the remainder of the period corresponding to a base period.

These amendments are being issued on an emergency basis to ensure that gas utilities may acquire additional supplies of propane for peak shaving to maintain gas service for essential human needs and property protection during the current heating season, while providing equitable allocations to meet the same needs of direct users of propane. If these amendments were not adopted until after notice and a hearing, they would not be effective until after the coldest portion of the heating season, long after most of the requests for additional peak shaving material should have been acted upon. FEA therefore finds that strict compliance with the notice requirements of section 7(i)(1)(B) of the Federal Energy Administration Act of 1974, as amended ("FEAA"), Pub. L. 93-275, Pub. L. 94-385, will cause serious harm and injury to the public health, safety and welfare, and the notice requirements of that section are hereby waived.

Section 7(c)(1) of the FEAA provides that FEA shall, before promulgating proposed regulations affecting the quality of the environment, provide a period of not less than five working days during which the Administrator of the Environmental Protection Agency ("EPA") may provide written comments concerning the impact of such regulations on the quality of the environment. Such comments are required to be published concurrently with or as part of the notice of propsed rulemaking.

Under section 7(c)(2) of the FEAA, the prior review required by section 7(c)(1) may be waived for a period of 14 days if there is an emergency situation which requires taking action at a date earlier than would permit the EPA the five day opportunity for prior comment required under section 7(c)(1). Notice of any such waiver must be given to the EPA and filed with the FEDERAL REGISTER with the notice of proposed or final FEA action and must include an explanation of the reasons for such waiver together with supporting data and factual background information.

Pursuant to section 7(c)(2) of the FEAA, FEA hereby waives the requirements of section 7(c)(1) of the FEAA concerning prior review by EPA of the environmental impact of this rulemaking. This waiver is based on an emergency situation which, as explained above, mandates that FEA take immediate steps to ensure adequate supplies of propane to direct users for residential and plant protection use and to gas utilities for peak shaving in excess of their base period use to serve essential human needs and protection of property needs that might otherwise be curtailed. A copy of this emergency amendment has been sent concurrent with its issuance to the Administrator for his comments.

In accordance with Executive Order 11821 and OMB Circular A-107, FEA is considering the inflationary impact of this proposal.

Because this amendment is being issued on an emergency basis, an opportunity for oral presentation of views is not possible prior to its implementation. A public hearing, however, will be held beginning at 9:30 a.m., on Thursday, February 10, 1977, in Room 2105, 2000 M Street, N.W., Washington, D.C., to receive comments from interested persons. Any person who has an interest in the subject of the hearing, or who is a representative of a group or class of persons which has an interest in the subject of the hearing, may make a written request for an opportunity to make an oral presentation. Such a request should be directed to Executive Communications, FEA, 1200 Pennsylvania Avenue, N.W., Washington, D.C. 20461, and must be received before 4:30 p.m., e.s.t., Friday, February 4, 1977. Such a request may be hand delivered to Room 3309, Federal Building, 1200 Pennsylvania Avenue, N.W., Washington, D.C., between the hours of 8:00 a.m. and 4:30 p.m., e.s.t., Monday through Friday, except Federal holidays. The person making the request should be prepared to describe the interest concerned if appropriate, to state why he or she is a proper representative of a group or class of persons which has such an interest; and to give a concise summary of the proposed oral presentation and a phone number where he or she may be contacted through Tuesday, February 8, 1977. Each person selected to be heard will be so notified by FEA before 5:30 p.m., e.s.t., Monday, February 7, 1977, and must submit 50 copies of his or her statement to Office of Allocation Regulation Development, FEA, Room 2214, 2000 M Street, N.W., Washington, D.C. 20461, before 5:30 p.m., e.s.t, Wednesday, February 9, 1977.

FEA reserves the right to select the persons to be heard at the hearing, to schedule their respective presentations, and to establish the procedures governing the conduct of the hearing. Each presentation may be limited, based on the number of persons requesting to be heard.

An FEA official will be designated to preside at the hearing. It will not be a judicial or evidentiary-type hearing. Questions may be asked only by those conducting the hearing, and there will be no cross-examination of persons presenting statements. At the conclusion of all initial oral statements, each person who has made an oral statement will be given the opportunity, if he or she so desires, to make a rebuttal statement. The rebuttal statements will be given in the order in which the initial statements were made and will be subject to time limitations.

Any interested person may submit questions, to be asked of any person making a statement at the hearing, to Executive Communications, FEA, before 4:30 p.m., e.s.t., Wednesday, February 9, 1977. Any person who makes an oral statement and who wishes to ask a question at the hearing may submit the question, in writing, to the presiding officer. FEA or the presiding officer, if the question is submitted at the hearing, will determine whether the question is relevant, and whether time limitations permit it to be presented for answer.

Any further procedural rules needed for the proper conduct of the hearing will be announced by the presiding officer.

A transcript of the hearing will be made and the entire record of the hearing, including the transcript, will be retained by FEA and made available for inspection at the FEA Freedom of Information Office, Room 2107, Federal Building, 1200 Pennsylvania Avenue, N.W., Washington, D.C., between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays. Anyone may purchase a copy of the transcript from the reporter.

Interested persons are invited to submit data, views, or arguments with respect to this emergency amendment to Executive Communications, Federal Energy Administration, Box KS, Washington, D.C. 20461.

Comments should be identified on the outside envelope and on documents submitted to Executive Communications, FEA, with the designation "Allocation Levels for Propane and Special Rule No. 1." Fifteen copies should be submitted. All comments received by Friday, February 11, 1977, and all relevant information, will be considered by FEA.

Any information or data considered by the person furnishing it to be confidential must be so identified and submitted in writing, in accordance with the procedures stated in 10 CFR 205.9(f). FEA reserves the right to determine the confidential status of the information or data and to treat it according to its determination.

(Emergency Petroleum Allocation Act of 1973, Pub. L. 93-159, as amended, Pub. L. 93-511, Pub. L. 94-99, Pub. L. 94-133, Pub. L. 94-163, and Pub. L. 94-385; Federal Energy Administration Act of 1974, Pub. L. 93-275, as amended, Pub. L. 94-332 and Pub. L. 94-385; Energy Policy and Conservation Act, Pub. L. 94-163, as amended, Pub. L. 94-385; E.O. 11790, 39 FR 23185; E.O. 11933, 41 FR 36641)

In consideration of the foregoing, Part 211 of Chapter II, Title 10 of the Code of Federal Regulations, is amended as set forth below, effective immediately.

Issued in Washington, D.C., January 24, 1977.

DAVID G. WILSON,
Acting General Counsel.

1. Section 211.82 is amended by adding, in the proper alphabetical order, a definition of "gas service for essential human needs and property protection," to read as follows:

§ 211.82 Definitions.

• • • • • •

"Gas service for essential human needs and property protection" means distribution of natural gas to residential and small commercial users with no alternate fuel capability which use less than 50,000 cubic feet of natural gas on a peak day, to industrial plants for plant protection fuel, and to apartment buildings and medical and nursing buildings with no alternate fuel capability.

• • • • • •

2. Section 211.83 is amended by revising paragraph (c) and by inserting before paragraph (a) as an introduction a phrase to read as follows:

§ 211.83 Allocation levels.

Except as provided in Special Rule No. 1 to this subpart—

• • • • •

(c) *Allocation levels subject to an allocation fraction.* (1) One hundred (100) percent of current requirements (as reduced by the application of an allocation fraction) for the following uses:

(i) Emergency services;
(ii) Energy production;
(iii) Sanitation services;
(iv) Telecommunications services;
(v) Passenger transportation services;
(vi) Medical and nursing buildings;
(vii) Aviation ground support vehicles and equipment;
(viii) Start-up, testing and flame stability of electrical utility plants;
(ix) Residential use; and
(x) Plant protection fuel use.

(2) One hundred (100) percent of base period use for:

(i) Petrochemical feedstock use;
(ii) Synthetic natural gas plant feedstock use;
(iii) Industrial use as a process fuel or where no substitute for propane is available;
(iv) Governmental use;
(v) Peak shaving for gas utilities. Unless directed by FEA upon application pursuant to Subpart G of Part 205 of this chapter, the use of propane for peak shaving by gas utilities during any consecutive twelve month period beginning after January 1, 1974, is limited to the volume of propane equal to one hundred (100) percent of that volume which a gas utility contracted for or purchased for delivery during the period April 1, 1972 through March 31, 1973, regardless of whether that volume was used during the period. Propane shall not be used for peak shaving as long as the gas utility continues service during such peak shaving usage to interruptible industrial customers (other than for process fuel, plant protection fuel, or raw material) or to any non-residential customer who can use a fuel other than natural gas, propane or butane; and
(vi) Refinery fuel use.

(3) Ninety (90) percent of base period use for the following uses:

(i) Commercial use (The maximum volume which may be obtained for this use, however, is 210,000 gallons per year);
(ii) Standby volumes or any other industrial use;
(iii) Transportation services other than passenger transportation services or aviation ground support vehicles, for vehicles equipped to use propane as of December 27, 1973; and
(iv) Schools.

3. Subpart D is amended by adding as an appendix thereto Special Rule No. 1, to read as follows:

SPECIAL RULE NO. 1—EMERGENCY ALLOCATION LEVELS AND SUPPLIERS' METHOD OF ALLOCATION

(1) *Scope.* This Special Rule applies to the allocation of propane in certain emergency situations, as determined by FEA, upon application by a gas utility pursuant to paragraph (3) below. This Special Rule shall remain in effect through March 31, 1977.

(2) *Purpose.* This Special Rule provides new allocation levels and a special suppliers' method of allocation for use in emergency situations in order to assure both maintenance, at the highest possible level, of service by gas utilities for essential human needs and property protection, and equitable distribution of propane for the same end-uses as between direct users of propane and customers of gas utilities.

(3) *Application by a gas utility for increased allocations of propane.* (a) Whenever a gas utility's requirements for propane for peak shaving to maintain gas service for essential human needs and property protection exceed one hundred (100) percent of base period use as reduced by application of its supplier's allocation fraction, the gas utility may apply, pursuant to Subpart G of Part 205 of this chapter, to the FEA National Office for assignment of a supplier and establishment of a base period use or an adjustment to its base period use of propane for peak shaving use. In its application the gas utility shall provide FEA with the name and address of its base period supplier of propane, if any, and with a complete statement of the circumstances surrounding its application, which shall include:

(i) The current level of its propane and natural gas inventories;
(ii) The volume of propane required on a peak day to maintain gas service for essential human needs and property protection, as defined in § 211.82;
(iii) Its present and anticipated curtailment of customers under applicable state and federal laws in the absence of a grant of relief from FEA;
(iv) The names and addresses of its natural gas supplier(s);
(v) The names and addresses of its propane supplier(s), if any, and the volume(s) of propane which such supplier(s) can presently supply;
(vi) A description of the priority-of-service categories imposed for use during periods of curtailment by the State regulatory body to whose jurisdiction the utility is subject;
(vii) A certification of the accuracy of the application by the chief executive officer of the applicant or his duly authorized representative; and
(viii) A statement that any propane allocated pursuant to the application shall be used only for the purpose stated in the application, shall not be diverted to other uses, and that if the applicant's needs for propane to maintain gas service for essential human needs and property protection decline, the applicant shall immediately file an amended application for a downward adjustment to its base period use.

(b) In processing an application under paragraph (3)(a), FEA shall consider potential supply reductions to users of propane

for residential use, plant protection fuel and other priority uses and shall attempt to maintain the most equitable feasible distribution of propane for priority uses.

(c) Upon consideration of an application of a gas utility, filed pursuant to this Special Rule, and other relevant information received or obtained during the proceeding, the FEA may issue an appropriate order assigning a supplier or suppliers and/or adjusting the base period use of the utility. A copy of the order shall be served on the applicant and upon any supplier or suppliers required to supply propane pursuant to the order.

(d) Within seven days of receiving propane pursuant to an order issued under paragraph (3)(c) of this Special Rule and every seven (7) days thereafter until the expiration of the order, the gas utility shall certify to the FEA National Office the priority-of-use categories to which it has supplied natural gas for the previous reporting period and the volumes supplied to each such category.

(4) *Suppliers' emergency method of allocation.* Upon receipt of an order under paragraph (3)(c) of this Special Rule, a supplier shall supply its purchasers according to the emergency allocation levels as provided in paragraph (5) of this Special Rule. The supplier shall recalculate its allocation fraction for the remainder of the period corresponding to a base period by dividing its estimated remaining allocable supply by the estimated remaining allocation entitlements of the purchasers supplied under the first priority allocation levels listed in paragraph (5)(a) of this Special Rule at the allocation levels provided therein. If the supplier's allocation fraction is one (1.0) or less than one (1.0), it shall supply its first priority purchasers at that allocation fraction. If the supplier's allocation fraction exceeds one (1.0), it shall calculate a second allocation fraction for its purchasers supplied under the second priority allocation levels listed in paragraph (5)(b) using as its allocable supply volumes of propane not needed to supply its first priority purchasers and shall distribute its remaining supplies of propane accordingly.

(5) *Emergency allocation levels*—(a) *First priority allocation levels.* (i) One hundred (100) percent of current requirements subject to an allocation fraction for:

(A) Agricultural production;
(B) Department of Defense use;
(C) Residential use;
(D) Plant protection fuel use;
(E) Emergency services;
(F) Energy production;
(G) Sanitation services;
(H) Telecommunication services;
(I) Passenger transportation services;
(J) Medical and nursing buildings;
(K) Aviation ground support vehicles and equipment; and
(L) Start-up, testing and flame stability of electric utility plants.

(ii) One hundred percent of base period use subject to an allocation fraction for:

(A) Synthetic natural gas plant feedstock use; and
(B) Peak shaving use by gas utilities to maintain gas service for essential human needs and property protection, as assigned or adjusted by FEA.

(b) *Second priority allocation levels.* (i) One hundred (100) percent of base period use for:

(A) Petrochemical feedstock use;
(B) Industrial use as a process fuel or where no substitute for propane is available;
(C) Peak shaving use by gas utilities. Unless otherwise directed by FEA upon application pursuant to Subpart G of Part 205, the use of propane for peak shaving by gas utilities during any consecutive twelve month period beginning after January 1, 1974, is limited to the volume of propane equal to one hundred (100) percent of that volume which a gas utility contracted for or purchased for delivery during the period April 1, 1972 through March 31, 1973, regardless of whether that volume was used during the period. Propane shall not be used for peak shaving as long as the gas utility continues service during such peak shaving usage to interruptible industrial customers (other than for process fuel, plant protection fuel, or raw material) or to any non-residential customer who can use a fuel other than natural gas, propane or butane; and
(D) Governmental use;
(E) Refinery fuel use.

(ii) Ninety (90) percent of base period use for:

(A) Commercial use (the maximum volume which may be obtained for this use, however, is 210,000 gallons per year)
(B) Standby volumes or any other industrial use;
(C) Transportation services other than passenger transportation services or aviation ground support vehicles, for vehicles equipped to use propane as of December 27, 1973; and
(D) Schools.

PART 210—GENERAL ALLOCATION AND PRICE RULES

PART 211—MANDATORY PETROLEUM ALLOCATION REGULATIONS

PART 212—MANDATORY PETROLEUM PRICE REGULATIONS

Exemption of Motor Gasoline From Mandatory Petroleum Allocation and Price Regulations

On January 19, 1977, the Federal Energy Administration ("FEA") issued two amendments exempting motor gasoline from 10 CFR Parts 210, 211 and 212, the General Allocation and Price Rules and the Mandatory Petroleum Allocation and Price Regulations (42 FR 4416, and 42 FR 4419, January 25, 1977). These amendments were transmitted to the Congress as Energy Actions Nos. 8 and 9 on January 19, 1977, in accordance with the procedures set forth in section 551 of the Energy Policy and Conservation Act, Pub. L. 94-163 ("EPCA").

Because of the pending change of Administration at the time the amendments were issued, FEA provided in the operative language thereof that the amendments would take effect March 1, 1977 unless disapproved by either House of Congress or withdrawn by the President prior to Congressional approval or disapproval during the 15-day period provided for Congressional review by the EPCA.

Notice was thereby given that these amendments were still subject to possible rescission before the completion of the 15-day review period. Thus, the rulemaking proceeding which FEA initiated on the exemption of motor gasoline from its regulations was, to this extent, continued in awareness of the fact that the new Administration might determine that further consideration would be necessary. The President has made such a determination and, therefore, FEA is now hereby rescinding the amendments issued January 19, 1977, and not yet approved or disapproved by the Congress. By this action, FEA has, in effect, withdrawn Energy Actions Nos. 8 and 9 from the process of Congressional review under section 551 of the EPCA.

Since this rescission is a continuation of a pending rulemaking proceeding, FEA is not required to provide prior notice and opportunity for comment with respect to this action. Requirements with respect to notice to the Administrator of the Environmental Protection Agency, evaluation of inflationary impact and providing an opportunity for oral comment likewise do not apply to this action because they were met in connection with the notice of proposed rulemaking and public hearing issued November 19, 1976 (41 FR 51332, November 24, 1976).

(Emergency Petroleum Allocation Act of 1973, Pub. L. 93-159, as amended, Pub. L. 93-511, Pub. L. 94-99, Pub. L. 94-133, Pub. L. 94-163, and Pub. L. 94-385; Federal Energy Administration Act of 1974, Pub. L. 93-275, as amended, Pub. L. 94-385; Energy Policy and Conservation Act, Pub. L. 94-163, as amended, Pub. L. 94-385; E.O. 11790, 39 FR 23185; E.O. 11933, 41 FR 36641).

In consideration of the foregoing, the amendments to Parts 210, 211 and 212 of Chapter II, Title 10 of the Code of Federal Regulations, issued January 19, 1977 (42 FR 4416, 42 FR 4419, January 25, 1977), to exempt motor gasoline from price and allocation controls are hereby rescinded in their entirety, effective immediately.

Issued in Washington, D.C., January 24, 1977.

DAVID G. WILSON,
Acting General Counsel.

[FR Doc.77-2685 Filed 1-24-77;3:30 pm]

Title 14—Aeronautics and Space

CHAPTER I—FEDERAL AVIATION ADMINISTRATION, DEPARTMENT OF TRANSPORTATION

[Docket No. 75-CE-22-AD; Amdt. 39-2817]

PART 39—AIRWORTHINESS DIRECTIVES

Beech Model 200 Airplanes

A proposal to amend Part 39 of the Federal Aviation Regulations to include an Airworthiness Directive (AD) applicable to Beech Model 200 airplanes was published in the FEDERAL REGISTER on September 8, 1975 (40 FR 41537). The proposed AD, if adopted, would require replacement of presently installed circuit boards in the secondary low pitch stop amplifier with those of improved design to preclude unintentional propeller feathering.

Interested persons have been afforded an opportunity to participate in the making of the amendment. No adverse comments were received.

Subsequent to the issuance of the proposal it has been determined that the secondary low pitch stop system may be removed from airplanes having a revised reversing system incorporated on Pratt and Whitney PT6A-27 and later model engines which are installed in Beech Model 200 airplanes. Accordingly, the FAA believes that the Final Rule should permit removal of the secondary low pitch stop system as an alternate means of compliance.

With respect to the modification specified in the Notice of Proposed Rule Making the airplane manufacturer subsequently superseded and cancelled Service Instruction 0745-354 which covered this modification. However, the FAA considers airplanes modified in accordance with this service instruction airworthy and this modification is being retained in the Final Rule as an alternate means of compliance.

Finally, the FAA has been advised that Beech Model 200, Serial Numbers BB-3, BB-4 and BB-5 airplanes are special configuration military airplanes that are not expected to be presented for civil certification. Therefore these three airplanes are being deleted from the applicability statement in the Final Rule.

Although this amendment modifies the original proposal, it is relieving in nature and is in the interest of safety. Accordingly, no further notice and public procedure hereon are necessary.

NOTE.—The FAA has determined that this document does not contain a major proposal requiring preparation of an Inflation Impact Statement under Executive Order 11821 and OMB Circular A-107.

In consideration of the foregoing and pursuant to the authority delegated to me by the Administrator, 14 CFR 11.89 (31 FR 13697), § 39.13 of Part 39 of the Federal Aviation Regulations is amended by adding the following new AD.

BEECH. Applies to Model 200 (Serial Numbers BB-2, BB-6 thru BB-18 and BB-20 thru BB-50) airplanes.

Compliance: Required within 100 hours' time in service after the effective date of this AD, unless already accomplished.

To prevent unintentional feathering of a propeller due to failure of the secondary low pitch stop amplifier, accomplish either Paragraph A or B:

(A) Replace both P/N 101-364171-1 and P/N 101-364171-9 printed circuit board assemblies with P/N 101-364170-15 printed circuit board assemblies in accordance with Beechcraft Service Instruction No. 0745-354, notwithstanding its supersedence by Beechcraft Service Instruction No. 0808-247.

(B) Remove secondary low pitch stop system in accordance with Beechcraft Service Instruction No. 0808-247, or later approved revisions.

(C) Airplanes which have accumulated 100 hours' time in service after the effective date of this AD may be flown in accordance with FAR 21.197 to a place where a replacement or removal can be performed, providing the existing amplifiers have not malfunctioned.

(D) Any equivalent method of compliance with this AD, must be approved by the Chief, Engineering and Manufacturing Branch, FAA, Central Region.

NOTE.—The manufacturer has advised the FAA that sufficient replacement parts are available to accomplish Paragraph A of this AD.

This amendment becomes effective March 1, 1977.

(Secs. 313(a), 601 and 603 of the Federal Aviation Act of 1958 (49 U.S.C. 1354(a), 1421 and 1423), and of Section 6(c) of the Department of Transportation Act (49 U.S.C. 1655 (c)))

Issued in Kansas City, Missouri, on January 17, 1977.

C. R. MELUGIN, JR.,
Director, Central Region.

[FR Doc.77-2612 Filed 1-26-77;8:45 am]

[Docket No. 76-EA-79; Amdt. 39-2816]

PART 39—AIRWORTHINESS DIRECTIVE

Piper Aircraft

The Federal Aviation Administration is amending § 39.13 of Part 39 of the Federal Aviation Regulations so as to issue an airworthiness directive applicable to Piper PA 36-285 type airplanes.

There has been a report that the wing front and rear spar attachment plates were found to have enlarged bolt holes and slight bearing load effects were observed on the bolts.

The foregoing constitutes a hazard and therefore an airworthiness directive is being issued, which will require a repetitive inspection and alteration if necessary.

Since the foregoing affects air safety, notice and public procedure hereon are impractical and good cause exists for making the directive effective in less than 30 days.

It has been determined that the expected impact of the proposed regulation is so minimal that the proposal does not warrant an evaluation.

In consideration of the foregoing and pursuant to the authority delegated to me by the Administrator, 14 CFR 11.89 [31 FR 13697] § 39.13 of Part 39 of the Federal Aviation Regulations is amended by issuing a new airworthiness directive as follows:

PIPER: Applies to Model PA-36-285, Serial Nos. 36-7360003 through 36-7560044 certificated in all categories except aircraft incorporating Piper Kit Part Number 760 933.

To prevent possible hazards in flight associated with elongation of bolt holes at the forward and/or aft wing attachment fittings, accomplish the following:

(a) Within the next 50 hours in service from the effective date of this AD or upon the attainment of 500 total hours in service which ever is later unless previously accomplished within the past 500 hours in service, and at intervals not to exceed 500 hours in service from the last inspection, inspect and alter, if necessary, the forward and/or aft wing attachment fittings in accordance with the instructions section of Piper Service Bulletin No. 471A dated July 16, 1976, or equivalent.

(b) Upon the incorporation of Wing Fitting Modification Kit, Piper Part Number 760 933 or equivalent, compliance with the requirements of this AD may be dispensed with.

(c) Equivalent inspections and repairs must be approved by the Chief, Engineering and Manufacturing Branch, FAA, Eastern Region.

(d) Upon submission of substantiating data by an owner or operator through an FAA Maintenance Inspector, the Chief, Engineering and Manufacturing Branch, FAA, Eastern Region may adjust the inspection intervals specified in this AD.

NOTE.—The Federal Aviation Agency has determined that this document does not contain a major proposal requiring preparation of an Inflation Impact Statement under Executive Order 11821 and OMB Circular A-107.

This amendment is effective January 28, 1977.

(Secs. 313(a), 601 and 603 of the Federal Aviation Act of 1958 [49 U.S.C. 1354(a), 1421 and 1423], and section 6(c) of the Department of Transportation Act [49 U.S.C. 1655(c)])

Issued in Jamaica, N.Y., on January 14, 1977.

L. J. CARDINALI,
Acting Director, Eastern Region.

[FR Doc.77-2613 Filed 1-26-77;8:45 am]

[Docket No. 75-NE-35, Amdt. 39-2814]

PART 39—AIRWORTHINESS DIRECTIVES

Pratt & Whitney JT8D Aircraft Engines

A proposal to amend § 39.13 of Part 39 of the Federal Aviation Regulations, Amendment 39-2099 (39 FR 7626), AD 75-05-06, as amended by Amendment 39-2604 (41 FR 19619) to require retorquing within 1500 hours time in service of all fuel manifold "B" nuts that have not been retorqued in service was published in the FEDERAL REGISTER on November 1, 1976 (41 FR 47947).

Interested persons have been afforded the opportunity to fully participate in the making of this amendment. Comments were received from the Air Transport Association (ATA) in response to the notice. The commentator suggested that the requirement to retorque, within 1500 hours time in service, all fuel manifold "B" nuts that had been quadruple torqued at manufacture is unreasonable and would impose an unnecessary burden and loss of service to the public. The ATA recommended a retroque at 2500 hours in lieu of the 1500 hours. The commentator based the recommendation on the improved failure statistics of the quadruple torqued "B" nuts (at manufacture) versus the single or double torqued "B" nuts, the success of the individual carrier inspection programs and finally the lack of evidence that safety of flight was affected.

Subsequent to the ATA comments on this subject, an operator experienced a "B" nut leak and resultant fire on an engine which was quadruple torqued at manufacture. The fire resulted in an inflight shutdown, and due to the severe nature of the fire, ground fire extinguishing assistance was required. The engine had been operating under a fuel flow monitoring inspection program.

Based on evaluation of the data submitted by the commentator and in view of the above cited incident, the proposed amendment will be issued as originally proposed, requiring retorque within 1500 hours time in service on affected engines.

The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an inflation impact statement under Executive Order 11821 and OMB Circular A-107.

In consideration of the foregoing, and pursuant to the authority delegated to me by the Administrator (31 FR 13697), § 39.13 of Part 39 of the Federal Aviation Regulations, Amendment 39-2099 (39 FR 7626), A.D. 75-05-06, as amended by Amendment 39-2604 (41 FR 19619) is further amended as follows:

A. Delete the words "were single or double torqued at original manufacture and" from the applicability paragraph.

B. Delete the words "torque" from Paragraph 1, and "torqued" from Paragraph 2, and insert the words "retorque" and "retorqued" respectively.

C. Delete the words "the effective date of this A.D., unless already accomplished" from Paragraph 1, and insert the words March 12, 1976, for fuel manifolds with "B" nuts which were single or double torqued at original manufacture and within the next 1500 hours time in service after the effective date of this amendment for fuel manifolds with "B" nuts which were quadruple torqued at original manufacture, unless already accomplished.

Issued in Burlington, Mass., on January 14, 1977.

This amendment becomes effective February 24, 1977.

QUENTIN S. TAYLOR,
Director, New England Region.

[FR Doc.77-2188 Filed 1-26-77;8:45 am]

[Airspace Docket No. 76-SO-101]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Designation of Control Zone

On November 18, 1976, a Notice of Proposed Rulemaking was published in the FEDERAL REGISTER (41 FR 50841), stating that the Federal Aviation Administration was considering an amendment to Part 71 of the Federal Aviation Regulations that would designate the Sanford, Fla., control zone.

Interested persons were afforded an opportunity to participate in the rulemaking through the submission of comments. All comments received were favorable.

In consideration of the foregoing, Part 71 of the Federal Aviation Regulations is amended, effective 0901 G.M.T., April 21, 1977, as hereinafter set forth.

In § 71.171 (42 FR 355), the following control zone is added:

SANFORD, FLA.

Within a 5-mile radius of Sanford Airport (lat. 28°46'30" N., long. 81°14'25" W.); within 3 miles each side of the 259° bearing from the Sanford RBN (lat. 28°47'05" N., long. 81°14'36" W.), extending from the 5-mile radius zone to 8.5 miles west of the RBN. This control zone is effective from 0800 to 2100 hours, local time, daily.

(Sec. 307(a) of the Federal Aviation Act of 1958 (49 U.S.C. 1348(a)) and of Sec. 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c))).

NOTE: The FAA has determined that this document does not contain a major proposal requiring preparation of an Inflation Impact Statement under Executive Order 11821 and OMB Circular A-107.

Issued in East Point, Ga., on January 17, 1977.

GEORGE R. LACAILLE,
Acting Director, Southern Region.

[FR Doc.77-2616 Filed 1-26-77;8:45 am]

[Docket No. 16422; Amdt. No. 1056]

PART 97—STANDARD INSTRUMENT APPROACH PROCEDURES

Recent Changes and Additions

This amendment to Part 97 of the Federal Aviation Regulations incorporates by reference therein changes and additions to the Standard Instrument Approach Procedures (SIAPs) that were recently adopted by the Administrator to promote safety at the airports concerned.

The complete SIAPs for the changes and additions covered by this amendment are described in FAA Forms 8260-3, 8260-4, or 8260-5 and made a part of the public rule making dockets of the FAA in accordance with the procedures set forth in Amendment No. 97-696 (35 FR 5609).

SIAPs are available for examination at the Rules Docket and at the National Flight Data Center, Federal Aviation Administration, 800 Independence Avenue, S.W., Washington, D.C. 20591. Copies of SIAPs adopted in a particular region are also available for examination at the headquarters of that region. Individual copies of SIAPs may be purchased from the FAA Public Information Center, AIS-230, 800 Independence Avenue, S.W., Washington, D.C. 20591 or from the applicable FAA regional office in accordance with the fee schedule prescribed in 49 CFR 7.85. This fee is payable in advance and may be paid by check, draft, or postal money order payable to the Treasurer of the United States. A weekly transmittal of all SIAP changes and additions may be obtained by subscription at an annual rate of $150.00 per annum from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. Additional copies mailed to the same address may be ordered for $30.00 each.

Since a situation exists that requires immediate adoption of this amendment, I find that further notice and public procedure hereon is impracticable and good cause exists for making it effective in less than 30 days.

In consideration of the foregoing, Part 97 of the Federal Aviation Regulations is amended as follows, effective on the dates specified:

1. Section 97.23 is amended by originating, amending or canceling the following VOR-VOR/DME SIAPs, *effective March 10, 1977.*

South Lake Tahoe, CA—Lake Tahoe Arpt., VOR/DME-A, Amdt. 1
Greeley, CO—Weld County Municipal, VOR-A, Amdt. 4
Pocatello, ID—Pocatello Municipal, VOR Rwy 3, Amdt. 13
Pocatello, ID—Pocatello Municipal, VOR/DME Rwy 21, Amdt. 7
Brownwood, TX—Brownwood Municipal, VOR Rwy 17, Amdt. 6
Georgetown, TX—Georgetown Municipal, VOR/DME Rwy 35, Amdt. 3

* * * *effective March 3, 1977.*

Macomb, IL—Macomb Municipal, VOR/DME-A, Amdt. 1
Berkeley Springs, WV—Potomac Airpark, VOR Rwy 29, Amdt. 1
Cable, WI—Cable Union Arpt., VOR/DME-A, Amdt. 1
Superior, WI—Richard I. Bong Arpt., VOR Rwy 13, Amdt. 1

* * * *effective January 27, 1977.*

Pendleton, OR—Pendleton Municipal, VOR Rwy 7L, Amdt. 12

The FAA published amendments in Docket No. 16302, Amdt. No. 1050 to Part 97 of the Federal Aviation Regulations (31 FR 54166; December 13, 1976) under § 97.23, effective January 20, 1977, which are hereby amended as follows:

a. Orlando, FL—Orlando Jetport at McCoy, VOR Rwy 18L, Original is rescinded.
b. Orlando, FL—Orlando Jetport at McCoy, VOR Rwy 18L & 18R, Amdt. 3 cancellation is rescinded (Amdt. 3 remains in effect).

2. Section 97.25 is amended by originating, amending or canceling the following SDF-LOC-LDA SIAPs, *effective March 10, 1977.*

Bismarck, ND—Bismarck Municipal, LOC/DME(BC) Rwy 13, Amdt. 2
Harlingen, TX—Harlingen Industrial Airpark, LOC(BC) Rwy 35L, Amdt. 3

* * * *effective March 3, 1977.*

Elkins, WV—Elkins-Randolph County Jennings-Randolph Field, LDA-C, Amdt. 2

* * * *effective February 24, 1977.*

Hawthorne, CA—Hawthorne Municipal, LOC Rwy 25, Amdt. 1

3. Section 97.27 is amended by originating, amending, or canceling the following NDB/ADF SIAPs, *effective March 10, 1977.*

Bismarck, ND—Bismarck Municipal, NDB Rwy 31, Amdt. 24
Brigham City, UT—Brigham City Arpt., NDB Rwy 26, Amdt. 5

Title 16—Commercial Practices

CHAPTER II—CONSUMER PRODUCT SAFETY COMMISSION

PART 1012—MEETINGS: ADVANCE PUBLIC NOTICE, PUBLIC ATTENDANCE, AND RECORDKEEPING

Interim Rules

CROSS REFERENCE: For interim rules governing the procedures for making a determination to open or close a meeting of the Commissioners, the provisions for public announcement of such meetings and the provisions regarding recordkeeping for such meetings, effective January 27, 1977, see FR Doc. 77-2579 published in the Proposed Rules section of this issue.

Title 17—Commodity and Securities Exchanges

CHAPTER II—SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-13190]

PART 200—ORGANIZATION; CONDUCT AND ETHICS; AND INFORMATION AND REQUESTS

Delegation of Authority to Director of Division of Corporation Finance

The Commission today announced the amendment, effective immediately, of its regulations governing delegation of authority to the Director of the Division of Corporation Finance (17 CFR 200.30-1) with respect to the Securities Exchange Act of 1934 ("Exchange Act") (15 U.S.C. 78a et seq., as amended by Pub. L. No. 94-29 (June 4, 1975)).

Section 3(a)(12) of the Exchange Act provides that the term "exempted security" or "exempted securities" includes, among others, "securities issued or guaranteed by corporations in which the United States has a direct or indirect interest as shall be designated for exemption by the Secretary of the Treasury as necessary or appropriate in the public interest or for the protection of investors." In accordance with the provisions of this section, the Secretary of the Treasury from time to time designates appropriate securities for exemption. Upon receipt of a letter from the Secretary of the Treasury, or from a Treasury Department official with delegated authority to act for the Secretary, designating securities as exempted securities under section 3(a)(12), the Commission authorizes publication of a release announcing the designation.

Inasmuch as these releases are of a routine nature and do not involve any policy considerations or novel questions, it is not necessary for the Commission to consider each Treasury Department designation announcement on an individual basis. Delegation of authority to the Director of the Division of Corporation Finance to issue these announcement releases will eliminate any delay caused by seeking Commission approval for release of the information and therefore will result in more timely notice to the public of the designation of a new exempted security.

To accomplish this delegation of authority, the Commission hereby amends 17 CFR 200.30-1 by adding a new paragraph (d)(9) to read as follows:

§ 200.30-1 Delegation of authority to Director of Division of Corporation Finance.

* * * * *

(d) * * *

(9) Upon receipt of a notification from the Secretary of the Treasury designating a security for exemption pursuant to section 3(a)(12), to issue public releases announcing such designation.

* * * * *

The Commission finds that the foregoing action relates solely to agency management and personnel and, accordingly, that notice and prior publication for comment under the Administrative Procedure Act (5 U.S.C. 553) are not necessary. This action, taken pursuant to Pub. L. 87-592, 76 Stat. 394 (15 U.S.C. 78d-1, 78d-2), becomes effective immediately.

By the Commission.

GEORGE A. FITZSIMMONS,
Secretary.

JANUARY 19, 1977.

Title 19—Customs Duties

CHAPTER I—UNITED STATES CUSTOMS SERVICE, DEPARTMENT OF THE TREASURY

[T.D. 77-37]

PART 1—GENERAL PROVISIONS

Change in Customs Field Organization

In order to promote more efficient management within the Customs Service, it is desirable to transfer supervision over the Customs station at Los Ebanos, Texas, from the Hidalgo, Texas, Customs port of entry to the Rio Grande City, Texas, Customs port of entry.

Accordingly, § 1.3(d) of the Customs Regulations (19 CFR 1.3(d)) is amended by substituting "Rio Grande City," for "Hidalgo," in the column headed "Port of entry having supervision" in the list of Customs stations and ports of entry having supervision thereof.

(Sec. 1, 37 Stat. 434 (5 U.S.C. 301, 19 U.S.C. 1))

Because this amendment involves a matter relating to agency organization, it is exempt from the notice requirements of 5 U.S.C. 553.

Effective date: This amendment shall become effective February 28, 1977.

LEONARD LEHMAN,
Acting Commissioner of Customs.

Approved: January 17, 1977.

JERRY THOMAS,
Under Secretary of the Treasury.

[FR Doc.77-2665 Filed 1-26-77;8:45 am]

[T.D. 77-38]

PART 4—VESSELS IN FOREIGN AND DOMESTIC TRADES

Information Required on Manifest

On February 25, 1974, a notice of proposed rulemaking was published in the FEDERAL REGISTER (39 FR 7179), which proposed to amend § 4.93(c) of the Customs Regulations (19 CFR 4.93(c)) to permit empty vans, tanks, and barges, equipment for use with vans and tanks, empty instruments of international traffic, and stevedoring equipment and material to be manifested at the port of lading without including their identification numbers or symbols or other appropriate identifying data, provided the manifest includes a statement that the district director at the port of unlading will be presented with a statement at the time of entry of the vessel listing the identifying numbers or symbols or other appropriate identifying data for the articles to be unladen at that port.

This amendment was proposed because the loading of such articles on a foreign vessel for movement from one coastwise port to a second coastwise port is the last action prior to sailing and it is difficult for the carrier to list timely the number and symbol of each article without delaying the vessel. Furthermore, when a number of identical articles are being transported to two or more coastwise ports, it is sometimes not known which specific article will be unladen at which port, and identification by number or symbol on the manifest by port of destination results in a cumbersome operation.

In addition, the notice proposed to further amend § 4.93(c) to provide that violation of the requirements set forth in that section would be subject to applicable penalties under section 584, Tariff Act of 1930, as amended (19 U.S.C. 1584).

Interested persons were given 30 days from the date of publication of the notice to submit data, views, or arguments with respect to the proposed amendment. After consideration of the comment received, it has been determined that the proposed amendment should be adopted as set forth in the notice of proposed rulemaking.

Accordingly, the proposed amendment is adopted as set forth below.

Effective date: This amendment shall become effective February 28, 1977.

VERNON D. ACREE,
Commissioner of Customs.

Approved: January 17, 1977.

JERRY THOMAS,
Under Secretary of the Treasury.

Paragraph (c) of § 4.93 is amended to read as follows:

§ 4.93 Coastwise transportation by certain vessels of empty vans, tanks, and barges, equipment for use with vans and tanks; empty instruments of international traffic; stevedoring equipment and material; procedures.

* * * * *

(c) Any manifest required to be filed under this part by any foreign vessel shall describe any article mentioned in paragraph (a) of this section laden aboard and transported from one United States port to another, giving its identifying number or symbol, if any, or such other identifying data as may be appropriate, the names of the shipper and consignee, and the destination. The manifest shall also include a statement (1) that the articles specified in paragraph (a)(1) of this section are owned or leased by the owner or operator of the transporting vessel and are transported for his use in handing his cargo in foreign trade; or (2) that the stevedoring equipment and material specified in paragraph (a)(2) of this section is owned or leased by the owner or operator of the transporting vessel, or is owned or leased by the stevedoring company contracting for the lading or unlading of that vessel, and is transported without charge for his use in handling his cargo in foreign trade. If the district director at the port of lading is satisfied that there will be sufficient control over the coastwise transportation of the article without identifying it by number or symbol or such other identifying data on the manifest, he may permit the use of a manifest that does not include such information provided the manifest includes a statement, that the district director at the port of unlading will be presented with a statement at the time of entry of the vessel that will list the identifying number or symbol or other appropriate identifying data for the article to be unladen at that port. Applicable penalties under section 584, Tariff Act of 1930, as amended (19 U.S.C. 1584), shall be assessed for violation of this paragraph.

(R.S. 251, as amended, sec. 27, 41 Stat. 999, as amended, sec. 624, 46 Stat. 759 (19 U.S.C. 66, 1624, 46 U.S.C. 883))

[FR Doc.77-2668 Filed 1-26-77;8:45 am]

[T.D. 77-36]

PART 10—ARTICLES CONDITIONALLY FREE, SUBJECT TO A REDUCED RATE, ETC.

Late Filing of Generalized System of Preferences Certificate of Origin Form A

Pursuant to § 10.173(a) of the Customs Regulations (19 CFR 10.173(a)), the importer or consignee of a shipment of merchandise eligible for duty-free treatment under the Generalized System of Preferences, valued in excess of $250, is required to file with the district director of Customs at the time of entry a properly completed Certificate of Origin Form A (or an acceptable duplicate thereof) as evidence of the country of origin of the merchandise. If a properly completed Certificate of Origin Form A (or an acceptable duplicate thereof) is not produced at the time of entry, the entry will be accepted provided all other applicable requirements are met and the importer or consignee gives a bond on Customs Form 7551, 7553, or 7595 for the subsequent production of the Certificate of Origin.

However, pursuant to § 10.112 of the Customs Regulations (19 CFR 10.112), whenever a free entry or a reduced duty document, form, or statement required to be filed in connection with the entry is not filed at the time of the entry or within the period for which a bond was filed for its production, but failure to file it was not due to willful negligence or fraudulent intent, such document, form, or statement may be filed at any time prior to liquidation of the entry or, if the entry was liquidated, before the liquidation becomes final.

Inasmuch as § 10.112 of the Customs Regulations permits the late filing of other free entry and reduced duty documents, it has been concluded that the requirement that the Certificate of Origin be filed only at the time of entry or within the period for which a bond was filed for its subsequent production is unduly restrictive. Accordingly, it has been determined that the late filing provisions of § 10.112 of the Customs Regulations should be made applicable to the filing of the Certificate of Origin by amending § 10.173(a) of the Customs Regulations to provide that the certificate be filed in connection with the entry, rather than at the time of entry.

Pursuant to § 10.172 of the Customs Regulations (19 CFR 10.172), a written claim for duty-free entry is required to be filed on the entry document by placing the symbol "A" as a prefix to the Tariff Schedules of the United States Annotated item number for each article for which such treatment is claimed. In order to make it clear that the failure to properly place the symbol "A" on the entry document does not preclude the importer or consignee from filing the Certificate of the Origin subsequent to the time of entry in accordance with § 10.112 of the Customs Regulations, it has been determined that the late filing of the certificate in accordance with that section should constitute the written claim for duty-free entry.

Accordingly, Part 10 of the Customs Regulations (19 CFR Part 10) is amended in the following manner:

The second sentence of § 10.172 is amended to read as follows:

§ 10.172 Claim for exemption from duty under the Generalized System of Preferences.

* * * If duty-free treatment is claimed at the time of entry, a written claim shall be filed on the entry document by placing the symbol "A" as a prefix to the Tariff Schedules of the United States Annotated item number for each article for which such treatment is claimed. If duty-free treatment is claimed subsequent to the time of entry in accordance with § 10.112, the filing of the Certificate of Origin, or a duplicate thereof as described in § 10.173(a)(2), shall constitute the written claim.

The first sentence of paragraph (a)(1), and the first sentence of paragraph (a)(2) of § 10.173 are amended to read as follows:

§ 10.173 Evidence of the country of origin.

(a) *Shipments valued in excess of $250.*—(1) *Certificate of Origin.* Except as provided in paragraph (a)(5) of this section, the importer or consignee of a shipment of eligible merchandise valued in excess of $250 shall file with the district director in connection with the entry the Generalized System of Preferences Certificate of Origin Form A, as evidence of the country of origin. * * *

(2) *Duplicate Certificate of Origin.* In the event of the loss, theft, or destruction of a Certificate of Origin, the district director will accept in connection with the entry a duplicate Certificate of Origin issued by the appropriate governmental body in the country of origin and endorsed with the word "duplicate" in box 4. * * *

Inasmuch as the foregoing amendments merely relax present requirements and place no affirmative duty or burden on the public, prior notice and public procedure thereon is unnecessary and good cause is found for dispensing with the delayed effective date provision of 5 U.S.C. 553.

Effective date: These amendments shall be effective January 27, 1977.

VERNON D. ACREE,
Commissioner of Customs.

Approved: January 17, 1977.

JERRY THOMAS,
Under Secretary of the Treasury.

[FR Doc.77-2667 Filed 1-26-77;8:45 am]

[T.D. 77-35]

PART 24—CUSTOMS FINANCIAL AND ACCOUNTING PROCEDURE

Reimbursement for Overtime Services

In accordance with section 5 of the Act of February 13, 1911, as amended (19 U.S.C. 267), and section 451 of the Tariff Act of 1930, as amended (19 U.S.C. 1451), § 24.16 of the Customs Regulations (19 CFR 24.16) provides that parties requesting overtime services by Customs employees are required to reimburse Customs for the amount of overtime compensation paid to the employees performing the services. For Customs purposes, "overtime services" are those performed on Sundays or holidays, or on weekdays, before the hours of 8:00 a.m. or after 5:00 p.m., or between the corresponding weekday hours where the regular hours

for the transaction of Customs business are other than 8:00 a.m. to 5:00 p.m.

In the case of Customs services performed in connection with the arrival or departure of private vessels and aircraft, section 53(a) of the Airport and Airway Development Act of 1970, as amended (49 U.S.C. 1741(a)), limits the amount of reimbursements to $25.00. In the case of inspectional services performed as a consequence of the operation of aircraft generally, section 53(e) of that Act limits the amount of reimbursement for such services performed during regularly-established hours of service on Sundays or holidays to the amount that would have been charged had they been performed during regularly-established hours of service on weekdays. The provisions of section 53(e) will become effective on January 1, 1977.

As written, § 24.16 of the Customs Regulations does not reflect the provisions of section 53 of the Airport and Airway Development Act of 1970, as amended (49 U.S.C. 1741). Therefore, it is necessary to amend § 24.16 to provide that charges for Customs overtime services shall be made, where appropriate, in accordance with that Act, and in particular, that no such charges for overtime shall be made to owners or operators of aircraft for services performed on Sundays or holidays between the hours of 8:00 a.m. and 5:00 p.m. (effective January 1, 1977). Inasmuch as the latter services will be provided without charge, § 24.16 is also amended to provide that the required application for such services need not be accompanied by a cash deposit or bond.

Accordingly, § 24.16 of the Customs Regulations (19 CFR 24.16) is amended in the following manner:

§ 24.16 [Amended]

Paragraph (a) of § 24.16 is amended to read as follows:

(a) *General.* Customs services for which overtime compensation is provided for by section 5 of the Act of February 13, 1911, as amended (19 U.S.C. 267), or section 451, Tariff Act of 1930, as amended (19 U.S.C. 1451), shall be furnished only upon compliance with the requirements of those statutes for applying for such services and giving security for reimbursement of the overtime compensation, unless the compensation is nonreimbursable under the said section 451, or section 53 of the Airport and Airway Development Act of 1970, as amended (49 U.S.C. 1741). Reimbursements of overtime compensation shall be collected by the district director from the applicants for the services. Customs employees shall not receive overtime compensation for services performed on regular tours of duty at night, but no regular tour of duty shall embrace any part of a Sunday or holiday if the services performed are such that extra compensation would be payable if performed at the request of a private interest. Reimbursable overtime services shall not be furnished to an applicant who fails to cooperate with the Customs Service by filing a timely application therefor during regular hours of business when the need for the services can reasonably by foreseen, nor in any case until the maximum probable reimbursement is adequately secured.

Paragraph (c)(1) of § 24.16 is amended to read as follows:

* * * * *

(c) *Application and bond.* (1) Except as provided for in subparagraphs (2) and (4) of this paragraph, an application for services of Customs employees at night or on a Sunday or holiday, Customs Form 3171, supported by the required cash deposit or bond, shall be filed in the office of the district director of Customs before the assignment of such employees for reimbursable overtime services. The cash deposit to secure reimbursement shall be fixed by the district director or his authorized representative in an amount sufficient to pay the maximum probable compensation and expenses of the Customs employees, or the maximum amount which may be charged by law, whichever is less, in connection with the particular services requested. The bond to secure reimbursement shall be on Customs Form 7597 or 7599 and in an amount to be fixed by the district director, unless another bond containing a provision to secure reimbursement is on file. A bond given on Customs Form 7597 to secure the payment of overtime services rendered private aircraft and private vessels shall be taken without surety or cash deposit in lieu of surety, and the bond shall be modified to so indicate.

* * * * *

Paragraph (c)(3) of § 24.16 is amended by substituting "timely" for "seasonably" where it appears in the second sentence of that paragraph.

Paragraph (c) of § 24.16 is amended by the addition of a new subparagraph (4) to read as follows:

* * * * *

(c) * * *

(4) Inspectional services will be provided to owners or operators of aircraft without charge for overtime on Sundays and holidays between the hours of 8:00 a.m. and 5:00 p.m. Applications for inspectional services for aircraft during those hours shall be filed as set forth in subparagraph (1) of this paragraph, but without cash deposit or bond.

(R.S. 251, as amended, sec. 624, 46 Stat. 759, (5 U.S.C. 301, 19 U.S.C. 66, 624))

Inasmuch as these amendments merely conform the Customs Regulations to provisions of the law limiting the reimbursement of certain Customs overtime charges, and because these amendments require no public initiative, notice and public procedure thereon is found to be unnecessary. In addition, with respect to the amendments to paragraphs (a) and (c) (1) and (3) of § 24.16, good cause is found for those amendments to become effective at the earliest possible date.

Effective date: The amendments to paragraphs (a) and (c) (1) and (3) of § 24.16 shall become effective January 27, 1977. The amendment to paragraph (c) (4) of § 24.16 shall become effective January 1, 1977.

LEONARD LEHMAN,
Acting Commissioner of Customs.

Approved: January 17, 1977.

JERRY THOMAS,
Undersecretary of the Treasury.

[FR Doc.77-2666 Filed 1-26-77;8:45 am]

Title 24—Housing and Urban Development

SUBTITLE A—OFFICE OF THE SECRETARY, DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. R-77-339]

PART 35—LEAD-BASED PAINT POISONING PREVENTION IN CERTAIN RESIDENTIAL STRUCTURES

Amendments of Definitions in Subparts A and B and Addition of New Subpart F (Prohibition Against the Use of Lead-Based Paint in Federal and Federally Assisted Construction of Residential Structures)

The Department of Housing and Urban Development (HUD) published as a final rule Subparts A through E of this Part on July 13, 1976, at 41 FR 28876-28881, in order to implement the provisions of section 302 of the Lead-Based Paint Poisoning Prevention Act, Pub. L. 91-695, as amended, (42 U.S.C. 4801 et seq), hereinafter referred to as "the Act."

On June 23, 1976, section 501(3) of the Act (42 U.S.C. 4841(3)) was amended by the National Consumer Health Information and Health Promotion Act of 1976, Pub. L. 94-317, 94th Congress, to change the definition of Lead Based Paint, as follows:

[(c)(1) section 501(3) of such Act (42 U.S.C. 4841(3) is amended to read as follows:

(3)(A) Except as provided in subparagraph (B), the term 'lead based paint' means any paint containing more than five-tenths of 1 per centum lead by weight (calculated as lead metal) in the total nonvolatile content of the paint, or the equivalent measure of lead in the dried film of paint already applied, or both.

(B)(i) The Consumer Product Safety Commission shall, during the six-month period beginning on the date of the enactment of the National Health Promotion and Disease Prevention Act of 1976, determine, on the basis of available data and information and after providing opportunity for an oral hearing and considering recommendations of the Secretary of Health, Education, and Welfare (including those of the Center for Disease Control) and of the National Academy of Sciences, whether or not a level of lead in paint which is greater than six one-hundredths of 1 per centum but not in excess of five-tenths of 1 per centum is safe. If the Commission determines, in accordance with the preceding sentence, that another level of lead is safe, the term 'lead-based paint' means, with respect to paint which is manufactured after the expiration of the six-month period beginning on the date of the Commission's determination, paint containing by weight (calculated as lead metal) in the total nonvolatile content of the paint more than the level of lead determined by the Commission to be safe or the equivalent measure of lead in the dried film of paint already applied, or both.]

Pursuant to this provision, the Consumer Product Safety Commission ruled

on December 17, 1976 that "available scientific information is insufficient to support a finding that a level of lead in paint above 0.06 of 1 percent is safe." Consequently, the term lead-based paint will mean, with respect to paint which is manufactured after June 22, 1977, any paint containing more than six one-hundredths of 1 per centum lead by weight (calculated as lead metal) in the total nonvolatile content of the paint, or the equivalent measure of lead in the dried film of paint already applied or both.

In accordance with the statutory amendment and the Consumer Product Safety Commission's determination, the Department is hereby amending certain definitions in Subparts A and B to conform to the statutory definition. The two definitions affected are the definition of "Act" in Subpart A and the definition of "Lead-Based Paint" in Subpart B.

In addition, section 401 of the Act was amended by Pub. L. 94-317, to provide that the Secretary of Housing and Urban Development shall take appropriate action to prohibit the use of lead-based paint in Federal and Federally-assisted construction or rehabilitation of residential structures. The purpose of the amendment was to designate HUD to replace the Department of Health, Education and Welfare (HEW), which previously had this responsibility, and the new Subpart F implements this change in statutory designation.

These amendments to the definitions and the new Subpart F of Part 34 are hereby published as a final rule. No purpose would be served by publishing these provisions as proposed rulemaking since the only amendments are those necessary to incorporate definitional provisions of Pub. L. 94-317 and to specify that the Secretary of Housing and Urban Development will replace the Secretary of Health, Education and Welfare as the appropriate official to enforce Section 401 of the Lead-Based Paint Poisoning Prevention Act.

The Department has determined that an Environmental Impact Statement is not required with respect to this amended rule. A copy of the Finding of Inapplicability is available for public inspection in the Office of the Rules Docket Clerk, Office of the Secretary, Room 10141, Department of Housing and Urban Development, 451 7th Street, SW, Washington, D.C. 20410.

NOTE.—The Department of Housing and Urban Development has determined that this document does not contain a major proposal requiring preparation of an Inflation Impact Statement under Executive Order 11821 and OMB Circular A-107.

Accordingly, Part 35 of Title 24 is amended by incorporating the following changes in Subparts A and B and by adding a new Subpart F, as follows:

1. In Subpart A, § 35.3, Definitions, revise paragraph (a) to read:

§ 35.3 Definitions.

(a) "Act" means the Lead-Based Paint Poisoning Prevention Act, Pub. L. 91-695, 84 Stat. 2078, as amended by Pub. L. 93-151 and Pub. L. 94-317 (42 U.S.C. 4801).

* * * * *

2. In Subpart B, § 35.12, Definitions, revise paragraph (a) to read:

§ 35.12 Definitions.

(a) "Lead-based paint" as defined in Section 501(3) of the Act as amended by Pub. L. 94-317 (42 U.S.C. 4801, et seq), the National Consumer Information and Health Promotion Act of 1976, means (1) any paint containing more than five-tenths of 1 per centum lead by weight (calculated as lead metal in the total non-volatile content of the paint or the equivalent measure of lead in the dried film of paint already applied or both; or (ii) with respect to paint which is manufactured after June 22, 1977 lead-based paint means any paint containing more than six one-hundredths of 1 per centum lead by weight (calculated as lead metal) in the total nonvolatile content of the paint or the equivalent measure of lead in the dried film of paint already applied.

* * * * *

3. Add Subpart F to read as follows:

Subpart F—Prohibition Against the Use of Lead-Based Paint in Federal and Federally-Assisted Construction or Rehabilitation of Residential Structures

Sec.
36.60 Scope.
36.61 Definitions.
36.62 Federal construction; prohibition against use of lead-based paint.
36.63 Federally assisted construction; prohibition against use of lead-based paint.
36.64 Reports to the Secretary.
36.65 Authority for Subpart B of these regulations.

Subpart F—Prohibition Against the Use of Lead-Based Paint in Federal and Federally-Assisted Construction or Rehabilitation of Residential Structures

§ 36.60 Scope.

The regulations of this Subpart are promulgated to implement Section 401 of the Lead-Based Paint Poisoning Prevention Act, as amended, which directs the Secretary of Housing and Urban Development to take such steps and impose such conditions as may be necessary or appropriate to prohibit the use of lead-based paint in residential structures constructed or rehabilitated by the Federal Government or with Federal assistance in any form. The regulations are applicable to all Federal agencies.

§ 35.61 Definitions.

The definitions contained in § 35.3 shall apply to this Subpart F and in addition the following definitions are applicable to this Subpart F:

(a) "Federal Agency" means the United States or any executive departments, independent establishments, administrative agencies and instrumentalities of the United States, including corporations in which all or substantially all of the stock is beneficially owned by the United States or by any of the foregoing departments, establishments, agencies or instrumentalities.

(b) "Agency Head" means the principal official of a Federal Agency and includes those persons duly authorized to act in his behalf.

(c) "Lead-based paint" as defined in Section 501(3) of the Act as amended by Pub. L. 94-317 (42 U.S.C. 4801 et seq), the National Consumer Information and Health Promotion Act of 1976, means (1) any paint containing more than five-tenths of 1 per centum lead by weight (calculated as lead metal) in the total non-volatile content of the paint or the equivalent measure of lead in the dried film of paint already applied or both; or (2) with respect to paint which is manufactured after June 22, 1977 lead-based paint means any paint containing more than six one-hundredths of 1 per centum lead by weight (calculated as lead metal) in the total nonvolatile content of the paint or the equivalent measure of lead in the dried film of paint already applied.

§ 36.62 Federal construction; prohibition against use of lead-based paint.

No Federal agency shall, in any residential structure constructed or rehabilitated by such agency, use or permit the use of lead-based paint on applicable surfaces.

§ 36.63 Federally assisted construction: prohibition against use of lead-based paint.

(a) Each Agency Head shall issue regulations and take such other steps as in his or her judgment are necessary to prohibit the use of lead-based paint on applicable surfaces of any residential structures constructed or rehabilitated by such agency under any federally assisted program.

(b) Such regulations shall require the inclusion of appropriate provisions in contracts and subcontracts pursuant to which such Federally assisted construction or rehabilitation is performed, prohibiting such use of lead-based paint, and shall include provisions for enforcement of that prohibition.

§ 36.64 Reports to the Secretary.

(a) To assist the Secretary in fulfilling her responsibilities under the Act, each Federal agency shall furnish to the Secretary, not later than 3 months after the effective date of these regulations, a report of the steps it has taken to comply with this Subpart F, Part 35.

(b) Each Federal agency shall submit such additional reports on its activities in the implementation of this part as may be deemed necessary by the Secretary.

§ 36.65 Authority for Subpart B of these regulations.

On or after the effective date of these amended regulations, Subpart F will serve as the authority for Subpart B of these regulations.

(Pub. L. 91-695, 84 Stat. 2078, as amended by Pub. L. 94-317 (42 U.S.C. 4801 et seq.);

sec. 7(d) Department of Housing and Urban Development Act (42 U.S.C. 3535(d)).)

Effective date: February 25, 1977.

Issued at Washington, D.C., January 19, 1977.

JOHN B. RHINELANDER,
Under Secretary of Housing and Urban Development.

[Docket No. R-77-241]

PART 42—RELOCATION PAYMENTS AND ASSISTANCE AND REAL PROPERTY ACQUISITION UNDER THE UNIFORM RELOCATION ASSISTANCE AND REAL PROPERTY ACQUISITION POLICIES ACT OF 1970

Eligibility for Relocation Payments—Section 8 of the United States Housing Act of 1937, as Amended

On February 20, 1975, revised guidelines amending Part 42 of the regulations of the Department of Housing and Urban Development implementing the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970 were published at 40 FR 7206. These regulations became effective on March 31, 1975. § 42.55(d)(3) of those regulations, pertaining to basic eligibility conditions for persons displaced as a result of the Section 8 Housing Assistance Payments Program authorized by the United States Housing Act of 1937, as amended (50 Stat. 88; U.S.C. 1401 et seq.) provides that persons who, on or after the date of execution of an Annual Contributions Contract (ACC), move from a dwelling acquired by a public housing agency and satisfy the other eligibility criteria of the regulations in that Part, shall qualify for relocation payments. It has been brought to the attention of the Department that a more pertinent date for establishing Federal recognition of a HUD-assisted project for purposes of creating eligibility for relocation payments is the date of notification to the public housing agency that the final proposal is approved.

The Secretary has determined that it is impractical, unnecessary and contrary to the public interest to follow a notice of proposed rulemaking procedure and that good cause for making the revision effective on the date of publication exists.

In connection with the environmental review of the proposed revision to the regulations, a Finding of Inapplicability has been made under HUD Handbook 1390.1, 38 FR 19182. A copy of the Finding is available for inspection in the Office of the Rules Docket Clerk, Office of the Secretary, Room 10141, Department of Housing and Urban Development, 451 7th Street, SW, Washington, D.C. 20410.

NOTE.—It is hereby certified that the economic and inflationary impacts of this revision have been carefully evaluated in accordance with OMB Circular No. A-107.

This revision is issued under the authority of the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970 (42 U.S.C. 4601), and Section 7(d), Department of Housing and Urban Development Act (42 U.S.C. 3535(d)).

In consideration of the foregoing, 24 CFR 42.55(d)(3) is revised to read as follows:

§ 42.55 Basic eligibility conditions.

* * * * *

(d) * * *

(3) Housing assistance payments program: If such person moves from real property on or after the date of notification to the public housing agency that the final proposal is approved: *Provided*, That eligibility under the regulations in this Part shall be limited to cases in which a public housing agency itself acquires real property from such person is displaced.

Effective date: This revision shall be effective January 26, 1977.

JOHN B. RHINELANDER,
Under Secretary of Housing and Urban Development.

CHAPTER II—OFFICE OF ASSISTANT SECRETARY FOR HOUSING—FEDERAL HOUSING COMMISSIONER (FEDERAL HOUSING ADMINISTRATION)

SUBCHAPTER A—GENERAL

[Docket No. R-77-450]

PART 200—INTRODUCTION

Redelegation With Respect to Fund Reservations Under Section 202 of the Housing Act of 1959, as Amended

The Department of Housing and Urban Development has determined that it would be more efficient and effective for both HUD and program applicants if field offices were redelegated authority to increase fund reservations for approved applications under section 202 of the Housing Act of 1959, as amended (12 USC 1701q). Therefore, §§ 200.109(a)(5), 200.118(e)(1), and 200.128 are amended to read as follows:

§ 200.109 Regional Administrators, Deputy Regional Administrators and Assistant Regional Administrator Housing Production and Mortgage Credit (Region VIII, Denver).

* * * * *

(a) * * *

* * * * *

(5) To make reservations of funds and to approve or disapprove loans for housing for the elderly or handicapped under section 202 of the Housing Act of 1959 and to make contracts and execute documents in connection therewith and, with respect to project applications for mortgage insurance under section 236 of the National Housing Act, to determine feasibility under section 236, issue commitments for mortgage insurance under section 236, insure such mortgases pursuant to such commitments, including approval of insured advances during construction, and in connection with section 202 loans to be converted to insured mortgages under section 236, to assign and deliver such mortgages to the permanent lender.

§ 200.118 Area Director and Deputy Area Director.

* * * * *

(e) * * *

(1) To make reservations of funds and to approve or disapprove loans for housing for the elderly or handicapped under section 202 of the Housing Act of 1959 and to make contracts and execute documents in connection therewith.

§ 200.128 Director and Deputy Director of the Insuring Offices.

To the position of Director, and under his general supervision to the position of Deputy Director, of each Insuring Office listed below, with respect to the production of housing units within the jurisdiction of the Insuring Office, there is redelegated the authority to perform the functions and exercise the authorities set forth in § 200.118 (c) and (e)(1).

Phoenix, AZ	Albuquerque, NM
Fresno, CA	Albany, NY
Sacramento, CA	Cincinnati, OH
Santa Ana, CA	Cleveland, OH
Denver, CO	Providence, RI
Springfield, IL	Memphis, TN
Des Moines, IA	Houston, TX
Topeka, KS	Salt Lake City, UT
Shreveport, LA	Spokane, WA
Grand Rapids, MI	Charleston, WV
Helena, MT	

Effective date: These amendments shall be effective as of January 17, 1977.

JOHN T. HOWLEY,
Acting Assistant Secretary for Housing — Federal Housing Commissioner.

[FR Doc.77-2692 Filed 1-26-77;8:45 am]

[Docket No. R-77-421]

PART 201—PROPERTY IMPROVEMENT AND MOBILE HOME LOANS

On November 23, 1976 a notice of proposed rulemaking was published in the FEDERAL REGISTER, 41 FR 51614, proposing amendments to Subtitle B of Title 24 of the Code of Federal Regulations, Chapter II, Subchapter B, Part 201, "Property Improvement and Mobile Home Loans."

The amendments require that mobile homes financed with loans under this part meet the requirements of the National Mobile Home Construction and Safety Standards Act of 1974 (Pub. L. 93-383, 42 U.S.C. 5401, et seq.) in effect at the time the mobile home is manufactured and revoke provisions of the regulations concerning factory inspection and private testing laboratories as these activities are now covered by the above standards.

Interested persons were invited to submit written data, views or statements not later than December 22, 1976.

Two comments were received. Both commenters indicated approval of the amendments. One of the commenters indicated that there might be some confusion by the public between these regulations and the regulations implementing the National Mobile Home Construction and Safety Standards Act of 1974. These regulations are solely concerned with the eligibility of mobile home loans under the National Housing Act and have no effect on regulations promulgated under the National Mobile Home Construction and Safety Standards Act of 1974.

A Finding of Inapplicability pursuant to Section 102(2)(c) of the National Environmental Policy Act of 1969, has been made with regard to these proposed regulations in accordance with HUD Handbook 1390.1. A copy of the Finding of Inapplicability is available for public inspection at the Office of the Rules Docket Clerk, Office of the Secretary, Room 10141, Department of Housing and Urban Development, 451 Seventh Street, SW., Washington, D.C. 20410.

Accordingly, 24 CFR Part 201 is amended to read as follows:

1. Section 201.520(b) Structural design and standards is amended to read as follows:

§ 201.520 Structural design and standards.

* * * * *

(b) The requirements of paragraph (a) of this section shall be satisfied by a certification by the manufacturer that the mobile home conforms to all applicable Federal construction and safety standards in effect on the date the mobile home was manufactured. The certification shall be in the form of a label or tag affixed to the mobile home as prescribed in Section 616 of the National Mobile Home Construction and Safety Standards Act of 1974, Pub. L. 93-383, 42 U.S.C. 5401, 5415.

* * * * *

§ 201.521 [Revoked]

§ 201.522 [Revoked]

2. In consideration of the foregoing, § 201.521 Factory Inspection and § 201.522 Private testing organizations, are revoked.

(Sec. 7(d) 79 Stat. 670 (42 U.S.C. 3535(d)); sec. 2, 48 Stat. 1246 (12 U.S.C. 1703), as amended by Pub. L. 93-383.)

Effective date: This regulation shall be effective on February 28, 1977.

NOTE.—The Department of Housing and Urban Development has determined that this document does not contain a major proposal requiring preparation of an Inflation Impact Statement under Executive Order 11821 and OMB Circular A-107.

JOHN T. HOWLEY,
Acting Assistant Secretary for Housing—Federal Housing Commissioner.

[FR Doc.77-2686 Filed 1-26-77;8:45 am]

[Docket No. R-77-405]

PART 201—PROPERTY IMPROVEMENT AND MOBILE HOME LOANS

Insurance of Financial Institutions

On August 3, 1976, a notice of proposed rulemaking was published in the FEDERAL REGISTER, 41 FR 32564-32567 stating that HUD was considering an amendment to subtitle B of Title 24 of the Code of Federal Regulations, Chapter II, subchapter B, Part 201, "Property Improvement and Mobile Home Loans", adding a new subpart D, "Combination and Mobile Home Lot Loans." The new subpart implements 309 (b)(2) and (d) of the Housing and Community Development Act of 1974, Pub. L. 93-383 which amended Title I of the National Housing Act, 12 U.S.C. 1703, to provide for insurance of financial institutions that make loans to finance the purchase of mobile home lots by present owners of mobile homes, and loans for the purchase of a mobile home lot and a mobile home in combination.

COMMENTS ON PROPOSED REGULATIONS

Interested persons were invited to submit written data, views, or statements. Twenty-one comments were received in response to this request. The majority of the comments related to the limitations on maximum terms. The 1974 amendments to Title I of the National Housing Act as amended (12 U.S.C. 1703) provide for a maximum term of 15 years and 32 days for a single-wide mobile home and a lot, and 20 years and 32 days for a mobile home consisting of two or more modules and a lot. The proposed regulations limited maxima for these loans to 12 years and 32 days, and 15 years and 32 days respectively. After taking into consideration the views and statements submitted, a determination has been made to set the maximum terms for these loans at the limits permitted under the Act.

Several commenters also objected to the exclusion of furniture from the financing package, and one commenter suggested that the regulations should contain a definition of furniture. After careful consideration, it was determined that the exclusion of furniture from financing is proper and necessary in view of the relatively long terms to be permitted under the program. A definition of furniture has been included in the regulations to make clear that wall-to-wall carpeting, major household appliances, stoves and air conditioners may be included in the financing package and will not be considered furniture.

A commenter questioned the definition of a mobile home (eligible for financing) which requires that a mobile home be at least 40 body feet or more in length, and 10 body feet or more in width, pointing out that the definition of a mobile home in the Mobile Home Construction and Safety Standards Act of 1974, 42 U.S.C. 5401, 5402, provides for dimensions of 8 body feet or more in width and 32 body feet or more in length. The Mobile Home Construction and Safety Standards Act applies to all mobile homes without regard to whether or not they are to be used as permanent residences. Title I of the National Housing Act, as amended, 12 U.S.C. 1703, imposes a statutory requirement that mobile homes financed pursuant to this part must be the permanent residence of the borrower. In implementing this requirement it is deemed necessary to exclude the financing of smaller mobile homes under the program. The final regulations provide for a minimum width of 12 body feet.

Several commenters suggested that a minimum size should be prescribed for a mobile home lot eligible for financing under this part. The lot must be acceptable to the Secretary as a mobile home site. Where local sanitary and zoning codes require minimum lot size, the lot must meet such code requirements in addition to the Secretary's requirements.

A suggestion was made that lots subject to a condominium agreement should be eligible. This requires further study to determine the conditions necessary for protection of the consumer and those factors affecting long term value. Accordingly, the prohibition of lots subject to a condominium agreement has been retained.

Several comments were made recommending that the maximum permissible interest rate be raised to permit a higher annual percentage rate. After careful study it was determined that an increase in the interest rate would not be warranted at this time.

A commenter suggested that in § 201.1512(a)(3)—now § 201.1512(b)—which deals with a purchase of a mobile home lot by the present owner of a mobile home, and requires that the borrower shall certify that he or she will place his or her mobile home on the lot acquired within six months after the date of the loan, the word "placed" be changed to "erected". Section 2(b) of Title I of the National Housing Act as amended (12 U.S.C. 1703(b)) provides that, "A mobile home lot loan may be made only if the owner certifies that he will place his mobile home on the lot acquired with such loan within six months after the date of such loan." In view of the use of the term "place" in the Act, that term has been retained in the regulations.

SUMMARY OF FINAL PROVISIONS

The final regulations provide for a maximum loan for the purchase of an undeveloped mobile home lot of $5,000. The maximum term for repayment would be 10 years and 32 days. The maximum loan for the purchase of a single-wide mobile home and a developed lot is $20,000 with a maximum term of 15 years and 32 days.

The maximum dollar amount allocated for the purchase of a developed mobile home lot is $7,500; the maximum term for repayment is 10 years and 32 days.

The maximum insurable loan for the purchase of a mobile home consisting of two or more modules and a developed lot is $27,500 with a maximum term of 20 years and 32 days. Mobile homes acquired pursuant to this subpart will be required to be built in accordance with the standards required by the regulations and procedures implementing the National Mobile Home Construction and Safety Standards Act of 1974, Pub. L. 93-383, 42 U.S.C. 5401, et seq.

Mobile home lots purchased will be appraised by an agent of the Secretary and insured lending institutions will be required to determine that marketable

title is vested in the borrower or borrowers.

Insured lenders will be required to obtain a first lien on the mobile home and the mobile home lot where both are secured with proceeds of the loan. When only the acquisition of a mobile home lot is being financed by a present owner of a mobile home, with a loan to be insured under the regulations being promulgated, the first lien need only be on the lot. The first lien on the mobile home and the mobile home lot, where state law permits, may be obtained in a single instrument. Where a chattel security and a real estate mortgage are necessary to obtain the requisite first lien or security interest both instruments will be required. For purposes of these regulations, where more than one legal instrument is necessary in order to effect a first lien on a mobile home and a mobile home lot, the transaction will nevertheless be considered to be a single loan transaction for purposes of this subpart.

The maximum interest rate eligible for insurance is 10½ percent per annum.

Insurance afforded to lending institutions under the promulgated regulations is subject to co-insurance as required by Title I of the National Housing Act. The Secretary's insurance liability is limited to 90 percent of the insured lender's loss on an individual loan up to the amount in the insured lender's general insurance reserve.

A Finding of Inapplicability respecting the National Environmental Policy Act of 1969 has been made in accordance with HUD procedures. A copy of this Finding of Inapplicability will be available for public inspection during regular business hours in the Office of the Rules Docket Clerk, Office of the Secretary, Room 10141, Department of Housing and Urban Development, 451 7th Street, SW., Washington, D.C. 20410.

Accordingly, 24 CFR Part 201 is amended to read as follows:

1. In Part 201, § 201.12 paragraph (b) is amended to read as follows:

§ 201.12 Insurance reserve.

* * * * *

(b) There shall be maintained for each insured a general insurance reserve which shall equal 10 percent of the aggregate amount advanced on all eligible loans originated by such insured pursuant to the provisions of the regulations in Subpart A, B,*, D * * * of this part on or after March 1, 1950, and prior to the expiration of the Secretary's authority to insure under the provisions of this Act, less the amount of all claims approved for payment by the Secretary in connection with such loans and less the amount of any adjustment made pursuant to paragraph (c) of this section.

* * * * *

2. In Part 201 a new subpart D is added to read as follows:

Subpart D—Combination and Mobile Home Lot Loans

Sec.
201.1500 Incorporation by reference.
201.1501 Purpose.
201.1502 Definitions.

Loan Requirements

201.1503 Eligibility requirements.
201.1504 Maximum loan amounts and terms.
201.1505 Combination loans for the purchase of a mobile home and a developed or undeveloped lot.
201.1506 Loans for the purchase or acquisition of a lot.
201.1507 Title and lien requirements.
201.1508 Waived title objections.
201.1509 Fees and charges.
201.1510 Borrower's minimum investment.
201.1511 Financing charges.
201.1512 Mobile home lot certification.

Insurance Requirements

201.1513 Insurance reserve.
201.1514 Rate of insurance charge.

Default Under Mobile Home Obligation

201.1515 [Reserved].
201.1516 Date of default.
201.1517 Notice of default.
201.1518 Acquisition of property.
201.1519 Notice of foreclosure.
201.1520 Deed in lieu of foreclosure.
201.1521 Notice of acquisition of title.
201.1522 Disposition of property.

Claims

201.1525 Claim application.
201.1526 Amount of claim.
201.1527 Incontestability of claim payment.

Extension of Time

201.1528 Actions to be taken by insured lender.

Amendments

201.1530 Effect of amendments.

Authority: Sec. 7(d), 79 Stat. 670 (42 U.S.C. 3535(d); sec. 2, 48 Stat. 1246 (12 U.S.C. 1703), as amended by Pub. L. 93-383, and Pub. L. 94-173.

Subpart D—Combination and Mobile Home Lot Loans

§ 201.1500 Incorporation by reference.

All of the provisions of Subpart B of this part concerning insurance of institutions making mobile home loans shall be applicable to insurance of institution making mobile home lot loans and combination loans pursuant to this subpart except the following provisions:

Sec.
201.501(b)(1)(j) and (1) Definitions.
201.505 Purpose of subpart.
201.525 Mobile home location standards.
201.530 Maximum loan amount.
201.535 Borrower's minimum investment.
201.540 Financing charges.
201.625 Rate of insurance.
201.560 Maturity provisions.
201.585 Refinancing.
201.595(e) Dealer investigation approval and control.
201.665 Claim application.
201.675 Insurance reserve.
201.900 Amendment and effect.

§ 201.1501 Purpose.

The provisions of this subpart contain the requirements under which an approved financial institution may obtain insurance of combination loans (mobile home and lot) and mobile home lot loans.

§ 201.1502 Definitions.

As used in the regulations in this subpart the term—

(a) "Combination loan" means a loan for the purchase of a mobile home and a mobile home lot, in a single transaction.

(b) "Mobile home lot" means a parcel or portion of land acceptable to the Secretary as a mobile home site. The mobile home lot may be unplatted, or may be in a mobile home park, a recorded or unrecorded subdivision or planned unit development, but may not be subject to a condominium agreement.

(c) "Repossession" means a lawful foreclosure, recovery or acquisition of title to property (pursuant to provisions of a security agreement or mortgage) such as to enable the insured lender to convey marketable title to a third party.

(d) "Borrower" means a natural person who applies for and receives a loan for the purchase of a mobile home and a developed or undeveloped lot, or only for a developed or undeveloped mobile home lot.

(e) "Owner" means (1) a borrower who owns a mobile home at the time of application for a loan to finance, under this subpart, the purchase of a lot upon which to place that mobile home, or (2) a borrower who is purchasing a mobile home and a lot, under the provisions of this subpart.

(f) "Developed lot" means a lot with water and utility connections, sanitary facilities, appropriate driveways, concrete parking pad, slab, or masonry foundation, provisions for anchoring, and other improvements which are necessary to make the lot acceptable to the Secretary as a mobile home site.

(g) "Undeveloped lot" means a lot with water and utility connections, sanitary facilities, ingress and egress to the property.

(h) "Actuarial method" means the method of allocating payments made on a debt between the amount financed and the finance charge, pursuant to which a payment is applied first to the accumulated finance charge, and any remainder is subtracted from, or any deficiency is added to, the unpaid balance of the amount financed.

(i) "Manufacturer's invoice" means a document which is officially issued by the manufacturer stating the true wholesale price of a mobile home and its equipment, excluding furniture. The document shall be on a form which is in general use in the industry.

(j) "Mobile home" means a transportable structure which is twelve body feet or more in width and is forty body feet or more in length, and which is built on a permanent chassis, and designed to be used as a dwelling with or without permanent foundation, when connected to the required utilities, and includes the plumbing, heating, air conditioning and electrical systems contained therein. Where a mobile home is composed of two or more modules or sections, each module or section shall have a minimum floor space area of at least 400 square feet.

(k) "Furniture" means movable articles of personal property such as bed, bedding, chairs, sofas, divans, lamps, tables, television, radio or stereo sets, and other similar items of personal property; but furniture does not include wall-to-wall carpeting, refrigerators, ovens, ranges, dishwashers, clothes dryers, heating or cooling equipment or other similar appliances.

Loan Requirements

§ 201.1503 Eligibility requirements.

Loans shall be made only for financing, in combination, the purchase of a mobile home and a developed or undeveloped mobile home lot or a developed or undeveloped mobile home lot by the owner of a mobile home which mobile home is the principal residence of that owner. Furniture may not be included in the loan, or financed with the proceeds of the loan.

§ 201.1504 Maximum loan amounts and terms.

(a) Maximum insurable loan amounts and terms shall not exceed:

(1) $17,500 for 15 years and 32 days for the purchase of a single-wide mobile home and an undeveloped lot (but not to exceed $12,500 for the mobile homes).

(2) $20,000 for 15 years and 32 days for the purchase of a single-wide mobile home and a developed lot (but not to exceed $1 ,500 for the mobile home).

(3) $25,000 for 20 years and 32 days for the purchase of a mobile home composed of two or more modules and an undeveloped lot (but not to exceed $20,000 for the mobile home).

(4) $27,500 for 20 years and 32 days for the purchase of a mobile home composed of two or more modules and a developed lot (but not to exceed $20,000 for the mobile home).

(b) Maximum permissible loan amounts and terms for the purchase of a mobile home lot shall not exceed:

(1) $5,000 for 10 years and 32 days for the purchase of an undeveloped lot on which to place a mobile home owned by the borrower.

(2) $7,500 for 10 years and 32 days for the purchase of a developed lot on which to place a mobile home owned by the borrower.

(c) A loan may not exceed the Secretary's estimate of the value of the property purchased.

§ 201.1505 Combination loans for the purchase of a mobile home and a developed or undeveloped lot.

(a) A loan to purchase a mobile home and a developed or undeveloped lot on which such mobile home is placed shall be eligible for insurance: If,

(1) The borrower acquires title to such lot, which meets the requirements of § 201.1507;

(2) The loan is secured by a first lien;

(3) The lot is determined by the Secretary to be an acceptable mobile home site;

(b) Notwithstanding that the borrower's obligation for purchase or acquisition of the lot is evidenced and secured separately from his obligation for the purchase of the mobile home, the instrument evidencing both obligations shall constitute one loan for the purposes of this part.

(c) Any portion of the cost of the home and lot and the cost of improvements to the home or lot which will not be paid from the proceeds of the loan must be paid by the borrower in cash from his or her own resources.

§ 201.1506 Loans for the purchase or acquisition of a lot.

(a) A loan to finance the purchase by the borrower of a lot on which to place a mobile home owned by the borrower shall be eligible, *Provided*, That:

(1) The borrower acquires title to such lot, which meets the requirements of § 201.1507;

(2) The loan is secured by a first lien;

(3) The cost of the purchase of the lot, which will not be paid from the proceeds of the loan, is paid by the borrower in cash from his or her own resources;

(4) The borrower certifies that he or she owns a mobile home which is the borrower's principal residence;

(5) The borrower certifies that he or she will place his or her mobile home on the lot within six months after the date the loan is made;

(b) For the purposes of this subpart, purchase of a mobile home lot includes:

(1) The refinancing of the balance owed by the borrower as purchaser under an existing real estate installment purchase contract; or

(2) The refinancing of existing mortgage loans or other liens which are secured of record on a mobile home lot owned by the borrower.

§ 201.1507 Title and lien requirements.

(a) The interest in the realty constituting a mobile home lot purchased by the borrower wholly or in part with the proceeds of a loan, shall not be less than a fee simple estate:

(b) The title to the realty shall be a marketable title such as is generally acceptable to informed buyers, title companies, and attorneys in the community in which the property is situated.

(c) It shall be the responsibility of the lender to assure that the borrower obtains or has an estate in the land constituting the mobile home lot that meets the requirements of this section and § 201.1508.

(d) The lender shall obtain from the borrower an agreement that the home will not be moved from the lot while the loan is outstanding.

§ 201.1508 Waived title objections.

Title shall not be objected to by reason of the following matters:

(a) Violation of a restriction based on race, color or creed, even where such restrictions provide for a penalty of reversion or forfeiture of title or a lien for liquidated damage;

(b)(1) Customary easements for public utilities, party walls, driveways, and other purposes;

(2) Easements for public utilities along one or more of the property lines and extending not more than 10 feet therefrom or for drainage or irrigation ditches along the rear 10 feet of the property, provided the exercise of the rights thereunder do not interfere with any of the buildings or improvements located on the subject property;

(c) Easements for underground conduits which are in place and which do not extend under any buildings on the subject property;

(d) Mutual easements for joint driveways constructed partly on the subject property and partly on adjoining property, provided the agreements creating such easements are of record;

(e) Encroachments on the subject property by improvements on adjoining property where such encroachments do not exceed 1 foot, provided such encroachments do not touch any buildings or interfere with the use of any improvements on the subject property;

(f) Encroachments on adjoining property by eaves and overhanging projections attached to improvements on subject property where such encroachments do not exceed 1 foot;

(g) Encroachments on adjoining property by hedges, wooden or wire fences belonging to the subject property;

(h) Encroachments on the adjoining property by driveways belonging to subject property where such encroachments do not exceed 1 foot, provided there exists a clearance of at least 8 feet between the building on the subject property and the property line affected by the encroachment;

(i) Variations between the length of the subject property lines as shown on the application for insurance and as shown by the record or possession lines, provided such variations do not interfere with the use of any of the improvements on the subject property and do not involve a deficiency of more than 2 percent with respect to the length of any other lines;

(j) Encroachments by garages or improvements other than those which are attached to portion of the main dwelling structure over easements for public utilities, provided such encroachment does not interfere with the use of the easement or the exercise of the rights of repair and maintenance in connection therewith;

(k) Violations of cost or set-back restrictions which do not provide a penalty of reversion or forfeiture of title, or a lien for liquidated damages which may be superior to the lien or the insured mortgage. Violations of such restrictions which do provide for such penalties, provided such penalty rights have been duly released or subordinated to the lien of the insured mortgage, or provided that the borrower has been furnished with a policy of title insurance expressly insuring the borrower against loss by reason of such penalties.

(l) Customary building and use restrictions which:

(1) Are coupled with a reversionary clause, provided there has been no violation prior to the date of the deed to the borrower; or

(2) Are not coupled with a reversionary clause and have not been violated to a material extent.

(m) Outstanding oil, water or mineral rights (or damage caused by the exer-

cise of such rights) which are customarily waived by prudent lending institutions and leading attorneys in the community.

§ 201.1509 Fees and charges for origination or loan.

(a) The Secretary will charge the insured a fee of $45 for appraisal of the mobile home lot.

(b) Fees and charges incident to the origination of a loan which may be paid by the borrower shall be limited to reasonable and customary amounts for the following:

(1) Appraisal fees charged by the Secretary.

(2) Recording fees and recording taxes.

(3) Credit report.

(4) That portion of taxes, assessments, and other similar items for the current year chargeable to the borrower and his initial deposit (lump-sum payment) for a tax and insurance escrow account.

(5) Survey, if required, by the lender or borrower.

(6) Title examination and title insurance, if any.

(7) Such other items as may be authorized in advance by the Secretary as appropriate for inclusion under this paragraph.

(c) Fees and charges specified in this section may not be included in the loan.

§ 201.1510 Borrower's minimum investment.

The borrower shall make a minimum cash down payment of at least 5 percent of the first $10,000 of purchase price of the mobile home and lot plus 10 percent of any amount in excess of $10,000. Where only a mobile home lot is being financed, the borrower shall make a minimum cash down payment of at least 10 percent of the purchase price of the mobile home lot.

§ 201.1511 Financing charges.

(a) *Maximum financing charges.* The maximum permissible financing charge which may be directly or indirectly paid to, or collected by, the insured in connection with a combination mobile home and lot loan or mobile home lot loan transaction shall not exceed:

(1) 10½ percent per annum.

(2) No points or discounts of any kind may be assessed or collected in connection with the loan transaction.

Finance charges on individual loans shall be made in accordance with tables of calculation issued by the Secretary.

(b) *Prepayment rebate.* If an obligation is paid in full prior to maturity, the insured shall rebate the full unearned charge according to the actuarial method, where such rebate is $1 or more.

§ 201.1512 Mobile home lot certification.

(a) Prior to disbursement of loan proceeds for the purchase of a mobile home lot, the insured shall obtain a certificate on a form prescribed by the Secretary, signed by the seller and borrower, establishing that:

(1) The lot meets the requirements established by the Secretary, and has been appraised by the Secretary or his designated agent.

(2) The borrower has not been paid or offered, as an inducement for consummation of the transaction, any cash payment or rebate, nor has it been represented to the borrower that he or she will receive a cash bonus payment or commission on future sales;

(b) If the loan is solely for the purchase of a mobile home lot by the present owner of a mobile home, which is the principal residence of the borrower, the borrower shall certify that he will place his mobile home on the lot acquired with such loan within six months after disbursement of the loan proceeds.

(c) If the insured has information to the contrary with regard to the statements in the certification required by paragraph (a) or (b) of this section, he shall not disburse the loan proceeds. In the absence of such contrary information, he may disburse the loan proceeds in reliance upon the statements in the certification.

INSURANCE REQUIREMENTS

§ 201.1513 Insurance reserve.

All of the provisions of § 201.12 with respect to the maintenance for each insured lender of a general insurance reserve shall apply with respect to loans reported for insurance under this subpart. The aggregate amount of loans advanced by an insured lender, for the purposes of determining its general insurance reserve, shall include loans reported for insurance under all subparts of this part.

§ 201.1514 Rate of insurance charge.

The insured shall pay to the Secretary an insurance charge equal to fifty-four one hundredths (0.54) of 1 per cent per annum of the net proceeds of any eligible loan reported and acknowledged for insurance. In computing the insurance charge, no charge shall be made for a period of 14 days or less, and a charge for a month shall be made for a period of more than 14 days.

DEFAULT UNDER MOBILE HOME OBLIGATION

§ 201.1515 [Reserved]

§ 201.1516 Default.

For the purposes of this subpart, the lender shall not consider the borrower(s) to be in default until 30 days after:

(a) The first uncorrected failure to perform any duty under the mobile home lot mortgage; or

(b) The first failure to make a monthly payment which is not covered by subsequent payments made by the borrower where such subsequent payments are applied to the overdue monthly payments in the order in which they became due.

(c) If after default and prior to completion of foreclosure or repossession proceedings the borrower shall cure the default, the lender shall reinstate the loan as if a default had not occurred, provided the borrower pays to the insured lender such expenses as the lender has incurred in connection with the foreclosure or repossession proceedings.

§ 201.1517 Notice of default.

The insured lender shall, within 60 days after the date of default as defined in this part, give written notice thereof to the Secretary on a form prescribed by him, unless such default has been cured or unless the Secretary has been notified of a previous default which remains uncured.

§ 201.1518 Acquisition of property.

At any time within one year from the date of default, or such additional period of time as may be approved by the Secretary, the lender, at its election, shall either:

(a) Commerce foreclosure or repossession; or

(b) Acquire possession of, and title to, the mortgaged property by means other than foreclosure.

§ 201.1519 Notice of foreclosure.

The insured lender shall give written notice to the Secretary on a form prescribed by him within 30 days after the institution of foreclosure or repossession proceedings and shall exercise reasonable diligence in prosecuting such proceedings to completion.

§ 201.1520 Deed in lieu of foreclosure.

(a) In lieu of instituting or completing a foreclosure or repossession, the lender may acquire property by voluntary conveyance from the mortgagor. Conveyance of the property by deed in lieu of foreclosure is approved subject to the following requirements:

(1) The loan is in default at the time the deed is executed and delivered.

(2) The credit instrument is cancelled and surrendered to the mortgagor;

(3) The mortgage and security agreement are satisfied of record as a part of the consideration for such conveyance; and

(4) The deed from the borrower contains a covenant which warrants against the acts of the grantor and all claiming by, through, or under him and conveys good marketable title.

§ 201.1521 Notice of acquisition of title.

The lender shall give written notice to the Secretary, on a form prescribed by him, of acquisition of good marketable title to the property, within 15 days of such acquisition.

§ 201.1522 Disposition of property.

(a) The insured lender shall take possession of, preserve and repair the property, and shall sell the property for the best price obtainable, within six months after the date of acquisition of marketable title. Repairs shall not exceed those required by local law. No other repairs shall be made without the specific advance approval of the Secretary.

(b) The insured lender shall not enter into a contract for the preservation, repair or sale of the property with any

officer, employee, owner of ten percent or more interest in the insured lender or with any other person or organization having an identity of interest with the insured lender or with any relative of such officer, employee, owner or person.

CLAIMS

§ 201.1525 Claim application.

(a) *How to file.* Claim for reimbursement for loss on any eligible loan shall be made on a form provided by the Secretary and executed by a qualified officer of the insured lender. The claim shall be accompanied by the insured lender's complete file, including copies of appraisals made by appraisers acceptable to the Secretary, pertaining to the transaction. Where the insured is required by law to keep an original document in its possession, a copy of the original document shall be deemed acceptable.

(b) *Where to file.* Claim shall not be filed by the insured lender until after default, repossession, and resale of the mobile home and lot or mobile home lot. Where a mobile home and lot have been financed, the mobile home and lot shall be sold in a single transaction. The mobile home may not be removed from the lot without the prior approval of the Secretary. Claim shall be filed no later than 12 months and 31 days after the due date of the earliest fully unpaid installment provided for in the obligation, unless an extension is requested and approved by the Secretary.

§ 201.1526 Amount of claim.

An insured lender may be reimbursed for losses on loans made in accordance with the regulations under this part, up to the amount of its general insurance reserve. The amount of reimbursement is determined by following the computation steps prescribed in paragraph (a), (b) and (c) of this section.

(a) Deduct from the unpaid amount of the obligation (net unpaid principal and the earned portion of the financing charge, calculated according to the actuarial method), at the time of default:

(1) The actual sales price obtained after lawful repossession and resale of the mobile home and lot, or mobile home lot, or the appraised value, whichever amount is the greater. The appraised value shall be determined by an appraiser acceptable to the Secretary;

(2) All amounts received by the lender on account of the loan from any source relating to the property on account of rent or other incomes after deducting reasonable expenses incurred in handling the property;

(3) All cash retained by the lender including amounts held or deposited for the account of the borrower or to which the lender is entitled under the loan transaction that has not been applied in reduction of the borrower's indebtedness.

(b) Add to 90 percent of the amount determined under paragraph (a) of this section 90 percent of the interest at 7 percent per annum on the amount determined under paragraph (a) of this section computed from the date of default:

(1) To either the date of claim application or for a period of 12 months and 31 days following such default date, whichever period of time is lesser, or:

(2) To the date of certification of the claim for payment in a case where an otherwise eligible claim has been held without payment by the Secretary pending a determination of the eligibility for insurance of other claims or loans, or by an investigation of the insured's loan or claim activities.

(c) Add to the amount obtained under paragraph (b) of this section 90 percent of the following allowances for expenditures made by the insured:

(1) Taxes, ground rent and water rates, which are liens prior to the mortgage, prorated to the date of disposition of the property;

(2) Special assessments, which are noted on the application for insurance or which become liens after the insurance of the mortgage, prorated to the date of disposition of the property;

(3) Hazard insurance on the mortgaged property, prorated to the date of disposition of the property;

(4) Taxes imposed upon any deeds or other instruments by which said property was acquired by the mortgagee;

(5) Foreclosure costs, or costs of acquiring the property otherwise, actually paid by the insured lender and approved by the Secretary, in an amount not in excess of two-thirds of such costs or $75, whichever is the greater.

(6) Reasonable payments made by the insured lender for:

(i) Preservation and maintenance of the property;

(ii) Repairs required by local law, and such additional repairs as may be specifically approved in advance by the Secretary;

(iii) Expenses in connection with the sale of the property including a sales commission at the rate customarily paid in the community;

(iv) Appraisal fee not to exceed $45.00.

§ 201.1527 Incontestability of claim payment.

Any payment for loss made to an insured lender shall be final and incontestable after two years from the date the claim was certified for payment in the absence of fraud or misrepresentation on the part of the lender, unless a demand for repurchase of the obligation shall have been made on behalf of the United States prior to the expiration of such two year period.

EXTENSION OF TIME

§ 201.1528 Action to be taken by insured lender.

The Secretary may extend any time period respecting any action required by an insured which is prescribed by this subpart.

AMENDMENTS

§ 201.1530 Effect of amendment.

The regulations in this subpart may be amended by the Secretary at any time and from time to time, in whole or in part, but such amendment shall not adversely affect the insurance coverage of a lender under its contract of insurance on any loan previously made or in the process of being made.

NOTE.—The Department of Housing and Urban Development has determined that this document does not contain a major proposal requiring preparation of an Inflation Impact Statement under Executive Order 11821 and OMB Circular A-107.

Effective date: This regulation shall be effective on February 28, 1977.

JOHN T. HOWLEY,
Acting Assistant Secretary for Housing—Federal Housing Commissioner.

[FR Doc.77-2689 Filed 1-26-77;8:45 am]

SUBCHAPTER E—SUBCHAPTER H [RESERVED]

SUBCHAPTER I—HUD OWNED PROPERTIES

[Docket No. R-77-448]

PART 290—DISPOSITION OF HUD-OWNED MULTIFAMILY PROJECTS

Interim Regulations

Notice is hereby given that the Department proposes to amend Chapter II of Title 24 of the Code of Federal Regulations by adding a new Subchapter I, "HUD-Owned Properties," a new Part 290, "Disposition of HUD-Owned Multifamily Projects," Subpart A, "General Provisions," Subpart B, "Formerly Subsidized Projects," and Subpart C, "Projects Not Formerly Subsidized," on an interim basis.

Subpart A would set forth general provisions. The term "disposition" is used throughout the Part to denote the sale as well as the demolition of HUD-Owned projects. The disposition of HUD-Owned multifamily projects shall be carried out, to the extent feasible to reduce the inventory of HUD-Owned projects in such a manner as to ensure the maximum return to the mortgage insurance funds consistent with the need to preserve and maintain urban residential areas and communities, and to protect the financial interests of the government by obtaining a satisfactory return based on the project's present market value and anticipated future use, and to maintain through a rental subsidy, or otherwise, rents at levels low- to moderate-income families can afford if the project was intended to serve low- to moderate-income groups. Disposition must be expedited, since HUD's ownership of projects is on an interim basis, and the Department is without a mandate to hold these projects on a long term ownership basis.

Subpart B would be applicable to the disposition of formerly subsidized projects, i.e., those with tenants who received the benefit of a rental subsidy before title to the project was acquired by HUD. The term "formerly subsidized project," refers to a project with rental subsidies provided by the following HUD programs: (1) Below-market interest rate mortgages insured under section 221(d)(3) of the National Housing Act; (2) In-

terest reduction payments made in connection with mortgages insured under section 236 of the National Housing Act; (3) Rent supplement payments under section 101 of the Housing and Urban Development Act of 1965; (4) Direct loans at below-market interest rates pursuant to section 202 of the Housing Act of 1959; (5) Direct loans at below-market interest rates pursuant to sections 401 and 404(b)(3) of the Housing Act of 1950; (6) Direct loans made under section 312 of the Housing Act of 1964; and (7) Housing assistance payments pursuant to (i) section 8 of the United States Housing Act of 1937, or (ii) section 23 of the United States Housing Act of 1937 in effect prior to January 1, 1975.

Subpart B sets forth a disposition process consisting of three decision points: the Initial Determination, the Disposition Recommendation and the Final Disposition Program. The Initial Determination would be made by the HUD field office Director promptly after HUD's acquisition of title and would constitute a preliminary decision as to whether the project could or could not be disposed of with a subsidy (Section 290.20). The Disposition Recommendation would also be prepared by the HUD field office Director and consists of a detailed physical and financial analysis of the project, a statement of the estimated price obtainable and a recommendation as to the nature of the disposition program (§ 290.30). Consideration would be given to the feasibility of:

1. Sale with a subsidy designed to maintain the project's low-to-moderate income character;

2. Sale as rental housing without a subsidy;

3. Conversion to other uses, including forms of home ownership; and

4. Partial or complete demolition.

The Disposition Recommendation is then submitted for approval and authorization to the appropriate Property Disposition Committee which would either accept the Disposition Recommendation or modify it, and then issue a Final Disposition Program for the project (§ 290.40). In some instances, the Final Disposition Program may provide for the payment of out-of-pocket moving costs by HUD (§ 290.45). In the case of disposition in connection with certain subsidy programs, the Final Disposition Program is authorized by the HUD field office Director.

At all three decision points, careful consideration would be given to the need for units of low-to-moderate-income housing and the feasibility of providing the benefits of a HUD rental subsidy program in connection with the disposition.

If at any time in the decision making process HUD would propose a disposition program which does not include a rental subsidy program, then HUD would provide a notice and comment procedure for eligible tenants (§ 290.35). This notice and comment procedure provides for: (1) notification to tenants of the Secretary's intent to adjust rents or to dispose of or demolish the project; (2) a 30-day period for written comments to be submitted to HUD; and (3) written notification to tenants of HUD's disposition decision.

The regulation also addresses itself to rental policy during the period in which HUD has title (§ 290.25). Promptly after title is taken, HUD would establish a maximum rental rate schedule for each unit in the project based upon a survey of the rents for comparable housing in the locality. Once a determination is made in any case to dispose of a project without a rental subsidy, rents payable by tenants would be adjusted to the level of the maximum rental rate schedule. These adjustments, however, would be implemented in phases, if necessary, to avoid financial hardships. No rent adjustments for eligible tenants would be implemented until a 30-day notice and comment procedure has been completed. When a determination is made to dispose of a project with a subsidy, however, rents to be charged eligible tenants (i.e., those eligible for a rental subsidy) would be established through income recertification procedures, in accordance with the applicable rental subsidy program proposed to be utilized in connection with the disposition.

Subpart B also sets forth the rules governing methods of sale, which are basically a codification of rules contained in HUD Handbook 4315.1, and currently followed by HUD. Except for stated exceptions, all sales would be by competitive offering. Negotiated sales would be permitted only where the sale is to an agency of the Federal, state or local government or where the project is converted to a cooperative or other form of conversion to homeownership.

Subpart C would be applicable to all multifamily projects other than formerly subsidized ones. There are two basic differences between Subparts B and C. First, no Initial Determination would be prepared under Subpart C. However, the procedures for the preparation of the Disposition Recommendation and authorization of the Final Disposition Program would be fully applicable to Subpart C and would be incorporated therein by reference. Second, the notice and comment procedure would not be applicable to Subpart C. The provisions on methods of sale also are fully applicable to Subpart C and would be incorporated therein by reference.

In some cases, the goal of maintaining project rents at levels affordable to the low-to-moderate-income families for whom the project was intended will require an explicit subsidy, such as Section 8 assistance. While the regulation generally contemplates that property be sold at market prices, there may be some instances in which a sale for low-to-moderate-income housing will produce a return to the insurance funds which is less than the return which would be realized by an unrestricted sale. These can be considered instances of implicit subsidies. The Department has made a decision that, in proper cases, subsidies for this purpose represent an appropriate utilization of public resources. The Department is particularly interested in public comments on its policy decision to devote resources, in the form of both programmatic and impliict insurance fund subsidies, to the preservation of HUD subsidized rental housing as a resource for the low-to-moderate-income families for whom those projects were originally intended.

In order to provide, as quickly as possible, a procedure for instituting due process and to conform HUD policy with recent judicial determinations with regard to tenant actions, and to defer further litigations arising out of alleged procedural deficiencies in this regard, the Department finds that it is impractical to provide for public comment in advance of the effective date of this Part, and good cause therefore exists for making this interim rule effective upon publication. However, interested persons are invited to submit written comments, suggestions, or data regarding the regulations to the Rules Docket Clerk, Room 10141, Office of the Secretary, Department of Housing and Urban Development, 451 Seventh Street, SW., Washington, D.C. 20410. Communications should make reference to the above docket number and title. All relevant material received on or before February 28, 1977, will be considered before adoption of the final rule, which the Department intends to promulgate by May 1, 1977. A copy of each communication submitted will be available for public inspection during business hours at the above address.

A Finding of Inapplicability with respect to the National Environmental Policy Act of 1969 has been made in accordance with HUD procedures. A Finding of Inapplicability with respect to an Inflation Impact Statement has also been made in accordance with HUD procedures. Copies of these findings are available for public inspection at the above address.

Accordingly, the Department proposes to amend its Chapter II of Title 24 by reserving Subchapter E through Subchapter H and adding a Subchapter I, Part 290, on an interim basis, as follows:

Subpart A—General Provisions

Sec.
290.1 Purpose and scope.
290.5 Definitions.
290.10 Objectives.

Subpart B—Formerly Subsidized Projects

290.15 Applicability.
290.20 Initial determination.
290.25 Rental rates.
290.30 Preparation of disposition recommendations.
290.35 Notice to eligible tenants.
290.40 Final disposition program.
290.45 Payment of moving costs.
290.50 Method of sale.

Subpart C—Projects Not Formerly Subsidized

290.55 Applicability.
290.60 Incorporation by reference.

AUTHORITY: Sec. 7(d), Department of Housing and Urban Development Act (42 U.S.C. 3535(d)).

Subpart A—General Provisions

§ 290.1 Purpose and scope.

The purpose of this Part is to prescribe the basic policies which govern the disposition of HUD-owned multifamily projects by the Deparement of Housing and Urban Development.

§ 290.5 Definitions.

(a) *Disposition.* The sale of a HUD-owned multifamily project, or any portion thereof, including the demolition of structures and transfer of title to the vacant land.

(b) *Disposition recommendation.* The HUD field office Director's disposition recommendation, with supporting data and analysis, setting forth his firm disposition program for the project.

(c) *Eligible tenant.* Any tenant currently residing in a formely subsidized project who was eligible for and received the benefits of a rental subsidy prior to HUD acquiring title to the project, and is determined to be eligible for a rental subsidy upon recertification of income in accordance with the procedure under the applicable subsidy program in force prior to HUD acquiring title to the project.

(d) *Final disposition program.* The disposition program authorized by the Property Disposition Committee, or the HUD field office Director, as appropriate.

(e) *Formerly subsidized project.* A multifamily project, the tenants of which, prior to the acquisition of title by HUD, received the benefit of a rental subsidy in the form of:

(1) Below-market interest rates mortgages insured under section 221(d)(3) of the National Housing Act;

(2) Interest reduction payments made in connection with mortgages insured under section 236 of the National Housing Act;

(3) Rent supplement payments under section 101 of the Housing and Urban Development Act of 1965;

(4) Direct loans at below-market interest rates, pursuant to section 202 of the Housing Act of 1959, sections 401 and 404(b)(3) of the Housing Act of 1950, or section 312 of the Housing Act of 1964;

(5) Housing assistance payments pursuant to section 8 of the United States Housing Act of 1937, or section 23 of the United States Housing Act of 1937 in effect prior to January 1, 1975.

(f) *HUD.* The Department of Housing and Urban Development.

(g) *HUD determination.* The Initial Determination, the disposition recommendation, or the final disposition program.

(h) *Initial determination.* The determination by the HUD field office Director, promptly after HUD's acquisition of the title to a previously subsidized project, as to whether the project should be disposed of with or without a rental subsidy program.

(i) *Multifamily project or projec's.* Any rental property, or combination of rental properties, consisting of 5 or more living units, acquired by the Secretary as the result of a default under a mortgage insured by the Secretary pursuant to the National Housing Act, or under a program involving a loan guarantee or a direct loan by the Secretary.

(j) *Property disposition committee.* The designated group of HUD officials redelegated the authority to authorize disposition programs for HUD-owned multifamily projects, pursuant to 41 FR 26946, June 30, 1976.

(k) *Rental subsidy.* A HUD rental assistance program for multifamily projects with eligible tenants who, because of insufficient income, are unable to pay the market rent for their rental unit without HUD assistance.

§ 290.10 Objectives.

The disposition of HUD-owned multifamily projects shall be carried out, to the extent feasible, in accordance with the following objectives:

(a) To reduce the inventory of HUD-owned projects in such a manner as to ensure the maximum return to the mortgage insurance funds consistent with the need to preserve and maintain urban residential areas and communities, and to protect the financial interests of the Government by obtaining a satisfactory return based on the project's present market value and anticipated future use.

(b) To maintain through a rental subsidy, or otherwise, rents at levels low-to-moderate-income families can afford, if the project was intended to serve low-to-moderate-income groups.

Subpart B—Formerly Subsidized Projects

§ 290.15 Applicability.

This subpart applies to all multifamily projects where the tenants, prior to acquisition of title by HUD, received the benefit of a rental subsidy.

§ 290.20 Initial determination.

(a) *Factors considered.* Promptly after acquiring title to a multi-family project, each HUD field office Director shall make an Initial Determination as to whether it is feasible to dispose of the project with a rental subsidy program. The following factors shall be considered:

(1) Whether or not rental subsidy funds can be made available to the project after disposition of the project.

(2) The eligibility for HUD rental subsidy of each eligible tenant in occupancy at acquisition, based upon income recertification.

(3) The availability of comparable (subsidized or unsubsidized) housing or housing assistance programs in the general area.

(4) The feasibility of making available to the eligible tenants comparable (subsidized or unsubsidized) housing or obtaining housing assistance for them.

(5) The availability of rental counseling.

(b) *Initial determination—disposition with subsidy.* An Initial Determination that a project will be sold under a rental subsidy program will be made whenever the following two conditions are both satisfied:

(1) A determination is made that a rental subsidy program is available and can be utilized after the sale of the project; and

(2) A determination is made that tenants would be adversely affected by a sale without a rental subsidy program because other comparable housing units or other comparable housing assistance is not available.

(c) *Initial determination—disposition without subsidy.* An Initial Determination that a project will be sold without a rental subsidy program shall be made when:

(1) A determination is made that a rental subsidy program cannot be utilized in the disposition of the project; or

(2) Comparable housing units or comparable housing assistance is available which will allow disposition without a rental subsidy, without adversely affecting eligible tenants. Promptly after issuance of an Initial Determination providing for the disposition of the project without a rental subsidy, HUD shall implement the notice and comment procedure prescribed by § 290.35. Whenever it is proposed that rental schedules be adjusted in accordance with the standards prescribed in § 290.25(a), the notice served under § 290.35 shall also include adequate information on the proposed adjustment in rents and shall specifically elicit comment on this.

§ 290.25 Rental rates.

(a) *Establishment of maximum rental rate schedule.* Following acquisition of a project, HUD will establish a maximum rental rate schedule for each unit in the project, comparable to the rates charged for comparable rental housing accommodations in the area, uniform to the extent feasible, based on unit size, location, services, amenities provided, and conducive to attracting high occupancy. This maximum rental rate schedule shall be reviewed and updated periodically, to assure current comparability. The rules set forth in paragraph (b) will govern the extent to which individual tenants will be charged rents in accordance with the maximum rental rate schedule or a lesser rent. Whenever rent increases are to be accomplished in accordance with this section, adjustments will be made in phases if necessary to avoid any substantial financial impact on the tenants or to prevent a substantial number of tenants from terminating their leases.

(b) *Rents payable by tenants*—(1) *Non-eligible tenants.* All tenants who are not eligible tenants, as defined in § 290.5(c), including all tenants who obtain occupancy after HUD acquires title, shall pay rent in accordance with the standards prescribed in paragraph (a) of this section.

(2) *Eligible tenants.* (i) Prior to the issuance of the Initial Determination, eligible tenants in occupancy at the time HUD acquires title shall pay the same rents which were payable under the Lease in effect prior to HUD acquiring title.

(ii) If the Initial Determination provides for the sale of the project with a rental subsidy program, rental rates for eligible tenants shall be established in accordance with the income recertification procedures applicable to the subsidy program proposed to be utilized in the sale.

(iii) If the Initial Determination provides for sale without a rental subsidy program, rents for eligible tenants will be adjusted in accordance with the standards prescribed in paragraph (a) of this section: *Provided*, That no increase in rents shall be put into effect until the notice and comment procedure has been implemented pursuant to §§ 290.20(c) and 290.35.

(iv) Whenever an Initial Determination providing for a sale with a subsidy is later modified by a Disposition Recommendation or a Final Disposition Program which provides for a sale without a subsidy, the HUD field office Director may adjust rents in accordance with the standards prescribed in paragraph (a): *Provided*, That no adjustment in rents shall be put into effect until the notice and comment procedure under § 290.35 has been completed.

§ 290.30 Preparation of disposition recommendation.

After the Initial Determination is made pursuant to § 290.20, the HUD field office Director shall prepare a Disposition Recommendation for presentation to the Property Disposition Committee for approval and authorization. This Disposition Recommendation shall consist of analyses as well as a recommendation for the disposition of the project as follows:

(a) *Physical and financial analysis.* A physical and financial analysis shall be made of the property, including an estimate of the price obtainable if the property were sold on the current market with no restrictions on use. In arriving at this price, generally accepted methods of appraising real property shall be used. The analysis shall consider, but need not be limited to, the following factors:

(1) The design, utility and facilities of the project;

(2) The location and accessibility of public transportation, schools, shopping, medical facilities, and other necessary public and private facilities;

(3) The need for rehabilitation or repairs, due to deferred maintenance or curable obsolescence, and estimated costs of such work;

(4) Local housing market conditions;

(5) Local economic conditions;

(6) Real estate tax assessments on the property;

(7) Availability of public or private financing;

(8) The history of the project and the factors which contributed substantially to the default;

(9) The impact of the disposition upon the racial composition of the neighborhood in which the project is located, as well as the neighborhoods to which the tenants may be relocated;

(10) The cost of paying out-of-pocket moving costs to eligible tenants, if the Property Disposition Committee should so authorize;

(11) Compliance with HUD requirements implementing the National Environmental Policy Act of 1969, as amended; and

(12) Compliance with the National Historic Preservation Act (Pub. L. 89-665), the Archeological and Historic Preservation Act of 1974 (Pub. L. 93-291), and Executive Order 11593 on Protection and Enhancement of the Cultural Environment, including the procedures prescribed by the Advisory Council on Historic Preservation in 36 CFR Part 800, and such other statutes as may be enacted which impact upon the disposition of a multi-family project.

(b) *Conversion to homeownership.* The Disposition Recommendation shall give appropriate consideration to the feasibility of conversion of a multifamily project to a condominium, and subsequent sale of the individual units; sale to a cooperative; and conversion and sales as individual dwellings. Whenever the HUD field office Director determines that one of these homeownership programs will produce a greater price than that estimated from a sale as rental property, such a program may be given favorable consideration. In the case of a multifamily project intended to be occupied by low-to-moderate-income families, favorable consideration also may be given to any of the ownership programs which will produce a disposition price which is at least equal to that estimated from a sale as rental property, and in which homeownership would assist in preserving and maintaining residential areas and communities, and could be accomplished within a time frame similar to that found in a sale as rental housing. The Disposition Recommendation also shall evaluate the insurance risk to HUD of the various financing programs pursuant to paragraph (e)(1) of this section, and the additional holding costs to HUD, if any, of such a disposition program.

(c) *Appropriateness for Use as Low-to-moderate-income housing.* The Disposition Recommendation shall also consider, but need not be limited to, the following factors:

(1) The availability of comparable (subsidized or unsubsidized) housing in the area and the feasibility of making such housing available to eligible tenants;

(2) The need in the area for units of low-or-moderate-income housing of the type contained in the project;

(3) The comments of the eligible tenants;

(4) The feasibility of providing the benefits of a HUD rental subsidy program to the project, in consideration of the following:

(i) Satisfaction of the eligibility requirements governing the currently available HUD rental subsidy program(s) for property disposition;

(ii) Expressions of interest by a public housing agency or other government entity, and the probability that an acceptable proposal will be submitted;

(iii) Availability to the HUD field office of contract authority and budget authority for a rental subsidy program;

(iv) The feasibility of obtaining the benefit of a rental subsidy under a state or local housing program;

(v) The extent, if any, to which a disposition plan providing for a rental subsidy program will affect the disposition price;

(vi) If the disposition recommendation involves the insurance of a mortgage or the taking back of a purchase money mortgage by HUD, the extent, if any, that such disposition plan will increase the risk to be assumed by the mortgage insurance funds beyond that which would be assumed under a disposition plan not involving a rental subsidy program. For all projects, whether or not they were previously insured by HUD, sale with HUD insurance will require that the project meet HUD's current underwriting criteria.

(d) *Demolition.* Whenever the analysis under paragraph (a) of this section (1) indicates that the project's monthly operating expenses exceed monthly income, (2) the project has little or no occupancy, (3) is functionally or economically obsolescent, (4) presents a danger to the safety of the neighborhood and its residents, (5) or is contributing to a general deterioration of the neighborhood, consideration may be given to a plan to demolish the project after acquisition of title by HUD. In arriving at a determination as to whether demolition will be recommended, careful consideration shall be given to all the factors enumerated in paragraphs (a), (b), and (c) of this section. In addition, consideration shall be given to the following:

(i) The economic feasibility of rehabilitation and sale.

(ii) Probable short and long term impacts of the demolition on the neighborhood, both in terms of physical structures and the residents of the neighborhood.

(iii) The extent to which the current and projected use of the land is consistent with local, state, and regional land use planning.

(iv) Availability of comparable (subsidized or unsubsidized) alternative housing for the residents and payments of out-of-pocket moving costs, if such payments are authorized by the Property Disposition Committee.

(e) *Methods of financing.* (1) HUD shall, in its discretion and in accordance with the objectives of the disposition policy under § 290.10, select one of the following methods of financing:

(i) All cash.

(ii) Sale with purchase money mortgage taken back by HUD.

(iii) Sale subject to a mortgage insured by HUD.

(2) Sales in accordance with paragraphs (e)(1)(ii) and (iii) of this section may contain a requirement that the purchaser rehabilitate the project. Where the sale is subject to a mortgage insured by HUD, the mortgage may include provisions for insured advances for major rehabilitation. All sales subject to paragraphs (e)(1)(ii) and (iii) of this section shall require that the purchaser execute a HUD Regulatory Agreement, which provides for certain contractual management controls between the purchaser and HUD during the life of the mortgage.

§ 290.35 Notice to eligible tenants.

(a) *General.* If the Initial Determination pursuant to § 290.20, the Disposition Recommendation pursuant to § 290.30, or the Final Disposition Program pursuant to § 290.40, proposes a disposition program which does not include a rental subsidy program, or which includes a rental subsidy program which is not comparable to the one in effect prior to HUD's acquisition of the title to the project, HUD shall promptly carry out the notice and comment procedure set forth in this section. Once this procedure is completed however, there is no requirement that it be repeated at a later stage of the disposition process.

(b) *Notification.* A notice shall be delivered directly or by mail to each eligible tenant, and shall be posted in a conspicuous place adjacent to the project office, within 5 days after the date of the HUD Determination. The notice shall summarize very briefly the nature of the HUD Determination, the eligibility requirements for the payment of moving costs by HUD (only if applicable and authorized), the names, addresses and telephone numbers of HUD-approved counseling agencies; and that: (1) Comments are invited for a 30-day period from the date of the issuance of the notice;

(2) The HUD Determination, including supporting material, shall be available for inspection and copying at the HUD field office and at the project office;

(3) The HUD Determination shall be reviewed with respect to the comments received, and revised if necessary before subsequent HUD action is taken;

(c) *Inspection and copying.* During the 30-day period following the issuance of the notice required pursuant to paragraph (a) of this section, a copy of the HUD Determination shall be available to eligible tenants for inspection and copying at the HUD field office with jurisdiction over the project, and at the project office. Reasonable requests from eligible tenants for a waiver of the fees charged for copying under the provisions of 24 CFR 15.14 will be honored.

(d) *Waivers.* In the case of any proposed demolition, the provisions of paragraphs (a) and (b) of this section, governing notice and comments, may be waived in whole or in part upon a determination by HUD that continued occupancy for all or a portion of the time required by the notice and comment procedure presents a substantial risk to the health or safety of the residents or other persons or property.

(e) *Consideration.* All comments received shall be carefully reviewed and due consideration given in connection with all future HUD actions in connection with the disposition of the project.

§ 290.40 Final disposition program.

(a) The Property Disposition Committee shall authorize a Final Disposition Program, which shall include the Disposition Recommendation together with such supplementary material as may be necessary, after due consideration is given to the HUD field office Director's Disposition Recommendation and any comments received pursuant to section 290.35. The Property Disposition Committee may modify any recommendation from a HUD field office Director or return it to the HUD field office Director for review, updating, and/or revision, as may be necessary.

(b) Subsidized Disposition. Disposition of projects under a rental subsidy program shall be in accordance with HUD regulations issued pursuant thereto. For those subsidized disposition programs which do not require Property Disposition Committee approval, the HUD field office Director shall authorize the disposition, pursuant to to 41 FR 13652, March 31, 1976, or 41 FR 16604, April 20, 1976.

(c) When the Property Disposition Committee authorizes a disposition without a rental subsidy, where disposition with a rental subsidy was recommended by the HUD field office Director, or demolition where demolition was not recommended, the procedures set forth in § 290.35 shall be immediately implemented.

(d) Copies of the Final Disposition Program shall be available for eligible tenants at the HUD field office with jurisdiction over the project and at the project office. However, where the project will be advertised with no stated minimum price, all references in the Final Disposition Program to the unstated minimum price shall be deleted. Reasonable requests for a waiver of the fees charged for copying under 24 CFR 15.14 shall be honored.

§ 290.45 Payment of moving costs.

(a) *Eligibility.* The Final Disposition Program may include a determination to pay out-of-pocket moving costs to eligible tenants, in the amount prescribed in paragraph (b) of this section:

(1) Where the proposed disposition would adversely affect eligible tenants, and

(2) Where such payments would expedite the disposition, and

(3) Where the payment of such moving costs is considered sound business judgment.

(b) *Amount of payment.* Tennants eligible under paragraph (a) of this section shall be paid an amount by HUD which may not exceed the average out-of-pocket moving costs per family or individual determined by the HUD field office from a survey of the local market.

§ 290.50 Method of sale.

(a) *Competitive offering.* Except as provided in paragraph (b) and (c) of this section, the disposition of HUD-owner multifamily projects shall be by competitive offering.

(1) Interested bidders shall be invited to submit sealed bids in accordance with bidding instructions issued by HUD. Offerings shall be publicized by advertisement and distribution of a prospectus.

(2) Bids must be posted, or delivered by other means, so as to be received by the addressee not later than the return date specified in the advertisement. The bidding instructions shall govern the submission of mailed bids, late bids and modifications or withdrawal of bids. Bids shall be opened publicly.

(3) The contract shall be awarded to the highest responsive, responsible bidder; *Provided*, That HUD reserves the right, in its discretion, to reject all bids. No bids shall be considered which does not meet the terms established by HUD. In determining whether a bidder is responsible, HUD shall evaluate the bidder's experience, and financial ability requisite to reasonable assurance of satisfactory performance. In the case of sales other than cash sales, a bidder must be approved under the Previous Participation Review and Clearance procedures in 24 CFR 200.210 et seq. in order to qualify as responsible. The Previous Participation Review and Clearance procedures shall not be applicable to cash sales.

(b) *Negotiated disposition.* Disposition by negotiation with one or more selected purchasers, without resorting to competitive bidding, is permitted only in the following cases:

(1) Disposition to an agency of the Federal, state or local government.

(2) Sales to a nonprofit cooperative organization pursuant to a recommendation under § 290.30.

(3) Sales of individual condominium units and of individual homes pursuant to a program of conversion under § 290.30(b).

(4) Where disposition programs are pursuant to paragraphs (b)(2) and (3) of this section, the contracts for the legal and organizational work necessary for the conversion of the project to the new form of ownership, and the marketing costs of individual units or shares, shall be awarded by competitive bidding.

(c) *Nursing homes and hospitals receiving Public Health Service Act grants.* Whenever HUD acquires a nursing home or hospital which has received a grant under Title VI of the Public Health Service Act (42 U.S.C. 291 et seq.), the sale shall be limited to public or nonprofit entities which agree to operate the property as a health facility in accordance with the Public Health Service Act and the regulations adopted thereunder. If an acceptable bid is not received, requests shall then generally be made by HUD to the Secretary of Health, Education and Welfare to waive this condition pursuant to 42 U.S.C. 291i and 42 CFR 53.135. If this waiver is issued, the property may then be offered a second time without the condition set forth in the first sentence of paragraph (c) of this section.

Subpart C—Projects Not Formerly Subsidized

§ 290.55 Applicability.

This subpart applies to all multifamily projects not formerly subsidized.

§ 290.60 Incorporation by reference.

The provisions of §§ 290.1, 290.5, 290.10, 290.25(a) and (b)(1), 290.30, 290.40(a), and § 290.50 apply with full force and effect to multifamily projects described in section 290.55 and are hereby incorporated by reference.

Issued at Washington, D.C., January 19, 1977.

NOTE.—It is hereby certified that the economic and inflationary impacts of these proposed regulations have been carefully evaluated in accordance with OMB Circular A-107.

JOHN T. HOWLEY,
Acting Assistant Secretary for Housing—Federal Housing Commissioner.

Title 28—Judicial Administration

CHAPTER I—DEPARTMENT OF JUSTICE

[Order No. 682-77]

PART 0—ORGANIZATION OF THE DEPARTMENT OF JUSTICE

Subpart C—Office of the Deputy Attorney General

AGENCY: Department of Justice

ACTION: Final rule

SUMMARY: Under 22 U.S.C. 263(a), the Attorney General is authorized to accept and maintain membership in the International Criminal Organization (INTERPOL), on behalf of the United States, and to designate those departments and agencies which may participate in the United States' representation with INTERPOL.

The purpose of this rule is to assign the responsibility for the establishment and implementation of policy related to INTERPOL within the Department of Justice to the Office of the Deputy Attorney General. Additionally, the Departments of Justice and Treasury have reached an understanding providing for alternating representation and joint participation in INTERPOL.

EFFECTIVE DATE: January 27, 1977.

FOR FURTHER INFORMATION CONTACT:

Harry L. Gastley, Office of Administrative Counsel, Office of Management and Finance, Department of Justice, Washington, D.C. 20530 (202-739-5361).

By virtue of the authority vested in me by 5 U.S.C. 301, 22 U.S.C. 263(a), and 28 U.S.C. 509 and 510, Section 0.15 of Subpart C of Part 0 of Chapter I of Title 28, Code of Federal Regulations, is amended by renumbering pararaph (b)(8) of § 0.15 to be paragraph (b)(9) and by adding a new paragraph (b)(8) to read as follows:

§ 0.15 Deputy Attorney General.

* * * * * * *

(b) * * *

(8) Establish and direct the implementation of policy related to the participation of the United States in the International Criminal Police Organization (22 U.S.C. 263(a)).

Dated: January 18, 1977.

EDWARD H. LEVI,
Attorney General.

Title 41—Public Contracts and Property Management

CHAPTER 5A—FEDERAL SUPPLY SERVICE, GENERAL SERVICES ADMINISTRATION

Miscellaneous Amendments

This change to the General Services Administration Procurement Regulations (GSPR) provides guidelines for assisting minority business enterprises in achieving increased participation in Government procurements; updates procedures applicable to the procurement of prison-made products and products of the blind and other severely handicapped; prescribes new contract clauses; revises procedures applicable to the review of procurements not set aside for small business; imposes restrictions on waiving requirements to furnish bid samples; revises forms and exhibits; and makes miscellaneous minor editorial changes.

PART 5A-1—GENERAL

The table of contents for Part 5A-1 is amended to add the following new entries:

Subpart 5A-1.13—Minority Business Enterprises

Sec.	
5A-1.1310	Subcontracting with minority business enterprises.
5A-1.1310-50	Minority Business Subcontracting Program.
5A-1.1310-51	Marketing, management, and technical assistance.

Subpart 5A-1.7—Small Business Concerns

Section 5A-1.706-50(f) is revised as follows:

§ 5A-1.706-50 Documentation and review of procurements not set aside for small business.

* * * * * * *

(f) Preparation of GSA Form 2689 is not repetitively required for procurements which clearly have no potential to be set aside for small business concerns, provided the procuring director, the local regional Director, Business Service Center (for Central Office procurement divisions and national commodity centers in Washington, DC, only, the Director, Socio-Economic Policy Division in lieu of the Director, Business Service Center), and the SBA procurement center representative agree that periodic reviews of such procurement actions will satisfy the requirements of §§ 1-1.705, 1-1.706, and 5A-1.706. For example, procurements of FSC 2310, Passenger motor vehicles—ambulances, sedans, station wagons, buses, limosines, hearses, ambulances (truck mounted), and FSC 2320, Trucks and truck-tractors (except armored cars and mobile health, dental, and X-ray clinic trucks) could logically be processed under such arrangements.

Subpart 5A-1.13—Minority Business Enterprises

New Subpart 5A-1.13 is added as follows:

§ 5A-1.1310 Subcontracting with minority business enterprises.

§ 5A-1.1310-50 Minority Business Subcontracting Program.

(a) Contracting officers shall send a letter as shown in (c), below, to all contractors awarded contracts valued at $500,000 or more. A copy of each letter shall be furnished to the Socio-Economic Policy Division (FCH). Contracting officers shall forward to FCH copies of related correspondence and reports received from the contractor.

(b) Any visits to contractor facilities for purposes of this subcontracting program must be cleared in advance with the contracting division.

(c) Letter format.

GENTLEMEN: You were awarded contract No. ---------- for ---------- This letter is to emphasize and call to your attention your obligation to utilize minority-owned businesses in your subcontracting program as provided by the terms of this contract.

The clause of your contract titled "Minority Business Enterprises Subcontracting Program," included in GSA Form 1790, Subcontracting Programs, requires you to "establish and conduct a program which will enable minority business enterprises * * * to be considered fairly as subcontractors and suppliers under this program." Basically, this involves designating one of your officials to ensure that minority firms are identified and encouraged to compete for your subcontracts. You are required to maintain certain records and submit reports prescribed by the contracting officer concerning your minority subcontracting program. For your convenience we are enclosing a copy of GSA Form 1790, Subcontracting Programs.

We may, at some later date, contact you to arrange a visit to discuss the program. In the meantime, if you have any questions concerning the program you may contact the Socio-Economic Policy Division (FCH), GSA, Washington, DC 20408.

Sincerely,

Contracting Officer.

Enclosure—GSA Form 1790.

(End of Sample Letter Format)

§ 5A-1.1310-51 Marketing, management, and technical assistance.

Contracting officers becoming aware of minority business enterprises in need of marketing, management, or technical assistance shall refer such concerns to the appropriate Business Service Center for assistance. When appropriate, the Business Service Center will coordinate the matter with the Socio-Economic Policy Division (FCH).

PART 5A-2—PROCUREMENT BY FORMAL ADVERTISING

Subpart 5A-2.2—Solicitation of Bids

1. Section 5A-2.201-70(e)(2) is revised as follows:

§ 5A-2.201-70 Forms to be used.

* * * * * * *

(e) * * *

(2) GSA Form 1246, GSA Supplemental Provisions (AID Procurement), Aug. 1976, shall be incorporated by reference in each solicitation for offers under the AID buying program by using the following provision:

GSA Form 1246, GSA Supplemental Provisions (AID Procurement), Aug. 1976, receipt of which is acknowledged by the bidder, is hereby incorporated by reference. A copy of GSA Form 1246, if not enclosed, is available upon request.

* * * * * * *

2. Section 5A-2.202-4 is amended to add paragraph (k) as follows:

§ 5A-2.202-4 Bid samples.

* * * * * * *

(k) If the Federal specification and/or item purchase description card has changed from the previous bid solicitation, waiver of bid samples is not authorized without the written approval of the Assistant Commissioner for Standards and Quality Control (FM).

Subpart 5A-2.4—Opening of Bids and Award of Contract

1. Section 5A-2.402(1) is revised as follows:

§ 5A-2.402 Opening of bids.

* * * * * * *

(1) When bids are received in more than one copy, the bid opening official shall verify the entries on all copies. If there is a discrepancy between the copies of a bid, the contracting officer shall direct the bidder's attention to the suspected mistake and shall follow the procedures set forth in FPR §§ 1-2.406 and 5A-2.406 concerning mistakes in bids.

* * * * * * *

2. Section 5A-2.407-84 is amended as follows:

§ 5A-2.407-84 Notification of proposed substantial awards and awards involving Congressional interest.

(a) *Applicability.* This section applies to notification of proposed awards resulting from either advertised or negotiated solicitations including modifications and renewals (1) when the dollar value exceeds or is estimated to exceed $250,000, except as shown in (b), below, and (2) when there is Congressional interest regardless of dollar value.

* * * * * * *

(b) Notification of proposed awards exceeding or estimated to exceed $250,000 is not required for products whose points of origin are not readily identifiable or which involve foreign production points.

* * * * * * *

(f) * * *

(1) Regional and Central Office procurement activities shall transmit notifications as determined by the Director (or his equivalent) of the Central Office or regional procurement activity directly to the Director of Congressional Affairs (AK), by telephone (566-1250) followed by a completed GSA Form 2932 annotated confirming notification.

* * * * * * *

PART 5A-5—SPECIAL AND DIRECTED SOURCES OF SUPPLY

The table of contents for Part 5A-5 is revised as follows:

Subpart 5A-5.4—Procurement of Prison-Made Products

Sec.	
5A-5.406	Procurement procedures.
5A-5.406-50	Use of forms.
5A-5.408	Clearances.
5A-5.408-50	Federal Prison Industries clearance numbers.

Subpart 5A-5.8—Procurement of Products of the Blind and Other Severely Handicapped

5A-5.805	Procurement procedures.
5A-5.805-2	Allocations and orders.
5A-5.805-3	Purchase exceptions.
5A-5.805-50	Administration of delinquent delivery orders.
5A-5.805-51	Use of forms.

Subpart 5A-5.50—Government Sources of Supply

5A-5.5000	Scope of subpart.
5A-5.5001	GSA sources.
5A-5.5002	Government Printing Office.
5A-5.5005	Department of Defense contracts.
5A-5.5005-1	Lubricating oils, greases, and gear lubricants.
5A-5.5005-2	Packaged petroleum products.
5A-5.5005-3	Gasoline, fuel oil (diesel and burner), kerosene, and solvents.
5A-5.5005-4	Coal.
5A-5.5005-5	Electronic items.
5A-5.5006	District of Columbia Government—Department of Corrections.
5A-5.5007	District of Columbia Government term contracts.

Subpart 5A-5.60—Procurement Procedures and Forms

5A-5.6001	Use of GSA Form 1584, Contract Summary.

Subpart 5A-5.70—Procurement Assignments

Sec.	
5A-5.7001	Scope.
5A-5.7002	General.
5A-5.7003	Criteria for making procurement assignments.
5A-5.7004	Changes in procurement assignments.
5A-5.7005	Central records for stock items assignments.
5A-5.7006	Current procurement assignments.

Subpart 5A-5.4—Procurement of Prison-Made Products

A new Subpart 5A-5.4 is added as follows:

§ 5A-5.406 Procurement procedures.

§ 5A-5.406-50 Use of forms.

GSA stock item purchases from the Federal Prison Industries shall be recorded on GSA Form 1584, Contract Summary, in accordance with § 5A-5.6001.

§ 5A-5.408 Clearances.

§ 5A-5.408-50 Federal Prison Industries clearance numbers.

Clearance numbers issued by the Federal Prison Industries shall be cited in the solicitation for offers and all subsequent award documents.

Subpart 5A-5.8—Procurement of Products of the Blind and Other Severely Handicapped

Subpart 5A-5.8 is revised as follows:

§ 5A-5.805 Procurement procedures.

(a) When the Committee for Purchase from the Blind and Other Severely Handicapped (hereafter referred to as the Committee) undertakes evaluation of an item, the item is included on a Proposed List. This list is forwarded to the Socio-Economic Policy Division (FCH) with a request for pertinent information, including procurement history, anticipated requirements, and the following details from the current production plan: (1) Date solicitation is to be released for printing; (2) solicitation issuance date; (3) bid opening date; and (4) contract award date. The appropriate procuring activity will in turn be contacted by FCH, and shall furnish the requested information within 15 working days. The response to FCH shall include identification, by NSN, of any items which are currently set aside for small business.

(b) FCH and the procuring activity must closely coordinate the procurement of all items for which addition to the Procurement List is anticipated. Under certain circumstances the Committee may request that procurement actions be canceled or delayed. FCH shall coordinate through FP all such requests prior to action by the procuring activity. To keep these requests to a minimum, the contracting officer shall, prior to issuance of a solicitation, request from FCH the status of any item in which he is aware that the Committee has indicated interest.

§ 5A-5.805-2 Allocations and orders.

In addition to the requirements set forth in § 1-5.805-2, requests for alloca-

tions and orders shall indicate the packaging, packing, or marking required if they are other than the standard required by the specification cited or otherwise provided in the Procurement List. Pricing of these non-standard requirements is covered in § 1–5.805–10(e).

§ 5A–5.805–3 Purchase exceptions.

Purchases from commercial sources pursuant to § 1–5.805–3 shall cite the purchase exception number issued by the central nonprofit agency (CNA) in the solicitation for offers and all subsequent award documents.

§ 5A–5.805–50 Administration of delinquent delivery orders.

(a) Delinquent orders require prompt and vigorous action on a continuing basis until the problems are resolved. Administration shall be in accordance with § 1–5.805–6 and the Procurement List issued by the Committee for Purchase from the Blind and Other Severely Handicapped (see 41 CFR 51–5.1–2(1) and 51–5.7).

(1) Efforts to negotiate an adjustment to the delivery schedule shall not include a request for price adjustment.

(2) Records of delinquencies, regardless of whether the delivery schedule was adjusted, shall be maintained in the procurement file.

(b) In delinquency situations where the requirements will not permit further delay and the items are available from commercial sources and may be obtained in significantly less time than from the workshop, the contracting officer will request that the central nonprofit agency issue a purchase exception for the required quantities. In the event that problems arise in negotiations, including a delay or refusal to grant a clearly justified purchase exception, the contracting officer shall request the assistance of the Socio-Economic Policy Division (FCH), in resolving the problem. FCH, if unable to effect an immediate solution with the central nonprofit agency, shall refer the matter to the Committee. If the Committee fails to provide a prompt solution, particularly where backorders or other exigency requirements exist, the appropriate procuring director shall refer the problem to the Assistant Commissioner for Procurement or to the cognizant national commodity center director, as applicable.

§ 5A–5.805–51 Use of forms.

GSA stock item purchases from the central nonprofit agencies (CNA) (blind and other severely handicapped), shall be recorded on GSA Form 1584, Contract Summary, in accordance with § 5A–5.6001.

Subpart 5A–5.50—Government Sources of Supply

Subpart 5A–5.50 is revised to read as follows:

§ 5A–5.5000 Scope of subpart.

This subpart sets forth policies and procedures regarding the use of certain government sources of supply, including the Government Printing Office, Defense Supply Agency, District of Columbia Government—Department of Corrections, and District of Columbia Government term contracts.

§ 5A–5.5001 GSA sources.

Items covered by the GSA Stock Catalog, Federal Supply Schedule contracts, and GSA consolidated procurement programs shall be acquired in accordance with instructions contained in the Federal Property Management Regulations Subchapter E—Supply and Procurement, §§ 101–26.3, 101–26.4, and 101–26.5.

§ 5A–5.5002 Government Printing Office.

Procurement of items for use within the District of Columbia which are listed in the GPO Catalog and Price List shall be from GPO. Procurement of these items from commercial sources is prohibited unless a waiver is granted by the Public Printer through Printing and Publications Division, Region 3, authorizing such purchases. When so authorized, the GPO waiver number shall be shown in the contract and/or purchase order. Acquisition from GPO of such items for use outside the District of Columbia is not mandatory. See FPMR 101–26.703 regarding marginally punched continuous forms.

§ 5A–5.5005 Department of Defense contracts.

The Defense Supply Agency, Defense Fuel Supply Center, Cameron Station, Alexandria, Virginia 22314, and the Defense General Supply Center, Richmond, Virginia 23219 prepare annual contracts for lubricating oils, greases, gear lubricants, packaged petroleum products, gasoline, fuel oil (diesel and burner), kerosene, solvents, and coal. Electronic items are available from the Defense Electronic Supply Center, Dayton, Ohio 45401.

§ 5A–5.5005–1 Lubricating oils, greases, and gear lubricants.

See FPMR 101–26.602–1.

§ 5A–5.5005–2 Packaged petroleum products.

See FPMR 101–26.602–2.

§ 5A–5.5005–3 Gasoline, fuel oil (diesel and burner), kerosene, and solvents.

See FPMR 101–26.602–3.

§ 5A–5.5005–4 Coal.

See FPMR 101–26.602–4.

§ 5A–5005–5 Electronic items.

See FPMR 101–26.603.

§ 5A–5.5006 District of Columbia Government—Department of Corrections.

The Commissioners of the District of Columbia are authorized to sell industrial products and services to Federal agencies. A listing of their commercial products and services is available from:

District of Columbia, Department of Corrections, Industries Division, Lorton, Virginia 22079.

Except as otherwise provided in paragraphs (a) and (b) of this § 5A–5.5006, these supplies and services may be procured on an optional basis.

(a) Laundry services for Federal agencies in the Washington, DC metropolitan area should be obtained from the Department of Corrections except when that department issues clearance for procurement from another source.

(b) Official U.S. Government tags for use on motor vehicles shall be acquired in accordance with FPMR 101–38.3.

§ 5A–5.5007 District of Columbia Government term contracts.

The District of Columbia places term contracts for sand, gravel, premixed concrete, Portland cement, slag and slag screenings, and road salt which may be used on an optional basis in the Washington, DC area. Details of these contracts may be obtained from the Purchasing Officer, DC Government, 613 G St. NW, Room 1002, Washington, DC 20001, or telephone 629–4811.

Subpart 5A–5.60—Procurement Procedures and Forms

New Subpart 5A–5.60 is added as follows:

§ 5A–5.6001 Use of GSA Form 1584, Contract Summary.

Contractual arrangements with (1) Federal Prison Industries (FPI), and (2) central nonprofit agencies (CNA) operating under the auspices of the Committee for Purchase from the Blind and Other Severely Handicapped shall be summarized on GSA Form 1584. The form shall be prepared in accordance with § 5A–16.950–1584–1 and the applicable instructions in this Subpart 5A–5.60.

(a) A separate GSA Form 1584 shall be prepared for each addressee (block 5).

(1) For CNA items, the appropriate CNA alpha code shall be inserted following the addressee (block 5).

(2) Currently applicable alpha codes are:

IB—National Industries for the Blind.
SH—National Industries for the Severely Handicapped, Inc.

(b) Each GSA Form 1584 shall be assigned a separate contract number in accordance with § 5A–1.352.

(c) At a minimum, blocks 1, 2, 4, 5, 6, 9, 10, 11, and 15 through 18 of GSA Form 1584 shall be completed. Blocks which are not applicable shall be annotated "N/A". Necessary information not available from the FPI Schedule or the CNA Procurement List shall be obtained by letter or telephone.

(1) When shipment FOB origin is specified, the shipping container weight shall be shown in block 17(h).

(2) For CNA items:

(i) Block 17(b)—include statement that copy of each purchase order is to be furnished to the appropriate CNA (see alpha code in block 5).

(ii) Block 17(c)—enter "ADO" instead of the price.

(d) If not otherwise provided, copies of GSA Form 1584 forwarded to the Quality Control Division shall include or be accompanied by adequate information regarding specifications, including packing and marking requirements, to enable that activity to perform inspection of the supplies.

(e) Each GSA Form 1584 issued for the procurement of stock items from FPI or CNA may be renewed for two successive periods provided no significant change has occurred. After two renewals, a new GSA Form 1584 shall be issued and a new contract number assigned. Renewal information shall be forwarded to 10FPN 20 calendar days prior to expiration of the currently effective period.

(f) When items are designated by a CNA as "allocated", GSA Form 1584 shall be prepared showing the CNA address in block 5 to enable the ADO system to provide a printed request that the inventory manager obtain an allocation number and workshop address from the CNA. At a minimum, entries are required in blocks 2, 4, 5, 16, 17(a) and 17(b). Block 17(b) shall include the caption allocated item(s). Each purchase order issued for allocated items shall include one of the following:

(1) Applicable specification.

(2) Applicable item purchase description and date.

(3) Reference to (1) or (2) when appropriate.

(g) Distribution of GSA Form 1584 shall be in accordance with § 5A–76.201 (b) or (c), with an additional copy to FPI or CNA as applicable.

PART 5A–7—CONTRACT CLAUSES

Subpart 5A–7.1—Fixed Price Supply Contracts

1. Section 5A–7.102–4 is amended as follows:

§ 5A–7.102–4 Variation in quantity.

* * * * *

(b) The Variation in Quantity clause set forth above is included in GSA Form 1424, GSA Supplemental Provisions, solely for the purpose of administrative convenience in avoiding the need to amend contracts or purchase orders when an overshipment or an undershipment within prescribed limits is determined to be acceptable. This standard clause is in no way intended to establish a general policy with respect to the extent to which FSS or the agencies it serves will accept variations in quantity. If experience indicates that a different variation percentage should be used in a particular procurement or class of procurements, due to the particular industry practices involved, the contracting officer may determine that a variation percentage, other than the 3 percent normally called for in the Variation in Quantity clause, shall be used. In this regard, based on Central Office studies, it has been determined that (i) a 5 percent variation shall be specified when procuring printing stationery paper, (ii) a 10 percent variation shall be specified when procuring aluminum foil items, (iii) a full pallet quantity be specified when the solicitation requires palletization, and (iv) a 10 percent variation shall be specified when purchasing special paint when the purchase is for 500 gallons or less, particularly if it is of an unusual type or color or a specialty item (e.g., gray or olive drab baking enamel for metal equipment).

(c) When other than a 3 percent variation is to be specified, the following clause shall be used:

VARIATION IN QUANTITY (ENTER ITEM DESCRIPTION)

Article 4, Variation in Quantity, of GSA Form 1424, GSA Supplemental Provisions, is hereby deleted in its entirety and the following substituted: A variation in quantity when caused by the conditions specified in Article 4 of Standard Form 32 will be accepted: *Provided*, That (1) such variation is not in excess of (Percent[1]) of the quantity ordered, or (2) the variation results in a full-pallet quantity. If ½ or less, ship to the next low pallet quantity. If over ½, ship to the next higher pallet quantity.

* * * * *

2. Section 5A–7.103–56 is revised as follows:

§ 5A–7.103–56 Minimum order limitation.

(a) When bidders are reluctant to accept small orders and will increase prices to cover additional costs for handling the orders, the following provisions shall be included in solicitations for requirements contracts for stock items.

MINIMUM ORDER LIMITATION

(a) No ordering office will be obligated to order and no Contractor will be obligated to make any delivery amounting to less than (Percent[1]), but such deliveries may be ordered by the Government subject to acceptance by the Contractor. Failure on the part of the Contractor to return the order by mailing or otherwise furnishing it to the ordering office within 5 working days after receipt shall constitute acceptance whereupon all other provisions of the contract shall apply to such order.

(b) Where either Government Standard Packing or Commercial Standard Packing is specified in the contract, orders shall be placed only in the specified standard pack quantity or multiples thereof.

(b) Where the unit of issue is a high dollar value item (i.e., procurement of tools), the following provision is authorized:

MINIMUM ORDER LIMITATION

(a) No ordering office will be obligated to order and no Contractor will be obligated to make any delivery amounting to less than (Percent[1]), but such deliveries may be ordered by the Government subject to acceptance by the Contractor. Failure on the part of the Contractor to return the order by mailing or otherwise furnishing it to the ordering office within 5 working days after receipt shall constitute acceptance whereupon all other provisions of the contract shall apply to such order.

(b) Notwithstanding the foregoing, where either Government Standard Pack or Commercial Standard Pack (shipping container) is specified in the contract, orders shall be placed by the Government in shipping container quantity except as set forth in paragraph (c), below.

(c) The Government may at its option place orders for less than a shipping container quantity, providing such quantity equals a unit, intermediate pack, or multiples thereof, up to a shipping container quantity. Such orders shall be packed in accordance with the applicable packaging and packing specification.

[1]Enter the minimum economical quantity in terms of dollar amount, pounds, gallons, drums, packages, dozens, etc.; coinciding with unit(s) of issue specified in the contract. Contracting officers shall consider the compatibility between the minimum order limitation and the normal standard pack.

PART 5A–14—INSPECTION AND ACCEPTANCE

Subpart 5A–14.2—Acceptance

Section 5A–14.206–1 is amended as follows:

§ 5A–14.206–1 Acceptance of nonconforming supplies or services.

* * * * *

(b) If the contracting officer or his authorized representative determines that acceptance of supplies or services is in the Government's best interest, recommendations for deviation shall be referred to the appropriate specification manager.

(c) Recommendations for deviation shall contain (1) a copy of the solicitation (or contract), (2) the reasons why the item does not conform to contract requirements, (3) a statement as to whether or not a similar deficiency was the basis for rejection of an otherwise low bid received on the same solicitation, and (4) the reasons why it is in the best interest of the Government to accept the non-conforming item. If urgency of acceptance is a factor, recommendations for deviation shall be handled on an expedited basis. When stock items are involved, the contracting officer shall coordinate with the appropriate national inventory manager to determine urgency of need.

(d) Where the recommendation for deviation is concurred in by the appropriate specification manager, he shall furnish the contracting officer with an estimate of the savings in costs which will accrue to the contractor. The contracting officer shall be guided by the estimate in negotiating an equitable price reduction (including direct and indirect costs, plus profit) for the deviation and shall annotate the contract file with a statement justifying the adequacy and reasonableness of the price reduction.

(e) For nonstock items (see § 1–14.206), the approval of the requiring activity must be obtained in all cases involving acceptance of nonconforming supplies or services.

* * * * *

[1]Enter appropriate percentage.

PART 5A–16—PROCUREMENT FORMS

Subpart 5A–16.9—Illustrations of Forms

§§ 5A–16.950–1246, 5A–16.950–1584A, 5A–16.950–1790 and 5A–16.950–1584–1 [Amended]

Sections 5A–16.950–1246, 5A–16.950–1584, 5A–16.950–1584A, and 5A–16.950–1790 are revised to illustrate new editions of forms, and § 5A–16.950–1584–1 is revised to show updated instructions for completion of new GSA Form 1584.

PART 5A–19—TRANSPORTATION

The table of contents for Part 5A–19 is amended to add § 5A–19.170, Receipt of improperly loaded shipments.

Sec.
5A–19.170 Receipt of improperly loaded shipments.

Subpart 5A–19.1—General

Section 5A–19.170 is added as follows:

§ 5A–19.170 Receipt of improperly loaded shipments.

Once damaged material is accepted and unloaded by the Government, the contracting officer has only limited authority to take action against the contractor. However, if material is accepted and unloaded and the receiving activity later notifies the contracting officer of improper loading, the contracting officer shall attempt to collect from the contractor any additional costs incurred. In addition, he shall take whatever action is deemed necessary to prevent a recurrence.

PART 5A–53—CONTRACT ADMINISTRATION

The table of contents for Part 5A–53 is amended to change the title of § 5A–53.471–2 as follows:

Sec.
5A–53.471–2 Nonstock (including Improved Federal Supply Schedule Program contracts) and stock direct delivery orders.

Subpart 5A–53.1—General

Section 5A–53.103(b) is revised as follows:

§ 5A–53.103 Authority and responsibility.

* * * * *

(b) The contract administration responsibilities of the inventory management centers and order processing and order control activities include (1) issuing definite quantity stock replenishment and stock and nonstock direct delivery orders from established sources, (2) issuing amendments to the above delivery orders (limited to editorial and other routine ordering problem corrections) and (3) the coordination and processing of transportation and shipping-type discrepancies, directing of proper disposition of rejected material, including arrangements for replacement or repair actions with the contractor, and the processing of charges for the failure of contractors to mark shipments in accordance with contract requirements.

* * * * *

Subpart 5A–53.4—Contract Performance

1. Section 5A–53.470 is revised as follows:

§ 5A–53.470 Monitoring.

Monitoring is the performance of all actions necessary to exercise effective control over individual supply transactions while they are being processed through the entire supply system. The inventory management center is responsible for monitoring stock replenishment orders. The order processing and order control activities are responsible for performing this function for direct stock and nonstock direct delivery orders, excluding those orders issued by the Special Programs Division (FPZ) and the Automotive Procurement Division (FYP).

2. Section 5A–53.471 is revised as follows:

§ 5A–53.471 Expediting.

§ 5A–53.471–1 General.

Expediting is the performance of all necessary actions required to obtain delivery to satisfy customer needs and consists of delivery status inquiries, ensuring "on time" deliveries, and accelerating or moving back delivery schedules. Expediting between the Government and contractor should only be made by the contracting officer or his authorized representative pursuant to this § 5A–53.471.

§ 5A–53.471–2 Nonstock (including Improved Federal Supply Schedule Program contracts) and stock direct delivery orders.

(a) *Source inspection.* (1) Requests for expediting source inspected orders shall be made to the regional Quality Control Division (QCD) responsible for inspection. The regional QCD shall take prompt action in accordance with the request and expeditiously reply to the requester.

(2) Requests for alteration of delivery schedules which may require contract modifications shall be sent directly to the contracting officer by the requester. The contracting officer shall take prompt action on the request and reply to the requester. Requests shall be processed within 5 workdays after receipt of the request.

(b) *Destination inspection.* The office issuing delivery orders requiring destination inspection shall expedite those orders which are late or anticipated to be late. Expediting by the order processing and order control activities shall be limited to requests for delivery status. Delivery arrangements requiring a contract/order modification shall be made only by the contracting officer.

§ 5A–53.471–3 Stock replenishment orders.

Requests for delivery status or accelerated delivery involving stock replenishment orders placed against national or zonal contracts shall be processed as follows:

(a) Requests for delivery status information shall be made to the responsible regional QCD (for source inspected orders) or the responsible inventory management center (for destination inspected orders). Prompt action shall be taken by the regional QCD and inventory management center, and an expeditious reply made to the requester. In addition to determining delivery status, the regional Quality Control Division and inventory manager may request specific shipping order precedence for items contained in the same order. However, any delivery arrangement requiring a contract/order modification shall be made only by the contracting officer.

(b) Requests for accelerated delivery: Requests for accelerated delivery shall be processed through the responsible inventory management center to the contracting officer. Upon receipt of the request for accelerated delivery, the contracting officer shall proceed in accordance with § 5A–72.106(a).

§ 5A–53.471–4 Stock availability improvement assistance.

The inventory management center has responsibility for ensuring that the contractor meets the delivery due dates specified in stock replenishment orders requiring inspection at destination. If problems arise in obtaining delivery, a request for assistance should be submitted to the contracting officer. Upon receipt of request, the contracting officer shall take appropriate action and respond promptly.

PART 5A–72—PROCUREMENT OF STOCK ITEMS

Subpart 5A–72.1—General Policies for Stock Replenishment

1. Section 5A–72.106(c)(3) is revised as follows:

§ 5A–72.106 Accelerated deliveries and public exigency purchases.

* * * * *

(c) * * *

(3) See § 5A–76.301(a) and (b) for formats to assist contracting officers in the preparation of findings and determination for negotiated exigency procurements. These formats are samples and modifications may be necessary to suit individual cases.

* * * * *

2. Section 5A–72.107–1(b) is revised as follows:

§ 5A–72.107–1 Contracts with guaranteed minimums.

* * * * *

(b) If no timely notification regarding any open balances is received from the contractor within the time specified in the Guaranteed Minimum Quantity clause (see § 5A–7.103–80), but the contract administration file indicates that unordered balances may exist, the following actions shall be taken:

* * * * *

Subpart 5A–72.2—Requirements Contracts for Stock Replenishment

Section 5A–72.202 is amended to add subparagraph (f) as follows:

§ 5A–72.202 Specifications.

* * * * *

(f) Requests from contractors for specification deviations should be in accordance with § 5A–14.206–1. If the deviation concerns preparation for delivery (packaging, packing, marking, and/or palletizing), the contracting officer should consider any impact on the supply distribution facility. Close liaison with the affected depots is essential.

PART 5A–76—EXHIBITS

The table of contents for Part 5A–76 is amended to delete §§ 5A–76.324, 5A–76.325, and 5A–76.326; and to show revised entries for Subparts 5A–76.2 and 5A–76.4, as follows:

Subpart 5A–76.2—Distribution of Documents

Sec.
5A–76.201 Distribution of contractual and related documents.
5A–76.201–1 Purchase/delivery order forms.
5A–76.201–2 Term contracts for stock items.
5A–76.201–3 Term contracts for nonstock items where GSA issues delivery orders.
5A–76.201–4 Federal Supply Schedule contracts and term contracts against which other agencies may place orders.
5A–76.201–5 Definite quantity contracts.
5A–76.201–6 Transportation and related services contracts.
5A–76.201–7 Purchase/delivery orders for stock replenishment.
5A–76.201–8 Purchase/delivery orders for direct delivery (DDO's).

Subpart 5A–76.4—Procurement Assignments

5A–76.401 General.
5A–76.402 Listing of assignments.
5A–76.403 Service contracts.
5A–76.403–1 National-scope service schedules.
5A–76.403–2 Regional-scope service schedules.
5A–76.404 U.S. Forest Service special items.

Subpart 5A–76.2—Distribution of Documents

Subpart 5A–76.2 is revised to update instructions applicable to the distribution of contracts, contract summaries, and purchase orders.

Subpart 5A–76.3—Miscellaneous Exhibits

§ 5A–76.301 [Amended]

1. Section 5A–76.301 is revised to change the format for a findings and determination.

§ 5A–76.306 [Amended]

2. Section 5A–76.306 is revised to update information and internal procedures regarding the bidders mailing list system.

Subpart 5A–76.4—Procurement Assignments

Subpart 5A–76.4 is revised to reflect updated procurement assignements and to recodify various portions under new headings.

NOTE.—Copies of the forms illustrated in Part 5A–16 and copies of the exhibits shown in Part 5A–76 are filed with the original document.

(Sec. 205(c), 63 Stat. 390; (40 U.S.C. 486(c)))

Effective date: These regulations are effective on the date shown below.

Dated: December 23, 1976.

JAY H. BOLTON,
Acting Commissioner,
Federal Supply Service.

[FR Doc.77–2485 Filed 1–26–77;8:45 am]

Title 49—Transportation

CHAPTER I—DEPARTMENT OF TRANSPORTATION, MATERIALS TRANSPORTATION BUREAU

[Docket No. HM–147; Amdt. No. 173–103]

PART 173—SHIPPERS—GENERAL REQUIREMENTS FOR SHIPMENTS AND PACKAGINGS

Carbon Dioxide Transported Aboard Aircraft

The purpose of this amendment to Part 173 of the Department's Hazardous Materials Regulations is to except from the coverage of those regulations carbon dioxide in solid form, when used as a refrigerant to preserve materials for medical diagnostic or treatment purposes. Regulations applicable to all carbon dioxide in solid form were published in the FEDERAL REGISTER on April 15, 1976 (41 FR 15972) under Docket HM–103/112. No comments were received which objected to the requirements imposed by this docket publication. Recently, the Materials Transportation Bureau has become concerned that these regulations may be disrupting certain shipments of essential medical supplies and specimens for critical medical diagnoses since carbon dioxide in solid form is used extensively for the preservation of materials being shipped by aircraft for medical diagnostic and treatment purposes. The Bureau recognizes that certain hazards are associated with carbon dioxide when shipped by air. It was for this reason that carbon dioxide in solid form was placed under regulation. It is the Bureau's opinion that on balance the benefits which accrue from the rapid movement of these materials outweigh the limited risks involved. Therefore, to the extent the regulations restrict the timely performance of essential medical services and treatment, some adjustment to the regulations is called for.

This Bureau plans to review the total effect of its regulations as they apply to carbon dioxide in solid form. Meanwhile, in consideration of the desirability of not disrupting the movement of these materials by aircraft, the regulations are amended in that regard. Because this action does not impose any burden on the general public, public proceedings are unnecessary.

In consideration of the foregoing, Part 173 of Title 49 Code of Federal Regulations is amended as follows:

In § 173.615 paragraph (e) is added to read as follows:

§ 173.615 Carbon dioxide, solid (dry ice).

* * * * *

(e) Carbon dioxide, solid (Dry ice) is excepted from the shipping paper and certification requirements of this subchapter if the requirements of paragraphs (a) and (d) of this section are complied with and the package is marked "Carbon dioxide, solid" or "Dry ice" and marked with an indication that the material being refrigerated is used for diagnostic or treatment purposes (e.g. Frozen medical specimens).

(49 U.S.C. 1803, 1804, 1808; 49 CFR 1.53(e)).

Effective date: This amendment is effective on January 19, 1977.

NOTE.—The Materials Transportation Bureau has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821 and OMB Circular A–107.

Issued in Washington, D.C. on January 19, 1977.

JAMES T. CURTIS, Jr.,
Director,
Materials Transportation Bureau.

[FR Doc.77–2406 Filed 1–26–77;8:45 am]

CHAPTER II—FEDERAL RAILROAD ADMINISTRATION, DEPARTMENT OF TRANSPORTATION

[Docket No. RSOR–2; Notice 5]

PART 218—RAILROAD OPERATING RULES

Protection of Trains and Locomotives

On August 9, 1973, the Federal Railroad Administration (FRA) published an advance notice of proposed rulemaking (ANPRM) stating that it was studying possible courses of action to address the safety problems highlighted by those accident cause codes generally categorized by FRA as "human factor" accidents.

In the advance notice of proposed rulemaking, FRA requested comments relative to four specific operating rules included in the Standard Code of Operating Rules of the Association of American Railroads (AAR). These rules were: Rule 34, Calling of Signals; Rule 93, Operation of Trains within Yard Limits; Rule 99, Protective Flagging; and Rule 291, Stop-and-Proceed Signals. After analysis of the comments received in response to the ANPRM, Rule 291 was developed in a separate notice of proposed rulemaking. Rules 34, 93 and 99 were referred to the Railroad Operating Rules Advisory Committee (RORAC). The RORAC was a group established by the FRA to provide expert advice and assistance in the study and development of railroad operating rules. The group was made up of representatives of railroad management, labor organizations, and State agencies with jurisdiction over railroads. Suggested revisions to the language of the AAR Standard Code version of each of these

regulations were developed by the RORAC through lengthy discussions, and approved by a majority of the Committee members. While these revised versions reflect the practical experience of those who deal with rules on a daily basis, the FRA does not wish to infer that they constitute a final statement of the official positions of all the organizations represented by the RORAC members. These revisions were utilized by the FRA in its development of the notice of proposed rulemaking published on March 30, 1976 (41 FR 13369).

Interested persons were invited to participate in this rulemaking proceeding by submitting written comments by May 14, 1976; or by appearing and presenting oral comments at a hearing conducted on May 14, 1976. After considering all of the comments, the FRA has decided to issue a final rule in this proceeding which differs somewhat from the proposals included in the NPRM. The changes determined to be necessary are set forth in the following discussion of each of the proposed rules.

COMMUNICATION OF SIGNAL INDICATIONS (SECTION 218.33, AAR RULE 34)

This proposed rule would require all railroad employees located in the operating compartment of a locomotive to call out loud the name or aspect of each signal governing the movement of their train, and to take appropriate action to ensure safety in the event that the engineer fails to operate in accordance with signal indications or is incapacitated while controlling the movement of a train.

The basic purpose of Rule 34 of the AAR Standard Code is to assure that all crew members in the cab of the locomotive maintain a vigilant lookout for signals affecting the operation of their train. The weakness of the Standard Code version was in its ambiguous language and failure to give crew members explicit direction as to their responsibility for the safety of their train and the action to be taken whenever that safety was in jeopardy. The revised version developed by RORAC was a great improvement over the Standard Code version in that it clearly assigned responsibility for safety to all crew members and designated the engineer as the individual responsible for assuring that crew members in the cab of the locomotive complied with the signal calling requirement. In addition, the revised rule clearly sets forth the responsibility of crew members to take positive action to control the movement of their train to ensure safety whenever the engineer fails to do so or is incapacitated. The rule explicitly authorizes any employee, under such circumstances, to stop the train by operation of the emergency brake valve.

The RORAC revised rule, which is basically the same as the proposed rule in the NPRM, was submitted to the AAR and its Operating Rules Committee for review. The revised language was approved by the Committee and adopted by the AAR as the official version to be incorporated into the Standard Code as Rule 34. Following this action by the AAR and the Rules Committee, many of the major rail carriers revised their own rule books so as to conform with the revised Rule 34 version.

On review and further consideration of the purpose of this regulation, the FRA has determined that this particular area of railroad operating rules is not an appropriate one for Federal regulation. The policies of the President concerning regulatory reform, and of the Secretary of Transportation concerning a full assessment of the impact of Federal regulatory actions, require careful evaluation of the effectiveness of such actions in accomplishing their intended purpose. FRA has concluded that it will be virtually impossible for its inspectors in the field to monitor compliance with such a rule or to establish the existence of a violation for purposes of enforcing a penalty where appropriate. Although crew members in the cab of a locomotive might comply when an FRA inspector was present, there would be no way of assuring that they are routinely complying with the regulation.

Two commenters to this proceeding expressed the opinion that operating rules can best be formulated and administered through the joint efforts of management and labor as has traditionally been the case in the railroad industry. The FRA believes that this rule provides a prime example of a case in which the traditional mechanisms of rules enforcement, through efficiency testing and rules instruction, is the more effective method of assuring that operating train crews are vigilant in their actions to assure the safe movement of their trains. Consequently, the FRA has decided to terminate this portion of this proceeding without the issuance of a final rule.

OPERATIONS WITHIN YARD LIMITS (SECTION 218.35, AAR RULE 93)

This proposed rule would require all railroads to adopt a uniform procedure to govern train operations within yard limits. The basic purpose of AAR Rule 93 was to establish controls to coordinate train movements on high speed main tracks and other movements on yard tracks. The rule granted yard movements the right to occupy segments of the main track within a designated area defined as "yard limits", provided the main track was cleared so as not to interfere with through movements of preferential trains of a designated class which retained a superior privilege to occupy the main track. All train or yard movements other than the designated class or classes thus became "inferior" and were required to observe vigorous speed restrictions (being able to stop short of another movement) since they could expect to find the main track occupied at any location by other "inferior" train movements operating under the same restrictions.

The FRA recognizes this historical use of the "yard limits rule", and fully intended to preserve the basic concepts of this type of operation through the rule proposed in § 218.35 of the NPRM. That proposed rule attempted to paraphrase, in standard Code of Federal Regulations format, the revised rule 93 developed by RORAC. Comments submitted by several commenters suggested that the changes in traditional terminology associated with widely used operating rules which were included in the NPRM would result in unnecessary confusion. Several of these commenters suggested that FRA adopt the revised version of rule 93 exactly as proposed by RORAC as the final rule in this proceeding.

As a result of these comments, FRA has decided to redraft the final rule in a format which will comply with the standard Code of Federal Regulations style, and yet preserve, to the maximum extent possible, the more traditional operating rule format and verbatim language recommended by RORAC. Section 218.35 has been revised accordingly. In order to clarify the following discussion of the comments, reference will be made to the relevant section of the NPRM, and the corresponding provision of the final rule.

Subsection (a) of the NPRM required each railroad to designate its yard limits by yard limit signs, timetable, train order, or special instructions, and its superior and inferior trains.

Three commenters stated that they believed that, in all cases, yard limits should be designated by appropriate yard limit signs, covered with a luminous reflective substance, in addition to being identified in various written sources such as train orders or timetables. The FRA believes that the presence of a physical reminder that yard limit territory is being entered will provide the engineer, and other members of the crew in the cab of the locomotive, with a visible reminder that movement beyond that point must be restricted according to the yard limits rule, and that they must maintain a particularly vigilant lookout for other movements on the track. Many carriers already use such signs to designate "yard limits". Yard limit designations given only in written form in train orders, timetables, or special instructions can be forgotten or confused. Therefore, FRA has revised § 218.35(a) so that yard limit signs must be used to designate the territory within which the rule is to apply. While the FRA believes that the presence of yard limit signs will enhance the effectiveness of the rule, we have no data to show that an additional requirement that such signs be constructed of a reflectorized substance is justified, nor did the commenter provide any such data. For this reason, FRA has decided at this time not to include specifications for the type of signs which must be used.

The provision of the NPRM requiring each railroad to designate its superior and inferior trains was criticized by several commenters as ambiguous and confusing. According to these commenters, superiority can be conveyed by right, by class or by direction. Right is conferred by train order and is superior to either class or direction which are conveyed by

timetable. The intent of rule 93 was to identify a superior class or classes of trains—such as first class trains or first and second class trains—which have a preferential authority to occupy the main track. These commenters suggested use of the RORAC version which clearly indicated that it was concerned with superiority conveyed by class, and provided the railroad with the option of designating what class or classes were appropriate for designation as superior movements based on the peculiarities of its operation. FRA has included the RORAC language in subsections (b)(1) and (b)(2) of § 218.35. In addition, subsection (c) requires the railroad to designate what class or classes of trains are to be given superiority on the main track within yard limits. All other train movements must operate subject to the requirement to clear the main track and the restrictions on speed.

Subsection (b) of the NPRM provided that yard movements could occupy the main track only when that track could be cleared for a superior train. If the track was not cleared by the prescribed time, the yard movement was required to provide flag protection as defined in § 218.37 (rule 99).

Two commenters criticized the manner in which this section was written because they felt it created the inference that the purpose of the rule was to restrict use of the main track, when in fact the purpose is to permit use of that track by all types of yard movements. They felt the positive, permissive language of the AAR Standard Code, which was preserved in the RORAC version, was a preferable statement of the rule. The FRA recognizes that the changes in language incorporated into the NPRM have caused confusion, although the change was not intended to alter the right of yard movements to use the main track. We have, therefore, decided to base the final rule on the RORAC version as suggested, and subsections (b)(1) and (2) set forth the basic authority for a yard movement to occupy the main track, as well as the conditions under which such a movement must be conducted.

Four commenters suggested that the proposed subsection (b) be revised by the substitution of the term "first class" for "superior" trains. FRA's decision to revert to the RORAC version of the rule has eliminated the problem and potential confusion which may have resulted from the different bases of superiority cited earlier in this discussion. Under the final rule, a railroad must designate the superior class, and may do so by extending the privilege of superiority to more than a single class of trains.

One commenter expressed the opinion that the provision exempting the crew of the yard movement from a protective flagging requirement in automatic block signal territory might be unsafe since the crew could not be insured of having two block signals in the direction of an approaching movement. The FRA believes that this commenter was chiefly concerned with protection for a movement moving onto the main track. The FRA believes that each operating crew will have at least two members, the conductor and engineer, who are sufficiently qualified on the physical characteristics of the railroad to be knowledgeable as to the location of signals. This knowledge, when combined with other generally applicable operating rules which require a movement to wait a specified interval after a switch is thrown before moving to the main track or across the main track, provides adequate protection for such movements.

One commenter thought there was confusion as to when protective flagging would be required. With the adoption of the RORAC version, FRA does not believe there should be such confusion. Flagging is required only when a yard movement cannot clear the main track in time for an approaching superior class train in non-automatic block signal territory.

Another commenter inquired if flagging on the main track would still be required if no class of trains was designated as superior. If no class of trains has been identified as being superior, then all movements within the yard limit territory must operate subject to the restrictions as to speed and stopping within one-half the range of vision requirements; therefore, flagging protection is not required.

Subsection (c) of the NPRM provided that, except where a block signal indicates the track to be clear, inferior train movements on the main track within yard limits must be made prepared to stop within one-half the range of vision, but not exceeding 30 miles per hour.

Once again, several commenters suggested that the final rule be expressed in terms of the Standard Code or RORAC version of the specific operating restrictions, rather than those of the proposed rule. This has been done in section (b)(2) of the rule. FRA believes the effect of this provision to be the same as was intended by the NPRM, with the exception of the maximum authorized speed within yard limits. Two commenters expressed the opinion that the 30 m.p.h. maximum speed was excessive and suggested the use of a maximum speed of 15 m.p.h. FRA has reviewed copies of the various versions of operating rule 93 which are presently in effect on most railroads. That review revealed a common range of speeds up to 20 m.p.h. The FRA believes that a 15 m.p.h. speed limit would unnecessarily restrict yard movements, and that a 20 m.p.h. maximum speed limit is more proper particularly when that maximum speed is coupled with a requirement to be able to stop within ½ the range of vision and, therefore, would be used only under the most ideal visibility situations. Subsection (b)(2) of § 218.35 has been revised accordingly.

Another commenter suggested that the requirement that the movement be able to "stop within one-half the range of vision" be deleted, and that the rule be changed to read "prepared to stop short of a train, engine, car, stop signal, derail, switch improperly lined or other obstruction." In its criticism of the Standard Code version of Rule 93, the National Transportation Safety Board (NTSB) noted that the traditional terminology of "stop short" did not provide adequate protection. The NTSB, as well as RORAC cited the problems posed by such a standard, particularly when it was applied to train movements in opposing directions. For this reason, RORAC recommended, and FRA agrees, that the "½ range of vision" standard will provide improved protection.

Subsection (d) of the NPRM provided that movements against the current of traffic could not be made unless authorized and protected by train order, yardmaster, or other railroad official.

Two commenters suggested that the authority for such a movement against the current of traffic should be in written form. The FRA believes that such a provision would be impractical and unnecessarily burdensome. Yard assignments are accustomed to operating under verbal authority from the yardmaster. Responsibility for providing the necessary protection lies with the yardmaster. We do not see that the issuance of written orders would add to the safety of yard movements against the current of traffic. This aspect of the rule has been adopted in subsection (b)(3) as recommended by RORAC.

One commenter suggested that the word "official" in subsection (d) of the NPRM be replaced with the word "authority". This commenter stated that such a change would permit a movement against the current of traffic to be authorized by signal indication or flag protection, and not necessarily by a person. The FRA believes that the term "official" is more proper. Even if a signal were available to give a clear indication, the official would still be required to authorize its use to govern the movement against the current of traffic.

One commenter felt that this provision should specifically state that movements against the current of traffic, when authorized, must be made subject to "yard speed." The FRA agrees that the proposed language, which is identical to the RORAC version adopted in this final rule, is ambiguous as to whether the other operating restrictions of the section apply. The final rule has been amended to indicate clearly that movements against the current of traffic must be made prepared to stop within one-half the range of vision, not to exceed 20 m.p.h.

One commenter suggested that this section merely require that provision be made for protection of the movement, without specific reference to the source of authority or type of protection. The FRA believes that such a rule would be ambiguous, and that a rule which specifies how authority and protection are to be obtained is preferable.

One commenter suggested a requirement of a five minute interval after a switch is lined for movement to or across the main track and before the move-

ment proceeds in order to establish block signal protection. This type of protection is now provided by rules such as Rule 513 of the Consolidated Code of Operating Rules. The FRA recognizes that operating rules are part of an overall code of procedures which govern train movements, and that there are many interrelated rules which might in some manner affect movements within yard limits. The FRA does not intend that the rule established in this proceeding should be the sole requirement governing such movements. We intend only that this rule will establish a uniform minimum standard as to the traditional provisions of rule 93. We expect that other related carrier rules will continue in effect as before, and be applied in conjunction with this revised rule 93 in order to assure the safety of yard movements. Therefore, no additional provisions have been added to this rule.

PROTECTIVE FLAGGING (SECTION 218.37, AAR RULE 99)

This proposed rule identified the circumstances in which protective flagging was required, and specifically defined the manner in which such flag protection was to be provided.

Among the various general comments submitted on the NPRM version of rule 99, the major issue concerned the question of whether or not flagging should be required in automatic block signal territory. Several commenters expressed the opinion that only a live flagman could provide adequate backup protection. On the other hand, other commenters cited statistics which demonstrate the reliability of signal systems such as automatic block signals, centralized traffic control, and automatic train control. The FRA believes that the provision which exempts train crews operating in automatic block signal territory from providing flag protection is safe, realistic and practical. Automatic block signal systems and other methods of train control cited above provide reliable train separation and when complied with fully assure a safe operation. In addition, the FRA has recently issued a final rule in response to the Federal Railroad Safety Authorization Act of 1976 (Pub. L. 94–348) which will require trains to be equipped with highly visible marking devices which will provide an additional, backup warning system for an engineer if, for whatever reason, he has passed a signal displaying a stop indication (42 FR 2321). The FRA believes that a regulation that would require the provision of a second "backup" warning system in addition to the primary safety system of the signals would not result in so significant an increase in safety as to justify the additional costs involved. The final rule retains the exemption for operations within automatic block signal territory.

Again, several commenters suggested the revision of this section so as to incorporate the revised rule 99 as drafted by RORAC. With some minor reorganization to accommodate Federal regulatory format, FRA has adopted this suggestion.

Another commenter stated that he believed that the proposed rule was a significant improvement over the existing Standard Code Rule 99, but that its effective application still depended upon the judgment of individual employees. In its criticism of the traditional Standard Code Rule 99, the NTSB noted the use of ambiguous terms such as "sufficient distance". The NTSB believed that such terms did not assist the employee in exercising his judgment so as to properly perform his duties. The FRA recognizes that the proposed rule, and the final rule, do rely upon some degree of judgment on the part of operating employees. We believe, however, that this rule will greatly assist the employee in exercising that judgment correctly by identifying for him some of the significant factors which he must consider in determining what actions will provide adequate protective flagging. In addition, the rule will require each carrier to specify a specific distance at which flag protection must be provided. The FRA does not believe all judgment can be eliminated from any rule, but feels that the specific definition of how protective flagging is to be provided which is given by this rule is far more helpful for a train crew than the traditional instructions based on "a sufficient distance" and similar ambiguous terms which have been used traditionally in rule 99.

One commenter stated that he preferred having no Federal regulation, and felt that the one proposed was inadequate. He noted the experience in one State which has in effect what he believed to be a stricter rule. He stated that in all cases of rear end collisions in automatic block signal territory, the proposed rule would not have applied. He would prefer that regulation in this area be left to the various States. As stated above, the FRA believes that there are adequate provisions for the safety of train movements within automatic block signal territory without the addition of protective flagging. Safe train operations are dependent upon the train crew's strict compliance with all signal indications, operating rules and other instructions governing the movement of their train. The FRA believes that this rule provides an adequate degree of safety in a reasonable manner. With respect to this commenter's preference for State regulation as opposed to Federal regulation, the policy of the Federal Railroad Safety Act of 1970, as expressed in section 205 (45 U.S.C. 434), has committed FRA to promoting uniform national regulation to the extent practicable. The FRA, as well as NTSB, has noted the need for revision of rule 99. We cannot assure that all States will adopt a regulation, and even if all did, we cannot assure that all 50 would be uniform. The necessity of complying with a multitude of rules is not only burdensome to carriers, but also confusing to operating employees. The FRA believes, therefore, that a single uniform Federal regulation is preferable to a multitude of different State regulations.

Another commenter asked that the final regulation specifically provide that more stringent State rules or laws would take precedence over a less stringent Federal regulation. The relationship between Federal regulations issued under the Federal Railroad Safety Act and State regulations governing the same subject matter is governed by section 205 of that Act. That statutory provision prescribes the preemption of all State laws, rules, regulations, orders and standards concerning the same subject matter as a Federal regulation, except where such a State provision addresses an essentially local safety hazard and is not incompatible with the Federal provision. In light of this statutory provision, FRA does not have the authority to amend the rule as requested by this commenter.

Several commenters thought that the exception in subsection (a) of the NPRM which would permit a railroad to designate, by train order or special instruction, that flag protection was not required is a serious defect in the rule. One of these thought it irresponsible to "delegate" to the carrier the authority to determine that flag protection was not required. The FRA has reviewed this provision in light of these comments and continues to believe that some such flexibility is justified. We recognize that train orders and special instructions have been used traditionally to relieve a train crew of unnecessary flagging in order to expedite a train movement under certain conditions without sacrificing safety. We have no reason to believe that continued use of this means of operation will lead to abuse or total disregard for the safety of the movement. With respect to the use of train orders, protection for the train movement is not eliminated. Rather, the responsibility for the protection of the train movement is transferred from the train crew (where it would be if flagging were required) to the dispatcher who issues the train order. Once such a "no-flagging" order has been issued, the dispatcher must assure that no other movement is permitted to operate in such a way as to endanger the movement. The FRA does not now believe that a similar degree of safety can be expected from the use of a special instruction as there is no corresponding single individual responsible for providing alternate protection for each movement so exempted. Therefore, while the train order exemption has been retained in the final rule, the special instruction provision has been eliminated.

Two commenters contended that the exemption from flagging in automatic block signal territory would eliminate the "backup protection" provided by the live flagman. As stated earlier, the signal system provides the primary safety system. In the rare situation where a signal malfunction results in a "false proceed", the requirement for highly visible marking devices as required in Part 221 of this chapter already provides a backup warning system. To require flagging in addition, as a backup to a backup system would be unjustifiably redundant protection.

Two commenters asked for a clear definition of "interlocking limits". FRA has included a definition in the final rule which should eliminate confusion over the meaning or intended scope of the term.

Several commenters questioned whether the term "block signal" as used in the exemption in subsection (a) of the NPRM was intended to include other systems of train control such as cab signals. The FRA fully intended the term "block signal" to be used in its broadest sense to include a cab signal which is in fact a fixed signal governing entrance to and passage through a block even though the signal is mounted in the cab of the locomotive rather than along the right-of-way.

One commenter thought there was a discrepancy between subsection (a), and subsections (b) and (c) of the NPRM with respect to flagging in automatic block signal territory—he believed that under (a) it was not required, but under (b) and (c) it was. This is an incorrect reading. Subsection (a) outlined the conditions under which flagging was not required (this provision has been redesignated as subsection (a)(2) of the final rule). Subsections (b) and (c) define the manner in which flagging is to be provided wherever it is required (these provisions have been redesignated as subsections (a)(1)(i) and (a)(1)(ii) of the final rule). There is no discrepancy.

Another commenter suggested that the requirement of protection by two block signals should be replaced by a requirement that the rear of the train is protected by a "block signal system". The FRA and the RORAC versions of the rule require the two block signals since the presence of those signals will assure that a following train movement will be operating under restrictive conditions prepared to stop short of a train ahead. The broader term "block signal system" could be interpreted as a single signal to the rear, and as such would not provide adequate assurance of safety.

Another commenter stated that a relatively new or inexperienced flagman would not necessarily know that there were two signals to the rear of his train. This commenter noted that employees are not usually required to be that qualified on the physical characteristics of the railroad until they become conductors. The FRA does not believe that this provision places an unreasonable burden on an inexperienced flagman. Generally speaking, each carrier's operating rules specify that the conductor and the engineer are responsible for the protection and safety of their train, as well as rules compliance by subordinate crew members. As noted by the commenter, the conductor is familiar enough with the physical characteristics of the railroad to provide adequate instruction to an inexperienced flagman.

Another commenter felt that acceptable distances between the signals ought to be stated in the rule. The design of signal systems is a complex operation which must take into consideration a variety of factors which are peculiar to the specific location. Signal spacing can be affected by the geography, grade, curvature, visibility, density of traffic, type of traffic, length of trains. These factors are too variable to permit the specification of a uniform signal spacing requirement, and in any event, FRA does not believe that such a requirement is necessary in relation to an effective rule 99.

One commenter thought that a passenger train making a scheduled stop should be exempt from the flagging requirement. FRA finds no justification for such an exemption as there are no special procedures that assure protection for the rear of the train while it is stopped.

A commenter inquired whether the meaning of the exemption based on two block signals meant that they must be two "clear" signals, or if two restricting signals would suffice. This provision is intended to require the presence of two signals capable of displaying an aspect which indicates the condition of block occupancy so as to enable a following train to stop short of the rear of the train ahead. The actual indication shown by those signals at any given time is not critical. Stop-and-proceed or grade signals are well established and effective means of controlling a train's movement and therefore can be counted in determining the presence of the necessary two signals.

One commenter noted that the NPRM reflected a drastic departure from the flagging rule now in effect on the Alaska Railroad which is operated by FRA. This rule was not intended to codify the existing practice of any railroad. Rather, it is intended to establish a minimum rule which, once this regulation becomes effective, will be adopted and applied by all carriers to more specifically state the conditions under which flagging is required and the manner in which it is to be provided.

A commenter suggested that the final rule should be no less strict than that contained in the Uniform Code of Operating Rules used by Canadian railroads. The FRA believes that the language of the final rule is as strict as that used by the Canadian railroads. This revision of the Standard Code Rule 99 is sufficiently specific to enable an employee to determine what action is expected of him under given operating conditions so that he is assisted in exercising his judgment as to how to provide for the safety of his train. It also requires each railroad to specify flagging distances for individual segments of its lines which take into consideration all the various factors necessary to define a "sufficient distance" for that territory.

Subsections (b) and (c) of the NPRM set forth the conditions under which flagging protection was to be provided. A number of commenters took exception to the judgment factors involved in a flagman's determination of when the conditions of subsection (b) or (c) existed. They contended that the flagman was not in a position to know with a fair degree of accuracy whether the train was moving at less than ½ the maximum authorized speed. The FRA does not agree that a flagman is incapable of making such a judgment with a reasonable degree of accuracy. Railroad employees have for years been taught how to estimate the speed of a train with the aid of passing mileposts and a standard railroad watch. Using this time honored method, a flagman can reasonably be expected to determine when the train is moving at less than ½ its maximum authorized speed.

In addition, these same commenters contended that the flagman was not in a position to determine such factors as the relative speed of his train to a following train in order to judge whether he was operating under circumstances in which he might be overtaken, even though moving at more than ½ the maximum speed for that track. The list of factors included in the proposed rule (subsection (b)) and the final rule (subsection (a)(1)(ii)) is intended as a guideline of factors to be considered by the flagman in exercising his judgment. Under such conditions, he must assume that the following train is moving at the maximum authorized speed for that territory, unless he has reliable information to the contrary such as by radio communication between his train and the following train and can ascertain the actual speed.

One commenter did note that a provision should be added to the rule providing for the use of radio. While radio may be used to communicate between trains so as to determine more accurately whether a train "may be overtaken", the FRA believes that the use of radio in over-the-road operation is still subject to too many variables in terms of reliability and coverage to be incorporated into this rule as a mandatory requirement. Those railroads that are well equipped with radios will be able to utilize them as an additional tool to assist the flagman in exercising his judgment as to when protection should be provided under subsection (a)(1)(ii).

One commenter characterized these two subsections as being overly wordy, difficult to understand, and difficult to teach to crew members. The FRA believes that the language of the RORAC version incorporated in the NPRM and final rule is far clearer than the traditional rule based on ambiguous terms such as "sufficient distance", "proper intervals", and the like. The inclusion of a list of factors to be considered in providing protection and the specific definition of how to flag will assist the flagman in exercising a more informed and proper judgment and will provide the specificity called for by NTSB. For this reason, this rule should be easier to comprehend and to teach.

One commenter thought the provisions of these two subsections ((a)(1)(i) and (a)(1)(ii)) would apply in automatic block signal territory, and were in that case illogical. These provisions were not intended to apply where automatic protective systems provide for the safety

of the movement. They would apply in territory which does not meet one of the criteria set forth in subsection (a)(2).

One commenter inquired whether a carrier that wished to retain a flagging requirement in territory which was exempted under subsection (a)(2) of this rule, would have to conduct that flagging in accordance with the provisions of the rule. The answer to this question is no. In an operation such as on a heavy commuter line, entirely controlled by automatic block signals, a carrier would not be required to flag under the rule. If he wished to maintain a flagging requirement of his own that differs from the procedure established in this regulation, he could do so.

One commenter suggested the substitution of the words "for any train at that location" for the proposed language "including slow order limits" which is used to define what is meant by maximum authorized speed. The FRA believes the proposed language is the better of the two phrases since it more accurately and explicitly defines what is to be considered maximum authorized speed.

Another commenter thought the ½ maximum speed concept would create difficulties for heavy trains leaving a yard where it would take some time to attain that speed. While FRA recognizes that heavy weight trains coming out of yards will take some time to attain a speed which exceeds ½ maximum speed, and will, therefore, be required to protect to their rear, this is not unlike present rule 99 requirements. To this extent, this rule will merely reinforce current practice, and assure that it is uniformly applied.

A number of commenters expressed the opinion that the required use of fusees was excessive and might also result in danger of fire, particularly on bridges, in tunnels and at stations, or of increased personal injuries. In order to insure full protection during the speed intervals identified in the regulation, lighted fusees must be dropped off in the manner prescribed in the RORAC rule so as to assure that the following train will encounter a lighted fusee. An exception to the rule is provided where a Federal, State or local regulation prohibits the use of fusees because of the danger of fire under certain weather conditions. Under such conditions, the carrier will be required to put into effect alternate operating procedures to ensure full protection. This may be done, for example, by use of an absolute block. Existing carrier rules cover the use of fusees in locations such as bridges, tunnels and stations. These may require revision and special instruction of employees so as to assure the degree of protection intended by this rule. With respect to the question of personal injury, the FRA recognizes that fusees have been used for years and that their safe use is one of the items stressed in safety instructions issued to both new and veteran employees.

A commenter also questioned the provision of the NPRM requiring fusees to be dropped from the rear of the train. The FRA agrees that fusees need not be dropped from the rear of the train. The manner in which the fusees are dropped can be determined by the carrier in its operating rules.

Subsection (d) of the NPRM defined the specific manner in which flagging is to be accomplished. One commenter suggested that the subsection be revised to require torpedoes to be placed "at least" 100 feet apart, rather than the specific "100 feet apart" as was proposed. The FRA agrees with this suggestion and has made the appropriate change for protection to the rear and to the front of a train (subsection (a)(1)(iii) and (a)(1)(iv)).

A commenter thought the phrase "flagman's signals" awkward and suggested the term "flagging signals" instead. The FRA believes the term "flagman's signals" is the better term in that it is the term presently used in the operating rules of many railroads and does not confine the meaning to train service alone.

Several commenters criticized the provision requiring each railroad to designate the specific distance which the flagman was required to go back in a given territory in order to provide flag protection. Some suggested that the final rule should revert to the "sufficient distance" terminology, while others contended that the proposed rule would result in nonuniformity. The FRA feels that the phrase "sufficient distance" is specifically the type of ambiguity and weakness in the present rule which was criticized by NTSB. The requirement that each railroad designate a safe flagging distance for each segment of its line based on speed and other operational characteristics will provide a more precise and effective rule.

One of these commenters suggested alternate language which would require the flagman to go back "a sufficient distance to insure full protection against a train approaching at twice the speed it was expected to operate." The FRA believes that adoption of a rule such as that would be unrealistic, would be burdensome for a flagman to comply with and could invite intentional operating speed violations. Operating rules presently included in railroad rule books that use indefinite terms such as "sufficient distance" will have to be revised to conform with the requirements of § 218.37.

The FRA does not believe that the "non-uniformity" resulting from the provision requiring each railroad to specify a specific distance for establishing flagging protection will in any way weaken the rule. In this case, the rule on each railroad will comply with the minimum standard included in this regulation in terms of the conditions in which flagging must be provided, as well as the manner in which it is provided. In these overall terms, the rules will create a uniform procedure. There is both a rational and practical basis for allowing the specific designation of a particular flagging distance since as was pointed out earlier in this discussion, so many variables are involved in defining a safe distance at any given location.

One commenter suggested the addition of a requirement which would provide that a flagman could not return to his train if he could see or hear a train approaching, but should wait until the train stops or acknowledges his signal. The FRA does not believe that such an additional provision is necessary to assure the safety of the operation. The following train will have already been warned by the two torpedoes and lighted fusee.

One commenter thought that subsection (e) of the NPRM, which provided for flag protection of the front of a train, should specify the conditions under which such protection is required. The rule as proposed provided that front end protection against opposing movements must be provided whenever required under the railroad's operating rules. The FRA believes this to be the sounder approach as this will minimize confusion resulting from a Federal regulation conflicting with a multitude of other carrier operating rules and procedures. Carriers now prescribe conditions under which front end protection is required, and these may vary depending upon the type of operation involved. FRA has no reason to believe that a continuation of the present practice will adversely affect the safety of train operations.

The FRA has reviewed the rules included in this proceeding in accordance with the policies of the Department of Transportation as stated in the FEDERAL REGISTER (41 FR 16200, April 16, 1976), and has concluded that the expected regulatory impact of these rules will be minimal since they do not differ significantly from present good operating practices and will merely assure that such good practice becomes the minimum standard for the industry.

The environmental impact of the rules has also been assessed in compliance with section 102(2)(C) of the National Environmental Policy Act. Since the Federal rule will serve only to assure that existing procedures are applied uniformly throughout the industry, FRA has determined that this action will not significantly affect the quality of the human environment.

In light of the foregoing discussion, Part 218 of Title 49 of the Code of Federal Regulations is amended as follows:

1. By revising the table of contents for Part 218 to read as follows:

Subpart A—General

Sec.
218.1 Purpose.
218.3 Application.
218.5 Definitions.
218.7 Waivers.
218.9 Civil penalty.
218.11 Filing, testing and instruction.
218.12-218.20 [Reserved]

Subpart B—Blue Signal Protection of Workmen

218.21 Scope.
218.23 Blue signal display.

Sec.
218.25 Workmen on track other than a hump-yard track.
218.27 Workmen on hump-yard track.
218.29 Remotely-controlled switches.

Subpart C—Protection of Trains and Locomotives

218.31 Scope.
218.33 [Reserved]
218.35 Operations within yard limits.
218.37 Flag protection.

AUTHORITY: Secs. 202, 84 Stat. 971, (45 U.S.C. 431), Sec. 1.49(n) of the regulations of the Office of the Secretary of Transportation, 49 CFR 1.49(n).

2. By adding new paragraphs (e), (f) and (g) to § 218.5 to read as follows:

§ 218.5 Definitions.

* * * * *

(e) "Interlocking limits means the tracks between the opposing home signals of an interlocking.

(f) "Flagman's signals" means a red flag by day and a white light at night, and a specified number of torpedoes and fusees as prescribed in the railroad's operating rules.

(g) "Absolute block" means a block in which no train is permitted to enter while it is occupied by another train.

3. By adding a new Subpart C to Part 218 which reads as follows:

Subpart C—Protection of Trains and Locomotives

§ 218.31 Scope.

This subpart prescribes minimum operating rule requirements for the protection of railroad employees engaged in the operation of trains, locomotives and other rolling equipment.

§ 218.33 [Reserved]

§ 218.35 Yard limits.

(a) After August 1, 1977, yard limits must be designated by—

(1) Yard limit signs, and

(2) Timetable, train orders, or special instructions.

(b) After August 1, 1977, each railroad must have in effect an operating rule which complies with the requirements set forth below:

(1) The main tracks within yard limits may be used, clearing the time an approaching designated class train is due to leave the nearest station where time is shown. In case of failure to clear the time of designated class trains, protection must be provided as prescribed by § 218.37. In yard limits where main tracks are governed by block signal system rules, protection as prescribed by § 218.37 is not required.

(2) Trains and engines, except designated class trains, within yard limits must move prepared to stop within one-half the range of vision but not exceeding 20 m.p.h. unless the main track is known to be clear by block signal indications.

(3) Within yard limits, movements against the current of traffic on the main tracks must not be made unless authorized and protected by train order, yardmaster, or other designated official and only under the operating restrictions prescribed in 218.35(b)(2).

(c) Each railroad shall designate in the operating rule prescribed under paragraph (b) of this section the class or classes of trains which shall have superiority on the main track within yard limits.

§ 218.37 Flag protection.

(a) After August 1, 1977, each railroad must have in effect an operating rule which complies with the requirements set forth below:

(1) Except as provided in subparagraph (2) of this paragraph, flag protection shall be provided—

(i) When a train is moving on the main track at less than one-half the maximum authorized speed (including slow order limits) in that territory, flag protection against following trains on the same track must be provided by a crew member by dropping off single lighted fusees at intervals that do not exceed the burning time of the fusee.

(ii) When a train is moving on the main track at more than one-half the maximum authorized speed (including slow order limits) in that territory under circumstances in which it may be overtaken, crew members responsible for providing protection will take into consideration the grade, curvature of track, weather conditions, sight distance and relative speed of his train to following trains and will be governed accordingly in the use of fusees.

(iii) When a train stops on main track, flag protection against following trains on the same track must be provided as follows: A crew member with flagman's signals must immediately go back at least the distance prescribed by timetable or other instructions for the territory, place at least two torpedoes on the rail at least 100 feet apart and display one lighted fusee. He may then return one-half of the distance to his train where he must remain until he has stopped the approaching train or is recalled. When recalled, he must leave one lighted fusee and while returning to his train, he must also place single lighted fusees at intervals that do not exceed the burning time of the fusee. When the train departs, a crew member must leave one lighted fusee and until the train resumes speed not less than one-half the maximum authorized speed (including slow order limits) in that territory, he must drop off single lighted fusees at intervals that do not exceed the burning time of the fusee.

(iv) When required by the railroad's operating rules, a forward crew member with flagman's signals must protect the front of his train against opposing movements by immediately going forward at least the distance prescribed by timetable or other instructions for the territory placing at least two torpedoes on the rail at least 100 feet apart, displaying one lighted fusee, and remaining at that location until recalled.

(v) Whenever a crew member is providing flag protection, he must not permit other duties to interfere with the protection of his train.

(2) Flag protection against following trains on the same track is not required if—

(i) The rear of the train is protected by at least two block signals;

(ii) The rear of the train is protected by an absolute block;

(iii) The rear of the train is within interlocking limits; or

(iv) A train order specifies that flag protection is not required.

(b) Each railroad shall designate by timetable or other instruction for each territory the specific distance which a crew member providing flag protection must go out in order to provide adequate protection for his train.

(c) Whenever the use of fusees is prohibited by a Federal, State or local fire regulation, each railroad operating within that jurisdiction shall provide alternate operating procedures to assure full protection of trains in lieu of flag protection required by this section.

This amendment is effective August 1, 1977. Earlier compliance with these regulations is authorized as of January 27, 1977.

Issued in Washington, D.C., on January 19, 1977.

ASAPH H. HALL,
Administrator.

[FR Doc.77-2585 Filed 1-26-77;8:45 am]

[Docket No. RSOR-5, Notice No. 3]

PART 220—RADIO STANDARDS AND PROCEDURES

Final Rule

On August 11, 1975, the Federal Railroad Administration (FRA) published in the FEDERAL REGISTER (40 FR 33682) a notice of proposed rulemaking (NPRM) stating that FRA was considering the issuance of a new Part 220, Radio Standards and Procedures. This new part would prescribe mandatory procedures governing the use of radio communications in connection with railroad operations. A technical correction to the proposed rule was published in the FEDERAL REGISTER on August 21, 1975 (40 FR 36575).

Interested persons were invited to participate in the rulemaking proceeding by submitting written comments before September 24, 1975. The notice also scheduled a public hearing which was held on September 25, 1975, in Washington, D.C. The written comments filed in response to the NPRM, and the comments submitted at the public hearing have been considered. FRA has determined, after reviewing and analyzing all of these comments, that several changes are necessary. These changes, which are discussed below, affect the following sections: § 220.1 Scope; § 220.5 Definitions; § 220.29 Statement of letters and numbers; § 220.43 Communication consistent with rules; § 220.49 Switching, backing or pushing; and § 220.61 Transmission of train orders by radio.

The Administrator has evaluated the adoption of this new part in accordance with the regulatory reform policies of the Department of Transportation, which were stated in the public notice published on April 16, 1976 in the FEDERAL REGISTER (41 FR 16200). These policies require an evaluation of the economic impact of regulations. The main economic impact to the railroad industry would be due to the instruction of employees in the proper use of radio communication, and the additional time used in connection with transmitting by radio in compliance with these rules. This time would involve listening to ensure a channel is clear before transmitting, properly identifying the station when transmitting or receiving, repeating a transmission when necessary, and copying and disseminating train orders received by radio. The costs which will be incurred as a result of these activities will be minimal. In the two accidents cited by the National Transportation Safety Board (NTSB) in recommending that FRA adopt rules for the use of radio, there were three fatalities, three injuries and over two million dollars in property damage. Since the adoption of these rules can prevent such accidents FRA has determined that the benefits outweigh the slight costs to the railroad industry.

A summary of the contents of the comments and FRA's responses to these comments, including any action taken as a result, are discussed below:

SUBPART A—GENERAL

Section 220.1. This section provides that the rules in this part shall govern the use of radio communications in connection with railroad operations. Several commenters asked for clarification concerning what modes of communication are to be governed by these rules. These rules apply only to voice communications between railroad employees by way of radio and are not applicable to communications by modes such as telephone, telegraph, automatic audio signalling devices, or the transmitting of recorded messages by radio. To clarify the intended scope of these rules, the following language has been added to this section regarding the term "radio communications": "The term 'radio communications' refers to the transmission and reception of voice communications by radio." In addition, the scope of these rules is limited to the use of radio communications in connection with railroad operations, as defined in this part.

This section also permits railroads to adopt more stringent requirements so long as the minimum requirements of this part are met. One commenter felt that the standards and procedures that railroads may adopt should be submitted to FRA prior to implementation and made subject to the penalty provisions. FRA believes that these measures would be counterproductive in that they would discourage railroads from adopting and observing more stringent requirements.

Section 220.3. This section states that this part applies to railroads that operate trains or other rolling equipment on standard gage track which is part of the general railroad system of transportation. This section also exempts rapid transit railroads and railroads that operate only on track inside an installation which is not part of the general railroad system of transportation. One commenter opposed the exemption in paragraph (b)(2) for rapid transit railroads. The commenter felt that any railroad subject to the Federal Railroad Safety Act of 1970 should be subject to these rules. In view of the many operational differences between rapid transit systems and the general railroad system of transportation, the application of identical radio rules and procedures would be inappropriate. FRA believes that radio rules for rapid transit railroads should be addressed separately and will continue to analyze and review the situation for future action. This section remains as proposed.

Section 220.5. This section defines terms used in this part. As a result of comments received a change has been made in the wording of one definition. The definition of the term "train order" in paragraph (c) has been revised to read as follows: "'Train order' means any mandatory directive issued as authority for the conduct of a railroad operation which is transmitted by radio." This new definition, which applies only to the rules in this part, reflects two changes from the proposed definition. The first is the elimination of the requirement that for a directive to qualify as a train order it must be conveyed in written form pursuant to the railroad's operating rules. The elimination of this provision is designed to broaden the scope of the definition to include those directives which have the same force and effect as train orders, such as movement orders, but which are not required by a railroad's operating rules to be reduced to writing by the recipient. The second is the addition of the requirement that for a directive to be considered a train order, for the purposes of this part, that it must also be transmitted by radio. Since these rules are not intended to govern the use of directives which are not transmitted by radio, such as timetables, this provision has been added to prevent their inclusion under the definition of train order.

FRA is aware that certain railroads are presently conducting operations by unique directives which serve as substitutes for train orders and which are not transmitted in accordance with these rules. An August 1, 1977, effective date has been established for these rules, which will enable railroads that desire to continue using such directives to petition FRA for waivers, pursuant to the provisions of 49 CFR Part 211, Rules of Practices (41 FR 54181, December 13, 1976).

Section 220.7. This section prescribes a civil penalty of at least $250 but not more than $2,500 for each violation of a provision of this part. One commenter noted that the Federal Communication Commission (FCC) regulations prescribe a monetary penalty for failure to observe proper station identification procedures. The commenter believed that this section might expose railroads to "double jeopardy" in that they may also be liable to FRA for violating § 220.37, which prescribes station identification procedures to be observed when using radio in connection with railroad operations. A violation of the FCC regulation would result from the failure to comply with a standard governing radio communications generally, while failure to comply with a rule in this part would constitute a violation of a railroad safety standard involving the use of radio. If a railroad uses identification procedures which do not comply with either FRA or FCC rules, that railroad may be liable to both agencies. However, this would not constitute "double jeopardy". Double jeopardy occurs when one is prosecuted more than once for the same offense, not when one is prosecuted for different offenses resulting from a single act. Here a railroad would be subject to two penalties for two different offenses, resulting from a single act. This section remains as proposed.

SUBPART B—RADIO PROCEDURES

Section 220.21. This section prescribes filing requirements for railroads using or intending to use radio communications in connection with their operations. Under this subpart, each railroad is required to adopt rules which conform with the minimum standards prescribed herein and to submit them to the Federal Railroad Administrator at least 30 days before implementation. Each amendment to these rules must be filed within thirty days after it is issued. One commenter suggested that this section be revised to require the filing of amendments thirty days prior to implementation. FRA believes that a thirty day advance filing requirement for amendments would have an unnecessarily restrictive affect upon the use of radio. These rules, which constitute the initial step in the regulation of a technical and expanding subject area, do not provide guidelines for all the exigencies which may occur in the course of using radio to conduct railroad operations. Occasions may arise where the expeditious amendment of the radio operating rules of a railroad may be needed to provide for unanticipated situations. These filing requirements will give railroads the necessary degree of flexibility to effectively manage in such situations. However, as stated before, any amendments adopted by a railroad must be as stringent as the standards prescribed in this part. In addition, individual railroads will be expected to exercise prudent judgment in amending their radio rules.

Another commenter favored eliminating the filing requirements since railroads are currently required to file their operating rules under 49 CFR Part 217. FRA believes that these new procedures, which are unique to radio-train operations, require detailed attention. The separate filing of radio rules will enable both railroads and the FRA to focus their attention on problems peculiar to these new operations. Accordingly, FRA has decided to retain these filing requirements. This section remains as proposed.

Section 220.23. This section requires railroads using radio in connection with their operations to publish information concerning the locations and hours of operation of their stations. One commenter suggested that FRA require railroads to publish this information in their timetables. FRA feels this is not necessary. The manner of publication should be left to the discretion of the railroads. However, all employees required to use radio in connection with train operations must be provided with a copy of the publication that is used.

One commenter noted that FCC regulations define a "base station" as "a land station in the land mobile service carrying on a service with land mobile stations" (47 CFR 93.7). This commenter pointed out that under this definition it was possible for a base station to be no more than the site of a transmitter and therefore unmanned. This would also be true for wayside stations. The commenter also stated that a literal interpretation of the last sentence of this section would result in the publication of a list of base and wayside stations that were never attended, but were functional because their "control points" were attended. It was suggested that the term "control point," which is defined in the FCC regulations as "an operational station which is used to control the emissions or operations of another station * * *" be used in lieu of the term "base and wayside stations." FRA believes that the use of the term "control point," in these rules, would cause confusion because it does not have a commonly recognized meaning in the railroad industry. A number of railroads use the term in lieu of station names to designate specific locations for the issuing of written orders, while others use it to designate remote control signal installations at outlying points. The terms "base" and "wayside" were chosen because they have commonly understood meanings in the railroad industry, even though those meanings may not be in accord with FCC definitions. On those railroads utilizing radio, a "base" station is generally understood to be the main receiving and transmitting terminal where the train dispatcher's office is located. The term "wayside" station is commonly understood as indicating an intermediate station between terminals. Thus, a dispatcher in a base station can code into his phone circuit a number of intermediate wayside radio installations to increase the range of his set to reach trains that are out of the range of his base station, but which are within the reception range of a wayside station. Based on the foregoing, FRA believes that the proposed terminology is more suitable for the railroad industry.

Another commenter thought that in publishing information concerning the hours of operation of base and wayside stations, railroads should only be required to indicate when they are "usually attended or in operation" as opposed to when they are in fact "attended or in operation." FRA believes that the use of the suggested language would present a safety hazard because it may cause unwarranted reliance upon a station being in operation. This section remains as proposed.

Section 220.25. This section requires those railroads using radio to educate and instruct their employees in the proper use of radio. This section remains as proposed.

Section 220.27. This section prescribes procedures to be employed for the identification of those receiving and transmitting communications by radio. One commenter felt the use of short identification tags should be permitted after initial transmissions. The language of paragraph (a)(1) permits the use of "an abbreviated name or initial letters" when identifying the railroad. In addition, paragraph (a)(2) permits the use of a "unique designation" when identifying a station. FRA believes that those provisions give sufficient latitude to permit the shortening of transmissions without resorting to the casual use of name tags, which do not provide adequate identification.

Two commenters felt that the requirements of paragraphs (a)(2) and (a)(3) were redundant and time consuming since both would result in the transmission of information concerning the location of stations. It was suggested that this section be revised to require compliance with either subparagraph, but not both. The location of a station is extremely important for identification purposes. Since most stations are designated by location, compliance with paragraph (a)(2) will usually satisfy the requirements of (a)(3). Paragraph (a)(3) provides for those cases where the name of a station does not indicate its location. FRA believes that safety will be enhanced by requiring compliance with the provisions of both subparagraphs. This section remains as proposed.

Section 220.29. This section prescribes minimum requirements for maintaining clarity and understanding when pronouncing letters and numbers during radio transmissions. Several commenters raised questions concerning the use of the phonetic alphabet in Appendix A. Paragraph (a) requires the use of a phonetic alphabet when pronouncing letters or numbers during radio transmissions. The phonetic alphabet in Appendix A is only recommended; therefore, any railroad presently using a different phonetic alphabet may continue to do so.

One commenter suggested that paragraph (a) be revised to begin with the phrase "If necessary for clarity", to eliminate the need for using the phonetic alphabet for terms such as "a.m." (ante meridiem) or "p.m." (post meridiem). FRA concurs with this suggestion and the language of this section has been revised accordingly.

Section 220.31. This section prescribes procedures for initiating radio transmissions. It is designed to ensure that a uniform and proper identification format is used. Since no comments were received regarding this section, it remains as proposed.

Section 220.33. This section prescribes the procedures for receiving transmissions. It provides a uniform format to ensure proper identification and repetition of messages. Several commenters felt that adherence to the requirements of this section would require the repetition of messages not involving railroad operations, such as transmissions between security forces, and lead to the overcrowding of channels. This section requires the repetition of all transmissions involving railroad operations to ensure safety. The exceptions contained in paragraph (c) are designed to eliminate the repetition of nonessential messages to avoid overcrowding channels. Thus, transmissions involving security forces and other personnel not involved in railroad operations are not subject to the rule. This section remains as proposed.

Section 220.35. This section prescribes procedures for terminating transmissions. The only comment received regarding this section suggested changes in the language of paragraphs (a) and (b), so that they would conform with more general provisions in the FCC regulations. This section is designed to ensure reception of the entire contents of messages before the termination of transmissions. FRA believes that these paragraphs, as proposed, more precisely convey that intent. This section remains as proposed.

Section 220.37. This section requires railroads to test the functional quality of equipment used for radio transmissions or receptions in connection with railroad operations. One commenter requested a clarification of the term "found not to be functioning properly", located in paragraph (b). A radio is not functioning properly when it is not capable of either receiving or transmitting communications clearly because of a mechanical malfunction or the deterioration of its power source. When a radio is used at a location which is within its normal operating range and the quality of its receptions and transmissions is so impaired as to render them unreliable, or the radio is totally incapable of either receiving or transmitting, then that radio is not functioning properly and must be removed from service until repaired. There may be instances where interference or fluctuation are encountered when a radio which is functioning properly is being used near or beyond the periphery of its normal operating range. In such instances the radio being used is not required to be removed from service. However, it should be noted that under § 220.45 of this part, any communications which are not fully understood or completed may not be acted upon and must be treated as if not sent.

One commenter felt that it would be impractical for the crews of multiple unit electric trains to comply with the provisions of paragraph (c), which requires that all crew members be notified when a radio is removed from service. In order to effectuate the purposes of this rule, the crews of all trains within the scope of these regulations must comply with the provisions of paragraph (c).

Section 220.39. This section requires that radio equipment be maintained so that it will be ready to receive transmissions whenever the engine or caboose is manned. This section remains as proposed.

Section 220.41. This section prescribes the procedures to be followed in reporting the failure of an engine or caboose radio that occurs while en route. Two commenters suggested that this section be revised to require the filling of a written report. This report, which would be submitted at the final terminal, would contain information identifying the point at which the failure was discovered. FRA believes that the regulation, as proposed, which requires that a radio failure be reported as soon as practicable, assures that radio failures will receive prompt attention. Individual railroads may adopt rules to require their employees to also file written reports, provided such rules are consistent with this part. This section remains as proposed.

Section 220.43. This section prohibits the use of radio communications in a manner inconsistent with the requirements of 49 CFR Part 220, the operating rules of individual railroads, and with FCC regulations. The proposed rule did not contain the reference to FCC regulations. Several commenters suggested that FRA also refer to the FCC regulations to avoid implying that this part preempted those regulations. These rules are not intended to preempt FCC regulations and to avoid that inference FRA has added language to that effect.

Language has also been added to this section to prohibit the use of citizen band radios in connection with railroad operations. The virtually unlimited public access to these radios has made their usage widespread. This usage presents serious problems because many users consistently fail to observe FCC identification procedures. In drafting these rules, FRA was careful to prescribe stringent identification procedures to ensure that employees using radio in connection with railroad operations properly identified themselves. FRA believes that the purposes of this part would be undermined if railroads were permitted to use citizen band radios, in that railroad employees, who must rely upon radio communications, would be subjected to serious safety hazards by unidentified and uncontrolled transmissions from public users.

Section 220.45. This section prohibits railroad employees from acting in response to radio communications unless those communications are understood or completed in accordance with the requirements of this part and the railroad's operating rules. Since no comments were received regarding this section, it remains as proposed.

Section 220.47. This section prescribes procedures governing emergency radio transmissions involving railroad operations. Two commenters suggested that the international distress call "May Day" be substituted for the word "emergency". FRA believes that the present language not only adequately conveys the intent of this section, but also is commonly used throughout the railroad industry. This section remains as proposed.

Section 220.49. This section prescribes guidelines for certain train movements made in response to radio communications. One commenter was uncertain whether this section was also applicable to operations on mainlines. It was noted that the title of this section, as proposed ("Yard movements, switching, backing"), implied that it was applicable only to switching and backing in yards. This confusion was compounded by the fact that the text of this section referred to switching, backing or pushing, and did not mention either yard movements or mainline operations. FRA intends this section to apply to switching, backing or pushing at all locations. To clarify this intent, the title of this section has been revised to read as follows: "Switching, backing or pushing". The text of this section remains as proposed. With this revision the title and the text of the section are in accord and the inference that the application of this section is limited to yard movements is eliminated.

One commenter felt that the word "and" should be substituted for "or" in the first sentence, to require both complete instructions and continuous radio contact. Continuous radio contact is necessary to maintain control of a switching, backing or pushing movement when instructions are incomplete. FRA believes that when complete instructions have been given for an entire movement, continuous radio contact is not necessary.

One commenter suggests that this section also require that radio equipped engines and cabooses be provided with portable radios, as auxiliary devices, to prevent a total loss of communication at a critical moment. Requiring railroads to equip each engine and caboose with a portable radio for emergency situations is unnecessary since the rule already requires the immediate cessation of movements when instructions are not understood or continuous radio contact is lost. FRA believes that the rule, as proposed, provides sufficient safeguards to assure safety when radio contact is lost.

Section 220.51. Paragraph (a) of this section restricts the use of radio in transmitting information concerning the position or aspect displayed by a fixed signal. This language is designed to prohibit the use of radio to transmit information in advance concerning the aspect of a signal, when the train receiving this information has not arrived at that signal. The practice of predicting the aspect of a signal may cause unwarranted reliance and presents a substantial safety hazard. This paragraph proscribes such a practice.

Paragraph (b) allows the use of radio to convey instructions which would have the effect of overriding the indication of a fixed signal in automatic block territory, if permitted by the railroad's operating rules. Commenters were concerned whether under paragraph (b) railroads were permitted to use radio to authorize trains to move under less restrictive conditions than a signal indicates. They also inquired as to whether radio may be used to require trains to move under more restrictive conditions. In promulgating this rule, FRA was concerned with preventing the casual use of radio to override signal indications in automatic block signal territory. The provisions of paragraph (b) permit the use of radio to authorize trains to either proceed from an automatic block signal displaying a "stop" indication, or to stop at a signal displaying a "proceed" indication, if such action is taken in accordance with the procedures contained in the operating rules of the railroad. Radio merely serves as an alternate method of communication.

SUBPART C—TRAIN ORDERS

Section 220.61. This section prescribes procedures governing the use of radio to transmit train orders when authorized by the operating rules of the railroad. Several commenters felt that it was dangerous for crew members to attempt to receive train orders in moving engines. One of these commenters expressed apprehension regarding the clarity of reception in a moving engine because of the high noise levels. Another commenter was concerned with the difficulty of legibly copying train orders while in a moving engine. The language of paragraph (b)(2) requires the stopping of trains to receive train orders when it is deemed necessary by a conductor, engineer, or train dispatcher. In addition, the rule is structured around a system of "checks and balances", which requires that train orders be copied by the receiving crew member and repeated to the dispatcher for verification. FRA believes that adherence to these procedures will provide adequate protection against the possibility of misunderstanding train orders.

Paragraph (b)(3) of this section has been amended to require that all train orders be reduced to writing. FRA believes that all instructions which fall under the definition of train order, as used in this part, should be reduced to writing so that there will be a written record substantiating the content of a transmission, which can be referred to by crew members implementing those instructions. This revision is intended to eliminate the dangers inherent in requiring a crew member to rely on his recollection of the content of a train order.

As a result of comments received, two changes have been made in the wording of paragraph (b)(4). The first change is the elimination of the requirement that train orders be repeated in accordance

with the railroad's operating rules, and the substitution of the requirement that train orders be immediately repeated in their entirety. This change is intended to prevent the use of abbreviated responses, such as the "X response", when an employee is called upon to repeat the contents of a train order.

The second change is the addition of the requirement that after the dispatcher has stated "complete", the employee copying the train order must then acknowledge by repeating "complete". FRA believes that the addition of this procedure will enhance safety by providing a uniform and more complete format for the termination of transmissions involving train orders.

One minor change has been made in the language of paragraph (b)(6). The term "or which" has been substituted for "and" in the first sentence to prohibit employees from acting upon train orders which have not been completed "or which" do not comply with the requirements of the railroad's operating rules. Failure to comply with either of these requirements may present a safety hazard and this change is intended to prevent the use of train orders which are not both complete and in compliance with the railroad's operating rules.

One commenter suggested that this entire section be eliminated because it repeats what is already contained in the operating book of rules of most carriers. FRA is cognizant of the fact that this section reiterates many procedures already utilized by many carriers. However, to establish uniform and standard procedures throughout the entire railroad industry, FRA has decided to retain the provisions of this section.

In consideration of the foregoing, Chapter II of Title 49 of the Code of Federal Regulations is amended by adding a new Part 220, Radio Standards and Procedures, to read as set forth below. These rules become effective August 1, 1977.

Issued in Washington, D.C., on January 19, 1977.

BRUCE M. FLOHR,
Deputy Administrator.

Subpart A—General

Sec.
220.1 Scope.
220.3 Application.
220.5 Definitions.
220.7 Penalty.

Subpart B—Radio Procedures

220.21 Railroad operating rules; radio communications.
220.23 Publication of radio information.
220.25 Instruction of employees.
220.27 Identification.
220.29 Statement of letters and numbers.
220.31 Initiating a transmission.
220.33 Receiving a transmission.
220.35 Ending a transmission.
220.37 Voice test.
220.39 Continuous monitoring.
220.41 Notification on failure of train radio.
220.43 Communication consistent with rules.
220.45 Communication must be complete.
220.47 Emergencies.
220.49 Yard movements, switching, backing.
220.51 Signal indications.

Subpart C—Train Orders

220.61 Transmission of train orders by radio.

AUTHORITY: Sec. 202 and 209, 84 Stat. 971, 975 (45 U.S.C. 431, 438), and § 1.49(n) of the regulations of the Office of the Secretary of Transportation, 49 CFR 1.49(n).

Subpart A—General

§ 220.1 Scope.

This part prescribes minimum requirements governing the use of radio communications in connection with railroad operations. The term "radio communications" refers to the transmission and reception of voice communications by radio. So long as these minimum requirements are met, railroads may adopt additional or more stringent requirements.

§ 220.3 Application.

(a) Except as provided in paragraph (b) of this section, this part applies to railroads that operate trains or other rolling equipment on standard gage track which is part of the general railroad system of transportation.

(b) This part does not apply to:

(1) A railroad that operates only on track inside an installation which is not part of the general railroad system of transportation; or

(2) A rapid transit railroad that operates only on track used exclusively for rapid transit, commuter, or other short-haul passenger service in a metropolitan or suburban area.

§ 220.5 Definitions.

As used in this part, the term:

(a) "Employee" means any person who is authorized by a railroad to use its radio facilities in connection with railroad operations.

(b) "Railroad operation" means any movement of a train, engine, on-track equipment, or track motor car, single or in combination with other equipment, on the track of a railroad.

(c) "Train Order" means any mandatory directive issued as authority for the conduct of a railroad operation which is transmitted by radio.

§ 220.7 Penalty.

Each railroad to which this part applies that violates any requirement prescribed in this part is liable to a civil penalty of at least $250 but no more than $2500.

Subpart B—Radio Procedures

§ 220.21 Railroad operating rules; radio communications.

(a) After August 1, 1977, the operating rules of each railroad with respect to radio communications shall conform with the requirements of this part.

(b) Before November 1, 1977 or 30 days before it commences to use radio communications in connection with railroad operations, whichever is later, each railroad shall file with the Federal Railroad Administrator, Washington, D.C. 20590, one copy of its operating rules with respect to radio communications. Each amendment to these rules shall be filed with the Federal Railroad Administrator within 30 days after it is issued.

§ 220.23 Publication of radio information.

Each railroad shall designate its territory where radio base stations are installed, where wayside stations may be contacted, and designate appropriate radio channels by publishing them in a timetable or special instruction. The publication shall indicate the periods during which base and wayside radio stations are attended or in operation.

§ 220.25 Instruction of employees.

Each employee who is authorized to use a radio in connection with a railroad operation, shall be:

(a) Provided with a copy of the railroad's operating rules governing the use of radio communication in a railroad operation.

(b) Instructed in the proper use of radio communication as part of the program of instruction prescribed in § 217.11 of this chapter.

§ 220.27 Identification.

(a) Except as provided in paragraph (c) of this section, the identification of each wayside, base or yard station shall include at least the following minimum elements, stated in the order listed:

(1) Name of railroad. An abbreviated name or initial letters of the railroad may be used where the name or initials are in general usage and are understood in the railroad industry;

(2) Name of office or other unique designation of the station; and

(3) Location of the station.

(b) Except as provided in paragraph (c) of this section, the identification of each mobile station shall consist of the following elements, stated in the order listed:

(1) Name of the railroad. An abbreviated name or initial letters of the railroad may be used where the name or initial letters are in general usage and are understood in the railroad industry;

(2) Train name (number), if one has been assigned, or other appropriate unit designation; and

(3) The word "engine", "caboose", "motorcar", "pakset" or other word which indicates to the listener the precise mobile transmitting station, unless identical to the requirement of paragraph (b)(2) of this section.

(c) If positive identification is achieved in connection with switching, classification, and similar operations wholly within a yard, fixed and mobile units may use short identification after the initial transmission and acknowledgement consistent with applicable Federal Communication Commission regulations governing "Station Identification".

§ 220.29 Statement of letters and numbers.

(a) If necessary for clarity, a phonetic alphabet shall be used to pronounce any letter used as an initial, except initial letters of railroads. See Appendix "A", of this part for the recommended phonetic alphabet.

(b) A word which needs to be spelled for precision or clarity shall first be pronounced, and the word shall then be spelled. If necessary, the word shall be spelled again, using a phonetic alphabet.

(c) Numbers shall be spoken by digit, except that exact multiples of hundreds and thousands may be stated as such. A decimal point shall be indicated by the word "decimal". (See Appendix B to this part, for a recommended guide to the pronunciation of numbers.)

§ 220.31 Initiating a transmission.

Before transmitting by radio, an employee shall:

(a) Listen to insure that the channel on which he intends to transmit is not already in use;

(b) Identify his station in accordance with the requirements of § 220.27; and

(c) Verify that he has made radio contact with the person or station with whom he intends to communicate by listening for an acknowledgement. If the station acknowledging his transmission fails to identify itself properly, the employee shall require a proper identification before proceeding with the transmission.

§ 220.33 Receiving a transmission.

(a) Upon receiving a radio call from another station, an employee shall promptly acknowledge the call, identifying his station in accordance with the requirements of § 220.27 and stand by to receive. An employee need not attend the radio, however, if this would interfere with other immediate duties relating to the safety of railroad operations.

(b) An employee shall acknowledge receipt of all transmissions directed to him or his station.

(c) An employee who receives a transmission shall repeat it to the transmitting party unless the communication:

(1) Relates to yard switching operations;

(2) Is a recorded message from an automatic alarm device; or

(3) Is general in nature and does not contain any information, instruction or advice which could affect the safety of a railroad operation.

§ 220.35 Ending a transmission.

(a) At the close of each transmission to which a response is expected, the transmitting employee shall say "over" to indicate to the receiving employee that the transmission is ended.

(b) At the close of each transmission to which no response is expected, the transmitting employee shall state his identification followed by the word "out" to indicate to the receiving employee that the exchange of transmissions is complete.

§ 220.37 Voice test.

(a) Each radio which is used in connection with a railroad operation outside yard limits shall be tested at the point where the train is originally made up. At least once during each tour of duty, the engineer and conductor shall be responsible for the testing of the radio to verify that the radio is operating properly on the engine and caboose. The tests shall consist of an exchange of voice transmissions with another station. The other station shall advise the station conducting the test of the quality and readability of its transmission.

(b) Any radio found not to be functioning properly shall be removed from service until it has been repaired.

(c) When a radio is removed from service, each crew member of the train and the train dispatcher or other employee designated by the railroad shall be so notified.

§ 220.39 Continuous monitoring.

Engine and caboose radios must be turned on to the appropriate channel as designated in § 220.23 with the volume adjusted to receive communications while the engine or caboose is manned.

§ 220.41 Notification on failure of train radio.

The failure of an engine or caboose radio en route shall be reported as soon as practicable to the train dispatcher or other employee designated by the railroad by any alternate means of communication available.

§ 220.43 Communication consistent with rules.

Radio communication may not be used in connection with a railroad operation in a manner which conflicts with the requirements of this Part 220, Federal Communication Commission regulations or the railroad's operating rules. The use of citizen band radios for railroad operating purposes is prohibited.

§ 220.45 Communication must be complete.

Any radio communication which is not fully understood or completed in accordance with the requirements of Part 220 and the operating rules of the railroad, shall not be acted upon and shall be treated as though not sent.

§ 220.47 Emergencies.

(a) An emergency transmission shall be preceded by the word "emergency", repeated three times. An emergency transmission shall have priority over all other transmissions and the frequency or channel shall be kept clear of non-emergency traffic for the duration of the emergency transmission.

(b) Emergency transmissions shall be used to report derailments, collisions, storms, wash-outs, fires, obstructions to tracks, and other hazardous conditions which could result in death or injury, damage to property or serious disruption of railroad operations. Emergency transmissions shall describe as completely as possible the nature, degree and location of the hazard.

§ 220.49 Switching, backing or pushing.

When radio communication is used in lieu of hand signals in connection with the switching, backing or pushing of a train, engine, or car, the employee directing the movement shall give complete instructions or keep in continuous radio contact with the employees receiving the instructions. When backing or pushing a train, engine or cars, the distance of the movement must be specified, and the movement must stop in one-half the remaining distance unless additional instructions are received. If the instructions are not understood or continuous radio contact is not maintained, the movement shall be stopped immediately and may not be resumed until the misunderstanding has been resolved, radio contact has been restored, or communication has been achieved by hand signals or other procedures in accordance with the operating rules of the railroad.

§ 220.51 Signal indications.

(a) No information may be given by radio to a train or engine crew about the position or aspect displayed by a fixed signal. However, radio may be used by a train crew member to communicate information about the position or aspect displayed by a fixed signal to other members of the same crew.

(b) Except as provided in the railroad's operating rules, radio communication may not be used to convey instructions which would have the effect of overriding the indication of a fixed signal in automatic block territory.

Subpart C—Train Orders

§ 220.61 Transmission of train orders by radio.

(a) Train orders may be transmitted by radio only when authorized by railroad's operating rules and must be transmitted in accordance with the railroad's operating rules and the requirements of this Part 220.

(b) The procedures for transmission of train orders by radio are as follows:

(1) The dispatcher or operator shall call the addressees of the train order and state his intention to transmit the train order.

(2) Before the train order is transmitted, the employee to receive and copy the train order shall state his name, identification or call sign, location, and that he is prepared to receive a train order. Train orders may not be received and copied by an employee operating the controls on an engine of a moving train. Train orders may not be transmitted to the crew of a moving train when, in the judgment of either the conductor, the engineer, or the train dispatcher, the train order cannot be received and copied without impairing the safe operation of their train.

(3) Train orders shall be copied in writing by the receiving employee in the format prescribed in the railroad's operating rules.

(4) After the train order has been received and copied, it shall be immediately repeated in its entirety. After verifying the accuracy of the repeated train order, the dispatcher shall then state "complete" and the initials of the employee designated by the railroad. Employees copying train orders must then acknowledge by repeating "complete" and the time.

(5) Before a train order is acted upon, both the conductor and engineer must have a written copy of the train order and make certain that the train order is read and understood by other members of the crew.

(6) A train order which has not been completed or which does not comply with the requirements of the railroad's operating rules, may not be acted upon and must be treated as though not sent. Information contained in a train order may not be acted upon by persons other than those to whom the train order is addressed.

APPENDIX A—RECOMMENDED PHONETIC ALPHABET

A	ALFA	N	NOVEMBER
B	BRAVO	O	OSCAR
C	CHARLIE	P	PAPA
D	DELTA	Q	QUEBEC
E	ECHO	R	ROMEO
F	FOXTROT	S	SIERRA
G	GOLF	T	TANGO
H	HOTEL	U	UNIFORM
I	INDIA	V	VICTOR
J	JULIET	W	WHISKEY
K	KILO	X	XRAY
L	LIMA	Y	YANKEE
M	MIKE	Z	ZULU

The letter "ZULU" should be written as "Z" to distinguish it from the numeral "2."

APPENDIX B—RECOMMENDED PRONUNCIATION OF NUMERALS

To distinguish numbers from similar sounding words, the word "figures" should be used preceding such numbers. Numbers should be pronounced as follows:

Number:	*Spoken*
0	ZERO
1	WUN
2	TOO
3	THUH-REE
4	FO-WER
5	FI-YIV
6	SIX
7	SEVEN
8	ATE
9	NINER

(The figure ZERO should be written as "0" to distinguish it from the letter "O". The figure ONE should be underlined to distinguish it from the letter "I". When railroad rules require that numbers be spelled, these principles do not apply.)

The following examples illustrate the recommended pronunciation of numerals:

Number:	*Spoken*
44	FO-WER FO-WER
500	FI-YIV HUNDRED
1000	WUN THOUSAND
16000	WUN SIX THOUSAND
14899	WUN FO-WER ATE NINER NINER
20.3	TOO ZERO DECIMAL THUR-REE

[FR Doc.77-2584 Filed 1-26-77;8:45 am]

CHAPTER V—NATIONAL HIGHWAY TRAFFIC SAFETY ADMINISTRATION, DEPARTMENT OF TRANSPORTATION

[OST Docket No. 44; Notice 77-3]

PART 571—FEDERAL MOTOR VEHICLE SAFETY STANDARDS

Occupant Crash Protection

This notice amends Standard No. 208, *Occupant Crash Protection*, to extend indefinitely the current occupant crash protection requirements for passenger cars.

In a notice published June 14, 1976 (41 FR 24070), I proposed five alternative courses of action for future occupant crash protection requirements under Standard No. 208 (49 CFR 571.208). Based on an analysis of comments received, a decision was reached to call upon the automobile manufacturers to join the Federal government in conducting a large-scale demonstration program to exhibit the effectiveness of passive restraint systems. The reasoning that underlies that decision is contained in a December 6, 1976, document ("The Secretary's Decision Concerning Motor Vehicle Occupant Crash Protection") that is hereby incorporated by reference in this notice. The effect of that decision on Standard No. 208 is to require the continuation of the current requirements for passenger cars, as proposed in the first of the five alternative courses of action.

The first alternative was written as a three-year extension (to August 31, 1979), although the preamble discussion made clear that the length of the extention was open to discussion. It is now apparent that a continuation of the existing requirements is best effectuated by a deletion of any termination date. This action accords with the intent of the first alternative to maintain current occupant crash protection requirements for the indefinite future. Because this action represents a continuation of existing manufacturing practices, it is the Department's finding that no new significant economic or environmental impacts result from this amendment.

I have directed the National Highway Traffic Safety Administration (NHTSA) to propose comparable changes in the requirements for multipurpose passenger vehicles and light trucks. The NHTSA has also been directed to take final action on the substantive changes to Standard No. 208 that were proposed in its notice of July 19, 1976 (41 FR 29715).

The Department hereby closes OST Docket No. 44, which is transferred to the NHTSA's docket on occupant crash protection. I want to make it clear, however, that by closing OST Docket No. 44 and amending Standard No. 208 to extend indefinitely the current occupant crash protection requirements for passenger cars, I have not in any way foreclosed a future Secretary or Administrator of NHTSA from instituting at any time a rulemaking to amend Standard No. 208 either to place a termination date on Standard No. 208 or to mandate passive restraints on some or all passenger cars.

In consideration of the foregoing, the heading and text of S4.1.2 of Standard No. 208 (49 CFR 571.208) are amended in part to read as follows:

S4.1.2. *Passenger cars manufactured on or after September 1, 1973.* Passenger cars manufactured on or after September 1, 1973, shall meet the requirements of S4.1.2.1, S4.1.2.2, or S4.1.2.3. * * *.

Effective date: January 19, 1977.

(Secs. 103, 119, Pub. L. 89-563, 80 Stat. 718 (15 U.S.C. 1392, 1407).)

Issued on January 19, 1977.

WILLIAM T. COLEMAN, Jr.,
Secretary of Transportation.

[FR Doc.77-2567 Filed 1-26-77;8:45 am]

Title 7—Agriculture

CHAPTER IX—AGRICULTURAL MARKETING SERVICE (MARKETING AGREEMENTS AND ORDERS; FRUITS, VEGETABLES, NUTS), DEPARTMENT OF AGRICULTURE

[Orange Reg. 75, Amdt. 5]

PART 905—ORANGES, GRAPEFRUIT, TANGERINES, AND TANGELOS GROWN IN FLORIDA

Amendment of Size Regulation

This amendment, effective January 21, 1977, lowers the minimum size requirements applicable to fresh shipments of Murcott Honey oranges, grown in the production area in Florida, to $2^{6}/_{16}$ inches in diameter (size 176). The specification of such lower minimum size for Florida Murcott Honey oranges is necessary to satisfy the current and prospective demand for such oranges. The amended regulation recognizes the size distribution of much of the Murcott Honey oranges currently available for fresh shipment.

Findings. (1) Pursuant to the marketing agreement, as amended, and Order No. 905, as amended (7 CFR Part 905), regulating the handling of oranges, grapefruit, tangerines, and tangelos grown in Florida, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674), and upon available information, including an informal poll of the Growers Administrative Committee and Shippers Advisory Committee, established under the aforesaid amended marketing agreement and order, it is hereby found that less restrictive requirements applicable to shipments of Murcott Honey oranges, as hereinafter provided, will tend to effectuate the declared policy of the act.

(2) This amendment reflects the Department's appraisal of the current and prospective demand for fresh Murcott Honey oranges by domestic and export market outlets. Less restrictive size requirements for such fruit are consistent with the size composition and available

supply of such oranges in the production area.

(3) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rulemaking procedure, and postpone the effective date of this amendment until 30 days after publication in the FEDERAL REGISTER (5 U.S.C. 553) because the time intervening between the date when information upon which this amendment is based became available and the time when this amendment must become effective in order to effectuate the declared policy of the act is insufficient; and this amendment relieves restrictions on the handling of Murcott Honey oranges grown in Florida.

Order. 1. The provisions of paragraph (a) (8) and paragraph (b) (8) of § 905.564 (Orange Regulation 75; 41 FR 42177, 49474, 51029, 53007, 54917) are amended to read as follows:

§ 905.564 Orange Regulation 75.

(a) • • •

(8) Any Murcott Honey oranges, grown in the production area, which are of a size smaller than 2 6/16 inches in diameter except that a tolerance for Murcott Honey oranges smaller than such minimum diameter shall be permitted as specified in § 51.1818 of the United States Standards for Grades of Florida Tangerines;

• • • • • •

(b) • • •

(8) Any Murcott Honey oranges, grown in the production area, which are of a size smaller than 2 6/16 inches in diameter, except that a tolerance for Murcott Honey oranges smaller than such minimum diameter shall be permitted as specified in § 51.1818 of the United States Standards for Grades of Florida Tangerines;

• • • • • •

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674)

Dated, January 21, 1977, to become effective January 21, 1977.

CHARLES R. BRADER,
Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[FR Doc.77-2639 Filed 1-26-77;8:45 am]

[Navel Orange Reg. 398]

PART 907—NAVEL ORANGES GROWN IN ARIZONA AND DESIGNATED PART OF CALIFORNIA

Limitation of Handling

This regulation fixes the quantity of California-Arizona Navel oranges that may be shipped to fresh market during the weekly regulation period Jan. 28–Feb. 3, 1977. It is issued pursuant to the Agricultural Marketing Agreement Act of 1937, as amended, and Marketing Order No. 907. The quantity of Navel oranges so fixed was arrived at after consideration of the total available supply of Navel oranges, the quantity currently available for market, the fresh market demand for Navel oranges, Navel orange prices, and the relationship of season average returns to the parity price for Navel oranges.

§ 907.698 Navel Orange Regulation 398.

(a) *Findings.* (1) Pursuant to the marketing agreement, as amended, and Order No. 907, as amended (7 CFR Part 907), regulating the handling of Navel oranges grown in Arizona and designated part of California, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), and upon the basis of the recommendations and information submitted by the Navel Orange Administrative Committee, established under the said amended marketing agreement and order, and upon other available information, it is hereby found that the limitation of handling of such Navel oranges, as hereinafter provided, will tend to effectuate the declared policy of the act.

(2) The need for this section to limit the respective quantities of Navel oranges that may be marketed from District 1, District 2, and District 3 during the ensuing week stems from the production and marketing situation confronting the Navel orange industry.

(i) The committee has submitted its recommendation with respect to the quantities of Navel oranges that should be marketed during the next succeeding week. Such recommendation, designed to provide equity of marketing opportunity to handlers in all districts, resulted from consideration of the factors enumerated in the order. The committee further reports that the fresh market demand for Navel oranges has become very active on all grades and sizes. Prices f.o.b. averaged $3.40 a carton on a reported sales volume of 934 carlots last week, compared with $3.46 per carton on sales of 623 carlots a week earlier. Track and rolling supplies at 487 cars were up 147 cars from last week.

(ii) Having considered the recommendation and information submitted by the committee, and other available information, the Secretary finds that the respective quantities of Navel oranges which may be handled should be fixed as hereinafter set forth.

(3) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rulemaking procedure, and postpone the effective date of this section until 30 days after publication hereof in the FEDERAL REGISTER (5 U.S.C. 553) because the time intervening between the date when information upon which this section is based became available and the time this section must become effective in order to effectuate the declared policy of the act is insufficient, and a reasonable time is permitted, under the circumstances, for preparation for such effective time; and good cause exists for making the provisions hereof effective as hereinafter set forth. The committee held an open meeting during the current week, after giving due notice thereof, to consider supply and market conditions for Navel oranges and the need for regulation; interested persons were afforded an opportunity to submit information and views at this meeting; the recommendation and supporting information for regulation, including its effective time, are identical with the aforesaid recommendation of the committee, and information concerning such provisions and effective time has been disseminated among handlers of such Navel oranges; it is necessary, in order to effectuate the declared policy of the act, to make this section effective during the period herein specified; and compliance with this section will not require any special preparation on the part of persons subject hereto which cannot be completed on or before the effective date hereof. Such committee meeting was held on January 25, 1977.

(b) *Order.* (1) The respective quantities of Navel oranges grown in Arizona and designated part of California which may be handled during the period January 28, 1977, through February 3, 1977, are hereby fixed as follows: (i) District 1: 1,230,000 cartons; (ii) District 2: 270,000 cartons; (iii) District 3: Unlimited movement."

(2) As used in this section, "handled," "District 1," "District 2," "District 3," and "carton" have the same meaning as when used in said amended marketing agreement and order.

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674)

Dated: January 26, 1977.

CHARLES R. BRADER,
Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[FR Doc.77-2949 Filed 1-26-77;12.38 pm]

[Amdt. 2]

PART 966—TOMATOES GROWN IN FLORIDA

Handling Regulation

This amendment relieves certain restrictions on the handling of Florida tomatoes from the effective date herein through February 6, 1977.

Findings. (a) Pursuant to Marketing Agreement No. 125 and Order No. 966, both as amended, regulating the handling of tomatoes grown in the production area, and based upon current information received by the Department, it is hereby found that the Handling Regulation, § 966.315 (41 FR 43909, 50264), should be further amended to reduce the minimum size requirement. This program is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674).

Information has been received from both the Florida Tomato Committee, established pursuant to said Marketing Agreement and Order, and from other sources including field representatives of the Agricultural Marketing Service that freezing weather conditions in the production area during the week of January 17 have resulted in substantial damage to the tomato crop. The committee has unanimously recommended that the minimum size restriction be lowered to 12 8/32 inches in order to be able to ship all remaining supplies. Continuation of the current size provisions of this regulation would no longer tend to effectuate the declared policy of the act.

(b) It is hereby found that it is impracticable and contrary to the public interest to give preliminary notice and engage in public rulemaking procedure, and that good cause exists for not postponing the effective date of this amendment until 30 days after publication in the FEDERAL REGISTER (5 U.S.C. 553) in that: (1) This amendment relieves restrictions on the handling of tomatoes grown in the production area, (2) information regarding this recommendation has been made available to producers and handlers in the production area, and (3) this amendment will not require any special preparation by handlers which cannot be completed by the effective date.

The amendment is as follows:

Paragraph (a) (2) (i) is hereby amended to read as follows:

§ 966.315 Handling regulation.

• • • • •

(a) • • •

(2) *Size.* (i) Tomatoes shall be at least 2 2/32 inches in diameter and be sized in accordance with § 51.1859 of the U.S. tomato standards except that from the effective date herein through February 6, 1977, tomatoes shall be at least 12 8/32 inches in diameter.

• • • • •

(Secs. 1–19, 48 Stat. 31, as amended (7 U.S.C. 601–674).)

Dated January 25, 1977, to become effective January 25, 1977.

FLOYD F. HEDLUND,
Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[FR Doc.77-2882 Filed 1-26-77;8:45 am]

[Amdt. 2]

PART 980—VEGETABLES: IMPORT REGULATIONS: TOMATOES

Minimum Size Requirements

Findings. Pursuant to the requirements of § 8e of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 608e–1), Tomato Import Regulation § 980.211, as amended (41 FR 43910, 50266), is hereby further amended to lower the minimum size requirement of this section from the effective date herein through February 6, 1977.

It is hereby found that good cause exists for not postponing the effective date of this amendment beyond that herein specified (5 U.S.C. 553) in that (1) the requirements of 8e of the act make such amendment mandatory upon amendment of the corresponding regulation applicable to shipments of domestic tomatoes; (2) this amendment corresponds with the amendment of regulations on shipments of domestic tomatoes under Marketing Order No. 966, as amended (7 CFR Part 966); and (3) this amendment relieves restrictions on the importation of tomatoes.

The amendment is as follows:

Paragraph (a) (1) is hereby amended to read as follows:

§ 980.211 Tomato import regulation.

• • • • •

(a) *Minimum grade and size requirements.* (1) At least U.S. No. 3 grade and at least 2 2/32 inches in diameter except that from the effective date herein through February 6, 1977, the minimum diameter shall be 12 8/32 inches.

• • • • •

(Secs. 1–19, 48 Stat. 31, as amended; (7 U.S.C. 601–674).)

Dated January 25, 1977, to become effective January 25, 1977.

FLOYD F. HEDLUND,
Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[FR Doc.77-2883 Filed 1-26-77;8:45 am]

proposed rules

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

[14 CFR Part 71]

[Airspace Docket No. 76-EA-97]

CONTROL ZONE

Proposed Designation

The Federal Aviation Administration is considering amending § 71.171 of Part 71 of the Federal Aviation Regulations so as to designate a Beaver Falls, Pa., control zone.

A new non-Federal airport traffic control tower to be established at Beaver County Airport, Beaver Falls, Pa., will provide the weather observation reporting and communications required for designation of a part-time control zone at that airport.

We propose to establish a part-time control zone to coincide with the planned hours of operation of the airport traffic control tower. The control zone will provide additional controlled airspace protection for IFR arrivals and departures at the airport.

Interested parties may submit such written data or views as they may desire. Communications should be submitted in triplicate to the Director, Eastern Region, Attn: Chief, Air Traffic Division, Department of Transportation, Federal Aviation Administration, Federal Building, John F. Kennedy International Airport, Jamaica, New York 11430. All communications received on or before February 28, 1977, will be considered before action is taken on the proposed amendment. No hearing is contemplated at this time, but arrangements may be made for informal conferences with Federal Aviation Administration officials by contacting the Chief, Airspace and Procedures Branch, Eastern Region.

Any data or views presented during such conferences must also be submitted in writing in accordance with this notice in order to become part of the record for consideration. The proposal contained in this notice may be changed in the light of comments received.

The official docket will be available for examination by interested parties at the Office of Regional Counsel, Federal Aviation Administration, Federal Building, John F. Kennedy International Airport, Jamaica, New York.

The Federal Aviation Administration, having completed a review of the airspace requirements for the terminal area of Beaver Falls, Pa., proposes the airspace action hereinafter set forth:

1. Amend § 71.171 of Part 71 of the Federal Aviation Regulations by designating a Beaver Falls, Pa., Control Zone as follows:

BEAVER FALLS, PA.

Within a 5-mile radius of the center, 40°46'21" N., 80°23'37" W., of Beaver County Airport, Beaver Falls, Pa., within 1.5 miles each side of the Ellwood City, Pa., VORTAC 248° radial, extending from the 5-mile radius zone to 1.5 miles west of the VORTAC. This control zone is effective from 0900 to 2100 hours, local time daily June 1, through August 31, and from 0900 to 1700 hours, local time daily September 1, through May 31.

NOTE.—The Federal Aviation Agency has determined that this document does not contain a major proposal requiring preparation of an Inflation Impact Statement under Executive Order 11821 and OMB Circular A-107.

This amendment is proposed under section 307(a) of the Federal Aviation Act of 1958 (72 Stat. 749; 49 U.S.C. 1348) and section 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).

Issued in Jamaica, N.Y., on January 6, 1977.

L. J. CARDINALI,
Acting Director, Eastern Region.

[FR Doc.77-2618 Filed 1-26-77;8:45 am]

[14 CFR Part 71]

[Airspace Docket No. 76-EA-98]

TRANSITION AREA

Proposed Alteration

The Federal Aviation Administration is considering amending § 71.181 of Part 71 of the Federal Aviation Regulations so as to alter the Corry, Pa., transition area (41 FR 476).

A new VOR RWY 32 original, instrument approach procedure developed for Lawrence Airport, Corry, Pa., requires alteration of the transition area to provide additional controlled airspace protection for aircraft executing the procedure.

Interested parties may submit such written data or views as they may desire. Communications should be submitted in triplicate to the Director, Eastern Region, Attn: Chief, Air Traffic Division, Department of Transportation, Federal Aviation Administration, Federal Building, John F. Kennedy International Airport, Jamaica, New York 11430. All communications received on or before February 28, 1977, will be considered before action is taken on the proposed amendment. No hearing is contemplated at this time, but arrangements may be made for informal conferences with Federal Aviation Administration officials by contacting the Chief, Airspace and Procedures Branch, Eastern Region.

Any data or views presented during such conferences must also be submitted in writing in accordance with this notice in order to become part of the record for consideration. The proposal contained in this notice may be changed in the light of comments received.

The official docket will be available for examination by interested parties at the Office of Regional Counsel, Federal Aviation Administration, Federal Building, John F. Kennedy International Airport, Jamaica, New York.

The Federal Aviation Administration, having completed a review of the airspace requirements for the terminal area of Corry, Pa. proposes the airspace action hereinafter set forth:

1. Amend § 71.181 of Part 71 of the Federal Aviation Regulations by deleting the description of the Corry, Pa., 700 foot floor transition area and by substituting the following in lieu thereof:

That airspace extending upward from 700 feet above the surface within a 5.5-mile radius of the center, 41°54'30" N., 79°38'30" W. of Lawrence Airport, Corry, Pa.; within 3 miles each side of the 305° bearing from the Corry RBN (41°54'44" N., 79°38'54" W.), extending from the 5.5-mile radius area to 8.5 miles northwest of the RBN; and within 5 miles each side of the Tidioute, Pa., VORTAC 319° radial, extending from 5.5-mile radius area to the VORTAC.

NOTE.—The Federal Aviation Agency has determined that this document does not contain a major proposal requiring preparation of an Inflation Impact Statement under Executive Order 11821 and OMB Circular A-107.

This amendment is proposed under section 307(a) of the Federal Aviation Act of 1958 (72 Stat. 749; 49 U.S.C. 1348) and section 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).

Issued in Jamaica, N.Y., on January 6, 1977.

L. J. CARDINALI,
Acting Director, Eastern Region.

National Oceanic and Atmospheric Administration

[15 CFR Part 923]

COASTAL ZONE MANAGEMENT PROGRAM

State Administrative Grants; Extension of Comment Period

On December 30, 1976, the National Oceanic and Atmospheric Administration (NOAA) published proposed regulations in the FEDERAL REGISTER (41 FR 57004) amending coastal zone management state administrative grant regulations pursuant to sections 306 and 312 of the Coastal Zone Management Act of 1972, as amended, 16 U.S.C. section 1451 et seq. NOAA requested that comments on the proposed regulations be submitted on or before February 3, 1977.

Subsequently, NOAA has concluded that an extension of the comment period is warranted. Written comments may be submitted to the Office of Coastal Zone Management, U.S. Department of Commerce, Page Building 1, 3300 Whitehaven Street, NW., Washington, D.C. 20235, on or before March 15, 1977.

R. L. CARNAHAN,
Acting Assistant Administrator for Administration.

FEDERAL TRADE COMMISSION

[16 CFR Part 456]

ADVERTISING OF OPHTHALMIC GOODS AND SERVICES

Notice That Presiding Officer's Summary, Findings and Conclusions With Respect to Proposed Trade Regulation Rule Has Been Made Public

The Presiding Officer's Report, required by 16 CFR 1.13(f) of the Commission's rules of practice consisting of his Summary, Findings and Conclusions with regard to the proposed rule and to those issues designated by the Presiding Officer and such other findings and conclusions as he has seen fit to make, has been made public and a copy placed on the public record of the proceeding. The staff's analysis of the rulemaking record and its recommendations to the Commission upon completion will also be made public.

The Presiding Officer's Report has not been reviewed or adopted by the Bureau of Consumer Protection or the Commission itself and its publication should not be interpreted as reflecting the present views of the Commission or any individual member thereof. The sixty-day period which the rules of practice provide for public comment on both the report by the Presiding Officer and the report of the staff will not commence until the staff's report required by § 1.13(g) of the rules of practice has been made public and placed on the record of this proceeding. Therefore, comment on the Presiding Officer's report alone would be considered premature at this time.

Issued: January 27, 1977.

MARGERY WAXMAN SMITH,
Acting Director, Bureau of Consumer Protection.

[16 CFR Part 600]

FAIR CREDIT REPORTING ACT

Reporting of Undesignated Information From a Spouse's File: Permissible Purposes for Consumer Reports on Nonapplicant Spouses; Proposed Interpretations and Request for Comments

The Federal Trade Commission announces two proposed interpretations of the Fair Credit Reporting Act pursuant to § 1.73 of its Procedures and rules of practice (36 FR 9293, 16 CFR 1.71-1.73) in order to afford interested persons and groups a chance to comment on the proposed interpretations.

The Commission's rules provide for issuance of interpretations of the Fair Credit Reporting Act (Pub. L. 91-508, 84 Stat. 1127-1136, 15 U.S.C. 1681 et seq.) when it appears that guidance as to the legal requirements of the Act would be in the public interest and would serve to bring about more widespread compliance with the Act. The interpretations are not substantive rules and do not have the force or effect of statutory provisions. They are guidelines intended as clarification of the Fair Credit Reporting Act, and, like industry guides, are advisory in nature. Failure to comply with such interpretations may result in corrective action by the Commission under applicable statutory provisions. These interpretations are published in order to obtain comments from the public. Publication should not be construed as an indication of how the Commission will ultimately resolve these issues. These interpretations will not become final until further notice by the Commission.

There are two proposed interpretations:

I. Interpretation § 600.7(a)—Reasonable Procedures to Assure Maximum Possible Accuracy of Information Concerning Individuals—Undesignated Information (Interprets 15 U.S.C. 1681e (1970)).

II. Interpretation § 600.8—Permissible Purposes for Reports on Nonapplicant Spouses in Consumer Credit Transactions. (Interprets 15 U.S.C. 1681b (1970)).

BACKGROUND

The lack of accessible credit history for women has severely restricted their ability to obtain credit.[1] This lack of credit history resulted from a variety of practices, most of which involved overt discrimination against women and helped cause the passage of the Equal Credit Opportunity Act. For example, before the Equal Credit Opportunity Act, some creditors would issue a credit card to an individually creditworthy married woman only in the name of her husband.[2] Often, when a single woman married, her credit cards would be withdrawn and reissued in the name of her husband even though her individual creditworthiness was unaffected by the marriage.[3] More importantly, where a married woman was jointly contractually liable for a credit obligation, the history of the account would almost never be reported in any name other than that of her husband. As a result many women presently have no credit identity separate from that of their spouse even though they have been joint obligors or users of several credit accounts. When a divorce or separation occurs, the credit history from the marriage has continued to be attibuted to the husband and not to the wife, thus requiring the wife to re-establish her credit history.[4]

The Equal Credit Opportunity Act ("ECOA"), 15 U.S.C. 1691-1691g (Supp V 1975), and its implementing regulation, Regulation B, 12 CFR Part 202 (1976), prohibit discrimination against credit applicants on the basis of sex or marital status. The regulation, which conclusively interprets the act, seeks to remedy the problems resulting from past information gathering processes in a number of ways. Section 202.6 of the regulation requires that, as of June 1, 1977, creditors must report to credit bureaus the histories of accounts on which both spouses are contractually liable (joint accounts) in a manner which will enable the credit bureaus to provide access to the information about the account in the name of each spouse.[5] The same requirement is imposed for accounts on which one spouse is contractually liable and the other is a user (user accounts). Section 202.5(j)(1) of the regulation requires creditors to give as much weight to credit histories concerning joint accounts or user accounts designated pursuant to § 202.6 as they would to the credit histories of other accounts.[6] Finally, § 202.5(j)(2) requires creditors to consider the credit history of any account reported in the name of the applicant's spouse or former spouse which the applicant can demonstrate accurately reflects the applicant's willingness or ability to repay.[7]

Creditors, credit bureaus and consumers have expressed concern that the Fair Credit Reporting Act can be interpreted to substantially limit a creditor's access to credit history information needed to evaluate married or formerly married women applying for separate accounts during the initial stages of implementation of the Equal Credit Opportunity Act. At the same time these groups share a common interest in (1) assuring that creditworthy women can obtain credit and (2) maintaining the integrity of the credit information system. The proposed interpretations are designed to minimize the impact of the Fair Credit Reporting Act on the goals of the Equal Credit Opportunity Act.

In addition, the interpretations will clarify for consumer reporting agencies and creditors their responsibilities under the Fair Credit Reporting Act. Note that neither Regulation B nor the Equal Credit Opportunity Act specifically regulates the conduct of consumer reporting agencies. They impose obligations only on creditors, properly leaving regulation of the credit reporting system to the Fair Credit Reporting Act.

See footnotes at end of document.

I. INTERPRETATION §600.7(a) CONCERNING "UNDESIGNATED INFORMATION"

NEED FOR INTERPRETATION

For many years most credit history of joint accounts or user accounts was reported to credit bureaus only in the name of the husband. The information was stored in a file under the identifier: "John Doe, spouse: Mary". The file could be accessed only by the husband's name ("John Doe") while the wife's name ("Mary") served as an identifier to distinguish John Doe from others of the same name in the same manner as his street address, birthdate and social security number. In some instances the files were termed "joint files," but the practical effect of the storage systems appears to have been the merger of all credit history from the marriage into the husband's file.

Section 202.6 of Regulation B addresses itself to this problem by requiring creditors after June 1, 1977 to report account information to credit bureaus in a manner which will reflect the participation of both spouses in the accounts and which will enable the agencies to provide access to the information in the name of each spouse.[9] In addition, the regulation requires that creditors ascertain whether accounts established prior to and in existence on June 1, 1977 are joint or separate accounts and adjust their reporting of these accounts accordingly.[9] This determination can be made either from the creditor's records or by mailing of the notice provided by the regulation. For accounts opened after June 1, 1977, creditors are required to determine how the accounts are opened.[10] Finally, § 202.5(j)(2) requires creditors to consider the credit history of any account reported in the name of the applicant's spouse or former spouse which the applicant can demonstrate accurately reflects the applicant's ability or willingness to repay.[11]

Regulation B does not resolve the problem of how credit history not designated by the § 202.6 procedure is to be treated. In most automated credit reporting systems this information is currently reported in the name of only one spouse, usually the husband, and retrievable only in his name even if the information reflects the history of a joint account or an account on which the wife was a user. The resulting lack of affirmative credit history can render the wife uncreditworthy as effectively as derogatory information. Some major credit grantors, for example, award points for each line of credit history in a report in their point scoring systems and many other credit grantors give weight to affirmative credit history in making their credit decisions. Such criteria are also employed in various prescreening programs used by creditors for solicitation purposes.

Ultimately, the undesignated information problem will be resolved prospectively by the operation of § 202.6, which will establish separate credit histories for married women. For the next few years however, unavailability of undesignated information could restrict the ability of women to obtain credit.

Recognizing this potential problem the largest credit reporting industry association, Associated Credit Bureaus, requested a Commission staff interpretation which would allow credit bureaus to automatically report all "undesignated information"[12] from a "joint file" when a separate report on either spouse is requested. Other credit bureaus have also requested clarification of this question.

The obvious objection to the proposed reporting of undesignated information is that some or much of it may not relate to the applicant spouse. Thus the question raised is whether use of a presumption that all undesignated information relates to both members of a marriage is "a reasonable procedure" designed to ensure the maximum possible accuracy of the information concerning the individual about whom the report relates, as required by section 607(b) of the Fair Credit Reporting Act.[13]

There appear to be two possible solutions to the problem presented by the current reservoir of undesignated information. The first solution is to allow a credit bureau to automatically incorporate undesignated information from the file of the applicant's spouse in its report on the applicant and rely on the Fair Credit Reporting Act's correction mechanism to remove information which does not reflect the applicant's credit history. This could be accomplished either by allowing the creditor to make a separate request for undesignated information in the spouse's file or by using an automated system which would automatically incorporate the undesignated information in a separate file on the applicant. Use of either of these two alternatives would result in automatic reporting of all undesignated information in the file of the applicant spouse.

The second solution is to prohibit the reporting of undesignated information from the file of the applicant's spouse unless the consumer reporting agency has some indication that the information in fact relates to the applicant other than the mere "undesignated" status of the particular information in the spouse's file. Such an approach would include setting up separate files on request of the consumer using undesignated information and, possibly, allowing creditors to verify by telephone that particular accounts listed on an application are reported as undesignated information in the spouse's file. This approach would, in effect, require many women who wish to avail themselves of "undesignated" information in their husband's file to arrange an interview with the credit bureau and have a separate file established.

ARGUMENT FOR AUTOMATIC REPORTING OF UNDESIGNATED INFORMATION

When there has been only one marriage it is reasonable to assume that most undesignated information in the files of married individuals relates to either joint accounts or user accounts. The majority of credit history information is positive information, that is, it reflects hte history of accounts paid as agreed. Thus, the proposed automatic reporting of undesignated information would benefit married women as a class by creating a separate credit history for them without requiring them to individually contact the credit bureau and, therefore, serve as a remedy to the effects of past credit practices. To the extent that erroneous information is included in the consumer's file because of this procedure, consumer injury can be mitigated through traditional Fair Credit Reporting Act correction procedures. However, in most instances it will be unnecessary for the consumer to correct erroneous information unless it results in the denial of credit.

Automatic incorporation of all undesignated information will also make more positive information avalable to women than would a procedure providing for verification by the credit bureau of the spouse's participation in each account included in the report, since many creditors will not have retained documents which reflect this information. Proponents of this interpretation believe that the possible harm to consumers from this procedure will be greatly outweighed by the benefits derived.

ARGUMENT AGAINST AUTOMATIC REPORTING OF UNDESIGNATED INFORMATION

There are at least four major arguments against automatic inclusion of undesignated information from a nonapplicant spouse's file when making a consumer report on the applicant spouse. First, while most "undesignated information" may relate to both spouses, some will not. This problem will be aggravated in instances in which the nonapplicant spouse had a previous marriage, or where there has been a recent divorce or separation, since many credit bureaus apparently have no practical means of ascertaining when a divorce or separation has occurred. Given the more than 1 million divorces which occurred in 1975, this flaw could produce a substantial inaccuracy problem.[14] Under the proposed automatic reporting there would also be, for example, instances in which adverse credit information which predates the marriage will be reported from the spouse's file including instances in which adverse credit information from the spouse's prior marriage would be included in the consumer's file.[15]

Second, the privacy of the nonapplicant spouse may be invaded. Information concerning some separate accounts held by the spouse will inevitably be incorporated in the other spouse's file. In addition, in certain instances, financial information from a divorced or separated consumer's file will fortuitously become available to his or her former spouse.

Third, the proposal would have the maximum adverse impact on married or formerly married women who have established their own credit history since their spouse's and former spouse's file

See footnotes at end of document.

may at least initially be mixed in with theirs. Finally, the interpretation would not be applicable in cases in which a divorce or separation was recorded with the credit bureau because the undesignated information could no longer be presumed to relate to both spouses. Thus, a significant number of women will still be required to contact the credit bureau to set up a separate file.

I. INTERPRETATION § 600.7—REASONABLE PROCEDURES TO ASSURE MAXIMUM POSSIBLE ACCURACY OF INFORMATION CONCERNING INDIVIDUALS—UNDESIGNATED INFORMATION (INTERPRETS 15 U.S.C. 1681e (1970)).

A consumer reporting agency may report information contained in the file of spouse A when spouse B applies for a separate extension of credit if such information relates to accounts on which spouse B was either a joint user or contractually liable. Conversely, however, a consumer reporting agency may not report information from spouse A's file that relates only to his or her individual credit history when spouse B applies for credit, unless it otherwise has a permissible purpose for the report under section 604[1] of the Fair Credit Reporting Act.

While this principle is simple to state, it is difficult to apply since most credit grantors have in the past reported the credit history of accounts on which two spouses are jointly liable or on which one is liable and the other a user, only in the name of one spouse and in most instances in the name of the husband. Although § 202.6 of Regulation B, which interprets the Equal Credit Opportunity Act,[2] is designed to provide a prospective solution to this problem, it appears to be commercially impracticable for consumer reporting agencies to reinvestigate all existing information to determine whether it reflects the participation of both spouses. Consumer reporting agencies are thus faced with a choice of either reporting all "undesignated information"[3] in the husband's file on the assumption that most of it relates to both spouses or initiating procedures to reinvestigate undesignated information upon the request of the consumer and establish separate files in those instances in which the consumer's participation can be verified.

The Commission believes a credit bureau which responds to a request for information on a consumer by supplying all undesignated information from the file of the consumer's spouse would not be in compliance with section 607(b)[4] of the Fair Credit Reporting Act, since some or all of the information reported may not relate to both spouses.

An acceptable alternative method of ensuring access by both spouses to undesignated information would be for credit bureaus to allow married or divorced individuals who wish undesignated information to be segregated to contact the credit bureau in order to have a separate file created. This procedure, currently in use by some credit bureaus, should ensure greater accuracy and protection of the privacy of individual spouses than automatic reporting of undesignated information. Such a procedure affords the credit bureau some additional indication, through the individual's own word plus any reinvestigation the credit bureau deems it advisable to conduct, that the undesignated information belongs to the consumer. The credit bureau would not be relying on the mere undesignated status of that information in the file of the consumer's spouse.

Finally, the Commission believes that credit bureaus, consistently with this interpretation, must adopt some procedure to ensure that undesignated information can be accessed in the name of either spouse who wishes to rely on it. If such a procedure is not adopted by credit bureaus, creditors who rely on information supplied by those bureaus may be subject to challenge under the general prohibition of discrimination against applicants on the basis of sex or marital status that is contained in § 202.2 of Regulation B.[5] A credit bureau's failure to create a separate file on request as described in the preceding paragraph may render its data base discriminatory and unusable by creditors unless the bureau can satisfy the Commission that it has a nondiscriminatory justification for its practice.

II. INTERPRETATION § 600.8 CONCERNING PERMISSIBLE PURPOSES FOR CONSUMER REPORTS

NEED FOR INTERPRETATION

The provisions of the Equal Credit Opportunity Act create a right to a separate credit identity for married women. The creation of this separate credit identity has produced uncertainty concerning the requirements of section 604 of the Fair Credit Reporting Act[17] which limits the distribution of consumer reports on "individuals" to specified permissible purposes. Specifically, the question is whether a creditor has a permissible purpose to obtain a consumer report on a applicant's spouse in instances in which the creditor is allowed under Regulation B to consider information about the spouse. This question did not arise previously because a married woman's credit identity was merged with that of her husband and their accounts were usually in the husband's name.

Although the Equal Credit Opportunity Act creates a separate credit identity for married women, there are still four specified instances in which Regulation B recognizes that information on the nonapplicant spouse may be considered by a credit grantor.[6] In each of these four instances a question arises as to whether the Fair Credit Reporting Act allows creditors to gain access to the information through credit bureaus, the normal sources of such information.

Section 604 provides in relevant part:

A consumer reporting agency may furnish a consumer report under the following circumstances and no other:

• • • • • •

(2) In accordance with the written instructions of the consumer to whom it relates.

(3) To a person which it has reason to believe—

(A) Intends to use the information in connection with a credit transaction involving the consumer on whom the information is to be furnished and involving the extension of credit to * * * the consumer; or

• • • • • •

(E) Otherwise has a legitimate business need for the information in connection with a business transaction involving the consumer.

The legislative history of this section indicates that its purpose was to ensure that reports were made only to those having legitimate business need for them. Its passage was spurred, in part, by a television program which suggested that almost anyone could obtain reports from credit bureaus.[7] There is no expressed intention in the legislative history to limit access to information by those having a legitimate business need for the information in connection with a business transaction involving the consumer.[8]

A narrow interpretation of section 604(3) would prevent the creditor from obtaining a consumer report about the nonapplicant spouse without that individual's written permission.[20] This interpretation does not seem to be required by the policies which section 604 is designed to further and would appear to contradict the policies of the Equal Credit Opportunity Act by requiring the applicant spouse to obtain the written permission of the non-applicant spouse in order to apply for credit in those instances listed in section 205(b)(1)(i–iv) of Regulation B. Moreover, this position would be inconsistent with prior staff opinions allowing creditors to gain access to consumer reports on nonapplicant spouses.[21]

The proposed interpretation allows creditors to obtain consumer reports on nonapplicant spouses where consideration of such information is permitted by Regulation B, with certain exceptions. Thus, for example, in a state with a community property law which grants the applicant spouse the power to commit the property and income of the nonapplicant spouse, a creditor may, under Regulation B, consider any information about the nonapplicant spouse which it can about the applicant, if the applicant is relying on community property as the basis for repayment of the credit. Under the proposed interpretation a permissible purpose would also exist for a creditor to obtain a consumer report on the nonapplicant spouse, since the creditor has a legitimate business need for the information in connection with a business transaction involving (tangentially) the nonapplicant spouse. Section 604(3)(E).

It is also arguable that the transaction, in effect, involves an extension of credit to the nonapplicant spouse and therefore a consumer report may be obtained under section 604(3)(A) as well. While this rationale is most clearly applicable in community property states it would also be

See footnotes at end of article.

true under other state laws which grant the applicant spouse the implied or express authority to open a joint account in the name of both spouses, thus, effectively making both spouses applicants or otherwise subjecting the nonapplicant spouse to contractual or other liability on the account. Compare § 202.5(b)(1)(ii) of Regulation B.

Similarly the proposed interpretation provides that, where the nonapplicant spouse is an intended user of the account, a permissible purpose to obtain a consumer report on the nonapplicant spouse exists. Compare § 202.5(b)(1)(i) of Regulation B.

II. INTERPRETATION § 600.8—PERMISSIBLE PURPOSES FOR REPORTS ON NONAPPLICANT SPOUSES IN CONSUMER CREDIT TRANSACTIONS (INTERPRETS 15 U.S.C. 1681b (1970))

Because of the many types of accounts offered by creditors which contemplate reliance by the creditor on the resources of both spouses, a question arises as to when a creditor has a permissible purpose to access the consumer report of the nonapplicant spouse.[1]

Whether a creditor would have a permissible purpose to access the consumer report of the nonapplicant spouse turns on the extent of that spouse's involvement in the credit transaction. In order to make such a determination it is appropriate to look to § 202.5(b)(1) of Regulation B which implements the Equal Credit Opportunity Act.[2] That Section governs the circumstances under which a creditor may consider information about the applicant's spouse. The Commission interprets section 604(3)(A) and (E)[3] of the FCRA to permit a creditor to access the consumer report of the applicant's spouse in those cases in which §§ 202.5(b)(1)(i), (ii) and (iii)[4] permit the creditor to consider information about the spouse.

In our view, a creditor may access the consumer report of the applicant's spouse when the applicant is applying for an account which the spouse will be permitted to use (see 12 CFR 202.5(b)(1)(i) (1976)) or an account for which the spouse will be contractually liable (see 12 CFR 202.5(b)(1)(ii) (1976)). In these instances a creditor would have a permissible purpose to access the nonapplicant spouse's report because, as to those two types of accounts the creditor "intends to use the information in connection with a credit transaction involving an extension of credit to the consumer" (see 604(3)(A) of the FCRA, 15 U.S.C. 1681b(3)(A)(1970)). Since the nonapplicant spouse in both situations is receiving, in effect, an extension of credit, the creditor has a permissible purpose to receive the consumer report of both the applicant and nonapplicant spouse.

Where the applicant is relying on community property or the spouse's income as a basis for repayment of the obligation, the situation described under § 202.5(b)(1)(iii) of Regulation B,[5] the creditor would also have a permissible purpose under section 604(3)(E)[6] of the FCRA to obtain the consumer report of the nonapplicant spouse. In that situation, although the transaction may not involve an extension of credit to the applicant's spouse, the creditor does have a legitimate business need for the information in connection with a business transaction involving the applicant's spouse. The connection between the applicant's spouse and the creditor is established by reason of the creditor's reliance on the resources of that spouse in the transaction involving the applicant. This interpretation is based on the assumption that the applicant is acting as an agent for his or her spouse in committing either the community property or the spouse's income as a basis for establishing creditworthiness.[7]

The rationales described above do not apply to the situation set forth in § 202.5(b)(1)(iv)[8] of Regulation B. The fact of a marriage, or previous marriage standing alone, is not sufficient to establish a permissible purpose to obtain a consumer report nor does a permissible purpose exist under section 604 to obtain a report on a former spouse. Although § 202.5(b)(1)(iv)[9] allows the creditor to consider information on a former spouse where the applicant is relying on alimony or child support, a former spouse cannot be deemed to have consented to the distribution of information as can a participant in an ongoing marriage. Where a spouse is legally separated or has otherwise indicated an intent to legally disassociate with the marriage the Commission believes that no permissible purpose exists.

Finally it should be noted that a permissible purpose for making a consumer report on a nonapplicant spouse can never exist under section 604(3)[10] of the Fair Credit Reporting Act when the consideration of the information is prohibited by Regulation B. It is clear that where Regulation B prohibits consideration of the information a "legitimate" need for it can never exist.

* * * * *

The Commission requested comments on the following subjects:

(1) The arguments for and against the proposed undesignated information interpretation. The Commission is specifically seeking submission of data which will allow the Commission to assess the negative impact of the proposed interpretation and balance this impact against the need for an expanded interpretation authorizing automatic reporting of undesignated information. Examples of such data include: (A) The percentage of women who currently have separate credit files, (B) the percentage of credit information which is positive, (C) the percentage of denials of credit which are currently caused by (i) inadequate information or (ii) derogatory information, (D) the procedures or safeguards which would lessen the impact of an interpretation authorizing automatic reporting of undesignated information on (i) privacy and (ii) accuracy, (E) the additional costs to consumer reporting agencies contrasted to costs to consumers. Also, the Commission requests views on whether FCRA procedures would be adequate to correct any inaccuracies created by automatic reporting of undesignated information under the spouse's name.

(2) The present practices of consumer reporting agencies with respect to opening separate credit files on married or divorced women including descriptions of the types of information which would be placed in or transferred to the file, the steps necessary to initiate such action the costs to the consumer of such services, and the costs to the credit bureau.

(3) Whether the Commission should issue an interpretation placing an affirmative duty under section 607(b) of the Fair Credit Reporting Act on consumer reporting agencies to create separate credit files concerning joint accounts and user accounts in the file of the consumer's spouse or former spouse upon request. What nondiscriminatory reasons, if any, can be advanced to justify refusals to create separate credit files? Would such a duty create the possibility that consumers could distort their own credit histories by, for example, identifying only favorable undesignated information for inclusion in their files? If a danger of distortion exists, how serious is it? What safeguards, if any, could minimize or eliminate inaccuracy of this kind?

(4) The extent to which one party to an on-going marriage expects his or her individual credit history to be withheld from the other party.

(5) The privacy considerations involved in both proposed interpretations and their alternatives, the weight to be accorded to them, and possible steps to minimize the adverse impact of the interpretations on personal privacy.

(6) The impact on creditors and consumers of requiring a written authorization from a nonapplicant spouse before a consumer report is furnished on him or her in connection with an extension of credit to the other spouse.

Comments on the proposed interpretations may be submitted to the Secretary of the Commission Federal Trade Commission 20580 within 45 days from the date of this notice and should be titled "Comment FCRA Interpretations". The proposed interpretations will not become final until further notice by the Commission.

Dated: January 27, 1977.

By direction of the Commission.

JOHN F. DUGAN,
Acting Secretary.

[12] The term "undesignated information" refers to all credit history information in a married consumer's file which was not reported to the consumer reporting agency with a designation indicating that the information relates to either the consumer's joint or individual credit experience. This would include most file informatoin compiled up to June 1, 1977 (when the Regulation B designation requirement goes into effect) and most information reported to credit bureaus after that date which relates to pre-June, 1977 accounts that have not been designated either by the creditor, through the process set forth in Section 202.6 of Regulation B, or by the consumer's direct request to the credit bureau.

[13] 15 U.S.C. 1681e (1970).

[14] In 1975 there were 1,026,000 divorces in the United States. HEW, "Vital Statistics Report, Annual Summary For the United States 1975" at 12 (June 1976). In 1975, 10 percent of all ever married persons 25 to 54 years old were reported as either divorced (and not remarried) or separated. Dept. of Commerce, "Marital Status and Living Arrangements: March 1975" at 2-4 (Dec. 1975).

[15] Recent trends indicate that 4 out of 5 divorced individuals can be expected to remarry. Norton & Glick, "Marital Instability: Past, Present, and Future", 32 J. Social Sci. 5, 8 (1976); Dept. of Commerce, "Population Characteristics" 3 (Oct. 1976).

FOOTNOTES FOR INTERPRETATION I.

[2] 12 CFR 202.6 (1976), as amended 41 FR 38759 (Sept. 13, 1976).

[3] For purposes of this interpretation, the term "undesignated information" refers to all credit history information in a married consumer's file which was not reported to the consumer reporting agency with a designation indicating that the information relates to either the consumer's joint or individual credit experience. This would include most file information compiled up to June 1, 1977 (when the Regulation B designation requirement goes into effect) and most information reported to credit bureaus after that date which relates to pre-June, 1977 accounts that have not been designated either by the creditor, through the process set forth in § 202.6 of Regulation B, or by the consumer's direct request to the credit bureau.

CONSUMER PRODUCT SAFETY COMMISSION

[16 CFR Part 1012]

MEETINGS: ADVANCE PUBLIC NOTICE, PUBLIC ATTENDANCE AND RECORDKEEPING

Proposed and Interim Amendments To Implement Government in the Sunshine Act

● The purpose of this document is to propose amendments to the Consumer Product Safety Commission's meetings policy, (16 CFR 1012) to implement the Government in the Sunshine Act ("Sunshine Act") Pub. L. 94-409. The Commission solicits public comment on the proposal until February 28, 1977. The Sunshine Act requires the Commission to issue final regulations effective by March 12, 1977. Howeve, the Commission wishes to begin to comply with the Sunshine Act prior to the effective date. The first meeting of the Commissioners to which the Commission expects to apply the provisions set forth in this document is planned for February 24, 1977. Therefore, until final regulations are issued, the procedures for making a determination to open or close a meeting of the Commissioners, the provisions for public announcement of such meetings and the provisions regarding recordkeeping for such meetings are effective upon publication of this document in the FEDERAL REGISTER. ●

BACKGROUND

In the FEDERAL REGISTER of November 4, 1975 (40 FR 51360), the Commission issued a policy regarding its requirements for advance public notice, public attendance and recordkeeping for meetings that are of substantial interest to the public involving Commissioners or Commission staff and outside parties (hereinafter "Part 1012"). In developing the policy, the Commission followed the principle that the public interest is best served when regulatory affairs are open to the fullest extent practicable. The Commission therefore, provided for advance public notice and public attendance at meetings between its members or its staff and outside parties, subject to narrow exceptions. The Commission remains committed to this principle and will continue to provide for advance public notice and public attendance at such meetings. In addition, as described below, the Commission proposes to revise its policy with regard to meetings of the Commissioners held to conduct official agency business in order to comply with the requirements of the Sunshine Act.

PROPOSED REVISIONS TO IMPLEMENT THE SUNSHINE ACT

The requirements of the Sunshine Act regarding meetings apply only to meetings of members of the collegial body heading the agency. The Commission therefore proposes to revise § 1012.2, containing definitions, to incorporate the definition of "meeting" as used in the Sunshine Act. Meetings to which the Sunshine Act applies, meetings of the Commissioners held to conduct official agency business, are referred to as "Commission meetings." Other meetings to which Part 1012 applies, which are not covered by the Sunshine Act, are referred to as "Agency meetings" and include meetings between Commissioners or agency staff and outside parties, hearings, staff meetings and advisory committee meetings.

The proposed amendments to Part 1012 to implement the Sunshine Act, involve chiefly a revision and expansion of former § 1012.4(b) (renumbered § 1012.4 in this document) relating to Commission meetings; and a revision and expansion of former § 1012.5 (renumbered § 1012.6 in this document) relating to recordkeeping requirements for the various types of meetings covered by the policy.

Proposed § 1012.4 follows closely the relevant provisions of section 3 of the Sunshine Act (5 U.S.C. 552b) and sets forth requirements for announcement of meetings of the Commission, requirements for attendance by the public and exceptions to the requirement of open meetings, and procedures to be followed by the Commission in closing a meeting and in reconsidering its decision to open or close a meeting.

Proposed § 1012.5 retains the provisions relating to Agency meetings previously set forth in § 1012.4(a), (c), (d) and (e). Proposed § 1012.6 sets forth requirements for recordkeeping and procedures for making meeting records available to the public. Requirements are set forth separately for Commission meetings and Agency meetings. Proposed § 1012.6(b) (formerly § 1012.5(b)) regarding recordkeeping requirements for Commission meetings retains the existing provisions relating to documentation, by use of "Commission minutes", of de-

cisions of the Commission made at Commission meetings or by ballot vote. However, in order to avoid confusion with the minutes provided for in § 1012.6(a)(1), which are detailed summaries of Commission meetings, the term "Record of Commission Action" is substituted for the term "Commission minute." Records of Commission Action summarize the issues presented, indicate the vote of each Commissioner and are signed by each Commissioner voting.

In considering these regulations, the Commission discussed the impact of section 6(b)(1) of the Consumer Product Safety Act (15 U.S.C. 2055(b)(1)) on Commission meetings to be conducted pursuant to these regulations. Section 6(b)(1) requires that prior to the public disclosure of any information about a consumer product that would permit the public to identify the manufacturer or private labeler of the product, the Commission must provide 30 days notice and a summary of the information to the manufacturer or private labeler in order to afford the interested party an opportunity to submit comments on the information. The purpose of the notice requirement is to assure that information which is publicly disclosed is accurate, fair, and reasonably related to effectuating the purposes of the Consumer Product Safety Act. The provision also requires the Commission to retract information that is publicly disclosed about the safety of a consumer product or the practices of any manufacturer, private labeler, distributor, or retailer of consumer products if the Commission determines that the information is inaccurate or misleading.

The particular question raised was whether a Commission discussion of information covered by section 6(b)(1) in a meeting open to the public, would constitute "public disclosure" of such information.

The Commission previously decided (on October 6, 1975) that the term "public disclosure" in section 6(b)(1) means the affirmative and widespread dissemination of information. The mere discussion of information at a public meeting would not, in the Commission's view, constitute a "public disclosure" which would invoke the notice or retraction requirements of section 6(b)(1).

Accordingly, in view of the provisions of the Sunshine Act regarding the bases for closing meetings and the Commission's interpretation of section 6(b)(1) of the Consumer Product Safety Act, the Commission's position is that section (b)(1) does not apply to discussions at Commission meetings and will not be invoked as a basis for closing any Commission meeting.

Accordingly, pursuant to the provisions of the Sunshine Act requiring agencies to promulgate implementing regulations (sec. 3(g), Pub. L. 94-409, 5 U.S.C. 552b(g), the Commission proposes to revise Part 1012 of Title 16, Chapter II, Subchapter A to read as follows:

Sec.

1012.1 General policy considerations.
1012.2 Definitions.
1012.3 Forms of advance public notice of meetings; public calendar/master calendar and FEDERAL REGISTER.
1012.4 Commission meetings; requirements for advance public notice and attendance by the public.
1012.5 Agency meetings; requirements for advance public notice and attendance by the public.
1012.6 Recordkeeping requirements for meetings.
1012.7 Agency meetings: the news media.
1012.8 Agency meetings: telephone conversations.

AUTHORITY: 5 U.S.C. 552b(g); Pub. L. 92-573, 86 Stat. 1207 (15 U.S.C. 2051-81); Pub. L. 90-189, 81 Stat. 568 (15 U.S.C. 1191-1204); Pub L. 86-613, 74 Stat. 372, as amended by Pub. L. 89-756, 80 Stat. 1303, and Pub. L. 91-113, 83 Stat. 187 (15 U.S.C. 1261-74); Pub. L. 91-601, 84 Stat. 1670 (15 U.S.C. 1471-75) and the Act of Aug. 7, 1956, 70 Stat. 953 (15 U.S.C. 1211-14).

§ 1012.1 General policy considerations.

(a) In enacting the Government in the Sunshine Act (Pub. L. 94-409, 5 U.S.C. 552b), the Congress stated the policy that the public is entitled to the fullest practicable information regarding the decisionmaking processes of the Federal Government. The purpose of the Government in the Sunshine Act is to provide the public with such information while protecting the rights of individuals and the ability of the Government to carry out its responsibilities. Accordingly, when the Commissioners of the Consumer Product Safety Commission hold meetings for the purpose of jointly conducting or disposing of Commission business, the meetings shall be held in accordance with the provisions of the Government in the Sunshine Act.

(b)(1) In order for the Consumer Product Safety Commission to properly carry out its mandate to protect the public from unreasonable risks of injury associated with consumer products, the Commission has determined that it must involve the public to the fullest possible extent in its activities.

(2) To guarantee public confidence in the integrity of Commission decisionmaking, the Agency will, to the fullest possible extent, conduct its business in an open manner which is free from any actual or apparent impropriety.

(3) To achieve the goals set forth in paragraphs (b)(1) and (2), the Commission believes that, wherever practicable, it should notify the public in advance of all Agency meetings involving matters of substantial interest held or attended by its personnel and permit the public to attend such meetings. Furthermore, to ensure the widest possible exposure of the details of such meetings, the Agency will keep records of them which are freely available for inspection by the public.

§ 1012.2 Definitions.

As used in this Part 1012, the following terms shall have the meanings set forth:

(a) *Agency.* The entire organization which bears the title Consumer Product Safety Commission (CPSC).

(b) *Agency staff.* Employees of the Agency other than the five Commissioners.

(c) *Commissioner.* An individual who belongs to the collegial body heading the CPSC.

(d) *Commission.* The Commissioners of the Consumer Product Safety Commission acting in an official capacity.

(e) *Majority of the Commission.* Three or more of the Commissioners.

(f) *Commission meeting.* The joint deliberations of at least a majority of the Commission where such deliberations determine or result in the joint conduct or disposition of official Agency business. This term does not include meetings required or permitted by § 1012.4(e)(1) (to determine whether a meeting will be open or closed), meetings required or permitted by § 1012.4(b)(2) (to change the subject matter of a meeting or the determination to open or close a meeting after the public announcement) or meetings required or permitted by § 1012.4(a)(2) (to dispense with the one week advance notice of a meeting).

(g) *Agency meeting.* Any face-to-face encounter, other than a Commission meeting as defined in paragraph (f) of this section, in which one or more employees, including Commissioners, discuss any subject relating to the Agency or any subject under its jurisdiction.

(h) *Outside party.* Any person not an employee, not under contract to do work for the Agency, or not acting in an official capacity as a consultant to the Consumer Product Safety Commission, such as advisory committee members or offeror personnel. Examples of persons falling within this definition are representatives from industry, consumer groups and other government bodies. Members of the news media are not considered to be outside parties when acting in a news-gathering capacity. (See also § 1012.7.)

(i) *Substantial interest matter.* Any matter, other than that of a trivial nature, that pertains in whole or in part to any issue that is likely to be the subject of a regulatory or policy decision by the Commission. Pending matters, i.e., matters before the Agency in which the Agency is legally obligated to make a decision, automatically constitute substantial interest matters. Examples of pending matters are: scheduled administrative hearings; matters published for public comment; petitions under consideration; and mandatory standard development activities. The following examples do not constitute substantial interest matters: inquiries concerning the status of a pending matter; discussions relative to general interpretations of existing laws, rules, and regulations; inspection of nonconfidential CPSC documents by the public; negotiations for contractual services; and routine CPSC activities such as recruitment, training,

meetings involving consumer deputies, or meetings with hospital staff and other personnel involved in the National Electronic Injury Surveillance System.

(j) *Public announcement.* A matter is publicly announced when it is entered on the master calendar or public calendar, or both.

§ 1012.3 Forms of advance public notice of meetings; public calendar/master calendar and "Federal Register."

Advance notice of Agency activities is provided to the public so that it may know of and participate in these activities to the fullest extent possible. Where appropriate, the Commission uses the following types of notices for both Agency meetings involving substantial interest matters and Commission meetings.

(a) *Public calendar/master calendar.* (1) The printed public calendar and the master calendar maintained in the Office of the Secretary are the principal means by which the Agency notifies the public of its day-to-day activities. The public calendar and/or master calendar provide advance notice of public hearings, Commission meetings, Agency meetings with outside parties involving substantial interest matters, selected staff meetings, advisory committee meetings, and other events such as speeches, and participation in panel discussions, regardless of the location. The public calendar also lists recent CPSC FEDERAL REGISTER issuances and Advisory Opinions of the Office of the General Counsel.

(2) Upon request in writing to the Office of the Secretary, Consumer Product Safety Commission, Washington, D.C. 20207, any person or organization will be sent the public calendar on a regular basis free of charge. In addition, interested persons may contact the Office of the Secretary to obtain information from the master calendar which is kept current on a daily basis.

(3) The master calendar, supplemented by meeting summaries, is intended to serve the requirements of section 27(j)(8) of the Consumer Product Safety Act (15 U.S.C. 2076(j)(8)).

(4) Commissioners and Agency staff are responsible for reporting meeting arrangements for Agency meetings to the Office of the Secretary so that they may be published in the printed public calendar or entered on the master calendar at least seven days before a meeting, except as provided in § 1012.5(b)(1). Such reports shall include the following information:

(i) Probable participants and their affiliations;

(ii) Date, time and place of the meeting;

(iii) Subject of the meeting (as fully and precisely designated as possible);

(iv) Who requested the meeting;

(v) Whether the meeting involves matters of substantial interest;

(vi) Notice that the meeting is open or reason why the meeting or any portion of the meeting is closed (e.g., discussion of trade secrets); and

(vii) Name and telephone number of the CPSC host or contact person.

(5) The Secretary of the Commission is responsible for preparing and making public the announcements and notices relating to Commission meetings that are required in § 1012.4(a) and (b).

(b) FEDERAL REGISTER. The FEDERAL REGISTER is the publication through which official notifications, including formal rules and regulations of the Agency, are made. Because the public calendar and/or master calendar are the primary devices through which the Agency notifies the public of its routine, daily activities, the FEDERAL REGISTER will be utilized only when required by the Government in the Sunshine Act (as provided in § 1012.4 (a) and (b)) or other applicable law, or when the Agency believes that the additional coverage which the FEDERAL REGISTER can provide is necessary to assist in notification to the public of important meetings.

§ 1012.4 Commission meetings; requirements for advance public notice and attendance by the public.

Commission meetings are held for the purpose of jointly conducting the formal business of the Agency, including the rendering of official decisions. The following provisions regarding announcement of meetings and attendance by the public shall apply to Commission meetings that determine or result in the joint conduct or disposition of official Agency business. Requirements as to other types of meetings Commissioners may attend (Agency meetings) are contained in § 1012.5.

(a) *Announcement of meetings.* (1) The Agency shall announce each Commission meeting in the public calendar or master calendar at least one week (seven calendar days) before the meeting. The Agency shall concurrently submit the announcement for publication in the FEDERAL REGISTER. The announcement and the FEDERAL REGISTER notice shall contain the following information:

(i) The date, time, and place of the meeting;

(ii) The subject matter of the meeting;

(iii) Whether the meeting will be open or closed to the public;

(iv) The name and phone number of the official who responds to requests for information about the meeting.

(2) If a majority of the Commission determines by recorded vote that Agency business requires calling a meeting earlier than 7 calendar days in advance, announcement shall be made in the public calendar or master calendar at the earliest practicable time and the Agency shall transmit the announcement concurrently for publication in the FEDERAL REGISTER.

(b) *Changes after public announcement.* (1) When necessary and at the direction of the Chairman, the Secretary shall change the time of a meeting after the announcement in the public calendar or master calendar. Such change shall be entered on the master calendar and such other notice shall be given as is practicable.

(2) The Commission may change the subject matter of a meeting or the decision to open or close a meeting or portion thereof to the public, after announcement in the public calendar or master calendar only if a majority of the Commission determines by recorded vote that Agency business so requires and that no earlier announcement of the change was possible. The Commission shall announce the change in the public calendar or master calendar at the earliest practicable time before the meeting and shall concurrently submit the announcement for publication in the FEDERAL REGISTER. (See also § 1012.4(f) for requirements for Commission reconsideration of a decision to open or close a meeting to the public.)

(c) *Attendance by the public.* Every portion of every Commission meeting shall be open to public observation, except as provided in paragraph (d) of this section. Notwithstanding paragraph (d) of this section, Commission meetings or portions thereof may be open to public observation if the Commission determines that the public interest so requires. The number of public observers shall be limited only by availability of space. Attendance by the public shall be limited to observation and shall not include participation.

(d) *Exceptions to the requirement of openness.* The requirement in paragraph (c) of this section that all Commission meetings be open to public observation shall not apply to any Commission meeting or portion thereof for which the Commission has determined, in accordance with the procedures for closing meetings set forth in paragraph (e) of this section, that such meeting or portion thereof is likely to—

(1) Disclose matters that are specifically authorized under criteria established by an Executive Order to be kept secret in the interests of national defense or foreign policy and in fact properly classified pursuant to such Executive Order;

(2) Relate solely to the internal personnel rules and practices of the Agency;

(3) Disclose matters specifically exempted from disclosure by statute (other than 5 U.S.C. 552): *Provided,* That such statute (i) requires that the matters be withheld from the public in such a manner as to leave no discretion on the issue, or (ii) establishes particular criteria for withholding or refers to particular types of matters to be withheld;

(4) Disclose trade secrets and commercial or financial information obtained from a person and privileged or confidential;

(5) Involve accusing any person of a crime, or formally censuring any person;

(6) Disclose information of a personal nature where disclosure would constitute a clearly unwarranted invasion of personal privacy;

(7) Disclose investigatory records compiled for law enforcement purposes, or information which if written would be contained in such records, but only to the extent that the production of such records or information would (i) interfere with enforcement proceedings, (ii) deprive a person of a right to a fair trial or an impartial adjudication, (iii) constitute an unwarranted invasion of personal privacy, (iv) disclose the identity of a confidential source and, in the case of a record compiled by a criminal law enforcement authority in the course of a criminal investigation, or by an agency conducting a lawful national security intelligence investigation, confidential information furnished only by the confidential source, (v) disclose investigative techniques and procedures, or (vi) endanger the life or physical safety of law enforcement personnel;

(8) Disclose information contained in related to examination, operating, or condition reports prepared by, on behalf of, or for the use of an agency responsible for the regulation or supervision of financial institutions;

(9) Disclose information the premature disclosure of which would be likely to significantly frustrate implementation of a proposed Agency action. This provision does not apply in any instance where the Agency has already disclosed to the public the content or nature of its proposed action, or where the Agency is required by law to make such disclosure on its own initiative prior to taking final agency action on such proposal; or

(10) Specifically concern the Agency's issuance of a subpoena, or the Agency's participation in a civil action or proceeding, an action in a foreign court or international tribunal, or an arbitration, or the initiation, conduct, or disposition by the Agency of a particular case of formal agency adjudication pursuant to the procedures in 5 U.S.C. 554 or otherwise involving a determination on the record after opportunity for a hearing.

(e) *Procedure for closing meetings of the Commission.* The following procedure shall be followed in closing a Commission meeting or portion thereof to public observation:

(1) A majority of the Commission must vote to close a meeting or portion thereof to public observation pursuant to paragraph (d) of this section. A separate vote of the Commission shall be taken for each matter with respect to which a Commission meeting is proposed to be closed to public observation. Each such vote may, at the discretion of the Commission, apply to that portion of any meeting held within the following thirty days in which such matter is to be discussed. The vote of each Commissioner participating in such vote shall be recorded and no proxies shall be allowed.

(2) Any person, whose interest may be directly affected if a portion of a meeting is open, may request in writing to the Office of the Secretary that the Commission close that portion on the basis of paragraph (d) (5), (6) or (7) of this section. The Commission shall vote on such requests if at least one Commissioner desires to do so.

(3) Within one day of a vote in accordance with paragraph (d) (1) or (2) of this section to close a Commission meeting or portion thereof, the Secretary shall make available to the public a notice setting forth:

(i) The results of the vote reflecting the vote of each Commissioner;

(ii) A full explanation of the action of the Commission closing the meeting or portion thereof, including reference to the specific basis for such closing (see paragraph (d) of this section) and an explanation, (without disclosing exempt information), of why the Commission concludes on balance, (taking into account the relative advantages and disadvantages to the public of conducting the meeting in open or closed session) that the public interest would best be served by closing the meeting;

(iii) A list of all persons (other than Commissioners) expected to attend the meeting and their affiliations; and

(iv) A certification by the General Counsel that in his or her opinion, the meeting may properly be closed to the public.

(4) The public release of the written statement required by paragraph (d) (3) of this section may be delayed upon a determination by the Commission, by recorded vote, that such a notice, or portion thereof, would disclose information which may be withheld in accordance with paragraphs (d) (1) through (10) of this section.

(f) *Reconsideration of a decision to open or close a meeting.* The Commission may, in accordance with the procedures in paragraph (b) (2) or (e) (2) of this section, reconsider its determination to open or close a Commission meeting when it finds that the public interest so requires.

§ 1012.5 Agency meetings: requirements for advance public notice and attendance by the public.

For the purpose of implementing the Agency's meetings policy, meetings which involve Agency staff or the Commissioners, other than Commission meetings, shall be classified in the following categories and shall be held according to the procedures outlined within each category.

(a) *Hearings.* Hearings are public inquiries held by direction of the Commission for the purpose of fact finding or to comply with statutory requirements. The Office of the Secretary is responsible for providing transcription services at the hearings. Where possible, notice of forthcoming hearings will be published in the public calendar and the FEDERAL REGISTER at least 30 days before the date of the hearings.

(b) *Meetings between Commissioners or Agency staff and outside parties.* The following requirements shall apply to Agency meetings between Commissioners or Agency staff and outside parties whether hosted or attended at Agency premises or at the premises of outside parties, or at any other location:

(1) *Notice.* (i) (A) Notice of Agency meetings with outside parties involving substantial interest matters shall be published in the public calendar at least 7 calendar days in advance of the meeting. Any Agency employee planning to host or attend such a meeting must notify the Office of the Secretary as provided in § 1012.3(a) (4). Once notification has been made, Commission employees subsequently desiring to attend the meeting need not notify the Office of the Secretary.

(B) When there is no opportunity to give 7 days advance notice of a meeting, Agency staff (other than the personal staff of Commissioners) who desire to hold or attend such meeting must obtain the approval of the Office of the Chairman. Personal staff of Commissioners must obtain the approval of their respective Commissioners. If such approval is obtained, the Office of the Secretary must be notified in advance of the meeting to record the meeting on the master calendar. The Office of the Secretary shall publish notice of the meeting as an addendum to the succeeding public calendar. Because it could unduly compromise the indepedence of individual Commissioners, they need not obtain the permission of the Chairman to hold or attend an emergency unscheduled meeting. Listing of the meeting in the master calendar is still required.

(ii) *Exceptions.* The notice requirement shall not apply to:

(A) Meetings with outside parties not involving substantial interest matters (although such meetings should be listed where the public interest would be served).

(B) Meetings regarding initial notifications pursuant to section 15(b) of the Consumer Product Safety Act. However, subsequent meetings are not excepted from the notice requirement.

(C) Meetings held during the normal course of field surveillance, inspection or investigation of a person or company, including informal citation hearings under the Federal Hazardous Substances Act or the Poison Prevention Packaging Act. However, advance notice is required for any negotiation meetings leading to settlement of individual cases.

(D) Meetings or discussions with or at the request of members of Congress and their staffs, or Office of Management and Budget personnel relating to legislation or appropriation matters.

(E) Meetings with Department of Justice employees regarding litigation matters.

(F) Routine speeches given by CPSC personnel before outside parties. However, personnel are encouraged to submit advance notice of these speeches to the Office of the Secretary for inclusion in the public calendar, for information purposes.

(2) *Attendance by the public.* (i) Any person or organization may attend any Agency meeting listed in the master calendar unless that meeting has been listed as a closed meeting. Generally, all meetings between Agency employees and outside parties are open to the public for the purpose of observation or participation, subject only to space limitations. Participation by the public may be permitted by the meeting chairperson. When feasible, a person or organization desiring to attend should give at least one day advance notice to the employee holding or attending such meeting.

(ii) The following Agency meetings are not open to the public:

(A) Meetings, or, if possible, portions of meetings where the Office of the General Counsel has determined that proprietary data are to be discussed in such a manner as to imperil their confidentiality.

(B) Meetings held by outside parties at which limits on attendance are imposed by lack of space, provided, that such meetings are open to the press or other news media.

(C) Meetings regarding initial notifications pursuant to section 15(b) of the Consumer Product Safety Act. All subsequent meetings shall be open to the public.

(D) Meetings held during the normal course of field surveillance, inspection, or investigation of a person or company, including informal citation hearings under the Federal Hazardous Substances Act or the Poison Prevention Packaging Act. However, the public may attend any negotiation meetings leading to settlement of individual cases.

(E) Meetings held with other government officials when they request that the meeting be closed, and, in the opinion of the Agency employees, extraordinary circumstances warrant closing the meeting.

(F) Meetings between Agency staff (other than Commissioners and their personal staff) and an outside party, when, by majority vote of the Commission, it is determined that extraordinary circumstances require that the meeting be closed. In such a case, the reasons for closing the meeting or a portion of the meeting shall be detailed in the public calendar.

(G) Meetings between a Commissioner, his or her personal staff, and an outside party, when in the opinion of the Commissioner extraordinary circumstances require that the meeting be closed. In such a case, the reasons for closing the meeting or a portion of the meeting shall be detailed in the public calendar.

(H) Meetings or discussions with members of Congress and their staffs or Office of Management and Budget personnel relating to legislation or appropriation matters.

(I) Meetings with Department of Justice employees regarding litigation matters.

(3) *Recordkeeping.* Any Commission employee who holds or attends an Agency meeting involving a substantial interest matter must prepare a meeting summary as described in § 1012.6(c) (1). However, only one meeting summary is required for each meeting, even if more than one CPSC employee holds or attends the meeting.

(c) *Staff meetings.* Staff meetings are attended only by members of the Agency as a general rule. At the discretion of the participants, such meetings may be listed on the public calendar and attendance by the public may be permitted. Recordkeeping is at the discretion of the participants.

(d) *Advisory committee meetings.* Meetings of the Agency's advisory committees are scheduled by the Commission. Notice will be given in both the public calendar and the FEDERAL REGISTER. Advisory committee meetings serve as a forum for discussion of matters relevant to the Agency's statutory responsibility with the objective of providing advice and recommendations to the Commission. The Agency's advisory committees are the National Advisory Committee for the Flammable Fabrics Act, the Product Safety Advisory Council, and the Technical Advisory Committee on Poison Prevention Packaging. The Office of the Secretary is responsible for the recordkeeping for such meetings. All meetings of advisory committees are open to the public as provided in the Federal Advisory Committee Act (Pub. L. 92–463, as amended by Pub. L. 94–409, 5 U.S.C. App. I) and the Commission's regulations under that Act (16 CFR Part 1018; 41 FR 45821, October 18, 1976).

§ 1012.6 Recordkeeping requirements.

(a) *Commission meetings*—(1) *Maintenance of transcripts, recordings or minutes.* (i) The Agency shall maintain a complete transcript or electronic recording of each Commission meeting, whether open or closed, except that in the case of a meeting, or portion thereof, closed to the public pursuant to paragraph (10) of § 1012.4(d), the Agency may elect to maintan a set of minutes instead of a transcript or a recording. Minutes shall:

(A) Fully and clearly describe all matters discussed, and

(B) Provide a full and accurate summary of any actions taken and the reasons therefor; including a description of each of the views expressed on any item and the record of any roll call vote (reflecting the vote of each Commissioner on the question). All documents considered in connection with any action shall be identified in such minutes.

(ii) The transcript, recording or minutes of closed Commission meetings shall include the certification by the General Counsel required by § 1012.4(e) (3) (iv) and a statement by the presiding Commissioner setting forth the date, time and place of the meeting and the persons present.

(iii) The transcript, recording or minutes of any Commission meeting may include attachments such as Commission opinions, briefing papers, or other documents presented at the meeting.

(iv) The transcript and accompanying material shall be maintained by the Secretary for a period of at least two years after the meeting, or until one year after the conclusion of any Agency proceeding with respect to which the meeting, or portion thereof, was held, whichever occurs later.

(2) *Availability of transcripts, recordings or minutes.* The Agency shall make available to the public, the transcript, recording or minutes of Commission meetings. However, unless the Commission finds that the public interest requires otherwise, any portion of the transcript, recording or minutes of a closed meeting which is determined to contain information which may properly be withheld from the public on the basis of paragraphs (1) through (10) of § 1012.4(d) need not be made available to the public.

(3) *Procedure for making available transcripts, recordings or minutes.* Meeting records will be made available for inspection or copies will be furnished, as requested, in accordance with the following procedures.

(i) *Requests.* Requests for inspection or copies shall be in writing addressed to the Secretary, Consumer Product Safety Commission, Washington, D.C. 20207. A request must reasonably describe the meeting, or portion thereof, including the date and subject matter and any other information which may help to identify the requested material.

(ii) *Responses to requests.* The responsibility for responding to requests for meeting records is vested in the Secretary of the Commission. In any case where the Secretary or designee of the Secretary in his/her discretion determines that a request for an identifiable meeting record should be initially determined by the Commission, the Secretary or designee may certify the matter to the Commission for decision. In that event, the Commission decision shall be made within the time limits set forth in paragraph (a) (3) (iii) of this section and shall be final.

(iii) *Time limitations on responses to requests.* The Secretary or designee of the Secretary shall respond to all written requests for copies of meeting records within ten (10) working days. The time limitations on responses to requests shall begin to run as of the time a request for records is received and date stamped by the Office of the Secretary.

(iv) *Responses: Form and content.* When a requested meeting record has been identified and is available for disclosure, the requester shall either be informed as to where and when the records will be made available for inspection or supplied with a copy. A response denying a written request for a meeting record of a closed meeting shall be in writing signed by the Secretary and shall include:

(A) A reference to the specific exemptions under the Government in the Sunshine Act (5 U.S.C. 552b(c)) authorizing the denial; and

(B) A statement that the denial may be appealed to the Commission pursuant to paragraph (a) (3) (v) of this section.

(v) *Appeals to the Commissioners.* (A) When the Secretary or designee of

the Secretary has denied a request for records in whole or in part, the requester may, within 30 days of its receipt, appeal the denial to the Commissioners of the Consumer Product Safety Commission by writing to the attention of the Chairman, Consumer Product Safety Commission, Washington, D.C. 20207.

(B) The Commission will act upon an appeal within 20 working days of its receipt. The time limitations on an appeal begin to run as of the time an appeal is received by the Office of the Chairman and date stamped.

(C) The Commission's action on appeal shall be in writing, signed by the Chairman of the Commission if the appeal is denied and shall identify the Commissioners who voted for a denial. A denial in whole or in part of a request on appeal for records of a closed meeting shall set forth the exemption relied on and a brief explanation (without disclosing exempt information) of how the exemption applies to the records withheld. A denial in whole or in part shall also inform the requester of his/her right to seek judicial review as specified in 5 U.S.C. 552b(h).

(vi) *Fees.* (A) Fees shall be charged for copies of transcripts, recordings, transcriptions of recordings or minutes in accordance with the schedule contained in paragraph (a)(3)(vi)(C) of this section.

(B) There shall be no fee charged for services rendered in connection with production or disclosure of meeting records unless the charges, calculated according to the schedule below, exceed the sum of $25.00. Where the charges are calculated to be an amount in excess of $25.00, the fee charged shall be the difference between $25.00 and the calculated charges.

(C) The schedule of charges for furnishing copies of meeting records is as follows:

(*1*) Reproduction, duplication or copying of transcripts or minutes: 10 cents per page.

(*2*) Reproduction of recordings: Actual cost basis.

(*3*) Transcription (where meeting records are in form of recording only): Actual cost basis.

(*4*) Postage: Actual cost basis.

(b) *Records of Commission action.* Records of Commission Action, summarizing the issues presented to the Commission for decision and indicating the vote of each Commissioner, document the decisions of the Commission, whether made at open or closed meetings or by ballot vote. The Commission's final Record of Commission Action constitutes the official means of recording the decisions of the Commission and the votes of individual Commissioners when filed with the Office of the Secretary.

(c) *Agency meetings.* The types of records required for Agency meetings depends on the type and purpose of the meeting. Following is a list of the types of and requirements for the categories of recordkeeping utilized by the Agency for Agency meetings.

(1) *Agency Meeting Summaries.* (i) Meeting summaries are written records setting forth the issues discussed at all Agency meetings with outside parties involving substantial interest matters. Any Commission employee who holds or attends an Agency meeting involving a substantial interest matter must prepare a meeting summary. However, only one meeting summary is required for each meeting, even if more than one CPSC employee holds or attends the meeting. A meeting summary should detail the essence of all substantive matters relevant to the Agency, especially any matter discussed which was not listed on the public calendar and should describe any decisions made or conclusions reached regarding substantial interest matters. A meeting summary should also indicate the date and the identity of persons at the meeting.

(ii) A meeting summary or a notice of cancellation of the meeting must be submitted to the Office of the Secretary within twenty (20) calendar days after the meeting for which the summary is required. The Office of the Secretary shall maintain a public file of the meeting summaries in chronological order.

(2) *Transcripts.* Transcripts are generally taken at public hearings and certain Agency meetings when complex subjects indicate verbatim records are desirable. The transcript may also include exhibits submitted to be part of the formal record of an Agency meeting. Copies of such transcripts are placed on file for public inspection in the Office of the Secretary.

§ 1012.7 Agency meetings: The news media.

The Agency recognizes that the news media occupy a unique position relative to informing the public of the activities of the Agency. It is believed that the inherently public nature of the news media requires that their activities be exempt from the requirements of this Part whenever Agency meetings are held with the news media for the purpose of informing them about Agency activities. Such Agency meetings are not exempt in the event that any representative of the news media attempts to influence any Agency employee on a substantial interest matter.

§ 1012.8 Agency meetings: Telephone conversations.

Telephone conversations present special problems regarding Agency meetings as set forth in this Part. It is recognized that persons outside the Agency have a legitimate right to information and to present their views regarding Agency activities. It is further recognized that such persons may not have the financial means to travel to meet with Agency employees. However, because telephone conversations, by their very nature, are not susceptible to attendance or participation by the public, care must be taken to ensure that they are not utilized to circumvent the provisions of this Part. Two basic rules apply to telephone conversations:

(a) Any telephone conversation in which substantial interest matters are discussed with outside parties must be detailed in a meeting summary which meets the requirements of § 1012.6(c)(1). A summary detailing telephone conversations must be submitted by the CPSC employee involved to the Office of the Secretary within 20 calendar days after the telephone call for which a summary is required. The Office of the Secretary shall maintain a public file of telephone call summaries in chronological order.

(b) All agency personnel must exercise sound judgment in discussing substantial interest matters during a telephone conversation and in the exercise of such discretion, should not hesitate to terminate a telephone conversation and insist that the matters being discussed be postponed until an Agency meeting with appropriate advance public notice may be scheduled or until the matter is presented to the Agency in writing if the outside party is financially or otherwise unable to meet with the Agency employee.

Interested persons are invited to submit on or before February 28, 1977, written comments regarding this document. Comments received after this date will be considered to the extent practicable.

Comments should be submitted, preferably in five copies, addressed to the Secretary, Consumer Product Safety Commission, Washington, D.C. 20207. Received comments may be seen in the Office of the Secretary, 3rd Floor, 1111 18th Street, N.W., Washington, D.C. during working hours Monday through Friday.

Dated: January 21, 1977.

SADYE E. DUNN,
Secretary, Consumer Product Safety Commission.

SECURITIES AND EXCHANGE COMMISSION

[17 CFR Part 240]

[Release No. 34-13195; File No. S7-672]

PERSONS DEEMED NOT TO BE BROKERS

Proposed Rulemaking

The Securities and Exchange Commission today announced for public comment a proposal to adopt Securities Exchange Act Rule 3a4-1 (17 CFR 240.3a4-1). Proposed Rule 3a4-1 would provide that, under certain circumstances, persons who are associated with an issuer of securities and who participate in a distribution of the issuer's securities shall be deemed not to be brokers, as that term is defined in section 3(a)(4) of the Securities Exchange Act of 1934 (the "Act") (15 U.S.C. 78c(a)(4)). The rule is proposed to be adopted pursuant to the Act, particularly sections 3, 15 and 23 thereof (15 U.S.C. 78c, 78o and 78w).

Section 3(a)(4) of the Act provides: "The term 'broker' means any person engaged in the business of effecting transactions in securities for the account of others, but does not include a bank." Where an issuer of securities elects not to use a registered broker or dealer to effect a distribution of securities and instead effects the distribution through its own regular officers and employees, the Act has customarily been interpreted not to require the issuer itself to register as either a broker or a dealer; the issuer would not be effecting transactions for the account of others nor, generally, would it be engaged in the business of both buying and selling securities for its own account.[1] At the same time, the persons acting on behalf of the issuer in distributing its securities may, depending on the circumstances, be either brokers or dealers within the meaning of Section 3(a)(4) or 3(a)(5) of the Act.

If the definition of the term "broker" in section 3(a)(4) of the Act were interpreted to cover all officers, employees, or other persons associated with an issuer who assisted the issuer in distributing its securities, such persons would have to register as broker-dealers under Section 15(a)(1) of the Act unless an exemption were available.[2] By interpretation, however, the Commission's staff has attempted over the years to distinguish between the circumstances in which persons distributing securities for issuers are deemed not to be "brokers" within the meaning of section 3(a)(4) and circumstances in which such persons should be deemed to be brokers. The rule the Commission has today proposed is intended to address that interpretive distinction.

Questions concerning broker-dealer registration have frequently arisen in circumstances where an entity, that characterizes itself as an issuer and proposes to distribute its securities through its officers and employees, or other persons associated with it, has itself repeatedly been involved in securities distributions or is controlled or managed by those who have. On the one hand, a securities distribution effected by persons associated with an issuer, viewed in isolation, would not generally raise questions as to whether the persons effecting the distribution were engaged in the business of effecting transactions in securities. On the other hand, the repetitive or continuous involvement of persons in effecting transactions for a series of "issuers," or even a single issuer, may indeed suggest that the persons engaged in that distribution process are doing so as part of a regular business and are therefore brokers within the meaning of section 3(a)(4).

Proposed Rule 3a4-1 would provide guidance to issuers in determining whether their officers, employees and other associated persons would be acting as brokers if they effected transactions in the issuer's securities. In the past the Commission has called attention in general terms to the applicability of the broker-dealer registration requirements of Section 15(a)(1) of the Act to persons selling certain securities, for example, condominium programs involving investment contracts.[3] It appears, however, that further guidance would be useful particularly to promoters of, for example, real estate syndications and oil and gas drilling programs (and other oil and gas ventures) who have in the past often sought to distribute securities.

The proposed rule would provide a "safe harbor" within which persons associated with an issuer would be deemed not to be brokers. The term "person associated with an issuer" would be defined in paragraph (b) of the rule and would exclude, among others, associated persons of an issuer or other entity which is itself a registered broker or dealer. Paragraph (a) of the rule would provide that the safe harbor to be afforded by the rule would not be available to any person who is subject to a "statutory disqualification," as that term is defined by section 3(a)(39) of the Act, 15 U.S.C. 78c(a)(39).

The safe harbor is available to an associated person in any one of three ways: by confining his participation to the types of transactions enumerated in paragraph (a)(1), or by being a bona fide employee of the issuer meeting the criteria set forth in paragraph (a)(2), or by restricting his activities in the manner described in paragraph (a)(3).

Paragraph (a)(1) would be available to those effecting certain kinds of transactions which have not generally raised substantial problems of investor protection. The transactions described in paragraph (a)(1)(i) involve the issuer on one side and a financial intermediary on the other. The inclusion of that exemption is premised on the belief that the types of financial intermediaries included will generally be capable of protecting their own interests without the need for further Commission regulation. The transactions described in paragraph (a)(1)(ii) are those in which an issuer sells its securities to the public through a registered broker or dealer. In that case, it is assumed, the activities of the issuer's associated persons in arranging for the offering would not appear to raise problems of investor protection so long as only the registered broker or dealer is involved in making sales to the public. The transactions described in paragraphs (a)(1)(iii) and (iv) are included because they do not currently seem likely to offer substantial inducements to improper selling tactics.

Paragraph (a)(2) would cover bona fide employees of an issuer meeting all three tests enumerated. The test set forth in paragraph (a)(2)(i) is designed to limit paragraph (a)(2) to employees who are not repetitively involved in the distribution process and thus not "in the business" of distributing securities. Any involvement in distributing or selling securities within the preceding two years would disqualify a person from relying on paragraph (a)(2) regardless of the nature of the involvement (e.g., whether or not it would come within paragraphs (a)(1) or (a)(3)) and regardless of whether it was for the current employer or a different one. The (a)(2)(ii) test is aimed, in turn, at limiting paragraph (a)(2) to employees who are regularly and primarily engaged in the issuer's business, outside the securities distribution process. It would, for example, exclude people hired to be securities salesmen. At the same time, it might be available under appropriate circumstances to the bona fide employees of a start-up company whose regular business operations involving such employees will not for the most part be undertaken until the completion of the offering. The (a)(2)(iii) test would exclude persons compensated on a commission basis or any other basis, whatever its designation, that varied directly with the volume or number of securities transactions. For example, a system of salary increases or bonuses that was in fact designed to pay the equivalent of commissions on securities sales would confer "remuneration based on transactions in securities." The test in paragraph (a)(2)(iii) is based in large part on the assumption that the payment of commissions and other transaction-related remuneration not only raises questions as to whether the recipient is "engaged in the business" of effecting transactions but also is somewhat more likely than other compensation schemes to induce high pressure sales tactics and to engender other problems of investor protection customarily associated with unsupervised and unregulated brokerage activities.

Paragraph (a)(3) is designed to cover persons associated with an issuer whose participation in the securities distribution process is essentially passive. Those qualifying under paragraph (a)(3) may not engage in any activities with respect to securities distributions other than those listed. For example, their participation in selling securities may not extend to "cold" calls to those who have not initiated an inquiry. A person's participation in transactions covered by paragraph (a)(1) would not, however, be considered in determining whether paragraph (a)(3) was available for his participation in other transactions.

[1] Section 3(a)(5), 15 U.S.C. 78c(a)(5), provides that the term "dealer" means any person engaged in the business of buying and selling securities for his own account but does not include a bank, or any person insofar as he buys or sells securities for his own account, either individually or in some fiduciary capacity, but not as part of a regular business.

[2] Section 15(a)(1), 15 U.S.C. 78o(a)(1), generally provides that it shall be unlawful for any broker or dealer (other than one whose business is exclusively intrastate and who does not make use of any facility of a national securities exchange) to make use of the mails or any means or instrumentality of interstate commerce to effect any transactions in, or to induce or attempt to induce the purchase or sale of, any security (other than an exempted security or commercial paper, bankers' acceptances, or commercial bills) unless the broker or dealer is registered in accordance with Section 15(b) of the Act, 15 U.S.C. 78o(b).

[3] *See* Securities Act Release No. 5347 (Jan. 4, 1973).

Only unusual circumstances would be expected to support a conclusion that persons who do not come within the provisions of the proposed rule are not brokers within the meaning of section 3(a)(4).

The text of the proposed rule is as follows:

§ 240.3a4–1. Associated persons of an issuer deemed not to be brokers.

(a) A person associated with an issuer of securities shall be deemed not to be a broker, as that term is defined in section 3(a)(4) of the Act, solely by reason of his participation in the distribution or sale of securities of such issuer if such person is not subject to a statutory disqualification, as that term is defined in section 3(a)(39) of the Act, and if:

(1) His participation is confined to transactions in securities:

(i) Involving offers and sales of securities to a registered broker or dealer, a registered investment company (or separate account), an insurance company, a bank or a trust for which a bank or registered investment adviser is the trustee or is authorized in writing to make investment decisions; or

(ii) Made through a registered broker or dealer; or

(iii) Exempted by reason of section 3(a)(7) or 3(a)(9) of the Securities Act of 1933 from the registration provisions of that Act; or

(iv) In connection with a reclassification, merger or consolidation or transfer of assets within the meaning of Rule 145 under the Securities Act of 1933; or

(2) He is a bona fide employee of the issuer who:

(i) Has not participated, within the preceding two years, in the distribution or sale of any securities; and

(ii) Primarily performs, or is intended primarily to perform at the end of the distribution, substantial duties for, or on behalf of, the issuer otherwise than in connection with transactions in securities; and

(iii) Is compensated on a basis other than the direct or indirect payment of commissions or other special remuneration based on transactions in securities; or

(3) He restricts his participation to any one or more of the following:

(i) The delivery of a prospectus or other communication described in Rule 134 under the Securities Act of 1933;

(ii) Responding to inquiries concerning the offering of securities; and

(iii) The ministerial and clerical work of effecting any transaction.

(b) When used in this section, the term "person associated with an issuer" means any natural person who is a partner, officer, director, or employee of the issuer and who is not an associated person of a registered broker or dealer.

* * * * *

All interested persons are invited to submit three copies of written views, data and arguments on proposed Rule 3a4–1 to George A. Fitzsimmons, Secretary, Securities and Exchange Commission, Washington, D.C. 20549, not later than March 21, 1977. Reference should be made to File No. S7–672. All submissions will be made available for public inspection at the Commission's Public Reference Room, Room 6101, 1100 L Street, NW., Washington, D.C.

By the Commission.

GEORGE A. FITZSIMMONS,
Secretary.

[Docket No. SD–125]

FOREIGN SOVEREIGN IMMUNITIES

Proposed Service on Foreign State Regulations

Correction

In FR Doc. 76–36776, appearing at page 54495 in the issue, make the following changes:

1. In the second column, "Subpart J—Legal And Related Service", should read "Subchapter J—Legal and Related Service".

2. In the third column, in the "annex" material, "6. Date of default judgment (if any):" should be added just below the information for number "5".

OVERSEAS PRIVATE INVESTMENT CORPORATION

[22 CFR Part 707]

SUNSHINE REGULATIONS

Proposed Rulemaking

Pursuant to the Government in the Sunshine Act, 5 U.S.C. 552b, and to implement the provisions of such Act, the Corporation proposes to amend Title 22, Chapter VII of the Code of Federal Regulations by adding a new Part 707.

The purpose of the proposed regulations is to state the policy for open meetings, exemptions to the open meeting rule, procedures for transcribing meetings closed to public observation and for making the non-exempt portions of the transcripts available to the public, and procedures for the public announcement of meetings open or closed to public observation. These proposed regulations will implement subsections (b) through (f) of the Government in the Sunshine Act.

Interested parties are invited to submit their comments on these proposed regulations to the Secretary, Overseas Private Investment Corporation, 1129 20th Street, N.W. Washington, D.C. 20527, not later than February 20, 1977. Written comments will be placed in the Corporation's public files and will be available for public inspection at the Office of Secretary of the Corporation.

JANUARY 24, 1977.

OVERSEAS PRIVATE INVESTMENT CORPORATION,
ELIZABETH BURTON,
Corporate Secretary.

The proposed regulations are as follows:

PART 707—SUNSHINE REGULATIONS

Sec.
707.1 Purpose and applicability.
707.2 Open meeting policy.
707.3 Scheduling of a meeting.
707.4 Public announcement.
707.5 Closed meetings.
707.6 Records of closed meetings.

AUTHORITY: 5 U.S.C. 552b.

§ 707.1 Purpose and applicability.

The purpose of this part is to effectuate the provisions of the Government in the Sunshine Act. This part applies to the deliberations of a quorum of the Directors of the Corporation required to take action on behalf of the Corporation where such deliberations determine or result in the joint conduct or disposition of official Corporation business, but does not apply to deliberations to take action to open or close a meeting or to release or withhold information under § 707.5. Any deliberation to which this part applies is hereinafter in this part referred to as a meeting of the Board of Directors.

§ 707.2 Open meeting policy.

(a) It is the policy of the Corporation to provide the public with the fullest practicable information regarding the decisionmaking process of the Board of Directors of the Corporation while protecting the rights of individuals and the ability of the Corporation to carry out its responsibilities. In order to effect this policy, every meeting of the Board of Directors shall be open to public observation and will only be closed to public observation if justified under one of the provisions of § 707.5. The public is invited to observe and listen to all meetings of the Board of Directors, or portions thereof, open to public observation, but may not participate or record any of the discussions by means of electronic or other devices or cameras. Documents being considered at meetings of the Board of Directors may be obtained subject to the procedures and exemptions set forth in § 706.31 of this chapter.

(b) Directors of the Corporation shall not jointly conduct or dispose of agency business other than in accordance with this part. This prohibition shall not prevent Directors from considering individually business that is circulated to them sequentially in writing.

(c) The Secretary of the Corporation shall be responsible for assuring that ample space, sufficient visibility, and adequate acoustics are provided for public observation of meetings of the Board of Directors.

§ 707.3 Scheduling of a meeting.

A decision to hold a meeting of the Board of Directors should be made as provided in the By-laws of the Corporation and at least eight days prior to the scheduled meeting date in order for the Secretary of the Corporation to give the public notice required by § 707.4. However in special cases, a majority of the

Directors may decide to hold a meeting less than eight days prior to the scheduled meeting date if they determine by a recorded vote that Corporation business requires such meeting at such earlier date. After public announcement of a meeting of the Board of Directors under the provision of § 707.4, the subject matter thereof, or the determination to open or close a meeting, or portion thereof, may only be changed if a majority of the Directors determines by a recorded vote that business so requires and that no earlier announcement of the change is possible.

§ 707.4 Public announcement.

(a) Except to the extent that such information is exempt from disclosure under the provisions of § 707.5, in the case of each meeting of the Board of Directors, the Secretary shall make public announcement at least one week before the meeting, of the time, place, and subject matter of the meeting, whether it is to be open or closed to the public, and the name and telephone number of the official designated by the Corporation to respond to requests for information about the meeting. Such announcement shall be made unless a majority of the Directors determines by a recorded vote that Corporation business requires that such meeting be called at an earlier date, in which case the Secretary shall make public announcement of the time, place, and subject matter of such meeting, and whether open or closed to the public, at the earliest practicable time.

(b) The time or place of a meeting may be changed following the public announcement required by paragraph (a) of this section only if the Secretary publicly announces such change at the earliest practicable time. The subject matter of a meeting, or the determination of the Corporation to open or close a meeting, or portion of a meeting, to the public, may be changed following the public announcement required by this section only if (1) a majority of the Directors determines by a recorded vote that business so requires and that no earlier announcement of the change was possible, and (2) the Secretary publicly announces such change and the vote of each Director upon such change at the earliest practicable time: *Provided*, That individual items which have been announced for consideration at a meeting of the Board of Directors may be deleted without notice.

(c) The "earliest practicable time", as used in this subsection, means as soon as possible, which should in few, if any, instances be later than the commencement of the meeting or portion in question.

(d) The Secretary shall use reasonable means to assure that the public is fully informed of the public announcements required by this subsection. Such public announcements may be made by posting notices in the public areas of the Corporation's headquarters and mailing notices to the persons on a list maintained for those who want to receive such announcements.

(e) Immediately following each public announcement required by this section, notice of the time, place, and subject matter of a meeting, whether the meeting is open or closed, any change in one of the preceding announcements, and the name and telephone number of the official designated by the Corporation to respond to requests for information about the meeting shall also be submitted by the Secretary for publication in the FEDERAL REGISTER.

§ 707.5 Closed meetings.

(a) Meetings of the Board of Directors will be closed to public observation where the Corporation properly determines, according to the procedures set forth in paragraph (c) of this section, that such portion or portions of the meeting or disclosure of such information is likely to:

(1) Disclose matters that are (i) specifically authorized under criteria established by an Executive order to be kept secret in the interests of national defense or foreign policy and are (ii) in fact properly classified pursuant to such Executive order;

(2) Relate solely to the internal personnel rules and practices of an agency;

(3) Disclose matters specifically exempted from disclosure by statute (other than 5 U.S.C. 552), *Provided*, That such statute (i) requires that the matters be withheld from the public in such a manner as to leave no discretion on the issue, or (ii) establishes particular criteria for withholding or refers to particular types of matters to be withheld;

(4) Disclose the trade secrets and commercial or financial information obtained from a person and privileged or confidential;

(5) Involve accusing any person of a crime, or formally censuring any person;

(6) Disclose information of a personal nature where disclosure would constitute a clearly unwarranted invasion of personal privacy;

(7) Disclose investigatory records compiled for law enforcement purposes, or information which if written would be contained in such records, but only to the extent that the production of such records or information would (i) interfere with enforcement proceedings, (ii) deprive a person of a right to a fair trial or an impartial adjudication, (iii) constitute an unwarranted invasion of personal privacy, (iv) disclose the identity of a confidential source and, in the case of a record compiled by a criminal law enforcement authority in the course of a criminal investigation, or by an agency conducting a lawful national security intelligence investigation, confidential information furnished only by the confidential source, (v) disclose investigative techniques and procedures, or (vi) endanger the life or physical safety of law enforcement personnel;

(8) Disclose information the premature disclosure of which would be likely to significantly frustrate implementation of a proposed agency action, except in any instance where the Corporation has already disclosed to the public the content or nature of its proposed action, or where the Corporation is required by law to make such disclosure on its own initiative prior to taking final Corporation action on such proposal; or

(9) Specifically concern the Corporation's issuance of a subpoena, or the Corporation's participation in a civil action or proceeding, an action in a foreign court or international tribunal, or an arbitration, or the initiation, conduct, or disposition by the Corporation of a particular case of formal Corporation adjudication pursuant to the procedures in 5 U.S.C. 554 or otherwise involving a determination on the record after opportunity for a hearing.

(b) Meetings of the Board of Directors shall not be closed pursuant to paragraph (a) of this section when the Corporation finds that the public interest requires that they be open.

(c) (1) Action to close a meeting, or portion thereof, pursuant to the exemptions defined in paragraph (a) of this section may be initiated by the President or any Director of the Corporation by presentation of a request for closure to the Board of Directors. The person initiating the request for closure shall give the Board of Directors a statement specifying the extent of the proposed closure, the relevant exemptive provisions and the circumstances pertinent to such request. Such statement shall also be given to the General Counsel of the Corporation to serve as a basis for the certification the General Counsel may determine can be issued in accordance with § 707.6. The General Counsel's determination shall be given to the Board of Directors. Action to close a meeting, or portion thereof, shall be taken only when a majority of the entire membership of the Board of Directors votes to take such action. A separate vote of the Board of Directors shall be taken with respect to each meeting and of the Board of Directors portion or portions of which are proposed to be closed to the public or with respect to any information which is proposed to be withheld. A single vote may be taken with respect to a series of meetings, a portion or portions of which are proposed to be closed to the public, or with respect to any information which is proposed to be withheld. A single vote may be taken with respect to a series of meetings, a portion or portions of which are proposed to be closed to the public, or with respect to any information concerning such series of meetings, so long as each meeting in such series involves the same particular matters and is scheduled to be held no more than thirty days after the initial meeting in such series. The vote of each Director participating in such vote shall be recorded and no proxies shall be allowed.

(2) Whenever any person whose interests may be directly affected by a portion of a meeting requests that the Corporation close such portion to the public

for any of the reasons referred to in paragraph (a)(5), (a)(6), or (a)(7) of this section, the Corporation, upon request of any one of its Directors, shall vote by recorded vote whether to close such meeting.

(3) Within one day of any vote taken pursuant to paragraph (c)(1) or (c)(2) of this section, the Secretary shall make publicly available a written copy of such vote reflecting the vote of each member on the question. If a portion of a meeting to be closed to the public, the Secretary shall, by the close of the business day next succeeding the day of the vote taken pursuant to paragraph (c)(1) or (c)(2) of this section, make publicly available a full written explanation of the Corporation's action closing the portion together with a list of all persons expected to attend the meeting and their affiliation. The information required by this subparagraph shall be disclosed except to the extent that it is exempt from disclosure under the provisions of paragraph (a) of this section.

§ 707.6 Records of closed meetings.

(a) For every meeting of the Board of Directors closed pursuant to § 707.5, the General Counsel of the Corporation shall publicly certify that, in his or her opinion, the meeting may be closed to the public and shall state each relevant exemptive provision. A copy of such certification, together with a statement from the presiding officer of the meeting setting forth the time and place of the meeting, and the persons present, shall be retained by the Secretary as part of the transcript, recording, or minutes required by paragraph (b) of this section.

(b) The Secretary shall maintain a complete transcript or electronic recording adequate to record fully the proceedings of each meeting, or portion of a meeting, closed to the public, except that in the case of a meeting, or portion of a meeting, closed to the public pursuant to § 707.5(a)(9), the Secretary shall maintain either such a transcript or recording, or a set of minutes. Such minutes shall fully and clearly describe all matters discussed and shall provide a full and accurate summary of any actions taken, and the reasons therefor, including a description of each of the views expressed on any item and the record of any roll-call vote (reflecting the vote of each member on the question). All documents considered in connection with any Corporation action shall be identified in such minutes.

(c) The Secretary shall maintain a complete verbatim copy of the transcript, a complete copy of the minutes, or a complete electronic recording of each meeting, or portion of a meeting, closed to the public, for a period of at least two years after such meeting, or until one year after the conclusion of the proceeding of the Board of Directors with respect to which the meeting or portion was held, whichever occurs later.

(d) Within ten days of receipt of a request for information (excluding Saturdays, Sundays, and legal public holidays), the Corporation shall make available to the public, in the Office of Secretary of the Corporation, Washington, D.C., the transcript, electronic recording, or minutes (as required by paragraph (b) of this section) of the discussion of any item on the agenda, or of any item of the testimony of any witness received at the meeting, except for such item or items of such discussion or testimony as the Secretary determines to contain information which may be withheld under § 707.5. Copies of such transcript, or minutes, or a transcription of such recording disclosing the identity of each speaker, shall be furnished to any person at the actual cost of duplication or transcription.

(e) The determination of the Secretary to withhold information pursuant to paragraph (d) of this section may be appealed to the President of the Corporation, in his or her capacity as administrative head of the Corporation. The President will make a determination to withhold or release the requested information within twenty days from the date of receipt of the request for review (excluding Saturdays, Sundays, and legal public holidays).

DEPARTMENT OF TRANSPORTATION

Office of the Secretary

[23 CFR Part 1204]

[OST Docket No. 44; Notice 77-2]

HIGHWAY SAFETY PROGRAMS STANDARDS

Termination of Proceeding

• *Purpose.* The purpose of this notice is to terminate the rulemaking proceeding on motor vehicle occupant crash protection insofar as it concerns the possible issuance of a highway safety program standard to cause the States to increase safety belt usage. •

In a notice published June 14, 1976 (41 FR 24070), I proposed five alternative courses of action for future occupant crash protection requirements under Federal Motor Vehicle Safety Standard (FMVSS) No. 208 (49 CFR 571.208). Based on an analysis of comments received, a decision was reached to call upon the automobile manufacturers to join the Federal Government in conducting a large-scale demonstration program to exhibit the effectiveness of passive restraint systems. The reasoning that underlies that decision is contained in a December 6, 1976, document ("The Secretary's Decision Concerning Motor Vehicle Occupant Crash Protection") that is hereby incorporated by reference in this notice. The effect of that decision on FMVSS 208 is to require the continuation of the current requirements for passenger cars, as proposed in the first of the five alternate courses of action.

The second alternative was written as a requirement that States adopt and enforce safety belt usage laws or otherwise achieve a usage level much higher than is being experienced today. As discussed above and in a final rulemaking document published elsewhere in today's FEDERAL REGISTER, I have decided not to impose such a requirement upon the States. I want to make it clear, however, that in terminating the subject rulemaking, I have not in any way foreclosed a future Secretary or Administrator of the National Highway Traffic Safety Administration from instituting at any time a rulemaking proceeding concerning possible issuance of a highway safety program standard to cause States to increase safety belt usage or any other type of rulemaking proceeding on the subject of future occupant crash protection requirements.

In consideration of the foregoing, the subject proceeding is hereby terminated.

Issued in Washington, D.C., on January 19, 1977.

(Sec. 101, Pub. L. 85-564, 80 Stat. 731, (231 U.S.C. 402).)

WILLIAM T. COLEMAN, JR.,
Secretary of Transportation.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of Assistant Secretary for Housing-Federal Housing Commissioner

[24 CFR Part 235]

[Docket No. R-77-449]

MOBILE HOME LOAN INSURANCE ASSISTANCE PAYMENTS FOR HOME-OWNERSHIP

Proposed Subsidized Ownership Program

The Department of Housing and Urban Development proposes to amend 24 CFR Part 235 to establish a mobile home subsidized ownership program, as authorized by the Housing Authorization Act of 1976 (90 Stat. 1067). The proposed program would be carried out by providing interest subsidies under section 235 of the National Housing Act and loan insurance for private lenders under Section 2 of Title I of the National Housing Act, as amended.

Program Summary. This program makes it possible for a lower income family to purchase as its principal residence a mobile home consisting of two or more modules and a lot on which it is or will be placed. To be eligible, a family must have an adjusted annual income at the time of initial occupancy of no more than 95 percent of the median income for the area, with adjustments for smaller and larger families, and must have paid in cash 5 percent of the first $10,000 of the purchase price plus 10 percent of the purchase price in excess of $10,000. Maximum permissible loan amounts and terms shall not exceed $25,000 for 20 years and 32 days in the case of a mobile home and an undeveloped lot or $27,500 for 20 years and 32 days in the case of a mobile home and a developed lot. The purchase price of the property may not exceed 120 percent of these loan amounts.

Monthly assistance payments will be made on behalf of an eligible family to a financial institution making a loan under this program or purchasing an obligation representing the loan. The amount of assistance will vary with the family's income and the total amount of the loan payment at the market rate of interest. Assistance payments will be made to reduce the borrower's effective interest costs to as low as seven percent if the borrower cannot afford the full loan payment with 20% of his or her income.

A loan under this program is subject to co-insurance where a share of the potential loss is borne by the lender. The insurance obligation of the Secretary with respect to any lender cannot exceed either (1) 10 percent of the total amount of loans made by the lender, or (2) 90 percent of the loss on any individual loan. Primary responsibility for loan processing is placed upon the insured lending institution.

The Department expects that this program will aid in support of industry efforts to produce economical quality housing for lower income families who, without a subsidy, might be unable to become home owners.

Wherever possible these proposed regulations were drafted to conform with the section 235 regulations published on January 6, 1976, at 41 FR 1168. Arguments in defense of existing § 235 regulations will not be reiterated here; instead an effort will be made to point out how those regulations were modified, when they were, to meet the special needs of this program.

Eligibility: Families owning homes. As under the existing § 235 program, a family which already owns a home may purchase a new mobile home and lot under this program, but will be required to sell its present home when it is no longer the family's residence. The family will not be permitted to rent that property out to another and occupy the subsidized unit.

Counseling. As under the existing section 235 program, insured lenders will be required to certify that the borrower received a package of written counseling material which will be provided by the Department. The regulations also provide that mobile home owners may be required to accept further counseling when it is needed and available from local agencies having requisite capabilities.

Eligibility: Mobile home and lot. Loans will be made only for financing in combination the purchase of a mobile home consisting of two or more modules and a lot on which the mobile is or will be placed. Furniture may not be included in the loan or financed with the proceeds of the loan. The mobile home lot must be acceptable to the Secretary as a mobile home site. As under the existing section 235 program, lots for use under this program cannot exceed one acre unless more than one acre is needed to comply with local code requirements or to provide for a safe and adequate water supply and sewage drainage system. Lots cannot be smaller than required by local sanitary and zoning codes.

Eligibility: Location and concentration. Several regulations applicable to units assisted under the existing section 235 program are extended to this program. They are the limitation on concentration of assisted units in a subdivision, the provision for preliminary reservation of contract authority for interest reduction payments, and local government comment procedures. Unlike the existing program, however, a developer or seller of 13 or more units in a subdivision is not required to apply for a preliminary reservation of contract authority. The regulation providing for local government comment has been altered to reflect this change. It now provides that with respect to any request for a contract for assistance payments involving 13 or more units in a locality with an approved housing assistance plan, the procedures for soliciting local government comment must be observed. The purpose of this change is to provide developers and sellers with greater flexibility while continuing to assure that local governments will be afforded opportunity to comment in appropriate cases.

Assistance payments and income recertification. The provisions for assistance payments and income recertification are essentially the same as under the existing section 235 program, except for those governing termination of the subsidy.

Termination of the subsidy. Assistance payments will be terminated when the mobile home owner ceases to occupy or sells the property. The Department recognizes that some advantages would flow from a rule that would extend the subsidy to subsequent purchasers. Continuation of the payment would enhance marketability and reduce the likelihood of default in situations where a mobile home owner could not otherwise find a purchaser. However, continuation of the subsidy would not contribute to a major purpose of the program—stimulating housing production—and would add to the total and long term costs of the program.

Limitation on use of assistance payments. The Housing Authorization Act of 1976 provides that periodic assistance payments to families acquiring a mobile home and lot under this part shall not be made with respect to more than 20 percent of the total number of units with respect to which assistance is approved under section 235 after January 1, 1976.

Interested persons are invited to participate in this proposed rulemaking by submitting written data, views, and arguments with respect to this proposal. Communications should be identified by the above docket number and title, and should be filed with the Rules Docket Clerk, Office of the Secretary, Room 10141, Department of Housing and Urban Development, 451 Seventh Street, SW., Washington, D.C. 20410.

All relevant materials received on or before February 28, 1977, will be considered before adoption of a final rule. Copies of comments submitted will be available for public inspection during normal business hours at the above address.

A Finding of Inapplicability pursuant to Section 102(2)(c) of the National Environmntal Policy Act of 1969, has been made with regard to these proposed regulations in accordance with HUD Handbook 1390.1. A copy of the Finding of Inapplicability is available for public inspection at the above address.

Accordingly, it is proposed to amend Title 24, Part 235, by adding new Subparts G and H to read as follows:

Subpart G—General Eligibility Requirements—Mobile Home Ownership for Lower Income Families

Sec.
235.1001 Incorporation by reference.
235.1005 Basic program outline.

Subpart G—General Eligibility Requirements—Mobile Home Ownership for Lower Income Families

§ 235.1001 Incorporation by reference.

(a) All of the provisions of subparts B and D of Part 201 of this chapter concerning insurance of institutions making mobile home loans and mobile home lot loans shall be applicable to loans assisted

under subparts G and H of this part except the following provisions:

Sec.
201.501 (b), (i), (k), and (l) Definitions.
201.505 Purpose of subpart.
201.510 New or used mobile homes.
201.520(d) Minimum size.
201.525 Mobile home location standards.
201.530 Maximum loan amount.
201.535 Borrower's minimum investment.
201.540 Financing charges.
201.555 Payment provisions.
201.625 Rate of insurance.
201.560 Maturity provisions.
201.570 Late charges.
201.585 Refinancing.
201.595(e) Dealer investigation approval and control.
201.665 Claim application.
201.675 Insurance reserve.
201.900 Amendment and effect.
201.1500 Incorporation by reference.
201.1501 Purpose.
201.1502 (d), (e), (j) Definitions.
201.1503 Eligibility requirements.
201.1504 Maximum loan amount and terms.
201.1505 Combination loans for the purchase of a mobile home and a developed or undeveloped lot.
201.1506 Loans for the purchase or acquisition of a lot.
201.1510 Borrower's minimum investment.
201.1512(b) Mobile home lot certification.
201.1530 Effect of amendments.

(b) For purposes of these subparts all references in Part 201 of this chapter to Section 2, of Title I of the National Housing Act, as amended, shall be construed to refer to section 235 of the Act.

§ 235.1005 Basic program outline.

This part authorizes assistance to aid lower income families to acquire ownership of a mobile home and a lot upon which the home is placed.

(a) Assistance will be in the form of monthly payments by the Secretary to the insured lender to reduce effective interest costs to a home owner to as low as seven percent if the home owner cannot afford the full loan payment with 20 percent of his income.

(b) The amount of subsidy will vary according to the family's income and the total amount of the payment at the market rate of interest. Family income and mortgage limits are established for eligibility in each locality.

(c) Assistance will be limited to borrowers who purchase for use as their principal residence a new mobile home, consisting of two or more modules and a lot on which such mobile home is sited.

(d) The borrower must have paid in cash 5 percent of the first $10,000 of the purchase price plus 10 percent of the purchase price in excess of $10,000.

(e) Assistance payments will be terminated upon sale of the property.

§ 235.1010 Definitions used in this subpart.

As used in this subpart, the following terms shall have the meaning indicated:

(a) "Borrower" means a natural person or persons who apply for and receive a loan for the purchase of a new mobile home and lot under this part, and who is a member of a family as defined under this part.

(b) "Mobile home" means a structure, consisting of two or more modules, which structure is erected on a lot, where each module measures twelve body feet or more in width and forty body feet or more in length, which is built on a permanent chassis, and is designed to be used as a dwelling with or without a permanent foundation, when connected with the required utilities and includes the plumbing, heating, air conditioning and electrical systems contained therein.

(c) "Adjusted annual income" means the annual family income remaining after making certain exclusions from gross annual income. The following items shall be excluded, in the order listed, from family gross annual income:

(1) Five percent of such gross annual income, in lieu of amounts to be withheld (social security, retirement, health insurance, etc.) regardless of the actual amount of such withholdings;

(2) Any unused income or temporary income, such as overtime pay which will be discontinued, income of a secondary wage earner which will terminate, unemployment compensation which does not occur regularly, or other income of a temporary nature which will be or has been discontinued;

(3) The earnings of each minor in the family who is living with such family plus the sum of $300 for each such minor.

(d) "Family" means (1) two or more persons related by blood, marriage or operation of law, who occupy the same unit; (2) a handicapped person who has a physical impairment which is expected to be of continued duration which substantially impedes his ability to live independently, and which would be improved by more suitable housing; or (3) a single person 62 years of age or older.

(e) "Gross annual income" means the total income, before taxes and other deductions, received by all members of the mortgagor's household. There shall be included in this total income all wages, social security payments, retired benefits, military and veteran's disability payments, unemployment benefits, welfare benefits, interest and dividend payments, and such other income items as the Secretary considers appropriate.

(f) "Minor" means a person under the age of 21. As used in this subpart, minor shall not include a borrower or his or her spouse.

(g) "Assistance payment" means that portion of a mobile home owner's monthly payment which the Secretary becomes obligated to pay under an assistance payment contract.

§ 235.1015 Eligible borrowers.

(a) To be eligible under this subpart, the borrower shall have an adjusted annual income, which shall not exceed at the time of initial occupancy 95 percent of the median income for the area, with adjustments for smaller and larger families, as determined by the Secretary, except that the Secretary may establish income ceilings which are higher based upon the Secretary's determination that such higher ceilings are necessary because of unusually low median family incomes or such other factors as the Secretary may deem appropriate to carry out the purpose of this part. The percentage of median income for smaller and larger families shall be as follows:

Persons per family:	*Percent of median family income*
1	67
2	76
3	85
4	95
5	101
6	107
7	113
8 or more	119

(b) In addition to the income limitations set forth in paragraph (a) of this section, a borrower must establish that his or her income is and will be adequate to meet his or her portion of the periodic payments required. Only that part of the mobile home owner's income which can reasonably be expected to continue for approximately the first five years of the loan term will be considered effective income for the purpose of determining the adequacy of the mobile home owner's income.

(c) The mobile home owner shall agree to recertify, on a form prescribed by the Secretary, as to occupancy, employment, family composition and income whenever one of the following events take place:

(1) Annually, no earlier than 60 days before and no later than 30 days after the anniversary date of the mortgage or at such other anniversary date as set by the Secretary;

(2) No more than 30 days after:

(i) The mobile home owner or any adult (21 years or older) member of the family residing in the household changes or begins employment which results in an increase in the family income reported in the original application for assistance or the most recent recertification.

(ii) The family income (except income of minors) increases at least $50 per month.

(3) At such other times as the Secretary may require.

(d) Assistance payments for the purchase of a new mobile home and lot may be used to assist a family already owning a home at the time of application; however, the family must sell the home when it ceases to be its residence and may not rent it and occupy the subsidized unit.

§ 235.1020 Home ownership counseling.

The Secretary will make available a counseling information package to lenders, reservation recipients, and sellers participating in this program, who will be required to distribute the package to potential purchasers. Material will include information on mobile home purchase procedures, property maintenance, and other mobile home ownership responsibilities. A certification by the reservation recipient, seller or lender that the prospective mobile home owner has received the counseling information package must accompany each application. In addition, some field office jurisdictions are served by HUD approved agencies offering counseling. Where such counseling is available, and if the applicant has never owned a home, or where in the opinion of the Secretary the applicant will benefit from counseling, successful completion of mobile home ownership counseling may be required before the Secretary will undertake to make assistance payments.

§ 235.1025 Eligibility requirements.

(a) Loans shall be made only for financing in combination the purchase of a mobile home consisting of two or more modules and a lot on which such mobile home is or will be situated. Furniture may not be included in the loan or financed with the proceeds of the loan.

(b) Marketable title in the mobile home and lot shall be vested in the borrower.

(c) The mobile home lot shall be acceptable to the Secretary as a mobile home site.

§ 235.1030 Lot size.

Home ownership assistance payments may not be used to permit acquisition of land in excess of requirements for an adequate residential site, even though the cost of land may be cheaper in outlying areas. Accordingly, lots for use under the program authorized by this part shall not exceed one acre unless more than one acre is needed to comply with local code requirements or to provide for a safe and adequate water supply and sewage drainage system.

§ 235.1035 Loan provisions.

(a) The security instrument or instruments shall be a first lien upon the mobile home and lot. The entire principal amount of the loan shall have been disbursed to the borrower or to the creditors for the borrower's account and with the borrower's consent.

(b) *Loan multiples.* The loan shall involve a principal obligation in multiples of $50.

(c) *Payments.* Payments shall be due on the first of the month.

§ 235.1040 Maximum loan amount and terms.

Maximum permissible loan amounts and terms shall not exceed:

(a) $25,000 for 20 years and 32 days in the case of a mobile home composed of two or more modules and an undeveloped lot (but not to exceed $20,000 for the mobile home).

(b) $27,500 for 20 years and 32 days in the case of a mobile home composed of two or more modules and suitably developed lot (but not to exceed $20,000 for the mobile home).

(c) The amount specified under paragraphs (a) and (b) of this section or the actual sales price of the mobile home and lot, except that the maximum loan amount attributable to the mobile home shall not exceed the lesser of 113 percent of the total price of the mobile home as stated in the manufacturer's invoice, plus the Secretary's estimate of the appraised value of the mobile home lot.

§ 235.1045 [Reserved]

§ 235.1050 Limitation on concentration of units in a subdivision.

No subdivision or substantially contiguous group of subdivisions which constitute or will constitute a single residential area, shall have over 40 percent of the homes therein assisted under this Part. The 40 percent rule shall not be applied to limit the number of subsidized units below 25 in any single residential area. The 40 percent ratio is applicable to the relationship of section 235 applications to the sum of vacant lots within a residential land development tract under centralized control. In defining residential areas for purposes of this paragraph, the Secretary will exercise appropriate discretion in order to meet the objective of limiting the concentration of subsidized units but not unduly restricting efficient and good subdivision planning and land utilization. Further, within a single residential area to assure sound underwriting which requires an assurance of a future market for resales without subsidy, the Secretary will limit, to the extent practicable, the percentage of subsidized units in a block or contiguous group of blocks to 40 percent.

§ 235.1055 Reservations of contract authority.

(a) Preliminary reservations of contract authority for interest reduction payments may be issued by the Secretary to a developer or seller specifically identified with sites in a particular subdivision or project or for a specific mobile home and lot not in a subdivision. Developers or sellers may submit a request to the Secretary for a preliminary reservation of contract authority. If contract authority is available, it will be reserved if the project in which the units will be located meets project selection, affirmative marketing, environmental, underwriting, feasibility and other applicable requirements. A preliminary reservation is an advance commitment that contract authority will be available for assistance payments when the homes are sold to families who qualify for assistance. Applications for preliminary reservation may be made as early as desired but not before filing of the request for subdivision approval or other appropriate applications.

(b) If a request for a preliminary reservation is approved, either for the amount requested or for an amount determined by the Secretary, the Secretary will reserve the contract authority. The reservation is a commitment by HUD that the contract authority for the transaction has been reserved.

(c) A preliminary reservation will expire six months after the date of issue.

(d) Periodic assistance payments pursuant to this subpart shall be limited to no more than 20 percent of the total number of units with respect to which assistance is approved under section 235 after January 1, 1976.

§ 235.1060 Local government comment procedures.

(a) With respect to any request for assistance payments involving 13 or more units in a locality with an approved housing assistance plan, the following procedures must be followed: Within 10 working days of the receipt of such a request, the Secretary shall, for purposes of compliance with Section 213 of the Housing and Community Development Act of 1974, forward a copy of the request to the chief executive officer of the unit of general local government in which the assisted housing is to be located, requesting comments and objections, if any. The unit of general local government shall have 30 days from receipt of the letter and copy of the request to object or otherwise submit comments as the response to the Secretary. Alternatively, the individual or organization making the request for assistance payments may include with the request a statement of "no objections" or other comment from the unit of general local government, obtained in advance by the individual or organization. The unit of local government may object to the request on the grounds that it is inconsistent with the housing assistance plan. If such an objection is filed, the Secretary may not approve the request unless the Secretary determines that the request is consistent with the housing assistance plan. If the Secretary determines that the request is consistent with the plan, the Secretary shall notify the chief executive officer of the unit of general local government, giving his reasons therefor in writing. If the Secretary concurs with the objection of the unit of local government, the Secretary shall so notify the individual or organization making the request for assistance payments, stating the reasons therefor in writing.

(b) With respect to a request for assistance payments involving 13 or more units in a locality that does not have an approved housing assistance plan, assistance under this Part may not be approved unless the Secretary determines that there is a need for such assistance, taking into consideration any applicable State housing plan, and that there is or will be in the area public facilities and services adequate to serve the housing assisted. Within 10 working days of receipt of such a request, the Secretary will forward a copy of the request to the chief executive officer of the unit of general local government in which the proposed assisted housing will be located with a letter requesting comments on matters relevant to the determination required in this paragraph. The unit of general local government shall have 30 days from receipt of the letter and copy of the assistance payments request to submit any comments it wishes to make to the Secretary. Any relevant comments received will be considered in connection with the Secretary's determination. As in the case of

requests subject to paragraph (a) of this section, individuals or organizations submitting assistance payments requests subject to the provisions of this paragraph (b) of this section may satisfy the comment requirements of this section by obtaining a statement of the local government on the application in advance and submitting that statement with the assistance payments request to the Secretary.

§ 235.1065 Late charge.

The note may provide that a late charge may be collected by the lender for each payment more than 15 days in arrears, but such charge shall not exceed 4 percent of each dollar of the borrower's share of the monthly payment. Such charge shall be separately billed to and collected from the borrower and shall not be deducted from any aggregate monthly payment. Such charge shall not be included in the assistance payment.

§ 235.1070 Cancellation of property insurance.

(a) The property shall have been covered by fire insurance at the time the loan was made.

(b) If the fire insurance company shall have later cancelled or refused to renew the policy, in order for the loan to be eligible for insurance benefits, the lender shall have notified the Secretary within 30 days (or within such further time as the Secretary may approve) of the cancellation of the fire insurance or of the refusal of the insuring company to renew the fire insurance. This notification shall have been accompanied by a certification of the lender that diligent efforts were made, but it was unable to obtain fire insurance coverage at reasonably competitive rates and that it will continue its efforts to obtain adequate fire insurance coverage at competitive rate.

Subpart H—Assistance Payments—Mobile Home Ownership for Lower Income Families

§ 235.1101 [Reserved]

§ 235.1105 Contract for assistance payments.

This subpart shall constitute the contract between the lender and the Secretary for assistance payments pursuant to section 235 of the National Housing Act.

§ 235.1110 Execution of assistance payment contract.

Mobile home owners. The acceptance of a loan report pursuant to § 201.650 shall also constitute the execution of the assistance payment contract with respect to the insurance granted to the lending institution reporting the loan.

§ 235.1111 Qualified mobile home owners.

To qualify for assistance payments, the mobile home owner's income at the time of application for assistance shall be within the limitations provided in § 235.1015, and insurance covering the mobile home owner's loan under Section 2 of Title I of the National Housing Act as amended, shall have been granted to the lending instituton which made the loan.

§ 235.1115 Limitation of sales price.

To qualify for assistance payments, the mobile home owner shall not have paid more than the Secretary's estimate of value of the mobile home and lot purchased, nor shall the purchase price of the property exceed 120 percent of the loan amount established pursuant to § 235.1040.

§ 235.1120 Assistance payments and handling charges.

(a) Assistance payments shall be in an amount not exceeding the lesser of—

(1) The balance of the monthly payment for principal, interest, real and personal property taxes, insurance and insurance premiums chargeable under § 201.1514 due under the loan or advance of credit remaining unpaid after applying for 20 percent of the mobile home owner's income as determined under this part; or

(2) The difference between the amount of the monthly payment for principal, interest, and insurance premium chargeable under § 201.1514 which the mobile home owner is obligated to pay under the loan or advance of credit and the monthly payment of principal and interest and insurance premium which the mobile home owner would be obligated to pay if the loan or advance of credit were to bear interest at a rate of seven percent per annum;

(b) In addition to the assistance payment referred to in paragraph (a) of this section, the lender shall be entitled to a monthly payment of an amount the Secretary deems sufficient to reimburse it for its expenses in handling the loan.

(c) Special assessments levied by a governmental body are to be included under the terms "taxes' as a part of the total monthly payment. However, ground rents, assessments of a home owner's association, and special assessments levied by persons or private organizations are not to be included.

§ 235.1125 Time of payments.

The assistance payment shall be due on the first day of each month and shall be paid upon receipt of a billing, on a form prescribed by the Secretary, from the lender or its authorized agent.

§ 235.1130 Term of assistance payment contract.

Mobile home loan. The term of the assistance payment contract shall begin on the date of disbursement of loan proceeds and shall continue until the contract is terminated pursuant to § 235.1160.

§ 235.1135 Mobile home owner's required recertification.

(a) The lender shall obtain from the borrower, on a form prescribed by the Secretary, a recertification as to occupancy, employment, family composition and income whenever one of the following events takes place:

(1) Annually, no earlier than 60 days before and no later than 30 days after the anniversary date of the mortgage or at such other anniversary date as set by the Secretary.

(2) No more than 30 days after the lender is notified by the borrower or learns from any identifiable source:

(i) That the borrower or any member of the family (21 years or older) residing in the household changes or begins employment which results in an increase in the family income reported in the original application for assistance or the most recent recertification.

(ii) That the family income (excluding income of minors) has increased at least $50 per month.

(3) At such other times as the Secretary may require.

(b) With respect to mortgages insured under this Part, the lender shall obtain from the applicant mobile home owner at the time application is made for assistance and at the time of annual recertification required under paragraph (a) (1) of this section, on a form provided by the Secretary, a statement of the aggregate amounts of total income prior to adjustments reported for all family members (other than minors) by the applicant mobile home owner is his most recent Federal income tax return. If seperate returns are filed by separate members of the family, the total income prior to adjustments included in all such returns (except returns of minors) shall be reported. If the income so reported is more than 25 percent above the income reported on the recertification, the lender shall obtain from the mobile home owner a new recertification or a written explanation of the difference in income reported on the two forms.

(c) A mobile home owner who fails to disclose his or her actual income in accordance with the requirements of this Part will be required to reimburse the Secretary for all overpayments made on his or her behalf.

(d) Each mobile home owner must provide a letter on a form prescribed by the Secretary authorizing the Internal Revenue Service to release Federal Income Tax returns for the most recent three years to the Secretary on request.

§ 235.1140 Mobile home owner's optional recertification.

Upon request of the mobile home owner the lender shall accept recertification whenever the borrower, his or her spouse or an adult (21 years or older) member of the family changes or loses employment which results in a decrease in the family income reported in the most recent certification or recertification. This recertification shall be on a form prescribed by the Secretary.

§ 235.1145 Adjustment in assistance payments.

The lender shall make appropriate adjustments in the amount of the requested assistance payments to reflect changes in family income reported in any required or optional recertification of the home owner. The adjustment shall not be retroactive except at the discretion of the Secretary. The adjustment shall apply only to assistance payments beginning with the payment due no earlier than the first day of the month following the date the borrower's recertification is received by the lender.

§ 235.1146 Recovery of assistance payments.

If it is determined that assistance payments have been paid on behalf of a borrower in excess of the amount of benefits to which the borrower was entitled, the lender shall reduce its next billing to the Secretary in the amount of overpaid assistance payments. The lender may increase the borrower's required monthly payments in an amount which will reimburse the lender within a reasonable time without causing undue hardship to the borrower. If the lender has filed a claim for mortgage insurance benefits, whether or not that claim has been paid or if the mortgage has been paid in full or the borrower has sold the property to an assumptor before the determination is made, and the lender did not contribute to the overpayment through fraud, misrepresentation or error (including failure to meet contractual obligations), the lender will not be required to reduce its billings or increase the assumptor's monthly payments. In such cases, HUD will require payment by the borrower on whose behalf assistance has been overpaid. If fraud, misrepresentation or error on the part of the lender resulted in assistance payments being made on behalf of a borrower when no assistance payment should have been made, the lender shall reduce the next billing to the Secretary in the amount of the handling charges for the period during which the assistance was not warranted.

§ 235.1150 Lender records.

The lender shall maintain such records as the Secretary may require with respect to the borrower's payments, the assistance payments received from the Secretary and the annual recertification of financial status from the mobile home owner. Such records shall be kept on file for a period of time and in a manner prescribed by the Secretary and shall be available, when requested, for review and inspection by the Secretary or the Comptroller General of the United States.

§ 235.1155 Effect of assignment of loan on assistance payment contract.

Where a loan covered by an assistance payment contract is sold to another approved lender, the buyer shall succeed to all rights and become bound by all the obligations of the seller under such contract.

§ 235.1160 Termination, suspension, or reinstatement of the assistance payment contract.

(a) *Termination.* The assistance payment contract shall be terminated when:

(1) The mobile home owner ceases to occupy the property.

(2) The property is sold by the mobile home owner.

(b) *Suspension.* The assistance payments contract shall be suspended when any one of the following events occurs:

(1) The lender determines that the borrower ceases to qualify for the benefits of assistance payments by reason of his income increasing to an amount enabling him to pay the full monthly mortgage payment by using 20 percent of the family income.

(2) Foreclosure is instituted.

(3) The lender is unable to obtain from the mobile home owner a required recertification of occupancy, employment, income, and family composition.

(4) At such other times as the Secretary may require.

(c) *Effect of termination or suspension.* Upon termination or suspension of the assistance payments contract, the payment due on the first day of the month in which the termination or suspension occurs shall be the last payment to which the lender shall be entitled except that, in the case of a suspended contract, payment may be resumed after the contract is reinstated pursuant to paragraph (e) of this section.

(d) *No effect on the mortgage insurance contract.* The termination or suspension of the assistance payments contract shall have no effect on the insurance contract, under Section 2 of Title I of the National Housing Act, as amended.

(e) *Reinstatement.* Where the assistance payment contract is suspended, it may be reinstated by the Secretary at his discretion and on such conditions as he may prescribe.

§ 201.1165 Effect of amendment.

The regulations in this subpart may be amended by the Secretary at any time, from time to time, in whole or in part, but such amendment shall not adversely affect the interest of a lender under an existing contract for assistance payments.

NOTE: The Department of Housing and Urban Development has determined that this document does not contain a major proposal requiring preparation of an Inflation Impact Statement under Executive Order 11821 and OMB Circular A-107.

JOHN T. HOWLEY,
Acting Assistant Secretary for Housing—Federal Housing Commissioner.

[FR Doc.77-2694 Filed 1-26-77;8:45 am]

Federal Disaster Assistance Administration

[24 CFR Part 2205]

[Docket No. R-77-445]

FEDERAL DISASTER ASSISTANCE

Disaster Legal Services

The Department promulgated the Final Regulations for Federal Disaster Assistance under the Disaster Relief Act of 1974 (88 Stat. 143 et seq.; 42 U.S.C. 5121 note et seq.) in the FEDERAL REGISTER (40 FR 23252) on May 28, 1975, as 24 CFR Part 2205. Since at the time of publication the authority for providing disaster legal services (section 412 of the Act) was reserved to the President, 24 CFR Part 2205 did not contain regulations covering provision of legal services. By Executive Order 11910 (April 13, 1976), such authority was granted to the Secretary, and was redelegated to the Administrator of the Federal Disaster Assistance Administration (41 FR 19365, May 12, 1976), and further redelegated to the Regional Directors, FDAA (41 FR 19363, May 12, 1976).

Section 2205.47a, as proposed, contains regulations covering the provision of disaster legal services to disaster victims. This new paragraph provides guidelines for lawyers cooperating with the Federal Disaster Assistance Admipistration, and defines the parameters of the disaster legal services program intended by the Act.

In each disaster requiring disaster legal services, the authority contained in section 412 has been specifically delegated to FDAA. There is a long-standing agreement between FDAA (and its predecessor agency, the Office of Emergency Preparedness) and the Young Lawyers Section (YLS) of the American Bar Association, which provides for volunteer services to disaster victims. FDAA desires to continue the operation of disaster legal services through that agreement, which is published in today's FEDERAL REGISTER. The regulations proposed here allow the FDAA Regional Director to provide authority and guidance to YLS or other attorneys when the YLS cannot adequately provide disaster legal services. By the terms of the May 12, 1976 redelegation, the Regional Directors may provide legal services under any arrangement they deem appropriate, using the existing agreement, other Federal attorneys, or any other arrangement.

Interested persons are invited to participate in the making of this rule by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket or notice number and be submitted to the Office of the Rules Docket Clerk, Office of the Secretary, Room 10141, Department of Housing and Urban Development, 451 7th Street, SW, Washington, D.C. 20410. All communications received on or before February 25, 1977, will be considered by the Administrator before publishing the final regulations. The provisions in this proposed regulation may be changed in light of comments received. All comments will be available for inspection, both before and after the closing date, at the Office of the Rules Docket Clerk at the above address.

The Administrator of the Federal Disaster Assistance Administration, with the concurrence of the appropriate Departmental officials, has issued a Finding of Inapplicability of Environmental Impact according to Section 102 of the National Environmental Policy Act of 1969, concerning this regulation, in accordance with the procedures set forth in HUD Handbook 1390.1 (38 FR 19182).

It is the position of the signatories to that Finding that this regulation in itself has no significant impact on the human environment. Interested parties may inspect and obtain copies of this Finding of Inapplicability of Environmental Impact at the Office of the Rules Docket Clerk, Department of Housing and Urban Development in Washington, D.C.

Accordingly, pursuant to the authority contained in section 7(d) of the Department of Housing and Urban Development Act (79) Stat. 670; 42 U.S.C. 3535(d)) and section 601 of the Disaster Relief Act of 1974 (88 Stat. 163; 42 U.S.C. 5201), it is proposed that a new section, designated § 2205.47a, be added to 24 CFR Part 2205, reading as follows:

§ 2205.47a Disaster legal services.

(a) Legal services may be provided to low-income individuals who require them as a result of a major disaster. For the purpose of this Section, "low-income individuals" shall include those disaster victims who, as a result of the disaster, have insufficient resources to secure adequate legal services. The Regional Director or his authorized representative shall make all determinations concerning whether an individual qualifies for legal services under this Section.

(b) Disaster legal services shall be provided without cost to such individuals. Fee-generating cases shall not be accepted by lawyers operating under these regulations. For the purposes of this Section, a fee-generating case is one which the Regional Director or his authorized representative, after any necessary consultation with local or State bar associations, determines would not ordinarily be rejected by local attorneys as a result of its lack of potential remunerative value. Any fee-generating cases shall be referred by the Regional Director or his authorized representative to private attorneys.

(c) The provision of disaster legal services may be accomplished by use of volunteer lawyers under terms of appropriate agreements. The provision of disaster legal services may also be accomplished by use of Federal lawyers, or by any other arrangement the Regional Director deems appropriate, including payment to attorneys by the Federal Disaster Assistance Administration for the provision of legal services when the Regional Director determines that there is no other means of obtaining adequate legal assistance for qualified disaster victims.

(d) In the event it is necessary for the Federal Disaster Assistance Administration to pay attorneys for the provision of legal services under these regulations, the Regional Director, in consultation with State and local bar associations, shall determine the amount of reimbursement due to the attorneys who have provided disaster legal services at the request of the Regional Director. At the Regional Director's discretion, administrative costs of lawyers providing legal services requested by him may also be authorized.

(e) Provision of disaster legal services is confined to the securing of benefits under the Act and claims arising out of a major disaster.

(f) Any disaster legal services shall be provided in accordance with § 2205.13 of these regulations.

NOTE: The Federal Disaster Assistance Administration has determined that this document does not contain a major proposal requiring preparation of an Inflation Impact Statement under Executive Order 11821 and OMB Circular A-107.

(Sec. 412, Pub. L. 93-288, 88 Stat. 157 (42 U.S.C. 15182), E.O. 11795 as amended by E.O. 11910, FR 25929. Delegation of Authority, 39 FR 28227.)

THOMAS P. DUNNE,
Administrator, Federal Disaster Assistance Administration.

[FR Doc.77-2703 Filed 1-26-77;8:45 am]

[24 CFR Part 2205]

[Docket No. R-77-282]

FEDERAL DISASTER ASSISTANCE

Individual and Family Grant Programs

The Department promulgated the Final Regulations for Federal Disaster Assistance under the Disaster Relief Act of 1974 (88 Stat. 143 et seq.; 42 U.S.C. 5121 note et seq.) in the FEDERAL REGISTER (40 FR 23252), May 28 1975, as 24 CFR Part 2205.

Section 2205.48 contains the regulations governing the Individual and Family Grant Program authorized by section 408 of the Act. During the two years of the program's operation, several changes have been suggested to improve program performance and clarify policy and eligibility questions. The following proposal would effect those changes, incorporate numbering changes both new and previously published as errata, and reprint section 2205.48 completely for the convenience of users.

The proposed changes are:

1. Deletion of the word "authorized" when used in conjunction with the word "representative" to avoid confusion in differentiating between the person assigned by the Governor to administer the Individual and Family Grant Program and the "Governor's Authorized Representative" as defined elsewhere in these Regulations. This change will appear both in paragraph (a) *General* and paragraph (e)(2).

2. Deletion of the word "financial" in paragraph (c)(1)(C) as a description of assistance from other means. If a grant recipient receives assistance in the form of a service or item, he should refund to the State that part of the grant that was identified as payment for that assistance, whether financial or in the nature of a service or item, in order to avoid duplication of benefits.

3. Deletion of existing paragraph (c)(1)(iii) and substitution of a more explicit requirement that States determine whether individuals and families must obtain flood insurance, and that States require grant recipients to provide proof of purchase of such flood insurance. This change will also establish the initial flood insurance premium as a necessary expense.

4. Addition of new subparagraphs (E) and (F) to paragraph (c)(2)(ii), that add new eligibility categories as dictated by experience in field operations. The first addresses minimum protective measures required to safeguard residences against threat of damage, and the second provides protection for mobile homes.

5. Addition of a new subparagraph (E) to paragraph (c)(2)(iii), to permit States to move and store personal property to prevent or reduce damage.

6. Deletion of the words "repair, replace or" and "loss of or" in paragraph (c)(2)(iv)(B). This change more accurately reflects the fact that the grant program is not intended to indemnify losses, but does not reduce the ability of States to meet transportation needs of disaster victims.

7. Addition of a new subparagraph (vi) under paragraph (c)(2) to include as eligible those rental accommodation expenses made necessary because of the disaster. This will allow States to assist those families who were ordered to evacuate an area, but who sustained no physical damage to their residences.

8. Revision of paragraph (d)(6) to provide coordination between the State and the Regional Director rather than the Federal Coordinating Officer, since the Regional Director is responsible for insuring that the grant program is administered properly.

9. Revision of paragraph (e)(1) to more clearly indicate a State's responsibility for administration of the program, and to provide guidance on recovery of funds that have not been spent by grant recipients for their specified purposes.

10. Addition of the words "State audits" in paragraph (g)(1)(v) to make it clear that a State audit must accompany a claim for reimbursement.

11. Revision of paragraph (g) to incorporate a provision permitting the Regional Director to extend the 180-day time limitation by an additional 90 days if all appeals have been resolved and all grants disbursed. This change will provide the Regional Director with greater flexibility in granting time extensions, while retaining controls necessary to insure that grant applicants receive assistance at the earliest possible time.

12. Deletion of present paragraph (g)(2), since the date for submission of requests for grant assistance for those disasters covered under the retroactive provision of the Act has passed.

13. Revision of paragraph (k) by changing the title from *Federal Audit* to *Audits*, and providing guidance on the conduct of both State and Federal audits.

Interested persons may participate in this proposed rule making by submitting written data, views or arguments to the Rules Docket Clerk, Office of the Secretary, Room 10141, Department of Housing and Urban Development, 451 7th Street, SW, Washington, D.C. 20410. Each person submitting a comment should identify this notice, and give reasons for any recommendations. Comments received on or before February 25, 1977, will be considered before final action is taken on this proposal. Copies of all written comments received will be available for examination by interested persons at the above address. This proposal may be changed in light of the comments received.

The Administrator, with the concurrence of the appropriate Departmental officials, has issued a Finding of Inapplicability of Environmental Impact concerning this proposed rule making, in accordance with Section 102 of the National Environmental Policy Act of 1969 and the procedures set forth in HUD Handbook 1390.1 (38 FR 19182). It is the position of the signatories to the Finding that this amendment in itself has no significant impact on the human environment. Interested parties may inspect and obtain copies of this Finding of Inapplicability of Environmental Impact at the Office of the Rules Docket Clerk of the Department of Housing and Urban Development in Washington, D.C. 20410.

Accordingly, pursuant to the authority contained in section 7(d) of the Department of Housing and Urban Development Act (79 Stat. 670; 42 U.S.C. 3535d) and section 601 of the Disaster Relief Act of 1974 (88 Stat. 163; 42 U.S.C. 5201), it is proposed that § 2205.48 be amended and reprinted to read as follows:

§ 2205.48 Individual and family grants.

(a) *General.* The Governor may request that Federal funds be made available to a State for the purpose of such State making grants to individuals and families who, as a result of a major disaster, are unable to meet necessary expenses or serious needs. The grant program authorized by this section will be 75 percent Federally funded and 25 percent State funded. The Governor of the affected State or his representative will administer the grant program. The grant program is intended to provide funds to disaster victims to permit them to meet those necessary expenses or serious needs for which other governmental assistance is either unavailable or inadequate. The grant program is not intended to indemnify all disaster losses or to purchase items or services that may generally be characterized as nonessential, luxury, or decorative.

(b) *Definitions as used in this section.* (1) "Necessary expense" means the cost of an item or service essential to an individual or family to mitigate or overcome an adverse condition caused by a major disaster.

(2) "Serious need" means a requirement for an item or service essential to an individual or family to prevent or reduce hardship, injury, or loss caused by a major disaster.

(3) "Family" means a social unit comprised of husband and wife and dependents, if any, or a head of household, as these terms are defined in the Internal Revenue Code of 1954.

(4) "Individual" means a person who is not a member of a family, as defined in paragraph (b)(3) of this section.

(5) "Assistance from other means" means assistance including monetary or in-kind contributions from other governmental programs, insurance, voluntary or charitable organizations, or from any source other than those of the individual or family.

(c) *National eligibility criteria.* In administering the Individual and Family Grant Program, a State shall determine the eligibility of an individual or family for a grant to meet a necessary expense or serious need in accordance with the following criteria.

(1) *General.* (i) In order to qualify for a grant under this section, an individual or family representative must certify:

(A) That application has been made to other available governmental programs for assistance to meet a necessary expense or serious need and that neither he nor any member of his family has been determined to be qualified for such assistance, or for demonstrated reasons, any assistance received has not satisfied any such necessary expense or serious need.

(B) That with respect to the specific necessary expense or serious need or portion thereof for which application is made, neither he, nor to the best of his knowledge, any member of his family, has previously received or refused assistance from other means.

(C) That should the individual or family receive a grant and assistance from other means later becomes available to meet the necessary expense or serious need, the individual or family shall refund to the State that part of the grant for which assistance from other means has been received.

(ii) Farmers, ranchers, and persons engaged in aquaculture who are qualified to apply to the Farmers Home Administration (FmHA), must submit proof of the denial of such loan assistance from the FmHA before they may be considered eligible for a grant under this section. If applicants have been denied such loan assistance because, in FmHA's determination, they are able to obtain necessary credit from other sources, they will be considered ineligible for grant assistance for those items or services for which assistance may be provided by the FmHA's Emergency Loan program.

(iii) Individuals or families who incurred a necessary expense or serious need in the major disaster area may be eligible for assistance under this section without regard to their residency in the major disaster area or within the State in which the major disaster had been declared.

(iv) States shall determine whether individuals or families otherwise eligible for assistance under this section must obtain flood insurance, as provided by the Flood Disaster Protection Act of 1973 (Public Law 93-234), in order to reduce future avoidable claims in the Federal or State governments for disaster assistance. After a determination that flood insurance is required, and after disbursement of a grant, States shall require the grant recipient to provide proof of purchase of the required flood insurance. In this regard, the initial premium for flood insurance, not to exceed $25, shall be considered a necessary expense.

(2) *Eligible categories.* Assistance under this section may be made available to meet necessary expenses or serious needs by providing essential items or services in the categories set forth below:

(i) Medical or dental.

(ii) Housing. With respect to private owner-occupied primary residences (including mobile homes), grants may be authorized to:

(A) Repair, replace, rebuild;

(B) Provide access;

(C) Clean or make sanitary;

(D) Remove debris from such residences. Any debris removal will be limited to the minimum required to remove health hazards or protect against additional damage to the residence;

(E) Provide minimum protective measures required to protect such residences against the immediate threat of damage; and

(F) Move mobile homes to prevent or reduce damage.

(iii) Personal Property.

(A) Clothing;

(B) Household items, furnishings, or appliances;

(C) Tools, specialized or protective clothing or equipment which are essential to or a condition of a wage earner's employment;

(D) Repair, clean or sanitize any eligible personal property item; and

(E) Move and store to prevent or reduce damage, including move and store unoccupied mobile homes.

(iv) Transportation.

(A) Grants may be authorized to provide transportation by public conveyance provided that the requirement for this transportation was the direct result of the disaster.

(B) Grants may be authorized to provide private transportation, if the requirement for this transportation was the direct result of the disaster, and transportation by public conveyance is inadequate or unavailable.

(v) Funeral expenses. Grants for funeral expenses will be based on minimum expenditures for interment or cremation.

(vi) Rental accommodations, to include motel, hotel, and other temporary accommodations.

(3) *Ineligible categories.* Assistance under this section will not be made available for any item or service in the following categories:

(i) Business losses, including farm businesses.

(ii) Improvements or additions to real or personal property.

(iii) Landscaping.

(iv) Real or personal property used exclusively for recreation.

(v) Financial obligations incurred prior to the disaster.

(vi) Any necessary expense or serious need or portion thereof for which assistance was available from other means but was refused by the individual or family.

(4) *Other categories.* Should the State determine that an individual or family has an expense or need not specifically identified as eligible, the State shall provide a factual summary to the Regional Director, and request a determination.

(d) *State request to participate in the Individual and Family Grant Program.* In order to make assistance under this section available to disaster victims, the Governor must file with the appropriate Regional Director a request which includes the following:

(1) A certification that assistance under the Act and from other means is insufficient to meet necessary expenses or serious needs of disaster victims.

(2) An estimate of the number of disaster victims who have necessary expenses or serious needs and the basis for such estimate.

(3) An estimate or the total Federal grant as identified in paragraph (f)(1) of this section.

(4) A commitment to implement an administrative plan as identified in paragraph (e) of this section.

(5) A commitment to identify specifically in the accounts of the State all Federal and State funds committed to the grant program.

(6) A commitment to maintain close coordination with the Regional Director and provide him with such reports as he may require in order to insure proper administration, including avoidance of duplication of benefits and timely availability of Federal funds.

(7) A commitment to implement the grant program throughout the major disaster area designated by the Administrator.

(8) A certification that the State will pay its 25 percent share of all grants to individuals or families. If the State is unable immediately to pay its 25 percent share, the State may request an advance of Federal funds as identified in paragraph (h) of this section.

(e) *State Administrative Plan.* (1) The State will develop a plan for the administration of the Individual and Family Grant Program that includes, but is not limited to:

(i) Assignment of grant program responsibilities to State officials or agencies.

(ii) Methods and procedures for notification of potential applicants to include the publication of pertinent time limitations.

(iii) Provisions for accepting applications, including the establishment of local application centers.

(iv) Administrative procedures for:

(A) Verifying necessary expenses and serious needs.

(B) Determining applicant eligibility and grant amounts by a panel of at least three State employees.

(C) Determining the need for flood insurance.

(D) Processing applicant appeals.

(E) Disbursing grants.

(F) Verifying grant expenditures.

(G) Recovering grant funds expended for unauthorized items or services, or grant funds in excess of a grant recipient's expenses or needs.

(H) Conducting a State audit.

(I) Providing controls to insure that grant recipients expend funds in a timely manner for those items and services specified by the State. Grant funds that have not been expended prior to Federal audit, and grant funds that have not been expended for their specified purposes and are not recovered by the State, may be subject to suspension.

(v) National eligibility criteria as defined in paragraph (c) of this section.

(vi) Provisions for compliance with §§ 2205.13, 2205.15, and 2205.18 of these regulations and the Flood Disaster Protection Act of 1973 (Pub. L. 93-234, 87 Stat. 975) and the Federal Insurance Administration Regulations, 24 CFR Parts 1909 et. seq.

(2) The Governor or his representative may request the Regional Director to provide technical assistance in the preparation of an administrative plan to implement the Individual and Family Grant Program.

(3) The Regional Director will review the State administrative plan for each disaster for which assistance is requested under this section to insure that the requirements of these regulations have been met. The Regional Director may defer approval of a State administrative plan until any deficiencies have been corrected.

(4) The State administrative plan is to be made part of the State's emergency plan, as described in § 2205.4 of these regulations.

(f) *Limitation on grants.* (1) The Federal grant under this part shall be equal to 75 percent of the actual cost of meeting necessary expenses or serious needs of individuals and families, plus State administrative expenses not to exceed 3 percent of the total Federal grant, and shall be made only on condition that the remaining 25 percent of such actual cost is paid to such individuals and families from funds made available by the affected State.

(2) An individual or family shall not receive a grant or grants under the provisions of this section aggregating more than $5,000 with respect to any one major disaster. Such aggregate amount shall include both the Federal and State share of the grant.

(g) *Time limitations.* (1) In the administration of the Individual and Family Grant Program authorized under section 408 of the Act, the following time limitations will be applicable except as described in paragraph (g)(2) of this section:

(i) Should the Governor decide to request assistance under this section, he must submit such request no later than seven days following the date on which the major disaster was declared and in the manner set forth in paragraph (d) of this section.

(ii) The State will accept applications from individuals or families for a period of 60 days following the date on which the major disaster was declared.

(iii) Any application filed after the 60-day period stated above must be reviewed by the State to determine whether the late filing was the result of extenuating circumstances or conditions beyond the control of the individual or family. If such conditions or circumstances are demonstrated, the State will determine that good cause existed for late filing and accept that application as though it had been filed on a timely basis; otherwise, the application will be rejected.

(iv) No application will be accepted by the State if it is filed more than 90 days following the date on which the major disaster was declared.

(v) All administrative activities, including the submission of final reports. State audits, and vouchers to the Regional Director, shall be completed by the State within 180 days following the date on which the major disaster was declared.

(2) The Regional Director may extend any time limitation set forth above for a period not to exceed 30 days. If all appeals to the State have been resolved and all grants disbursed, the Regional Director may further extend the 180-day time limitation contained in paragraph (g)(1)(v) above for a period not to exceed 90 days. The Administrator may further extend any of the above time limitations.

(h) *Advance of State share.* (1) If the State is immediately unable to pay its 25 percent share of the grants to be made under this section, the Governor may request that this amount be advanced by the Federal Government. Requests for such advances will be made to the Regional Director and will include the following:

(i) A certification that the State is immediately unable to pay its 25 percent share and an explanation of the reasons therefor.

(ii) A statement as to the specific actions taken or to be taken to overcome the inability to provide the State share, including a time schedule for such actions.

(iii) A commitment to repay the Federal advance at the time the State is able to do so.

(iv) An estimate of the total amount needed to meet the 25 percent State share.

(v) An agreement to return immediately upon discovery all Federal funds advanced to meet the State's 25 percent share which exceed actual requirements.

(2) Failure to repay the advance of the State share, in accordance with the time schedule in paragraph (h)(1)(ii) of this section, may result in the withholding by the Federal Government of subsequent advances under this section.

(3) Any advance of the State's share not repaid to the Federal Government by the repayment date established by the time schedule in accordance with paragraph (h)(1)(ii) of this section, may, at the discretion of the Administrator, be recovered by the offset of Federal funds to which the State would otherwise be entitled under other sections of this Act.

(i) *Approval—Authorization of Funds.* (1) The Regional Director may approve Federal assistance and authorize advances of funds under this section upon his determination that:

(i) All required certifications and commitments have been completed by the Governor;

(ii) The administrative plan provided by the State to implement the Individual and Family Grant Program meets the requirements of these regulations.

(2) The Regional Director may authorize Federal assistance based on his estimate of the amount required to meet the necessary expenses or serious needs of disaster victims.

(j) *Reimbursement to the State.* Reimbursement to the State of the Federal share of eligible costs will be on the basis of a voucher filed by the State and approved by the Regional Director.

(k) *Audits.* The State shall perform site audits on all claims in accordance with audit guidelines provided by the HUD Inspector General. All claims are subject to Federal audit.

NOTE.—Federal Disaster Assistance Administration has determined that this document does not contain a major proposal requiring preparation of an Inflation Impact Statement under Executive Order 11821 and OMB Circular A-107.

(Sec. 408, Pub. L. 93-288, 88 Stat. 156 (42 U.S.C. 5178), EO 11795 as amended by EO 11910, 39 FR 25939, Delegation of Authority, 39 FR 26227.)

THOMAS P. DUNNE,
Administrator, Federal Disaster Assistance Administration.

Office of Assistant Secretary for Fair Housing and Equal Opportunity

[24 CFR Part 108]

[Docket No. R-77-447]

COMPLIANCE PROCEDURES FOR AFFIRMATIVE FAIR HOUSING MARKETING

Notice of Proposed Rulemaking

It is proposed to implement the Department's Affirmative Fair Housing Marketing (AFHM) Regulations, 24 CFR 200.600 et seq., by establishing a comprehensive compliance procedure, which would provide all participants in the Department's housing programs that are required to submit AFHM plans advance information as to Departmental procedure to insure compliance with AFHM Regulations. At the same time, it would insure nation-wide uniformity in obtaining compliance. The compliance procedures outlined do not represent a significant change in Departmental policy in effectuating compliance in those Departmental programs subject to Executive Order 11063, but present the specific procedural steps in an orderly fashion. A show cause procedure is provided in order that a participant in the Department's housing programs subject to the Regulations has opportunity to show good faith efforts to comply with its AFHM plans when there is information which indicates there may be a violation of the AFHM regulation prior to conducting a compliance review. The nature of the compliance review is specified as well as procedures for conducting the review. Since noncompliance with the AFHM regulation may involve a violation of Executive Order 11063 when a complaint or a compliance review of the AFHM plan indicates possible violation of the Executive Order a comprehensive compliance review may also be undertaken to determine compliance with requirements of that Order. Where appropriate, efforts will be undertaken to resolve the matter by conciliation. In cases where these efforts fail the regulation of sanctions. Failure of an individual tion sanctions. Failure of an individual to respond to the HUD informal efforts does not prejudice the individual's rights at later stages of enforcement.

Interested persons are invited to comment on this proposed regulation by furnishing such written comments, data, and recommendations as they may desire. All such materials should be filed with the Rules Docket Clerk, Office of the Secretary, Room 10141, Department of Housing and Urban Development, 451 7th Street SW., Washington, D.C. 20410. Comments received on or before February 28, 1977, will be considered before adoption of a final regulation in this matter. Copies of all comments will be available for public inspection at the above address during regular business hours, both before and after the close of the comment period.

The Department has determined that this proposed regulation will not have an environmental impact, as defined in HUD Handbook 1390.1. The finding of inapplicability may be inspected at the above address.

NOTE.—It is hereby certified that the economic and inflation impacts of the proposed regulation have been carefully evaluated in accordance with OMB Circular No. A-107.

Accordingly, it is proposed to amend Subchapter A of Chapter 1 of Title 24 of the Code of Federal Regulations by establishing a new Part 108 to read as follows:

PART 108—COMPLIANCE PROCEDURES FOR AFFIRMATIVE FAIR HOUSING MARKETING

Sec.

108.1 Purpose and application.
108.2 Authority.
108.3 Responsibility.
108.4 Monitoring and technical assistance.
108.5 Show Cause proceeding to determine compliance.
108.6 Compliance reviews.
108.7 Conciliation conference.
108.8 Sanctions.
108.9 Application of sanctions.
108.10 Effective date.

AUTHORITY: Sec. 7(d) Depart. of Hud Act, 42 U.S.C. 3535(d), E.O. 11063, 27 FR 11527 and Title VIII of the Civil Rights Act of 1968, Pub. L. 90-284, 42 U.S.C. 3608, as amended by the Housing and Community Development Act of 1974, Pub. L. 93-383.

§ 108.1 Purpose and application.

(a) The primary purpose of this regulation is to establish procedures for determining whether or not an applicant's actions are in compliance with its approved Affirmative Fair Housing Marketing (AFHM) Plan and the AFHM Regulations (Subpart M of Part 200 of this title).

(b) These regulations apply to all subsidized and unsubsidized housing programs administered by the Federal Housing Administration, and the Department of Housing and Urban Development as defined in paragraph (c) of this section and all other persons required to submit AFHM plans in Department Programs.

(c) The term "Applicant" includes:

(1) Sponsors and developers (both at the time of application for assistance from the Department and after the assistance is granted) whose application is approved for development or rehabilitation of subdivisions, multifamily projects and moble home parks of five or more lots, units or spaces, or of dwelling units, when the applicants' participation in FHA housing programs had exceeded or would thereby exceed development of five or more such dwelling units during the year preceding the application, except that there shall not be included in a determination of the number of dwelling units developed by an applicant those in which a single family dwelling is constructed or rehabilitated for occupancy by a mortgagor on property owned by the mortgagor and in which the applicant had no interest prior to entering into the contract for construction or rehabilitation; and (2) all other persons required to submit AFHM plans in Department Programs.

§ 108.2 Authority.

This regulation is issued pursuant to the authority to issue regulations granted to the Secretary by section 7(d) of the Department of Housing and Urban Development Act of 1965, 42 U.S.C. 3535 (d), Executive Order 11063, 27 FR 11527, and Title VIII of the Civil Rights Act of 1968, Public Law 90-284, 42 U.S.C. 3608, as amended by the Housing and Community Development Act of 1974, Public Law 93-383.

§ 108.3 Responsibility.

The Assistant Regional Administrator for Fair Housing and Equal Opportunity (ARA for FH and EO) shall be responsible for determining whether or not an applicant's actions are in compliance with its approved AFHM plan and the AFHM regulations. Compliance determinations shall be based on whether or not the applicant has made good faith efforts

to fulfill the provisions of its approved plan and is in compliance with the regulations, not on whether implementation of the plan has resulted in achievement of the anticipated results.

§ 108.4 Monitoring and technical assistance.

(a) *Submission of Reports.* The applicant shall submit sales or occupancy reports to the Area or Insuring Office as required.

(b) *Responsibility of Director of E.O. and the E.O. Specialist.* The Area or Insuring Office as appropriate is responsible for monitoring the applicant's AFHM plan, providing technical assistance to the applicant in the preparation or modification of the plan, and reviewing applicant monthly sales and occupancy reports. Copies of such reports shall be forwarded to the ARA for FH and EO by the Area or Insuring Office as requested.

(c) *Review of Applicants' Reports.* When the monthly sales or occupancy reports show that 20% of the units covered by the affirmative marketing plan have been sold or rented, the report shall be evaluated by the Area or Insuring Office to determine if the applicant is taking affirmative action to ensure that the terms of the plan are being implemented in such a way as to attract buyers or tenants of all minority and majority groups. Such evaluations shall continue to be made on a monthly basis. If a determination is made that the plan should be modified in order to accomplish the purposes of the AFHM regulation, the Department shall discuss with the applicant any needed changes.

(d) *Failure of Applicant to File Monthly Reports.* If the applicant fails to file a required monthly report, the applicant shall be notified in writing that if the delinquent report is not submitted to the Area/Insuring Office within 10 days from date of receipt of the notice, the ARA for FH and EO will be requested to conduct a compliance review of the applicant's affirmative fair housing marketing practices.

(e) *Referral to ARA for FH and EO for Compliance Action.* If an applicant fails within 10 days of receipt of notice under paragraph (d) of this section to submit a required monthly sales or occupancy report, or if it appears that an applicant has not complied with its plan or in any other way is in noncompliance with the AFHM regulation, the matter shall be referred with appropriate documentation to the ARA for FH and EO for compliance action.

§ 108.5 Show cause proceeding to determine compliance.

(a) *General.* Whenever the ARA for FH and EO has received information from an Area/Insuring Office, complaint, or other source which indicates that an applicant may be in violation of its AFHM plan or the APHM regulation, he shall initiate Show Cause Proceedings, unless the ARA for FH or EO determines that an immediate compliance review of the applicant's affirmative marketing practices is necessary.

(b) *Notice.*—To initiate a Show Cause Proceeding, the ARA for FH and EO shall issue a written notice to the applicant requiring the applicant to show cause within thirty (30) days why enforcement action or other appropriate action to ensure compliance should not be instituted. The notice shall be sent to the last known address of the applicant, by certified mail, return receipt requested. The notice shall request the applicant to attend a meeting for the purpose of reviewing the AFHM plan and its implementation, at a designated time, date, and location convenience to all parties and shall request the applicant to bring specific documents and records, or furnish other relevant information concerning its compliance, including but not limited to:

(1) Copies or scripts or all advertising in the SMSA or housing market area, as appropriate, including newspaper, radio and television advertising, and a photograph of any sale or rental sign at the site of construction;

(2) Copies of brochures and other printed material used in connection with sales or rentals;

(3) Evidence of outreach to community organizations;

(4) Any other evidence of affirmative outreach to groups which are not likely to apply for the subject housing;

(5) Evidence of instructions to employees with respect to company policy of nondiscrimination in housing, and data on racial composition of staff;

(6) Description of training conducted with sales/rental staff; and

(7) Evidence of nondiscriminatory hiring and recruiting policies for staff engaged in the sale or rental of properties.

The documentation should show what activities the applicant has engaged in to ensure that it has acted affirmatively to attract buyers and renters regardless of sex of all minority and majority groups.

(c) *The Show Cause Meeting.* The show cause meeting shall be conducted by the ARA for FH and EO or designee. Parties to the matters under consideration may be represented by counsel and shall have a fair opportunity to present any relevant material. Formal rules of evidence will not apply to such proceedings. Minutes of the meeting shall be recorded.

(d) *Resolution of Matters.* If the documentation produced at the show cause meeting shows no violation of the AFHM regulations and that the applicant is in good faith complying with its approved affirmative marketing plan, the ARA for FH and EO shall so inform the applicant in writing. If the documentation indicates a possible failure to comply with the AFHM plan or the AFHM regulations, and the matter cannot be resolved informally, the ARA for FH and EO shall so notify the applicant no later than twenty (20) days after the date of the show cause meeting, in writing by certified mail, return receipt requested, and shall advise the applicant that the Department will conduct a comprehensive compliance review. The compliance review shall be conducted to determine whether the applicant has complied with the provisions of Executive Order 11063, Title VIII of the Civil Rights Act of 1968, and the AFHM regulations in conjunction with the applicant's specific AFHM plan previously approved by HUD.

§ 108.6 Compliance reviews.

(a) *General.* All compliance reviews shall be conducted by the ARA for FH and EO or designee. Complaints alleging a violation(s) of the AFHM regulations or a failure to comply with an affirmative marketing plan ascertained in the absence of a complaint or as in § 108.5 (d) shall be referred immediately to the ARA for FH and EO. The Assistant Regional Administrator for Housing shall be notified of all alleged violations of the AFHM regulations or a failure to comply with an AFHM plan, as appropriate.

(b) *Conducting Compliance Reviews.* The ARA for FH and EO or designee, shall conduct a compliance review. In the case of multi-family projects the ARA/EO or designee shall conduct such reviews periodically throughout the life of the mortgage. A comprehensive review of the applicant's compliance with all equal opportunity requirements may also be periodically conducted by the ARA for FH and EO or designee.

(c) *Nature of Compliance Reviews.* The purpose of a compliance review is to determine whether the applicant is in compliance with the Department's AFHM Regulations and is conforming to its approved affirmative marketing plan. The applicant shall be given at least five (5) days notice of the time set for any compliance review and the place or places for such review. A review will be made of the applicant's sales and rental practices, including practices in soliciting buyers and tenants, determining eligibility, selecting and rejecting buyers and realities and in concluding sales and rental transactions. A review will also be made of programs to attract majority and minority buyers and renters, including use of advertising media, brochures and pamphlets and conformance with the Department's Fair Housing Poster Regulation, Part 110 of this title, and the Advertising Guidelines for fair housing, 37 F.R. 6700. Occupancy data, in relation to the size and location of units, services provided and prices and rental ranges, broken down on a racial basis will also be reviewed, as well as staff engaged in the sale of rental properties.

§ 108.7 Conciliation conference.

Following a compliance review, the ARA for FH and EO or designee shall prepare a report, including recommendations for specific action to be taken by the applicant where appropriate. The applicant shall receive a summary of the findings, and the ARA for FH and EO shall then attempt to resolve the matter by conciliation, when the findings indicate the applicant is in noncompliance. The ARA for Housing shall also receive a copy of the summary of the findings. The resolution of the matter shall be made in writing and shall be signed by the applicant and the ARA for Fair Housing and Equal Opportunity. A copy of the conciliation agreement entered into shall be provided to the ARA for Housing and the Area or Insuring Office Director as appropriate.

§ 108.8 Sanctions.

When conciliation fails and there is a failure or refusal to comply and give satisfactory assurance of future compliance with the requirements of the AFHM regulations, shall be a proper basis for applying sanctions. Such sanctions may include those authorized by laws, regulations, agreements, rules of policies governing the program pursuant to which the application was made, including but not limited to denial of further participation in Departmental programs in accordance with Part 24 of this title—Debarment, Suspension, and Ineligibility of Contractors and Grantees, and referral to the Department of Justice for suit by the United States for Injunctive or other appropriate relief.

§ 108.9 Application of sanctions.

(a) *General.* In cases where the applicant declined the opportunity to conciliate or conciliation failed, the Assistant Secretary for Fair Housing and Equal Opportunity or designee will issue to the applicant an order to show cause within thirty (30) days why sanctions should not be imposed pursuant to Sec. 200.635 of the AFHM regulations or Sec. 302 of Executive Order 11063. The notice shall be sent to the last known address of the applicant, by certified mail, return receipt requested. The notice will advise the applicant of the right to submit information and relevant data indicating compliance with the requirements of the Affirmative Fair Housing Marketing Regulations, 24 CFR.200.600, Executive Order 11063, 27 FR 11527, the Poster Regulation, 37 FR 16540 and the Advertising Guidelines, 37 FR 6700, and other affirmative marketing requirements applicable to the HUD Programs or activity. Further, the applicant will be offered the opportunity to be present at a meeting scheduled 30 days after the date of the notice, in order to submit any other evidence showing such compliance. The date, place and time of the scheduled meeting will be included in the notice.

(b) *The Show Cause Meeting to Impose Sanctions.* The show cause meeting shall be conducted by the ARA for FH and EO or the ARA's designee. Parties to the matters under consideration may be represented by counsel and shall have a fair opportunity to present any relevant material. Minutes of the meeting shall be recorded and made a matter of record.

(d) *Resolution of the Matters.* If it is found that the applicant is not in compliance the entire file in the matter shall be referred to the Assistant Secretary for FH and EO to make a determination whether or not to initiate further action to complete the imposition of sanctions. The applicant shall be notified of such action by certified mail, return receipt requested and copies of this notice shall be sent to the appropriate Area/Insuring Office Director, the Regional Administrator, the ARA for the appropriate program and the appropriate Assistant Secretary.

If it is found that the applicant is in compliance all parties concerned shall be notified.

Issued at Washington, D.C., January 21, 1977.

JOHN B. RHINELANDER,
Under Secretary of Housing and Urban Development.

[FR Doc.77-2707 Filed 1-26-77;8:45 am]

Office of Assistant Secretary for Housing—Federal Housing Commissioner

[24 CFR Part 891]

[Docket No. R-77-388]

LOW INCOME HOUSING

Review of Applications for Housing Assistance; Allocation of Housing Assistance Funds

On August 23, 1976, the Department of Housing and Urban Development (HUD) published at 41 FR 35660 a final rule amending Chapter VIII of Title 24 of the Code of Federal Regulations by adding a new Part 891, "Review of Applications for Housing Assistance; Allocation of Housing Assistance Funds." Subpart E of Part 891 contains the policies and procedures governing supplemental allocations of contract authority for use in jurisdictions participating in an Areawide Housing Opportunity Plan selected as the basis for the award of supplemental allocations in accordance with this Subpart. (Subpart E previously had been published for final effect on June 23, 1976, at 41 FR 25983.)

Notice is hereby given that the Department proposes to amend § 891.102 of Subpart A (Definitions) and selected portions of Subpart E. The purpose of the revisions is three-fold: (1) to make the objectives of the Areawide Housing Opportunity Plan effort more explicit (2) to clarify and to revise the requirements for selection of Areawide Housing Opportunity Plans to serve as the basis for award of supplemental allocations of contract authority and (3) to provide for Plans approved by HUD to serve as the primary basis for the distribution of housing assistance funds otherwise allocated by HUD to the area served by the APO.

As prescribed in these regulations, an Areawide Housing Opportunity Plan (Plan) is a plan developed by an areawide planning organization (APO) which addresses areawide housing assistance needs and goals and allocates lower income housing assistance in such a manner as to provide for a broader geographical choice of housing opportunities for lower income households outside areas and jurisdictions containing undue concentrations of low income and minority households. For a Plan to be acceptable, at least 50 percent of the jurisdictions in the area served by the APO, representing at least 75 percent of the population, must have reached agreement with the APO on goals for the distribution of housing assistance and on measures for the implementation of the Plan. In addition, the housing assistance goals contained in Housing Assistance Plans (HAPs) prepared by or applicable to participating jurisdiction may not be less than or inconsistent with the goals identified in the Plan.

The proposed regulations would establish two potential uses for Plans submitted to HUD for review. First, a Plan determined by HUD to have met the general criteria in § 891.502 would be designated by the Secretary as an "Approved Areawide Housing Opportunity Plan." Under this provision, the aggregate amount of contract authority otherwise allocated in accordance with Subpart D of Part 891 to jurisdictions within the area served by the APO of Part 891 to jurisdiction within the area served by the APO would be disturbed, to the extent practicable, in accordance with the Approved Plan. Although the total amount of housing assistance funds allocated to jurisdictions in the area would still be made in accordance with Subpart D, the program mix and geographical distribution of contract authority would be decided jointly by the HUD Field Office Director and the APO and would reflect the Approved Plan. Because the goals in HAPs and the Plan cannot be inconsistent, an allocation of contract authority by HUD according to the regional Plan will be consistent with the HAPS of Participating Jurisdictions. It is hoped that this procedure will enable HUD to be more responsive to local and regional priorities and goals.

Second, Plans which meet the general criteria in § 891.502 would be considered by the Secretary for selection as the basis for supplemental allocations of contract authority to participating jurisdictions. Additional criteria contained in § 891.503 would identify plans for priority consideration from among acceptable plans. HUD has determined that supplemental allocations pursuant to Subpart E can only be made to participating jurisdictions which are covered by a HAP. However, this does not preclude a jurisdiction which is not covered by a HAP from being considered as a participating jurisdiction through agreement on numerical goals and on measures for the implementation of the Plan.

The specific changes proposed to be made are as follows:

1. The definitions of "Areawide Housing Opportunity Plan" (Plan) and "Participating Jurisdiction" contained in § 891.102 of Subpart A have been expanded to more clearly define a Plan and the responsibilities of Participating Jurisdictions. An "Approved Areawide Housing Opportunity Plan" is defined.

2. Section 891.501(a) has been amended to specifically include as part of the role of the APO participation in the determination of the distribution of the supplemental allocation of housing assistance among Participating Jurisdictions.

3. Section 891.501(c) has been revised to limit the amount of supplemental allocations provided on the basis of a Plan selected as the basis for funding. The range of the supplemental allocation has been expanded to between 10 and 50 percent of the initial allocation of contract authority made available in accordance with § 891.404 of Subpart D to Participating Jurisdictions under the applicable housing assistance program(s). In addition, the amount of supplemental contract authority which may be awarded on the basis of any single Plan is limited to twenty percent of the total amount of supplemental contract authority made available by the Secretary for supplemental allocations under Subpart E. The total amount of contract authority which may be awarded on the basis of previously selected Plans is limited to 66⅔ percent of the total supplemental contract authority made available by the Secretary. These proposed revisions are responsive to the need to ensure that Plans which have not been previously selected are given an opportunity to compete with previously selected Plans on an equitable basis and that no single Plan receives a disproportionate share of the contract authority available for supplemental allocations under Subpart E.

4. The needs assessment required in § 891.502(a)(1) has been revised so that only an areawide assessment is required.

5. Section 891.502(a)(2), (formerly § 891.502(a)(4)) has been expanded to identify factors which shall be considered in an allocation procedure. This elaboration is deemed necessary to clarify the objectives of Subpart E.

6. Expression of goals has been made more specific. Section 891.502(a)(3), (formerly § 891.502(a)(2)), has been revised to permit either numerical or percentage housing goals, but requires them on a one and a three-year basis. They must also be specific, at a minimum, as to household types.

7. Section 891.502(a)(4), (formerly § 891.502(3)), has been expanded to include additional examples of acceptable evidence of agreement between the APO and Participating Jurisdictions and to indicate that agreement on implementation measures must be part of this agreement.

8. In response to confusion over the method by which Participating Jurisdictions are to be counted, § 891.502(b)(1) has been expanded to define those circumstances in which a jurisdiction within a county which is a Participating Jurisdiction may be counted as a Participating Jurisdiction.

9. Several additional criteria for priority plans have been added to § 891.503. Separate consideration is now given to APOs which participate in providing housing information and those which provide referrals, counseling or related assistance. Special consideration will also be given to areas without residency preferences for Low Income Housing and to other activities developed or administered by the APO which address the objectives of the Plan.

10. Section 891.503 requires that an APO whose Plan has been previously selected must demonstrate significant progress in addressing at least three priority criteria.

11. The identification of the required elements of requests for supplemental allocations in § 891.504 has been expanded to ensure that the request is responsive to each of the criteria for acceptable and priority Plans and that the necessary information is provided for HUD review.

12. Section 891.505 has been expanded to provide for a separate discussion of the basis for selection of Plans to receive supplemental funding and the determination of the amount of supplemental contract authority to be awarded on the basis of these Plans.

13. A new § 891.506 has been added to provide for special recognition by the Secretary of Plans which meet the general criteria in § 891.502. To the extent practicable, these Plans shall serve as the primary basis for the allocation of any housing assistance provided by HUD in accordance with Subpart D of Part 891. This recognition represents an additional commitment of support to regional strategies which address the housing assistance needs of lower income persons.

14. Section 891.507 has been added to provide for the submission of a report to HUD on the implementation and impact of selected Plans.

Interested persons are invited to participate in the making of these proposed rules by submitting such written comments or suggestions as they may desire. Communications should identify the subject matter by the above title and should be submitted to the Rules Docket Clerk, Department of Housing and Urban Development, 451 Seventh Street, S.W., Room 10141, Washington, D.C. 20410. All communications received on or before February 25, 1977 will be considered before action is taken on these proposals.

Comments received after that date shall be considered only as time permits, or shall be considered as petitions for future rulemaking.

The Department has determined that these regulations do not constitute a major Federal action significantly affecting the quality of human environment. Accordingly, a finding of inapplicability of environmental impact has been prepared and is available for inspection by the public during regular business hours in Room 10141, 451 Seventh Street, S.W., Washington, D.C.

This notice of proposed rulemaking is issued under the authority of Section 7(d), Department of HUD Act, 42 U.S.C. 3535(d).

Accordingly, it is proposed to amend Subparts A and E of Part 891, Chapter VIII, 24 CFR, as follows:

1. Section 891.102 of Subpart A is amended by revising paragraph (c), adding a new paragraph (d) and by redesignating paragraphs (d) through (o) as (e) through (p) to read as follows:

§ 891.102 Definitions.

* * * * *

(c) *Approved Areawide Housing Opportunity Plan (Approved Plan).* An Areawide Housing Opportunity Plan approved by the Secretary in accordance with § 891.506 to serve as the basis for allocations under § 891.404(a)(3).

(d) *Areawide Housing Opportunity Plan (Plan).* A plan, developed by an Areawide Planning Organization, which addresses areawide housing assistance needs and goals and contains a program which encourages, facilitates, and demonstrably provides for a broader geographical choice of housing opportunities for lower income households outside of areas and jurisdictions containing undue concentrations of low income or minority households.

(l) *Participating jurisdiction.* A jurisdiction, whether or not it is covered by a HAP (including counties and other local governments), with which the APO has reached agreement on numerical or percentage goals for the distribution of lower income housing assistance and on measures for the implementation of the Plan.

* * * * * *

2. By revising Subpart E to read as follows:

Subpart E—Supplemental Allocations Based Upon Areawide Housing Opportunity Plans

Sec.
891.501 Applicability and scope.
891.502 General criteria for acceptable plans.
891.503 Criteria for priority plans.
891.504 Contents of requests for supplemental allocations.
891.505 Review and selection of plans.
891.506 Reporting requirements.
891.507 Approval of plans as basis of allocations under § 891.404(a)(3).

AUTHORITY: Sec. 7(d) of the Department of HUD Act, (42 U.S.C. 3535(d)).

Subpart E—Supplemental Allocations Based Upon Areawide Housing Opportunity Plans

§ 891.501 Applicability and scope.

(a)(1) This Subpart describes the policies and procedures governing (i) the review and selection of Areawide Housing Opportunity Plans, as defined in § 891.102 of Subpart A, as the basis for supplemental allocations of contract and budget authority for use in jurisdictions participating in such a Plan; and (ii) approval of such plans to serve as the primary basis for the allocation of any housing assistance provided by HUD pursuant to Subpart D of Part 891 (hereinafter "Subpart D").

(2) The role of the APO under the provisions of this Subpart includes, but need not be limited to, (i) development of the Plan, including the needs assessment, the allocation procedures, implementation strategies and other components described in §§ 891.502 and 891.503; (ii) submission of requests to the Secretary for supplemental allocations in accordance with § 891.504; and (iii) participation in the determination of the distribution of the supplemental allocation of housing assistance among Participating Jurisdictions covered by a HAP in accordance with § 891.505(f).

(b) The Secretary, after considering all the pertinent factors under section 213(d) of the Housing and Community Development Act of 1974, including such adjustments as may be necessary to assist in carrying out activities designed to meet lower income housing needs as described in approved HAPs, will determine the aggregate amount of contract authority to be used for supplemental allocations and from which housing assistance program(s) contract authority will be made available for supplemental allocations in any fiscal year for which such allocations will be made.

(c) The Secretary shall announce, through a Notice in the FEDERAL REGISTER, the amount of contract authority to be made available for supplemental allocations during any fiscal year; the housing assistance program(s) under which these allocations shall be made; any additional or special criteria which may be established for specific housing assistance programs; and the time, closing date, and address for submission of requests for the supplemental allocations. The closing date for submission of requests shall not be sooner than 30 calendar days after publication of the Notice in the FEDERAL REGISTER.

(d) In order to be approved as a basis for a supplemental allocation under this Subpart, a Plan must meet the general criteria for acceptability set forth in § 891.502. Priority shall be given to those Plans which also meet the greatest number of the priority criteria set forth in § 891.503.

(e)(1) The amount of the supplemental allocation provided on the basis of a Plan selected for funding in a single fiscal year under this Subpart shall not be less than 10 percent nor more than 50 percent of the initial allocation of contract authority to the Participating Jurisdictions in accordance with § 891.404 of Subpart D during the same fiscal year in which the request specified in § 891.504 is submitted to HUD.

(2) The total amount of supplemental contract authority which may be awarded on the basis of any single Plan shall not exceed twenty percent of the supplemental contract authority for the applicable housing assistance program available in that fiscal year in accordance with § 891.501(b).

(3) The total amount of supplemental contract authority awarded on the basis of Plans (or an earlier version of a selected Plan) which have been selected during any previous fiscal year for award of supplemental allocations in accordance with this Subpart shall not exceed 66⅔ percent of the total amount of the supplemental contract authority for the applicable housing assistance program unless, the Secretary determines that there are no other Plans which meet the general criteria for acceptable plans set forth in § 891.502 and at least two of the criteria for priority plans set forth in § 891.503.

§ 891.502 General criteria for acceptable plans.

(a) In addition to any special criteria in the Notice published pursuant to § 891.501(c), a plan, to be acceptable, shall be a program for allocating housing assistance among jurisdictions in the area served by the APO which encourages, facilitates, and demonstrably provides for a broader geographical choice of housing opportunities than is presently available for lower income households outside areas and jurisdictions containing undue concentrations of low income or minority households. The Plan shall contain, but need not be limited to, the following elements:

(1) An assessment, based upon the most reliable and generally available uniform data base, of the housing assistance needs of lower income households (including households displaced or to be displaced by governmental action) on an areawide basis. This assessment shall indicate housing assistance needs by (i) household type (lower income households which are elderly or handicapped; large families; and other families), (ii) present form of housing tenure (owner and renter), (iii) female heads of households and (iv) minority households.

(2) A procedure for allocating housing assistance (whether or not provided by HUD) among jurisdictions within the area served by the APO (as a minimum, by county and for each jurisdiction of over 50,000 population) in accordance with the Plan and the objectives of this Subpart. The procedure shall consider the assessment of needs conducted in accordance with § 891.502(a)(1), the Housing Assistance Plans of jurisdictions in the area served by the APO, and any regional community development, growth, land use, and environmental policies and objectives which have been adopted or are being developed by the APO. In addition, the procedure shall, as a minimum, explicitly take into account the following factors:

(i) Present and potential areas of undue concentration of low income and minority households which have been identified in approved HAPs of Participating Jurisdictions and other data available to the APO.

(ii) The locations of assisted housing and jurisdictions with undue concentrations of assisted housing.

(iii) The present or potential capacity of each jurisdiction to accommodate assisted housing.

(iv) Present and projected (for at least three years) regional population and employment data or patterns, with particular emphasis on the data and patterns applicable to lower income persons.

(v) The needs of lower income households which are (A) large families, (B) minority households and (C) female heads of households.

The allocation procedure included in the Plan shall be designed to ensure that the distribution of housing assistance in accordance with the procedure will have a demonstrable impact in increasing the geographical choice of housing opportunities for lower income households outside areas and jurisdictions containing undue concentrations of low income or minority households throughout the area served by the APO.

(3) Numerical or percentage goals, on an annual and on a 3-year basis, by type of assistance and source of funds, for the distribution of lower income housing assistance (whether or not provided by HUD) to each Participating Jurisdiction which address the needs identified in § 891.502(a)(1) and which have been derived from the allocation procedure. The goals identified in HAPs prepared by or applicable to Participating Jurisdictions may not be less than or inconsistent with the goals identified in the Plan. The numerical or percentage goals shall, as a minimum, be specific as to household type (lower income households which are elderly or handicapped; large families; and other families).

(4) Evidence of agreement between the APO and each Participating Jurisdiction on the goals in paragraph (a)(3) of this section for the distribution of lower income housing assistance among Participating Jurisdictions and of agreement on measures for the implementation of the Plan in accordance with the allocation under paragraph (a)(2) of this section. This evidence may include individual written agreements or other confirmation from the Chief Executive Officer of the Participating Jurisdiction, including confirmation of the consistency of the numerical goals in the HAP of each Participating Jurisdiction covered by a HAP with the goals in the Plan; or by an equivalent provision acceptable to the Secretary which demonstrates a commitment to the objectives and implementation measures of the Plan by each Participating Jurisdiction (e.g., through commitment of CDBG funds in support of implementation measures, removal of impediments to the provision of lower income housing, or cooperation in efforts to meet the Criteria for Priority Plans contained in § 891.503).

(5) Provisions for the Plan to be used in the review of all applications for community development, housing assistance, and other community assistance programs which are subject to review under OMB Circular A-95.

(b) The Plan also shall meet the following conditions:

(1) The Plan shall apply to and include as Participating Jurisdictions at least fifty percent of the jurisdictions in the area served by the APO, wherein Participating Jurisdictions represent at least seventy-five percent of the population of the area. For the purposes of counting Participating Jurisdictions, any jurisdiction under 50,000 population within a county which is a Participating Jurisdiction may be counted as a Participating Jurisdiction if (i) the county's agreement with the APO on numerical or percentage goals applies to that jurisdiction and the county has authority to provide or approve assisted housing in

that jurisdiction or the county has reached agreement on goals and implementation measures with that jurisdiction and the plan provides written evidence thereof; and (ii) the agreement between the county and the APO specifies general locations for assisted housing for those jurisdictions in the county which are not covered by a HAP.

(2) The Plan shall have been approved by the governing body of the APO.

(3) The APO shall demonstrate (i) that the plan can be implemented through activities undertaken or to be undertaken by the APO and Participating Jurisdictions and (ii) that an additional allocation of contract authority can be committed within a reasonable time in Participating Jurisdictions covered by a HAP in a manner consistent with the objectives of the Plan. Implementation activities may include, but need not be limited to, provision of technical assistance to PHAs or prospective developer/sponsors; coordination of outreach to eligible families and owners of properties potentially available for the section 8 Existing Housing Program; coordination of CDBG activities which support the objectives of the Plan; preparation of guides to assisted housing opportunities throughout the region served by the APO; development of specific mechanisms to facilitate interjurisdictional moves; or other coordinated administrative mechanisms to achieve the objectives of the plan and the numerical or percentage goals contained therein. Satisfactory evidence that an additional allocation of contract authority can be committed within a reasonable time may include, but is not limited to, (A) the availability of sites whose locations are consistent with the objectives of the Plan and which meet all applicable program standards and criteria (including site and neighborhood standards) in those Participating Jurisdictions in which the Plan proposes the use of newly-constructed or rehabilitated housing under the programs specified in § 891.101(a), and developer/sponsor-owner interest (e.g., as evidenced by responses to recent notifications of fund availability or invitations for housing applications under these programs); (B) the willingness and ability of established PHAs to administer or otherwise participate in the program in those Participating Jurisdictions in which the Plan proposes the use of a program specified in § 891.101(a) which requires the participation of a PHA, or actions taken by such Participating Jurisdictions to establish PHAs or to negotiate agreements with existing PHAs to perform this function; and (C) contract authority currently allocated to Participating Jurisdictions has been committed or satisfactory progress has been made in committing such contract authority and these Participating jurisdictions have been cooperative in removing or waiving impediments to the provision of lower income housing which have been imposed by local governments.

(4) The data used in making the assessment of housing assistance needs in § 891.502(a)(1) available for use by Participating Jurisdictions in preparing their HAPs.

§ 891.503 Criteria for priority plans.

(a) In order for an Acceptable Plan to qualify for priority consideration, it must meet one or more of the following criteria:

(1) The APO presently administers, funds, or participates in the provision of housing information to lower income and minority households desiring housing assistance outside areas and jurisdictions which contain undue concentrations of low income or minority households.

(2) The APO presently administers, funds, or participates in a program which provides referrals, counseling, and related assistance to lower income and minority households desiring housing assistance outside areas and jurisdictions which contain undue concentrations of low income or minority households.

(3) To the extent that the section 8 Existing Housing Program is used by Participating Jurisdictions, eligible families currently are permitted to use and are assisted in using their section 8 Certificates of Family Participation in two or more Participating Jurisdictions representing at least 50 percent of the area population (e.g., through use of an areawide, regional, or state public housing agency; through cooperation or other local agreements which provide for interjurisdictional use of Section 8 Certificates of Family Participation among Participating Jurisdictions; through elimination of residency preferences for issuance of section 8 Existing Certificates in Participating Jurisdictions which are participating in the section 8 Existing Housing Program; or other administrative mechanisms acceptable to the Secretary which facilitate interjurisdictional moves for households with section 8 Certificates of Family Participation among Participating Jurisdictions which are participating in the Section 8 Existing Housing Program).

(4) Residency preferences for admission to Low-Income housing have been eliminated in all Participating Jurisdictions by all PHAs administering a Low-Income Housing Program.

(5) The Area served by the APO is covered by a voluntary areawide affirmative fair housing marketing agreement with HUD which is currently operative or is covered by a similar program which can be demonstrated to achieve the same objective as a typical agreement with HUD.

(6) The Plan applies to and includes as Participating Jurisdictions 75 to 100 percent of the jurisdictions in the area served by the APO.

(7) Any other activity or activities, as developed or administered by the APO and acceptable to the Secretary, which encourages, facilitates and demonstrably increases the geographical choice of housing opportunities for lower income households outside areas and jurisdictions containing undue concentrations of low-income or minority households.

(b) APOs whose Plan has previously been selected as the basis for the award of supplemental allocations must meet or demonstrate significant progress in addressing at least three priority criteria to be considered for additional supplemental allocations.

§ 891.504 Contents of requests for supplemental allocations.

(a) Each request for supplemental allocation shall consist of:

(1) A letter of transmittal signed by the executive director of the APO submitting the request;

(2) An index of all documents and materials submitted with the request, including graphs, maps, or other illustrative material;

(3) A list of all jurisdictions within the area served by the APO, identification of Participating Jurisdictions, and identification of Participating Jurisdictions covered by HAPs;

(4) A description of the Plan, with specific references to the plan and other documentation, where appropriate, which responds to each of the acceptability criteria contained in § 891.502 and the priority criteria contained in § 891.503; provides examples of and discusses the Plan's conformity to these criteria; and explains how the Plan, with specific references to the allocation procedure (including allocation criteria and factors) and implementation measures, will provide a broader geographical choice of housing opportunities for lower income households outside areas and jurisdictions containing undue concentrations of low income or minority households;

(5) The amount of supplemental allocation requested and from which program(s);

(6) A proposal, consistent with the Plan, showing type of households to be assisted and type of housing proposed for the Participating Jurisdictions covered by a HAP, for using supplemental allocations of ten, thirty, and fifty percent of the initial allocation of contract authority from the applicable program(s) otherwise allocated to Participating Jurisdictions during the current fiscal year in accordance with § 891.404.

(7) Identification of any variations or inconsistencies between the goals of the Plan and the goals contained in the HAPs of Participating Jurisdictions, with a discussion of the reasons therefor;

(8) A discussion of the methodology and sources of data used in assessing areawide housing assistance needs under § 891.502(a)(1);

(9) Identification of areas containing undue concentrations of low income households and of minority households both for each Participating Jurisdiction and on an areawide basis;

(10) A narrative statement which indicates how the Plan, including implementation measures, addresses the needs of lower income households which are (i) large families, (ii) female headed and (iii) minority households within the area served by the APO;

(11) If supplemental allocations or other housing allocations pursuant to Subpart D have been awarded in any previous fiscal year on the basis of the plan or an earlier version of the plan, a report on the distribution of these allocations; activities undertaken in support of the plan, any known results in achieving the objectives of the plan and this Subpart, any expansion, upgrading or other refinement of the data used in any earlier version of the plan;

(12) For participating jurisdictions which are not covered by a HAP, the general locations proposed for assisted housing in accordance with the numerical or percentage goals in § 891.502(a)(3);

(13) A summary of the recent experience of participating jurisdictions with assisted housing programs, including the status and amount of housing assistance received—by program—by each participating jurisdiction during the current fiscal year and each of the previous two fiscal years;

(14) The impact of the plan on the distribution of housing assistance within the area served by the APO since approval of the plan, or an earlier version of the plan, by the governing body of the APO;

(15) A description of the citizen participation process used in the development of the plan in accordance with requirements under section 701 of the Housing Act of 1954 and the way in which affected public and private agencies and organizations were provided an opportunity to participate;

(16) A narrative statement which describes the APO's proposal, if any, to evaluate the impact of the plan and the effect of any supplemental allocations received in achieving the objectives of the plan;

(b) In lieu of a separate and distinct discussion of any or all of items (8) through (16) of § 891.504(a), the APO may, at its option, provide an index which refers to any other portion of the request which specifically responds to these items.

(c) Copies of HAPs prepared by Participating Jurisdictions need not be submitted with the request.

(d) Each request shall be submitted in the number of copies and to the address required in the Notice published pursuant to § 891.501(d). Any request received by HUD after the deadline date and time specified in the Notice shall not be accepted but shall be returned unopened.

§ 891.505 Review and selection of plans.

(a) The Secretary shall review all Plans submitted to identify (1) Acceptable Plans under § 891.502 and (2) Priority Plans under § 891.503. Field Office Directors and Regional Administrators shall be consulted in this evaluation.

(b) On the basis of the evaluation conducted in accordance with paragraph (a) of this section the Secretary shall select, from among all Acceptable Plans, those Plans on the basis of which supplemental allocations can be awarded. Preference shall be given to those Plans which meet the greatest number of the priority criteria set forth in § 891.503.

(c) The Plans to be selected as the basis for supplemental allocations shall be determined by the Secretary on the basis of the following factors:

(1) The compliance with, and overall quality of the Plan with respect to each of the general criteria for acceptable Plans set forth in § 891.502 and the criteria for priority Plans in § 891.503 and the degree to which the Plan addresses the objective of this Subpart;

(2) The responsiveness of the request to the requirements outlined in § 891.504; and

(3) In the case of Plans or earlier versions of Plans previously selected as the basis for supplemental allocations during any previous fiscal year, the impact of the Plan and prior supplemental allocations and the progress made by the APO and Participating Jurisdictions in meeting additional priority criteria as indicated in the Report required in § 891.506, in the request, or from other information available to HUD.

(d) The amount of the supplemental allocation to be awarded on the basis of each of the selected Plans shall be determined by the Secretary on the basis of each of the following factors:

(1) The compliance with, and overall quality of the Plan with respect to each of the criteria in §§ 891.502 and 891.503 and the degree to which the Plan addresses the objective of this subpart.

(2) The number of Plans selected as the basis for award of supplemental allocations and the amount of housing assistance available for supplemental allocations.

(3) The type of lower income households (elderly or handicapped; large families; and other families) and type of housing (new, substantial rehabilitation, or existing) proposed to be assisted with the supplemental allocation, relative to the needs identified in § 891.502(a)(1).

(4) The amount of housing assistance available to each of the Participating Jurisdictions for the current fiscal year that has been committed.

(e) If contract authority from more than one housing assistance program is made available by the Secretary in any fiscal year in accordance with § 891.501(b), and the APO requests supplemental allocations for more than one program, the Secretary shall determine the program(s) from which contract authority will be provided on the basis of a Plan selected as the basis for funding.

(f) After the total amount of the supplemental allocations on the basis of each of the selected Plans has been determined, each APO shall be advised of its selection or rejection. Selected APOs shall also be advised of the amount of additional contract authority which is to be made available on the basis of the Plan and the approximate number of units this contract authority is expected to assist. Concurrently with or subsequent to this notification, the allocations will be distributed to those Field Office Directors with jurisdiction over Participating Jurisdictions for reallocation among Participating Jurisdictions covered by a HAP. The Field Office Directors will consult with APOs to determine the actual geographical distribution and program mix of units on the basis of the Plan and other applicable administrative or statutory requirements prior to allocation among Participating Jurisdictions covered by a HAP.

§ 891.506 Approval of plans as basis for allocations under § 891.404(a)(3).

(a) Each Plan which has been determined by the Secretary to have met each of the general criteria for acceptable plans contained in § 891.502 (whether or not it is selected as the basis for award of supplemental allocations under § 891.505(a)) shall be designated by the Secretary as an Approved Areawide Housing Opportunity Plan. An Approved Plan shall serve, to the extent practicable, as the primary basis for the allocation by HUD of any housing assistance provided by HUD pursuant to Subpart D (1) until a subsequent or updated version of an Approved Plan has been approved by HUD in accordance with the procedures under this Subpart or (2) for three years, whichever occurs first. This allocation shall be in consultation with the APO.

(b) In addition, the one and three-year goals in the Housing Assistance Plans of Participating Jurisdictions shall be approved by the Area Office if those goals are not inconsistent (in number or program type) with the goals in an Approved Plan.

(c) Each APO whose Plan is approved pursuant to this section shall be advised of this designation simultaneously with the transmittal of the Secretary's notification to the Field Office Director.

§ 891.507 Reporting requirements.

Each APO which has developed a Plan selected as the basis for funding during or subsequent to fiscal year 1977 shall submit to the Secretary, within one year after the determination by the Field Office Director on the distribution of the supplemental allocation in accordance with § 891.505(f), a report which contains the following information:

(a) The actual distribution of the supplemental allocation among jurisdictions and the number of households assisted or to be assisted (by type of household and by race and sex of head of household, if known) as a result of the supplemental allocation and other housing assistance allocated pursuant to Subpart D;

(b) Any known impact of the Plan in reducing concentrations of low income or minority households outside areas and jurisdictions which contain undue concentrations of such households;

(c) Any refinements, amendments, or upgrading of any of the elements of the Plan;

(d) Actions taken by Participating Jurisdictions to implement or to support

the implementation of the Plan (e.g., encouragement of developers/sponsors, zoning amendments, tax abatement programs, coordination of outreach to eligible families and owners of properties qualifiable for the Section 8 Existing Housing Program, reservations of water and sewer capacity, development and implementation of complementary CDBG or other activities, etc.);

(e) Any increase in the number of Participating Jurisdictions or Participating Jurisdictions covered by HAPS; and

(f) Actions taken to meet additional Priority Criteria contained in § 891.503.

(It is hereby certified that the economic and inflationary impacts of this regulation have been carefully evaluated in accordance with OMB Circular A-107).

JOHN T. HOWLEY,
Acting Assistant Secretary for Housing—Federal Housing Commissioner.

DEPARTMENT OF THE TREASURY

Bureau of Alcohol, Tobacco and Firearms

[27 CFR Part 250]

[Notice No. 307]

LIQUORS AND ARTICLES FROM PUERTO RICO AND THE VIRGIN ISLANDS

Elimination the Serial-Number-of-Approved-Formula-Marking Requirement on Distilled Spirits Containers

The Director, Bureau of Alcohol, Tobacco and Firearms, with the approval of the Secretary of the Treasury or his delegate, is issuing a notice of proposed rulemaking to eliminate the requirement of marking the serial number of the approved formula on containers of distilled spirits made in Puerto Rico and in the Virgin Islands, and shipped to the United States.

The proposed regulations are to be issued under the authority contained in 26 U.S.C. 7805 (68A Stat. 917).

The Director received a petition on April 26, 1976, which requested that 27 CFR 250.40, Marking containers of distilled spirits, be amended "to eliminate the requirement for printing the serial number of the approved formula on the cases of distilled spirits, under which distilled spirits were made in Puerto Rico and shipped to the United States". This petition seeks to alleviate any undue burden on producers of Puerto Rican rum by doing away with a marking requirement which may be nonessential.

Section 250.40 currently requires that the serial number of the approved formula be marked on all containers of distilled spirits shipped to the United States from Puerto Rico. Whenever a Puerto Rican manufacturer changes a formula, the manufacturer must remove the premarked serial number from empty shipping containers and affix the new approved formula number. If it were possible to eliminate the formula number requirement of § 250.40, Puerto Rican manufacturers would be relieved from the necessity of removing old serial numbers and re-marking with new serial numbers.

Form 478-B is a required application and permit document that accompanies shipments of distilled spirits from Puerto Rico to the United States. In addition to other information, this form contains both the formula number of the distilled spirits product and the serial numbers of the shipping containers. Since the Form 487-B identifies the formula number of all shipping containers, it could be used to supply the information in question which § 250.40 presently requires.

The Director is also considering to amend a comparable regulation, § 250.206, affecting distilled spirits shipments of Virgin Island manufacture to the United States. Virgin Islands producers are presently required to show formula numbers on the individual shipping containers and on a certificate which accompanies each shipment, along with a report of gauge. If the formula number requirement of § 250.206 were deleted from the section, the certificate, which calls for the number and the date of the approved formula, and the report of gauge, which shows the serial number of each package gauged for shipment, would supply the same information. Thus, the Virgin Islands manufacturers would also be relieved from what appears to be a needless requirement.

In addition to giving notice to the distilled spirits producer of Puerto Rico and of the Virgin Islands, the Director seeks to give notice to the governments of Puerto Rico and of the Virgin Islands of the United States to permit them to comment on this proposal.

Interested parties who desire to submit written comments or arguments on the proposed changes should submit them, in duplicate, to the Director, Bureau of Alcohol, Tobacco and Firearms, Washington, DC 20226 (Attention: Chief, Regulations and Procedures Division) no later than March 14, 1977. Written statements which are not exempt from disclosure by the Bureau of Alcohol, Tobacco and Firearms, may be inspected by any person upon compliance with 27 CFR 71.22(d)(7). The provisions of 27 CFR 71.31(b) shall apply with respect to designation of portions of statements as exempt from disclosure.

In view of the foregoing, it is proposed that the regulations, 27 CFR 250.40 and 250.206, pertaining to markings on distilled spirits containers be amended by deleting the phrase, "the serial number of the approved formula under which made", by deleting the last sentence, and by simplifying the language of the sections.

1. As amended, § 250.40 reads as follows:

§ 250.40 Marking containers of distilled spirits.

The distiller, rectifier, or bottler shall serially number each case, barrel, cask, or similar container of distilled spirits filled for shipment to the United States. In addition to the serial number of the container, the distiller, rectifier, or bottler shall plainly print, stamp, or stencil with durable coloring material, in letters and figures not less than one-half inch high, on the head of each barrel, cask or similar container or on one side of each case, as follows:

(a) The name of the distiller, rectifier, or bottler;

(b) The brand name and kind of liquor;

(c) The wine and proof gallon contents; or, for bottles filled according to the metric standards of fill prescribed by § 5.47a, of this chapter, the contents in liters and the proof of the spirits; and

(d) In the case of barrels or casks, the serial number of the permit to ship, Form 487-B, prefixed by the number of such form (e.g., "487-B-61-1").

2. As amended, § 250.206 reads as follows:

§ 250.206 Marking packages and cases.

The distiller, rectifier, or bottler shall serially number each case, barrel, cask, or similar container of distilled spirits filled for shipment to the United States. In addition to the serial number of the container, the distiller, rectifier, or bottler shall plainly print, stamp, or stencil with durable coloring material, in letters and figures not less than one-half inch high, on the head of each barrel, cask or similar container or on one side of each case, as follows:

(a) The name of the manufacturer;

(b) The brand name and kind of liquor; and

(c) The wine and proof gallon contents; or, for bottles filled according to the metric standards of fill prescribed by § 5.47a, of this chapter, the contents in liters and the proof of the spirits.

NOTE.—The Director, Bureau of Alcohol, Tobacco and Firearms, has determined that this document does not contain a major proposal requiring preparation of an Inflation Impact Statement under Executive Order 11821 and OMB Circular A-107.

Signed: December 23, 1976.

JARVIS L. BREWER,
Acting Director.

Approved: January 17, 1977.

JERRY THOMAS,
Under Secretary of the Treasury.

[FR Doc.77-2625 Filed 1-26-77;8:45 am]

DEPARTMENT OF JUSTICE

Office of the Attorney General

[28 CFR Part 16]

[Order No. 680-77]

PRODUCTION OR DISCLOSURE OF INFORMATION

Exemption of Records System Under the Privacy Act

The Department of Justice proposes to issue a regulation exempting a system of records maintained by the Offices of the United States Attorneys, the Pre-Trial Diversion Program Files, JUSTICE/USA-015, from the provisions of subsections (c) (3) and (4), (d), (e) (1), (2) and (3), (e)(4) (G) and (H), (e) (5) and (8), (f), (g) and (h) of the Privacy Act pursuant to 5 U.S.C. 552a (j)(2) and (k) (1) and (2). The principal function of the U.S. Attorneys Offices pertains to the enforcement of criminal laws. The purposes of this exemption are to maintain the confidentiality and security of information compiled for purposes of criminal investigation or civil or regulatory law enforcement or reports compiled at any stage of the process of enforcement of the criminal laws, and to maintain the confidentiality and security of the identity of witnesses, informants, and others protected in witness security programs. Some records contained in this system of records may not be subject to exemptions. A determination will be made as to the exemption of a specific record at the time a request for notification or access is made.

These reasons for exempting this system are similar to ones published in subsection (b) of 28 C.F.R. 16.81 for other systems of the Offices of the United States Attorneys and are published within subparagraph (b) of this order.

By virtue of the authority vested in me by U.S.C. 552a (j) and (k), and as Attorney General of the United States, 28 CFR, Chapter I, Part 16, Subpart E, § 16.81 is amended by the addition of the following new paragraph (a)(9) and paragraph (b) as follows:

§ 16.81 Exemption of U.S. Attorneys Systems—Limited access, as indicated.

(a) The following system of records is exempt from 5 U.S.C. 552a (c) (3) and (4), (d), (e) (1), (2) and (3), (e) (4) (G) and (H), (e) (5) and (8), (f), (g) and (h):

* * * * *

(9) Pre-Trial Diversion Program Files (JUSTICE/USA-015)

These exemptions apply to the extent that information in this system is subject to exemption pursuant to 5 U.S.C. 552a (j) and (k).

(b) Exemption from the particular subsections are justified for the following reasons:

(1) From subsection (c)(3) because the release of the disclosure accounting uses published for these systems would permit the subject of a criminal investigation and/or civil case or matter under investigation, litigation, regulatory or administrative review or action, to obtain valuable information concerning the nature of that investigation, case or matter and present a serious impediment to law enforcement or civil legal activities.

(2) From subsection (c)(4) since an exemption is being claimed for subsection (d), this subsection will not be applicable.

(3) From subsection (d) because access to the records contained in these systems would inform the subject of criminal investigation and/or civil investigation, matter or case of the existence of that investigation, provide the subject of the investigation with information that might enable him to avoid detection, apprehension or legal obligations, and present a serious impediment to law enforcement and other civil remedies.

(4) From subsection (e)(1) because in the course of criminal investigations and/or civil investigations, cases or matters, the United States Attorneys often obtain information concerning the violation of laws or civil obligations other than those relating to an active case or matter. In the interests of effective law enforcement and civil litigation, it is necessary that the United States Attorneys retain this information since it can aid in establishing patterns of activity and provide valuable leads for other agencies and future cases that may be brought within the United States Attorneys' offices.

(5) From subsection (e)(2) because in a criminal investigation the requirement that information be collected to the greatest extent possible from the subject individual would present a serious impediment to law enforcement in that the subject of the investigation would be placed on notice of the existence of the investigation and would therefore be able to avoid detection, apprehension or legal obligations and duties.

(6) From subsection (e)(3) because the requirement that individuals supplying information be provided with a form stating the requirements of subsection (e)(3) would constitute a serious impediment to law enforcement in that it could compromise the existence of a confidential investigation, reveal the identity of confidential sources of information and endanger the life and physical safety of confidential informants.

(7) From subsections (e)(4) (G) and (H) because these systems of records are exempt from individual access pursuant to subsections (j) and (k) of the Privacy Act of 1974.

(8) From subsection (e)(5) because in the collection of information for law enforcement purposes it is impossible to determine in advance what information is accurate, relevant, timely, and complete. With the passage of time, seemingly irrelevant or untimely information may acquire new significance as further investigation brings new details to light and the accuracy of such information can only be determined in a court of law. The restrictions of subsection (e)(5) would restrict the ability of trained investigators and intelligence analysts to exercise their judgment in reporting on investigations and impede the development of intelligence necessary for effective law enforcement.

(9) From subsection (e)(8) because the individual notice requirements of subsection (e)(8) could present a serious impediment to law enforcement as this could interfere with the United States Attorneys' ability to issue subpoenas and could reveal investigative techniques and procedures.

(10 From subsection (f) because these systems of records have been exempted from the access provisions of subsection (d).

(11) From subsections (g) and (h) because these systems of records are compiled for law enforcement purposes and have been exempted from the access provisions of subsections (d) and (f).

Interested person are invited to submit written comments concerning this proposed exemption. Comments should be mailed to the Executive Office of United States Attorneys, Department of Justice, Washington, D.C. 20530. All comments must be received by February 28, 1977. No oral hearings are contemplated Comments received will be available for inspection in Room 1266, Main Department of Justice Building, 10th and Constitution Avenue, NW., Washington, D.C.

Dated: January 18, 1977.

EDWARD H. LEVI,
Attorney General.

NATIONAL LABOR RELATIONS BOARD

[29 CFR Part 102]

PUBLIC OBSERVATION OF MEETINGS OF THE NATIONAL LABOR RELATIONS BOARD

Proposed Rules

Pursuant to its authority under section 6 of the National Labor Relations Act, as amended (49 Stat. 452; 29 U.S.C. 156), and in accordance with section 3(a) (section 552b(g)) of the Government in the Sunshine Act, Pub. L. 94-409, September 13, 1976, 5 U.S.C., Section 552b(g), the National Labor Relations Board hereby gives notice of its intent to promulgate rules establishing the circumstances under which Board meetings will be open to public observation, the Agency's procedures for public announcement of time, place and subject matter of Board meetings, and provisions for the maintenance of minutes, transcripts or recordings of such meetings. A statement of the basis and purpose of such rules is published herewith.

STATEMENT OF PURPOSE

The Government in the Sunshine Act requires each agency to promulgate regulations to implement the provisions of that statute. This proposed Subpart S of the Rules of the National Labor Relations Board is designed to fulfill that requirement.

Section 102.137 of the subpart states the general statutory obligation that all meetings of agency members for the purpose of conducting or disposing of agency business are to be open to public observation, unless the meeting is to be closed due to the subject matter.

Section 102.138 defines the term "meeting" as applied to the Board. The reference to "at least two members of any group of three Board members to whom the Board has delegated power which it may itself exercise", is from section 3(b) of the National Labor Relations Act. Under that section three members of the Board is a quorum and two members of any designated group is established as a

quorum for purposes of the exercise of delegated powers.

Section 3(a)(d)(4) of the Sunshine Act (5 U.S.C. Section 552b(d)(4)) provides that when the majority of an agency's meetings fall within certain of the statutory reasons permitting meetings to be closed, that agency may provide by regulation for the closing of meetings falling within that provision. Section (c)(10) of the statute permits the closing of meetings which concern the agency's issuance of a subpena, its participation in a civil action or proceeding, or the initiation, conduct or disposition by the agency of a particular case of formal adjudication pursuant to the procedures of section 554 of Title 5, U.S.C., or which otherwise involve a determination on the record after opportunity for a hearing. During the three year period 1974–1976, the National Labor Relations Board held 141 meetings, the subject matter of which was the deliberation of unfair labor practice and representation proceedings pending before the Board for disposition. Of these, 59 were held in calendar year 1974, 46 in 1975 and 36 in 1976. During that same three year period the Board held a total of approximately 60 meetings on matters other than deliberation of pending cases. The Board is therefore entitled under the statute to provide by regulation for the closing to public observation of meetings falling within subsection (c)(10) of the statute. Section 102.139(a) of the proposed rules so provides.

Section 102.139(b) sets forth the other criteria contained in the statute for closing meetings, which might be applicable to this agency's activities.

Section 102.140 sets forth agency procedures to be followed in determining whether a meeting is in fact to be closed to public observation. It also provides for the public availability of the vote of members on the issue of closing.

Section 102.141 sets forth, in its various subsections, the requirements for public announcement of Board meetings, including procedures to be followed when a change of open or closed status, subject matter, or time and place, is made subsequent to the initial announcement of the meeting. The provisions also specify requirements for determining whether a meeting should be held under circumstances permitting less than the seven day prior notice to the public required by the statute, and for publication of the annuoncements in the FEDERAL REGISTER to the extent required.

Section 102.142 provides for maintenance of a transcript, recording or minutes, as may be appropriate, for each closed meeting. The section also establishes the circumstances under which those records may be made available to the public, and the agency's responsiblility concerning the period of their retention.

All persons who desire to submit written comments, views, or arguments for consideration by the Board in connection with the proposed rules should file 10 copies of the same, on or before February 28, 1977, with the Executive Secretary, National Labor Relations Board, Washington, D.C. 20570. Copies of such communications will be available for examination by interested persons during normal business hours in the Office of the Executive Secretary of the Board, Room 701, 1717 Pennsylvania Avenue, NW., Washington, D.C. 20570.

Dated: January 24, 1977 at Washington, D.C.

JOHN C. TRUESDALE,
Executive Secretary.

The proposed rules, when promulgated, will constitute a new Subpart S of the Board's Rules and Regulations, §§ 102.137 through 102.142, and will read as follows:

Subpart S—Open Meetings

Sec
102.137 Public Observation of Board Meetings.
102.138 Definition of meeting.
102.139 Closing of meetings: reasons therefor.
102.140 Action necessary to close meeting; record of votes.
102.141 Notice of meetings; public announcement and publication.
102.142 Transcripts, recordings or minutes of closed meetings; public availability; retention.

Subpart S—Open Meetings

AUTHORITY: Sec. 6, National Labor Relations Act, as amended (49 Stat. 452; 29 U.S.C. 156) and sec. 3(a), Government in the Sunshine Act, Pub. L. 94–409, Sept. 13, 1976, 5 U.S.C. 552b(g).

§ 102.137 Public Observation of Board Meetings.

Every portion of every meeting of the Board shall be open to public observation, except as provided in § 102.139 of these rules, and Board members shall not jointly conduct or dispose of agency business other than in accordance with the provisions of this subpart.

§ 102.138 Definition of meeting.

For purposes of this subpart, "meeting" shall mean the deliberations of at least three members of the full Board, or the deliberations of at least two members of any group of three Board members to whom the Board has delegated powers which it may itself exercise, where such deliberations determine or result in the joint conduct or disposition of official agency business, but does not include deliberations to determine whether a meeting should be closed to public observation in accordance with the provisions of this subpart.

§ 102.139 Closing of meetings; reasons therefor.

(a) Except where the Board determines that the public interest requires otherwise, meetings, or portions thereof, shall not be open to public observation where the deliberations concern the issuance of a subpoena, the Board's participation in a civil action or proceeding or an arbitration, or the initiation, conduct or disposition by the Board of particular representation or unfair labor practice proceedings under sections 8, 9, or 10 of the act, or any court proceedings collateral or ancillary thereto.

(b) Meeting, or portion thereof, may also be closed by the Board, except where it determines that the public interest requires otherwise, when the deliberations concern matters or information falling within the reasons for closing meetings specified in 5 U.S.C. 552b(c)(1) (secret matters concerning national defense or foreign policy); (c)(2) (internal personnel rules and practices); (c)(3) (matters specifically exempted from disclosure by statute); (c)(4) (privileged or confidential trade secrets and commercial or financial information); (c)(5) (matters of alleged criminal conduct or formal censure); (c)(6) (personal information where disclosure would cause a clearly unwarranted invasion of personal privacy); (c)(7) (certain materials or information from investigatory files compiled for law enforcement purposes); or (c)(9)(B) (disclosure would significantly frustrate implementation of a proposed agency action).

§ 102.140 Action necessary to close meeting; record of votes.

A meeting shall be closed to public observation under § 102.139, only when a majority of the members of the Board who will participate in the meeting vote to take such action.

(a) When the meeting deliberations concern matters specified in § 102.139(a), the Board members shall vote at the beginning of the meeting, or portion thereof, on whether to close such meeting, or portion thereof, to public observation. A record of such vote, reflecting the vote of each member of the Board, shall be kept and made available to the public at the earliest practicable time.

(b) When the meeting deliberations concern matters specified in § 102.139(b), the Board shall vote on whether to close such meeting, or portion thereof, to public observation. The vote shall be taken at a time sufficient to permit inclusion of information concerning the open or closed status of the meeting in the public annoucement thereof. A single vote may be taken with respect to a series of meetings at which the deliberations will concern the same particular matters where such subsequent meetings are scheduled to be held within thirty days after the initial meeting. A record of such vote, reflecting the vote of each member of the Board, shall be kept and made available to the public within one day after the vote is taken.

(c) Whenever any person whose interests may be directly affected by deliberations during a meeting, or a portion thereof, requests that the Board close that meeting, or portion thereof, to public observation for any of the reasons specified in 5 U.S.C. section 552b(c)(5) (matters of alleged criminal conduct or formal censure), (c)(6) (personal information where disclosure would cause a clearly unwarranted invasion of personal privacy), or (c)(7) (certain materials or information from investigatory files compiled for law enforcement purposes), the Board members participating in the meeting, upon request of any one of its members, shall vote on whether to close such meeting, or a portion thereof, for that reason. A record of such vote, reflecting the vote of each member of the Board participating in the meeting shall be kept and made available to the public within one day after the vote is taken.

(d) After public announcement of a meeting as provided in § 102.141 of these rules, a meeting, or portion thereof, announced as closed may be opened, or a meeting, or portion thereof, announced as open may be closed, only if a majority of the members of the Board who will participate in the meeting determine by a recorded vote that Board business so requires and that an earlier announcement of the change was not possible. The change made and the vote of each member on the change shall be announced publicly at the earliest practicable time.

(e) For each meeting closed pursuant to § 102.139, the solicitor of the Board shall certify that in his or her opinion the meeting may be closed to the public. The certification shall set forth each applicable exemptive provision for such closing. Such certification shall be retained by the agency and made publicly available as soon as practicable.

§ 102.141 Notice of meetings; public announcement and publication.

(a) A public announcement setting forth the time, place and subject matter of meetings or portions thereof closed to public observation pursuant to the provisions of § 102.139(a) of these rules, shall be made at the earliest practicable time.

(b) Except for meetings closed to public observation pursuant to the provisions of § 102.139(a) of these rules, the agency shall make public announcement of each meeting to be held at least 7 days before the scheduled date of the meeting. The announcement shall specify the time, place and subject matter of the meeting, whether it is to be open to public observation or closed, and the name, address, and phone number of an agency official designated to respond to requests for information about the meeting. The 7 day period for advance notice may be shortened only upon a determination by a majority of the members of the Board who will participate in the meeting that agency business requires that such meeting be called at an earlier date, in which event the public announcements shall be made at the earliest practicable time. A record of the vote to schedule a meeting at an earlier date shall be kept and made available to the public.

(c) Within one day after a vote to close a meeting, or any portion thereof, pursuant to the provisions of § 102.139(b) of these rules, the agency shall make publicly available a full written explanation of its action closing the meeting, or portion thereof, together with a list of all persons expected to attend the meeting and their affiliation.

(d) If after public announcement required by paragraph (b) of this section has been made, the time and place of the meeting are changed, a public announcement shall be made at the earliest practicable time. The subject matter of the meeting may be changed after the public announcement only if a majority of the members of the Board who will participate in the meeting determine that agency business so requires and that no earlier announcement of the change was possible. When such a change in subject matter is approved a public announcement of the change shall be made at the earliest practicable time. A record of the vote to change the subject matter of the meeting shall be kept and made available to the public.

(e) All announcements or changes thereto issued pursuant to the provisions of paragraphs (b) and (d) of this section, or pursuant to the provisions of § 102.140(d), shall be submitted for publication in the FEDERAL REGISTER immediately following their release to the public.

(f) Announcements of meetings made pursuant to the provisions of this section shall be made publicly available by the executive secretary.

§ 102.142 Transcripts, recordings or minutes of closed meetings; public availability; retention.

(a) For every meeting or portion thereof closed under the provisions of § 102.139 of these rules, the presiding officer shall prepare a statement setting forth the time and place of the meeting and the persons present, which statement shall be retained by the agency. For each such meeting or portion thereof there shall also be maintained a complete transcript or electronic recording of the proceedings, except that for meetings closed pursuant to § 102.139(a) the Board may, in lieu of a transcript or electronic recording, maintain a set of minutes fully and accurately summarizing any action taken, the reasons therefor and views thereon, documents considered, and the members' vote on each roll call vote.

(b) The agency shall make promptly available to the public copies of transcripts, recordings or minutes maintained as provided in accordance with paragraph (a) of this section, except to the extent the items therein contain information which the agency determines may be withheld pursuant to the provisions of 5 U.S.C. section 552b(c). Copies of transcripts or minutes, or transcriptions of electronic recordings including the identification of speakers, shall, to the extent determined to be publicly available, be furnished to any person, subject to the payment of duplication costs in accordance with the schedule of fees set forth in § 102.117(c)(2(iv), and the actual cost of transcription.

(c) The agency shall maintain a complete verbatim copy of the transcript, a complete electronic recording, or a complete set of the minutes for each meeting or portion thereof closed to the public, for a period of at least one year after the close of the agency proceeding of which the meeting was a part, but in no event for a period of less than two years after such meeting.

PERSONAL FLOTATION DEVICES

Proposed Information Pamphlet

Correction

In FR Doc. 76–37229 appearing on page 55478 in the issue for Monday, December 20, 1976, the format of § 181.705 was incorrect. It is being reprinted below to correctly reflect material to be published in a pamphlet. Section 181.703 is also being reprinted since it contains internal references to material in § 181.705.

§ 181.703 PFD information pamphlet: manufacturer requirements.

Each manufacturer of a Type I, II, III, IV, or V personal flotation device that is sold or offered for sale for use on a recreational boat shall furnish the information required by § 181.705 with each device by meeting one of the following:

(a) If the personal flotation device package is not transparent—

(1) The information in paragraph (a) of § 181.705 of this subpart must be printed on the outside of the package; and

(2) The information in paragraph (b) of § 181.705 of this subpart must be printed in a pamphlet and the pamphlet must be enclosed in each package.

(b) If the personal flotation device package is transparent—

(1) The information in paragraph (a) of § 181.705 of this subpart must be printed on the front page of a pamphlet and the pamphlet must be enclosed in each package so that the front page can be read through the package; and

(2) The information in paragraph (b) of § 181.705 of this subpart must be printed on the remaining pages of the pamphlet.

(c) If the personal flotation device is not in a package, a pamphlet that meets paragraph (b) of this section must be attached to each personal flotation device so that a purchaser can remove it.

§ 181.705 PFD information pamphlet: contents.

Each manufacturer of a Type I, II, III, IV, or V personal flotation device shall furnish, under the requirements of § 181.703 of this subpart, the information in this section with each PFD that is sold or offered for sale for use on a recreational boat and may include additional information. Instructions or illustrations:[1]

[1] The illustrations required by paragraph (a) of § 181.705 may be photographs or drawings. Each manufacturer should use illustrations of his own products. If this is not possible, illustrations of other Coast Guard approved PFD's may be used

(a) PERSONAL FLOTATION DEVICES FOR RECREATIONAL BOATS; FEDERAL REGULATIONS REQUIRED: [1]

(a) No person may use a recreational boat less than 16 feet in length or a canoe or kayak unless at least one personal flotation device of the following types is on board for each person:

(1) Type I PFD.
(2) Type II PFD.
(3) Type III PFD.
(4) Type IV PFD.

(b) No person may use a recreational boat 16 feet or more in length, except a canoe or kayak, unless at least one personal flotation device of the following types is on board for each person:

(1) Type I PFD.
(2) Type II PFD.
(3) Type III PFD.

(c) No person may use a recreational boat 16 feet or more in length, except a canoe or kayak, unless at least one Type IV PFD is on board in addition to the PFDs required in paragraph (b).

THERE ARE FIVE TYPES OF PERSONAL FLOTATION DEVICES

This is a Type (I, II, III, IV, or V) PFD

Type I—A Type I PFD has the greatest buoyancy and is designed to turn an unconscious person in the water from a face down position to a vertical or slightly backward position and to maintain the person in the vertical or slightly backward position. The Type I PFD is recommended for all waters, especially for cruising on waters where there is a probability of delayed rescue, such as large bodies of water where it is not likely that a significant number of boats will be in close proximity. This type PFD is the most effective of all the types in rough water. The Type I PFD is available in two sizes—Adult (90 lbs. or more) and child (less than 90 lbs.).

(Illustration of Type I PFD)

Type II—A Type II PFD is designed to maintain the wearer in a vertical or slightly backward position in the water. The Type II PFD is usually more comfortable to wear than the Type I. The Type II is recommended for use where there is a probability of quick rescue, such as areas where boating, fishing, and other water activities are likely to occur. The Type II PFD is available in three sizes—Adult (more than 90 lbs.), Medium Child (50 lbs. to 90 lbs.), and Small Child (less than 50 lbs.).

(Illustration of Type II PFD)

Type III—The Type III PFD is designed so that the wearer can place him or herself in a vertical or slightly backward position, and can maintain that position with a minimum of effort. A Type III is the most comfortable, comes in several sizes, and is usually the best choice for water sports, such as skiing. The Type III is recommended for use where there is a probability of quick rescue, such as areas where boating, fishing and other water activities are likely to occur.

(Illustration of Type III PFD)

Type IV—A Type IV PFD is designed to be thrown to a person who has fallen overboard and to be grasped and held by him until he is rescued.

(Illustration of Type IV PFD)

Type V—A Type V PFD is a PFD approved for restricted uses. No. Type V PFD is currently approved for use on recreational boats.

(Illustration of Type V PFD)

(b) YOUR PERSONAL FLOTATION DEVICE

You are required by Federal Regulation to have at least one Coast Guard approved personal flotation device (PFD) for each person in your recreational boat. You may not use your recreational boat unless all your PFD's are in serviceable condition, are readily accessible, are legibly marked with the Coast Guard approval number, and are of an appropriate size for each person on board.

WHY DO YOU NEED A PFD?

Your PFD provides buoyancy to help keep your head above the water and to help you remain in a satisfactory position in the water. The average weight of an adult is only 10 to 12 pounds in the water and the buoyancy provided by the PFD is necessary to support that weight in water. Unfortunately, your body weight does not determine how much you will weigh in water. In fact, your weight in water changes slightly throughout the day. There is no simple method of determining your weight in water. You should try the device in the water to make sure it supports your mouth out of the water. Remember, all straps, zippers, and tie tapes must be used and of course the PFD must be the proper size (size limitations are on the label).

HYPOTHERMIA

Hypothermia, the loss of body heat to the water, is probably the greatest cause of deaths. Often the cause of death is listed as drawning; but, most often the primary cause is hypothermia and the secondary cause is drowning. After an individual has succumbed to hypothermia, he will lose consciousness and then drown. The following chart shows the effects of hypothermia:

Water temperature (degrees Fahrenheit)	Exhaustion or unconsciousness	Expected time of survival
32.5 to 40	Under 15 min	Under 15 to 45 min.
32.5 to 40	15 to 30 min	30 to 90 min.
40 to 50	30 to 60 min	1 to 3 hr.
50 to 60	1 to 2 hr	1 to 6 hr.
60 to 70	2 to 7 hr	2 to 40 hr.
70 to 80	3 to 12 hr	3 hr to indefinite.
Over 80	Indefinite	Indefinite.

PFD's can increase survival time because of the insulation they provide. Naturally, the warmer the water, the less insulation one will require. When operating in cold waters (below 40°F) consideration should be given to using a coat or jacket style PFD as they cover more of the body than the vest style PFD's.

Some points to remember about hypothermia protection:

1. While afloat in the water, do not attempt to swim unless it is to reach a nearby craft, fellow survivor, or a floating object on which you can lean or climb. Unnecessary swimming increases the rate of body heat loss.

2. Keep a positive attitude about your survival and rescue. This will improve your chances of extending your survival time until rescue. Your will-to-live does make a difference!

3. If there is more than one person in the water, huddling is recommended while waiting to be rescued. This action tends to reduce the rate of heat loss and thus increase the survival time.

4. Always wear your PFD, it won't help you fight off the effects of hypothermia if you don't have it on when you go into the water.

EACH OF THESE DEVICES IS INTENDED TO HELP YOU SAVE YOUR OWN LIFE

For your PFD to function properly, follow these suggestions to insure that it fits, floats, and remains in good condition:

(1) Try your wearable PFD on and adjust it until it fits comfortably in and out of the water.

(2) Mark your PFD with your name if you are the only wearer.

(3) Try your PFD out in the water. This will show you how it works, and will give you confidence when you use it.

(4) Do not alter your PFD. If it doesn't fit properly, get one that does. An altered device is no longer Coast Guard approved.

(5) Use your PFD only for the purpose for which it is intended. Do not use it as a boat fender or kneeling pad.

(6) Inspect your PFD periodically to insure that it is free of rips, tears, or holes, that the flotation pads have no leaks, and that all seams and joints are securely sewn.

(7) Keep your PFD away from sharp objects which may rip the fabric or puncture the flotation pads.

(8) If your PFD contains kapok, the kapok fibers may become waterlogged and lose their buoyancy after the vinyl inserts are split or punctured. When the kapok becomes hard or if the device is soaked with water, it is no longer serviceable. It may not work when you need it and must be replaced.

(9) If your PFD is wet, allow it to dry thoroughly before storing it.

(10) Store your PFD in a well ventilated area.

PFD'S AND CHILDREN

A child is difficult to float in a safe position because of the distribution of body weight and because a child tends to panic when suddenly in an unfamiliar environment. The violent movement of the arms and legs in an attempt to "climb out" of the water tends to nullify the stability of the PFD. An approved device will keep a child afloat, but not always in a face-up position. A child should be taught how to put on the device and should be allowed to try it out in the water. It is important that the child feels comfortable and knows what the PFD is for and how it functions. Parents should note, however, that PFD's are not a substitute for adult supervision.

WEAR YOUR PFD

Your personal flotation device won't help you if you don't have it on. If you don't choose to wear it at all times, you should keep it handy and put it on when heavy weather threatens, or when danger is imminent. Don't wait until it is too late. Non-swimmers and children especially should wear their PFD's at all times when on or near the water.

REMEMBER—SAFE BOATING IS NO ACCIDENT

If you need more information about PFD's and safe recreational boating, contact your State boating authority, U.S. Coast Guard Auxiliary, U.S. Power Squadron, Red Cross, or your nearest unit of the U.S. Coast Guard.

[37 CFR Part 201]

[Docket RM 77-1]

RECORDING OF NOTICES OF IDENTITY AND SIGNAL CARRIAGE COMPLEMENT OF CABLE SYSTEMS

Notice of Proposed Rulemaking

AGENCY: Library of Congress, Copyright Office.

ACTION: Proposed rule.

SUMMARY: The purpose of this notice of proposed rulemaking is to advise the public that the Copyright Office of the Library of Congress is considering the adoption of a new regulation designed to implement a section of Pub. L. 94–553 (90 Stat. 2541), the Act for General Revision of the Copyright Law, pertaining to the recording of certain notices by cable systems.

DATES: Initial comments should be received on or before February 18, 1977. Reply comments on or before March 4, 1977.

ADDRESS: Interested persons should submit written comments to:

Office of General Counsel, Copyright Office, Washington, D.C. 20559.

FOR FURTHER INFORMATION, CONTACT:

Jon Baumgarten, General Counsel, Copyright Office, Washington, D.C. 20559 (703–557–8731).

SUPPLEMENTARY INFORMATION: Section 111(c) of the first section of Pub. L. 94–553 establishes a compulsory licensing system under which cable systems may make secondary transmissions of copyrighted works. Initial conditions of the compulsory license are set forth in § 111(d)(1) as follows:

> For any secondary transmission to be subject to compulsory licensing under subsection (c), the cable system shall, at least one month before the date of the commencement of operations of the cable system or within one hundred and eighty days after the enactment of this Act, whichever is later, and thereafter within thirty days after each occasion on which the ownership or control or the signal carriage complement of the cable system changes, record in the Copyright Office a notice including a statement of the identity and address of the person who owns or operates the secondary transmission service or has power to exercise primary control over it, together with the name and location of the primary transmitter or primary transmitters whose signals are regularly carried by the cable system, and thereafter, from time to time, such further information as the Register of Copyrights, after consultation with the Copyright Royalty Tribunal (if and when the Tribunal has been constituted), shall prescribe by regulation to carry out the purpose of this clause.

Section 111(d)(1) thus establishes the following recording requirements for cable systems, if they are to enjoy the benefits of the compulsory license provided by section 111(c):

(1) Any system that is in operation on April 17, 1977 (180 days after the effective date of the new law) must record the following information in the Copyright Office no later than April 18, 1977: [1]

(a) "the identity and address of the person who owns or operates the secondary transmission service or has power to exercise primary control over it"; and

(b) "the name and location of the primary transmitter or primary transmitters whose signals are regularly carried by the cable system".

(2) Any system that begins operation after April 17, 1977, must record the specified information (quoted in the preceding paragraph) at least one month before the date operations commence. (As a transitional exception, the recording deadline for any system that starts operating between April 18, 1977, and May 18, 1977, is April 18, 1977.)

(3) After making the initial record (described in the preceding two paragraphs), the cable system must then make supplemental records "within thirty days after each occasion on which the ownership or control or the signal carriage complement of the cable system changes."

(4) In addition to the initial and supplemental records (described in the preceding three paragraphs), the cable system must record "thereafter, from time to time, such further information as the Register of Copyrights, after consultation with the Copyright Royalty Tribunal (if and when the Tribunal has been constituted), shall prescribe by regulation to carry out the purpose of this clause."

The main purpose of the proposed regulation is to make clear that the public records of the Copyright Office are open, well in advance of the first statutory deadline of April 18, 1977, to the initial recording of notices of identity and signal carriage required by section 111(d)(1). The Office's records will also be opened to the recording of the supplemental information required upon changes of ownership, control or signal carriage complement. It is proposed that the recording of these notices be covered by the addition of a new § 201.11 to the regulations of the Copyright Office. The proposed section pertains to the nature of the document to be filed and the action to be taken by the Copyright Office upon its receipt.

The proposed regulation is an interim measure. Section 111(d)(1) authorizes the Register of Copyrights to prescribe regulations under which, after the initial information has been recorded, the recording of "further information * * * to carry out the purpose of this clause" can be required. Moreover, the recording provisions of § 111(d)(1) are part of a larger statutory scheme of compulsory licensing under which cable systems will be required to record or file other information in the Copyright Office. Fairly extensive rulemaking procedings, with the fullest possible public and industry participation, will be needed before the Copyright Office can prescribe in detail all of the information that cable systems must record under § 111 as whole. These proceedings will be instituted in the near future, but they obviously cannot be concluded before the initial deadline of April 18, 1977.

For this reason the proposed regulation, in prescribing the requirements for recording an "initial notice" and a "notice of change", follows the express statutory language of section 111–(d)(1). At the same time, the proposed regulation contains suggestions as to how these requirements should appropriately be interpreted in practice, and further suggestions for additional information that should appropriately be included in the notices. These suggested interpretations and additional information are of the sort that can be expected to be included in future, definitive regulations prescribed under section 111 as a whole. By including them as suggestions in the proposal for an interim regulation, the Copyright Office hopes to encourage public comment on the issues they raise, and to reduce, at least to some extent, the amount of additional information required to be recorded under definitive regulations issued after April 18, 1977

In addition to general comments on the points raised above, specific comments are invited upon the following:

(1) The Office has considered the possibility of cable systems recording copies of FCC Form 325, "Annual Report of Cable Television Systems", instead of separately prepared notices. It is noted, however, that (a) FCC Form 325 does not include the "location" of primary transmitters as required by § 111(d)(1); and (b) paragraph 4 of Schedule 2 to FCC Form 325 does not require identification of individual primary FM radio transmitters where the cable system carries all FM band signals.

(2) Attention is directed to the definition of signals "regularly carried" at page 95 of H.R. Rep. No. 94–1476, 94th Cong., 2d Sess. The report states that "signals 'regularly carried' by the system mean those signals which the Federal Communications Commission has specifically authorized the cable system to carry, and which are actually carried by the system on a regular basis." In preparing this proposal the Copyright Office has considered the phrase "specifically authorized" to include identification of any primary transmitter whose signals are actually carried by the cable system under the "authority" of any permissive or mandatory rule, regulation or authorization of the Federal Communications Commission, or in the absence of any prohibitory Commission rule or regulation, if the signals are carried on a regular basis. We have thus considered that (a) distinctions between categories of signals, such as radio and television, network and independent, commercial and noncommercial, and local and distant, are irrelevant for this purpose; but that (b) identification of primary transmitters whose signals are carried on a sporadic basis, such as under program substitution rules of the Federal Communications Commission, is not required.

Authority. This regulation is proposed under 17 U.S.C. 207 and 215, and under sections 111(d)(1) and 702 of Title 17 of

[1] Since April 17, 1977 is a Sunday, the deadline for recording is the next business day.

the United States Code as amended by Pub. L. 94–553.

Proposed Regulation. In consideration of the foregoing, it is proposed to amend Part 201 of 37 CFR chapter II by adding a new § 201.11 to read as follows:

§ 201.11 Notices of identity and signal carriage complement of cable systems.

(a) *Definitions.* (1) An "Initial Notice of Identity and Signal Carriage Complement" is a notice under section 111(d)(1) of Title 17 of the United States Code is amended by Pub. L. 94–553 and required by that section to be recorded in the Copyright Office "at least one month before the date of the commencement of operations of the cable system or within one hundred and eighty days after (October 19, 1976), whichever is later" for any secondary transmission by the cable system to be subject to compulsory licensing.

(2) A "Notice of Change of Identity or Signal Carriage Complement" is a notice under section 111(d)(1) of Title 17 of the United States Code as amended by Pub. L. 94–553 and required by that section to be recorded in the Copyright Office "within thirty days after each occasion on which the ownership or control or the signal carriage complement of the cable system changes" for any secondary transmission by the cable system to be subject to compulsory licensing.

(b) *Forms.* The Copyright Office does not provide printed forms for the use of persons recording Initial Notices or Notices of Change.

(c) *Contents.* (1) An Initial Notice of Identity and Signal Carriage Complement shall be identified as such by prominent caption or heading, and shall include the following:

(i) The identity and address of the person who, or entity which, owns or operates the cable system or has power to exercise primary control over it. It is suggested that the "identity" include the legal name of the person or entity, together with any fictitious or assumed name used for the purpose of conducting the business of the cable system, and that the "address" be given as the full mailing address of that person or entity. It is further suggested that the Notice include the legal name, fictitious or assumed name (if any), and full mailing address of the cable system if different from the above, together with the name of the community served by the system.

(ii) The name and location of the primary transmitter or primary transmitters whose signals are regularly carried by the cable system. It is suggested that the "name" of the primary transmitter be given by station call sign, accompanied by a brief statement of the type of signal carried (for example, "TV", "FM" or "AM"); and that the "location" of the primary transmitter be given as the name of the community to which the transmitter is licensed by the Federal Communications Commission (in the case of domestic signals) or with which the transmitter is identified (in the case of foreign signals).

(2) A Notice of Change of Identity or Signal Carriage Complement shall be clearly identified as such by prominent caption or heading, and shall include the information required by paragraph (c)(1) of this section. It is suggested that the notice also include a brief statement of the nature and date of the change which occasioned the recording of the notice.

(d) *Signature.* It is suggested that all Initial Notices and Notices of Change be dated and that they contain the individual signature of the person identified as the individual person who owns or operates the cable system or has power to exercise primary control over it, or by a duly authorized representative of that person; or, if an entity is identified as owning, operating, or controlling the system, the signature should be that of an officer if the entity is a corporation, or a partner if the entity is a partnership.

(e) *Recording in Copyright Office.* (1) The Copyright Office will record the Notices described in this section by placing them in the appropriate public files of the Office.

(2) Upon request and payment of a fee of $3, the Copyright Office will furnish a certified receipt for any such Notice.

Dated: January 18, 1977.

BARBARA RINGER,
Register of Copyrights.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Office of the Secretary

[45 CFR Chapter I]

MUSEUM SERVICES ACT

Intent To Issue Regulations

On October 8, 1976, the President signed the Arts, Humanities, and Cultural Affairs Act of 1976, cited as Pub. L. 94–462. The Act contains five titles, Title II of which is the Museum Services Act. This Notice of Intent to Issue Regulations is exclusively concerned with Title II.

The purpose of this Notice of Intent is two-fold. First, it serves to make the public aware of the existence and provisions of the Museum Services Act, as well as, projected Department of Health, Education, and Welfare activities to implement the Act through the regulations process. Secondly, the Notice of Intent facilitates public involvement in the rulemaking process at an early stage by focusing attention on issues basic to the implementation of the Act. The proposed regulations will be published in the FEDERAL REGISTER as a Notice of Proposed Rulemaking with another opportunity for public comment before publication as final regulations. We are not, of course, asking for recommendations amending the Act. We are concerned solely with the identification of issues involving clarification, interpretation, and specification which arise from the provisions of the Act.

LEGISLATIVE HISTORY

With the authorization of appropriations for the National Foundation on the Arts and Humanities expiring at the end of Fiscal Year 1976, joint hearings on the legislation, including the proposed Museum Services Act, were held in November 1975 by the Subcommittee on Select Education of the House Committee on Education and Labor and the Special Subcommittee on Arts and Humanities of the Senate Committee on Labor and Public Welfare. These hearings resulted in S. 3440, Committee Report 94–880 (May 14, 1976) and H.R. 12838, Committee Report 94–1024 (April 9, 1976). Final enactment by the Congress of H.R. 12838, Conference Report 94–1260, occurred on September 20, 1976.

SUMMARY OF MUSEUM SERVICE ACT PROVISIONS

The Act establishes within the Department of Health, Education, and Welfare an Institute of Museum Services, consisting of a National Museum Services Board and a Director of the Institute. The Board consists of fifteen members, appointed by the President with the advice and consent of the Senate, broadly representative of various museums, of the curatorial, educational and cultural resources of the United States, and of the general public. The Director is appointed by the President with the advice and consent of the Senate, will be compensated at the rate for executive level V, and will report to the Secretary of Health, Education, and Welfare with respect to the activities of the Institute.

Subject to the policy direction of the Board, the Director is authorized to make grants to museums to increase and improve museum services including: (1) The construction and installation of displays and exhibitions; (2) developing and maintaining experienced staff; (3) meeting the administrative costs of preserving and maintaining collections and providing educational programs to the public; (4) inter-museum arrangements; (5) the conservation of artifacts and art objects; and (6) developing and carrying out special programs for specific population groups. Grants under this title can be used to pay up to 50 percent of the cost of programs, except that up to 20 percent of the total appropriation can be used for grants without regard to that limitation. The Institute is authorized to accept grants, gifts, and bequests of money for use in furtherance of the functions of the Institute.

The amount authorized to be appropriated for grants by the Institute is $15 million for Fiscal Year 1977, $25 million for Fiscal Year 1978, and such sums as may be necessary for Fiscal Years 1979 and 1980. Such sums as may be necessary is also authorized to be appropriated to administer the provisions of this title. A further authorization is provided through Fiscal Year 1980 to match the amount of any private contributions to the Institute.

ISSUES

ISSUE 1: SELECTION OF NATIONAL MUSEUM SERVICES BOARD MEMBERS

The statute requires that Board membership be "broadly representative of various museums * * *" What criteria, if any, should the Department of Health, Education, and Welfare recommend to the President to insure such broad representation? What kind of selection process, if any, would be most likely to help the President meet this goal?

ISSUE 2: COORDINATION

The statute mandates that the Board "assure that the policies and purposes of the Institute are coordinated with other activities of the Federal Government." In addition, the statute amends the National Foundation on the Arts and Humanities Act of 1965 to require that the Federal Council on the Arts and Humanities "advise and consult with the National Museum Services Board and with the Director of the Institute of Museum Services * * *" How extensive should such coordination be? How can such coordination be most effectively implemented? How should the relationship between the Federal Council and the Institute's Board and Director be precisely defined?

ISSUE 3: DEFINITION OF MUSEUM

The statute defines museum as "a public or private non-profit agency or institution organized on a permanent basis for essentially educational or esthetic purposes, which, utilizing a professional staff, owns or utilizes tangible objects, cares for them, and exhibits them to the public or a regular basis."

Is this definition adequate for program administration? If not, what expansion and/or clarification is necessary?

ISSUE 4: ELIGIBILITY

Any institution which qualifies under the definition of "museum" is eligible to apply for a grant to improve its services. In this application process should such institutions be required to meet any specific accreditation standards in order to be eligible for a grant under this program?

ISSUE 5: ACTIVITIES OF THE INSTITUTE

The statute authorizes the Director, with the policy direction of the Board, to make grants to museums for a variety of activities. The description of these activities, which is not meant to be all inclusive, raises a number of specific questions:

Given the authorization level in the Act, should there be any limit on the cost or extent of construction or installation of displays?

How should the Department define the terms "professionally-trained" and "otherwise experienced" in relation to museum staff: Should the Department through this program consider subsidizing undergraduate education, graduate fellowships, inservice training for museum employees, or any combination of the above?

How should the Department define what constitutes a traveling exhibition? What are legitimate transportation costs?

How should the Department define the term "conservation" of artifacts and art objects?

What will qualify as a "specialized program for specific segments of the public?" Should other segments be identified in a regulation?

In each case above what specific criteria should be set up in order to assure funding of the most appropriate and most valid proposals?

Finally, given the sweep of this legislation, are there any specific types of activities related to the operation of museums which should not qualify for funding under this statute?

ISSUE 6: MATCHING REQUIREMENTS

An issue within this category which deserves special attention is that relating to the distribution of funds. Grants under this section may not exceed one half of the cost of the program for which the grant is made except that "not more than 20 per centum" of the funds available may be allocated without regard to such limitations. The Department would like to solicit advice as to what criteria should be used to determine which projects or programs should qualify for more than 50 percent funding.

An additional question relates to the sources of recipients' matching funds. Should some or all of these funds come from new funds or should recipients be permitted to use funds from existing budget levels to fulfill the matching requirements?

Further, how should the Department interpret the phrase "immediate disbursement?" Does money have to be obligated within a given fiscal year? Is any specific time frame appropriate?

ISSUE 7: FUNDING

While the statute provides some detail regarding the scope of activities which qualify for funding by the Institute, little is said about how the authorization should be divided among the range of eligible activities:

Should funds be earmarked for certain kinds of museums (art, science, history, other)?

Should funds be earmarked for certain kinds of museum services, for specialized programs, for specific segments of the public?

Should additional weight be given to museums' past efforts at and/or future interest in educational programs?

Should additional weight be given to funding an institution's present needs or new initiatives?

Should some money be earmarked for evaluation activities related to this program?

What, if any, evidence of eligibility and/or need will institutions be required to submit during the funding process?

OTHER ISSUES

The Secretary of Health, Education, and Welfare welcomes comments, advice, and guidance from any member of the general public on any of the issues set forth in this Notice of Intent and on any other issues related to the Museum Services Act. We hope that this Notice of Intent will both benefit the development of regulations and promote an understanding of the process.

COMMENTS

Comments are due by March 15, 1977.

NATIONAL TRANSPORTATION SAFETY BOARD

[49 CFR Part 804]

RULES IMPLEMENTING THE GOVERNMENT IN THE SUNSHINE ACT

Proposed Rulemaking

Pursuant to the Government in the Sunshine Act (Act), Pub. L. 94–409, the National Transportation Safety Board (NTSB) gives notice that it proposes to amend Chapter VIII, Title 49, Code of Federal Regulations, by adding a new Part 804 entitled "Rules Implementing the Government in the Sunshine Act."

The Act requires that meetings of multimember Government agencies, including the NTSB, be open to public observation subject to 10 exemptions. The Act also requires public announcement of every meeting. To facilitate widespread dissemination of the public announcement referred to in proposed § 804.7, the NTSB will, in addition to publishing a notice of each announcement in the FEDERAL REGISTER, post the announcements on meeting notice bulletin boards, submit the announcements to the media, and establish a mailing list for anyone desiring to receive announcements. Requests to be placed on this mailing list should be addressed as follows: Meetings Announcement Mailing List, Publications Unit, National Transportation Safety Board, Washington, D.C. 20594.

Interested persons are invited to submit written comments concerning the proposed regulations to the General Counsel, National Transportation Safety Board, 800 Independence Avenue, S.W., Washington, D.C. 20594, on or before February 28, 1977.

Accordingly, the NTSB proposes to establish Part 804 of Chapter VIII, Title 49, Code of Federal Regulations, to read as follows:

PART 804—RULES IMPLEMENTING THE GOVERNMENT IN THE SUNSHINE ACT

Sec.

804.1 Applicability.
804.2 Policy.
804.3 Definitions.
804.4 Open meetings requirement.
804.5 Grounds on which meetings may be closed or information may be withheld.

Sec.

804.6 Procedures for closing meetings, or withholding information, and requests by affected persons to close a meeting.
804.7 Procedures for public announcement of meetings.
804.8 Changes following public announcement.
804.9 Transcripts, recordings, or minutes of closed meetings.
804.10 Availability and retention of transcripts, recordings, and minutes, and applicable fees.

AUTHORITY: Government in the Sunshine Act, Pub. L. 94-409, 90 Stat. 1241 (5 U.S.C. 552b); Independent Safety Board Act on 1974, Pub. L. 93-633, 88 Stat. 2166 (49 U.S.C. 1901 et seq.).

§ 804.1 Applicability.

(a) This part implements the provisions of the Government in the Sunshine Act (5 U.S.C. 552b). These procedures apply to meetings, as defined herein, of the Members of the National Transportation Safety Board (NTSB).

(b) Documents which are considered at meetings may be obtained subject to the procedures and exemptions set forth in Part 801 of the NTSB regulations (49 CFR Part 801).

§ 804.2 Policy.

It is the policy of the NTSB to provide the public with the fullest practicable information regarding the decisionmaking processes of the Board, while protecting the rights of individuals and the ability of the Board to discharge its statutory functions and responsibilities. The public is invited to attend but not to participate in open meetings.

§ 804.3 Definitions.

As used in this part: "Meeting" means the deliberations of three or more Members where such deliberations determine or result in the joint conduct or disposition of official NTSB business, and includes conference telephone calls otherwise coming within the definition. A meeting does not include:

(a) Notation voting or similar consideration of business, whether by circulation of material to the Members individually in writing or by a polling of the Members individually by telephone.

(b) Deliberations by three or more Members (1) to open or to close a meeting or to release or to withhold information pursuant to § 804.6, (2) to call a meeting on less than seven days' notice as permitted by § 804.7(b), or (3) to change the subject matter or the determination to open or to close a publicly announced meeting under § 804.8(b).

"Member" means an individual duly appointed and confirmed to the collegial body, known as "the Board," which heads the NTSB.

"National Transportation Safety Board (NTSB)" means the agency set up under the Independent Safety Board Act of 1974.

§ 804.4 Open meetings requirement.

Members shall not jointly conduct or dispose of agency business other than in accordance with this part. Except as provided in § 804.5, every portion of every meeting of the Board shall be open to public observation.

§ 804.5 Grounds on which meetings may be closed or information may be withheld.

Except in a case where the Board finds that the public interest requires otherwise, a meeting may be closed and information pertinent to such meeting otherwise required by §§ 804.6, 804.7, and 804.8 to be disclosed to the public may be withheld if the Board properly determines that such meeting or portion thereof or the disclosure of such information is likely to:

(a) Disclose matters that are (1) specifically authorized under criteria established by an Executive Order to be kept secret in the interests of national defense or foreign policy, and (2) are in fact properly classified pursuant to such Executive Order;

(b) Relate solely to the internal personnel rules and practices of the NTSB;

(c) Disclose matters specifically exempted from disclosure by statute (other than 5 U.S.C. 552): *Provided*, That such statute (1) requires that the matters be withheld from the public in such a manner as to leave no discretion on the issue, or (2) establishes particular criteria for withholding or refers to particular types of matters to be withheld;

(d) Disclose trade secrets and commercial or financial information obtained from a person and privileged or confidential;

(e) Involve accusing any person of a crime, or formally censuring any person;

(f) Disclose information of a personal nature where disclosure would constitute a clearly unwarranted invasion of personal privacy;

(g) Disclose investigatory records compiled for law enforcement purposes, or information which if written would be contained in such records, but only to the extent that the production of such records or information would:

(1) Interfere with enforcement proceedings;

(2) Deprive a person of a right to a fair trial or an impartial adjudication;

(3) Constitute an unwarranted invasion of personal privacy;

(4) Disclose the identity of a confidential source and, in the case of a record compiled by a criminal law enforcement authority in the course of a criminal investigation, or by an agency conducting a lawful national security intelligence investigation, confidential information furnished only by the confidential source;

(5) Disclose investigative techniques and procedures; or

(6) Endanger the life or physical safety of law enforcement personnel;

(h) Disclose information contained in or related to examination, operating, or condition reports prepared by, on behalf of, or for the use of an agency responsible for the regulation or supervision of financial institutions;

(i) Disclose information the premature disclosure of which would—

(1) In the case of an agency which regulates currencies, securities, commodities, or financial institutions, be likely to (i) lead to significant financial speculation in currencies, securities, or commodities or (ii) significantly endanger the stability of any financial institution; or

(2) In the case of any agency, be likely to significantly frustrate implementation of a proposed agency action, except that this paragraph shall not apply in any instance where the NTSB has already disclosed to the public the content or nature of its proposed action, or where the NTSB is required by law to make such disclosure on its own initiative prior to taking final agency action on such proposal; or

(j) Specifically concern the Board's issuance of a subpoena, or the NTSB's participation in a civil action or proceeding, an action in a foreign court or international tribunal, or an arbitration, or the initiation, conduct, or disposition by the NTSB of a particular case of formal agency adjudication pursuant to the procedures in 5 U.S.C. 554 or otherwise involving a determination on the record after opportunity for a hearing.

§ 804.6 Procedures for closing meetings, or withholding information, and requests by affected persons to close a meeting.

(a) A meeting shall not be closed, or information pertaining thereto withheld, unless a majority of all Members votes to take such action. A separate vote shall be taken with respect to any action under § 804.5. A single vote is permitted with respect to a series of meetings, a portion or portions of which are proposed to be closed to the public, or with respect to any information concerning such series of meetings, so long as each meeting in such series involves the same particular subject matters and is scheduled to be held no more than thirty days after the initial meeting in such series. Each Member's vote under this paragraph shall be recorded and proxies are not permitted.

(b) Any person whose interest may be directly affected if a portion of a meeting is open may request the Board to close that portion on any of the grounds referred to in 804.5 (e), (f), or (g). Requests, with reasons in support thereof, should be submitted to the General Counsel, National Transportation Safety Board, 800 Independence Avenue, S.W., Washington, D.C. 20594. On motion of any Member, the Board shall determine by recorded vote whether to grant the request.

(c) Within one working day of any vote taken pursuant to this section, the NTSB shall make available a written copy of such vote reflecting the vote of each Member on the question and, if a portion of a meeting is to be closed to the public a full written explanation of its action closing the meeting and a list of all persons expected to attend and their affiliation.

(d) For every closed meeting, the General Counsel of the NTSB shall publicly certify that, in his or her opinion, the meeting may be closed to the public and shall state each relevant exemptive provision. A copy of such certification, together with a statement of the presiding officer setting forth the time and place of the meeting and the persons present, shall be retained by the NTSB as part of the transcript, recording, or minutes required by § 804.9.

§ 804.7 Procedures for public announcement of meetings.

(a) For each meeting, the NTSB shall make public announcement, at least one week before the meeting, of the:

(1) Time of the meeting;

(2) Place of the meeting;

(3) Subject matter of the meeting;

(4) Whether the meeting is to be open or closed; and

(5) The name and business telephone number of the official designated by the NTSB to respond to requests for information about the meeting.

(b) The one week advance notice required by paragraph (a) of this section may be reduced only if: (1) A majority of all Members determines by recorded vote that NTSB business requires that such meeting be scheduled in less than seven days; and

(2) The public announcement required by paragraph (a) of this section be made at the earliest practicable time.

(c) Immediately following each public announcement required by this section, or by § 804.8, the NTSB shall submit a notice of public announcement for publication in the FEDERAL REGISTER.

§ 804.8 Changes following public announcement.

(a) The time or place of a meeting may be changed following the public announcement only if the NTSB publicly announces such change at the earliest practicable time. Members need not approve such change.

(b) The subject matter of a meeting or the determination of the Board to open or to close a meeting, or a portion thereof, to the public may be changed following public announcement only if:

(1) A majority of all Members determines by recorded vote that NTSB business so requires and that no earlier announcement of the change was possible; and

(2) The NTSB publicly announces such change and the vote of each Member thereon at the earliest practicable time.

§ 804.9 Transcripts, recordings, or minutes of closed meetings.

The NTSB shall maintain a complete transcript or electronic recording adequate to record fully the proceedings of each meeting, or a portion thereof, closed to the public. The NTSB may maintain a set of minutes in lieu of such transcript or recording for meetings closed pursuant to § 804.5 (h), (i)(1), or (j). Such minutes shall fully and clearly describe all matters discussed and shall provide a full and accurate summary of any actions taken, and the reasons therefor, including a description of each of the views expressed on any item and the record of any rollcall vote. All documents considered in connection with any actions shall be identified in such minutes.

§ 804.10 Availability and retention of transcripts, recordings, and minutes, and applicable fees.

The NTSB shall make promptly available to the public the transcript, electronic recording, or minutes of the discussion of any item on the agenda or of any testimony received at the meeting, except for such item, or items, of discussion or testimony as determined by the NTSB to contain matters which may be withheld under the exemptive provisions of § 804.5. Copies of the nonexempt portions of the transcript or minutes, or transcription of such recordings disclosing the identity of each speaker, shall be furnished to any person at the actual cost of transcription or duplication. The NTSB shall maintain a complete verbatim copy of the transcript, a complete copy of the minutes, or a complete electronic recording of each meeting, or a portion thereof, closed to the public for at least two years after such meeting, or until one year after the conclusion of any NTSB proceeding with respect to which the meeting, or a portion thereof, was held, whichever occurs later.

Signed at Washington, D.C., this 24th day of January 1977.

WEBSTER B. TODD, JR.,
Chairman.

notices

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Federal Grain Inspection Service

UNITED STATES GRAIN STANDARDS ACT

Recordkeeping and Registration

The following statements concerning the recordkeeping and registration provisions of the United States Grain Standards Act, as amended by Public Law 94-582 (90 Stat. 2867), are published pursuant to section 3A of the Act for the information of persons subject to the provisions of the Act and of the public generally.

RECORDKEEPING

Section 12(d) of the United States Grain Standards Act, as amended by Public Law 94-582 (90 Stat. 2882), generally provides that grain merchandisers and elevator owners or operators who obtain, or have obtained, official inspection or weighing services under the Act shall keep, for a 5-year period after obtaining such services, complete and accurate records of purchases, sales, transportation, storage, weighing, handling, treating, cleaning, drying, blending, and other processing, and official inspection and official weighing for all grain merchandised or handled by them.

In implementing the recordkeeping provisions, a rulemaking proceeding will be instituted by the Federal Grain Inspection Service to identify the kind of records to be kept and the manner in which they shall be kept. Until a final determination is made in this matter, the Service will consider merchandisers and elevator owners or operators as being in compliance with the recordkeeping provisions if the merchandisers, owners, or operators permit representatives of the Secretary or the Administrator to have access to, and to copy, at all reasonable times, the records which the merchandisers, owners, or operators normally maintain with reference to the named activities.

REGISTRATION

Section 17A(a) of the Act generally provides that the Administrator of the Federal Grain Inspection Service shall provide by regulation for the registration, with specified exceptions, of all persons engaged in the business of buying grain for sale in foreign commerce and in the business of handling, weighing, or transporting of grain for sale in foreign commerce. In implementing the registration provisions, a rulemaking proceeding will be instituted by the Service to establish procedures and guidelines for registration. Until a final determination is made in this matter, there is no obligation to register under the Act.

Done at Washington, D.C., on: January 17, 1977.

DONALD E. WILKINSON,
Interim Administrator.

BURNETT INLET FISH HATCHERY

Availability of Final Environmental Statement

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969, the Forest Service, Department of Agriculture, has prepared a final environmental statement for the Burnett Inlet Fish Hatchery, USDA-FS-R10-FES (Adm)-76-06.

This environmental statement concerns the construction plans for nonprofit salmon hatchery structures on Burnett Inlet, Tongass National Forest, Alaska.

This final environmental statement was transmitted to CEQ on January 19, 1977.

Copies are available for inspection during regular working hours at the following locations:

USDA, Forest Service, South Agriculture Building, Room 3231, 12th Street & Independence Ave. SW, Washington, D.C. 20250.
USDA, Forest Service, Alaska Region, Federal Office Building, Juneau, Alaska 99802.
Forest Supervisor, Chatham Area, Tongass National Forest, Federal Building, Sitka, Alaska 99835.
Forest Supervisor, Stikine Area, Tongass National Forest, Federal Building, Petersburg, Alaska 99833.
Forest Supervisor, Ketchikan Area, Tongass National Forest, Federal Building, Room 313, Ketchikan, Alaska 99901.

A limited number of single copies are available upon request to the Forest Supervisor, Stikine Area, Tongass National Forest, P.O. Box 309, Petersburg, Alaska 99833.

Copies of the environmental statement have been sent to various Federal, State and local agencies as outlined in the CEQ guidelines.

CARL W. SWANSON,
Environmental Coordinator, Alaska Region.

JANUARY 19, 1977.

GEOTHERMAL DEVELOPMENT BREITENBUSH AREA

Availability of Draft Environmental Statement

The Notice of Availability for the Geothermal Development—Breitenbush Area Draft Environmental Statement on Mt. Hood and Williamette National Forest, Oregon, USDA-FS-R6-DES(Adm)-77-3, that appeared in the FEDERAL REGISTER, Volume 41, No. 213 (41 FR 48389), Wednesday, November 3, 1976, is corrected to extend the review period to February 15, 1977.

CURTIS L. SWANSON,
Regional Environmental Coordinator, Planning, Programing and Budgeting.

JANUARY 20, 1977.

BOISE NATIONAL FOREST GRAZING ADVISORY BOARD

Meeting

The Boise National Forest Grazing Advisory Board will meet at 9:00 a.m., March 8, 1977, at the Boise National Forest Supervisor's Office, 1075 Park Boulevard, Boise, Idaho.

The agenda for the meeting is as follows:

1. Election of Officers.
2. Review of the Federal Land Policy and Management Act of 1976, Pub. L. 94-579.
3. Review of the National Forest Management Act of 1976, Pub. L. 94-588.
4. New business.

The meeting will be open to the public. Persons who wish to attend should notify Mr. Tom Nicholson, President, Boise National Forest Grazing Advisory Board, 10322 Estate Drive, Boise, Idaho 83705; Telephone Area Code 208-375-5255.

The committee has established the following rules for public participation: Written statements will be accepted by the committee president prior to the meeting or immediately after the close of the meeting.

Dated: January 20, 1977.

EDWARD C. MAW,
Forest Supervisor.

Soil Conservation Service

ST. THOMAS-LODEMA WATERSHED PROJECT, NORTH DAKOTA

Availability of Negative Declaration

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Guidelines (40 CFR Part 1500); and the Soil Conservation Service Guidelines (7 CFR Part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for the St. Thomas-Lodema Watershed Project, Pembina County, North Dakota.

The environmental assessment of this federal action indicates that the project will not create significant adverse local, regional, or national impacts on the environment and that no significant controversy is associated with the project. As a result of these findings, Mr. Allen L. Fisk, State Conservationist, Soil Conservation Service, has determined that the preparation and review of an environmental impact statement is not needed for this project.

The project concerns a plan for watershed protection and flood prevention. The remaining planned works of improvement, as described in the negative declaration, include conservation land treatment supplemented by 25.0 miles of channel work on natural and previously notified ephemeral streams.

The negative declaration is being filed with the Council on Environmental Quality and copies are being sent to various federal state, and local agencies. The basic data developed during the environmental assessment is on file and may be reviewed by interested parties at the Soil Conservation Service, Room 270, Federal Building, Rosser Avenue, and 3rd Street, Bismarck, North Dakota 58501. A limited number of copies of the negative declaration is available from the same address to fill single copy requests.

No administrative action on implementation on the proposal will be taken until February 11, 1977.

Dated: January 14, 1977.

(Catalog of Federal Domestic Assistance Program No. 10.904, Watershed Protection and Flood Prevention on Program—Pub. L. 83-566, 16 U.S.C. 1001-1008.)

JOSEPH W. HAAS,
Assistant Administrator for Water Resources Soil Conservation Service.

ARMS CONTROL AND DISARMAMENT AGENCY

ENVIRONMENTAL IMPACT STATEMENTS

Issuance of Final Agency Procedures for Compliance With Federal Environmental Statutes

Notice is hereby given of the publication of final procedures of the U.S. Arms Control and Disarmament Agency (ACDA) for compliance with Federal environmental statutes, in accordance with the requirements of section 102(2)(C) of the National Environmental Policy Act (NEPA) (42 U.S.C. 4332(2)(C)), and section 309 of the Clean Air Act (42 U.S.C. 1857h-7). These procedures supercede the proposed procedures published by the Agency in the FEDERAL REGISTER on March 8, 1973 (38 FR 6321) and will be published in the ACDA Manual.

When the proposed procedures were published on March 8, 1973, the Agency solicited written comments or suggestions for consideration concerning them to be submitted on or before April 9, 1973 to the General Counsel of the Agency. The records of the Office of the General Counsel indicate that no comments were received at that time; however, by letter dated December 10, 1973 the Center for Law and Social Policy submitted a copy of a letter dated April 6, 1973 addressed to the General Counsel of the Agency submitting nine numbered comments on behalf of the Sierra Club and the Environmental Defense Fund. These comments have been available for public inspection in the Office of the General Counsel. All of the suggestions have been fully considered and most of them have been adopted or substantially satisfied by eidtorial changes, deletions, or additions to the procedures. In addition, the nomenclature and citations in the procedures, particularly the citations to the Guidelines of the Council on Environmental Quality, have been clarified and updated.

The following is a brief discussion of the nine comments and the changes made in the final procedures in response to them:

1. Section 3 of the proposed procedures provided that the Bureau of Science and Technology (ST) (now the Non-Proliferation and Advanced Technology Bureau (NTB)) would have primary responsibility for determining whether any proposed action required an environmental impact statement and would "consult" with the Office of the General Counsel in making this decision. The commenter pointed out that the General Counsel's role should be more than a consulting one because the decision on whether an environmental impact statement is required is basically a legal one. The Agency agrees and has revised the initial paragraph of section 3 and made changes elsewhere in that section and in section 4, the third paragraph of section 5, and in section 6 (c) and (d) of the final procedures to assign appropriate responsibilities to the Office of the General Counsel.

2. The third paragraph of section 3 of the proposed procedures contained guidelines to consider in assessing the need for impact statements. The first of these guidelines provided several examples of what are not considered major Federal actions. The commenter urged that before providing such examples, the procedures should set forth examples of what are major Federal actions. The Agency agrees that it is desirable for the procedures to provide more guidance about the Federal actions for which the agency is responsible under the NEPA. The Agency has moved the guidelines to the end of section 2(b) of the final procedures which deals with determining the need for environmental impact statements and has revised them to accommodate this comment and the following four comments which also relate to the guidelines. In the process, the reference in section 5(b) of the proposed procedures to the Department of State procedures has been moved to the end of the new section 2(b)(1) in the final procedures.

3. Section 3(a)(1) of the proposed procedures stated that Agency participation in research or study projects would not be considered major Federal actions for purposes of the NEPA. The commenter pointed out that some types of research, e.g., field research, could pose significant risks to the environment and should not be exempted from the impact statement requirement. The Agency agrees and has reflected this point in the new section 2(b)(2) of the final procedures.

4. Section 3(a)(2) of the proposed procedures exempted all "mandatory actions" required by international agreements or decisions to which the United States is bound. While agreeing that the question whether or not the United States should comply with a mandatory international obligation should not be subject to an impact statement, the commenter expressed concern that this would be construed as exempting "mandatory" internatinal obligations that could be fulfilled by alternative routes with varying environmental impacts. The Agency has addressed this concern by adding a parenthetical clarification in section 2(b)(3) of the final procedures where the subject is now covered.

5. Section 3(b) of the proposed procedures referred to indirect effects of Agency activities. The commenter felt that further guidance on this subject was needed. The Agency has expanded the discussion of indirect effects in section 2(b)(4) of the final procedures which combines section 3(b) of the proposed procedures with the last two sentences of section 3(c) of the proposed procedures and additional explanatory material. The commenter also felt that the procedures should explicitly note that "major Federal actions" should be construed with a view to overall cumulative impact and with a view to further actions contemplated. The Agency believes that this subject already is adequately covered in the third sentence of section 2(b) where there is a specific reference to section 1500.6 of the CEQ Guidelines for a general elaboration of the term "major Federal action".

6. The second sentence of the final paragraph of section 3 of the proposed procedures provided that those preparing an environmental impact statement "may, where appropriate" solicit information from private organizations and government agencies with special expertise or interest. The commenter pointed out that the NEPA provides that such consultations "shall" be held with appropriate government agencies. The Agency agrees and has changed that paragraph of the final procedures to comply with the NEPA requirement.

7. Paragraph 3 of the proposed procedures concluded by stating that the Office of the General Counsel would provide advice on the legal requirements for the preparation of impact statements.

FEDERAL REGISTER, VOL. 42, NO. 18—THURSDAY, JANUARY 27, 1977

The commenter pointed out again that legal requirements are not something the General Counsel should advise on, but rather his office should decide such issues. The Agency agrees and has revised the last sentence of paragraph 3 of the final procedures to require that decisions on legal requirements regarding the contents of environmental impact statements be obtained from that office.

8. The commenter objected that section 6(a) of the proposed procedures would be applicable to "Limited Official Use" information through its use of the term "administratively controlled material". The Agency agrees that "Limited Official Use" information will be covered and has made no changes in the final procedures since they are considered appropriate for information properly determined to be "Limited Official Use".

9. Section 6(d) of the proposed procedures set no minimum time for advance notice of public hearings on environmental issues and allowed hearings to be held only 15 days after circulation of the draft impact statement. The commenter urged that the section be amended to provide that, where possible, notice of hearings in the FEDERAL REGISTER and the circulation of draft impact statements should occur 30 days before the hearings. The Agency agrees, and has added a new sentence to that effect in section 6(d) of the final procedures.

The Agency is always interested in receiving public comment on its published procedures and regulations. This is particularly so in this case due to the length of time between the publication of the proposed procedures and the publication of these final procedures. Persons desiring to make comments or suggestions for consideration concerning these procedures should submit them in writing to the General Counsel, U.S. Arms Control and Disarmament Agency, 2201 C Street, N.W., Washington, D.C. 20451.

The Agency procedures are as follows:

1. *General.* Attention is called to section 102(2)(C) of the National Environmental Policy Act (NEPA) (42 U.S.C. 4332(2)(C)); section 309 of the Clean Air Act (42 U.S.C. 1857h-7); Executive Order 11514 of March 5, 1970; and the Guidelines for Preparation of Environmental Impact Statements issued by the Council on Environmental Quality (CEQ) (40 CFR Part 1500), incorporated herein by reference. Except as modified by the present policy guides, the CEQ Guidelines will be followed by the responsible Agency officials in complying with policies and provisions of the NEPA and section 309 of the Clean Air Act. The requirements of these procedures are in addition to, and not a substitute for, any environmental analyses or consultations required by any international obligations of the United States.

2. *Determining the Need for Environmental Impact Statements.* (a) Whether or not an environmental impact statement is required under section 102(2)(C) of the NEPA and filed for any Agency action, the policies and provisions of NEPA require that the environmental effects of proposed actions, and reasonable alternatives thereto (including those not within the authority of the Agency), be considered. The process of deciding on the need for an environmental impact statement on any Agency action will itself require an analysis of the effects that the proposed action will have on the human environment. The inquiry into environmental effects is mandated, independent of the requirements to file environmental impact statements, by section 102(2)(B) of the NEPA, which requires procedures to insure that presently unquantified environmental amenities and values may be given appropriate consideration in decisionmaking along with economic, technical, and other considerations. Section 1500.1 of the CEQ Guidelines underscores this by recognizing a requirement that agencies build into the decisionmaking process an appropriate and careful consideration of the environmental aspects of proposed actions. While the procedural requirements of section 102(2)(C) must be carefully complied with, it must also be emphasized that the essence of the NEPA is the need for real consideration of environmental effects.

(b) Section 102(2)(C) of the NEPA requires an environmental impact statement on "every recommendation or report on proposals for legislation and other major Federal actions significantly affecting the quality of the human environment." Therefore, if otherwise required, an environmental impact statement must be prepared for an activity which is both a major Federal action and has a potentially significant effect on the environment. For a general elaboration of the terms see the CEQ Guidelines, especially sections 1500.5 and 1500.6. In assessing the need for impact statements regarding any particular action, the following guidelines will be considered:

(1) The Agency is responsible for determining whether environmental impact statements are required and for preparing such statements with respect to Federal actions for which the Agency is solely responsible or for which it is the "lead agency", as defined in section 1500.7(b) of the CEQ Guidelines. However this does not encompass actions having no environmental impact under peacetime conditions (e.g., actions taken in formulating rules regulating the conduct of warfare), or activities covered by section 36 of the Arms Control and Disarmament Act (sec. 146 of Public Law 94-141). In connection with the Agency's responsibilities, it should be noted that although the Agency conducts activities related to the preparation for and management of U.S. participation in international negotiations in the arms control and disarmament field, these functions are subject to the direction of the Secretary of State (see 22 U.S.C. 2551(b), 22 U.S.C. 2574(a), and the Department of State Circular 175 Procedure (11 FAM 720)). (For Department of State environmental impact statement procedures, see 37 FR 19167, September 19, 1972.)

(2) The Agency is responsible for determining whether environmental impact statements are required for its research projects and for preparing such statements for those projects which constitute major Federal actions significantly affecting the quality of the human environment. Since the Agency's research is directed at acquiring a fund of theoretical and practical knowledge for arms control and disarmament policy formulation, the conduct of most Agency research will not involve significant environmental impact; however, there are types of research, e.g., field research, which could have significant effects on the environment and may therefore require an environmental impact statement.

(3) Mandatory actions (i.e., those for which no alternatives are available) required under any treaty or international agreement to which the United States is a party, or required by the decisions of international organizations, authorities, conferences, or consultations in which the United States is a member or participant, will not be considered major Federal actions for purposes of the NEPA.

(4) Indirect effects of Agency activities can lead to a need to file an environmental impact statement. In some such instances, the Agency might be the lead agency responsible for the preparation of such a statement. However, in most cases, another Agency will be responsible since the action of this Agency will merely permit rather than require action by the other agency or will leave open the manner in which the actions of the other agency will be performed. For example, projects such as the destruction of weapons in accordance with the provisions of an international arms control agreement would be the subject of environmental impact statements, if otherwise required, prepared by the Department of Defense, the Department of State, or other lead agency. In some cases, joint preparation of the statement by two or more agencies may be appropriate.

3. *Responsibility within the Agency.* The Office of the General Counsel (GC) is responsible for the legal aspects of filing environmental impact statements and the contents of any such statements as well as for coordination of necessary activities related thereto. The Non-Proliferation and Advanced Technology Bureau (NTB) has primary responsibility for the scientific and other non-legal aspects of the Agency's compliance with the requirements of the NEPA. Other Agency bureaus and offices are responsible for providing necessary assistance to GC and NTB on environmental matters. Disagreements between bureaus and offices will be referred to the Director of the Agency for resolution.

Each Agency bureau or office having operational responsibility over a proposed major action which may significantly affect the environment shall inform NTB and GC of the proposed action, its potential environmental impact and reasonable alternatives thereto. In order to determine whether the proposed action will be "a major Federal action significantly affecting the quality of the human environment," NTB and GC, together with the bureau or office having operational responsibility, shall investigate the direct and indirect environmental effects of the proposed action. Where appropriate to supplement their work in evaluating the environmental impact of the proposed action, they will solicit information from other parts of the Agency, from other Government agencies with jurisdiction by law or special expertise with respect to any environmental impact involved, or from private organizations.

In each instance where it is determined, after this investigation, that no environmental impact statement will be prepared by the Agency, a memorandum will be prepared jointly by NTB and GC for Agency files indicating the extent of the investigation conducted and the reasons for the determination that no impact statement will be prepared. A list of actions for which such memoranda have been prepared will be available to Government agencies or members of the public on request to GC.

Where it is determined that an environmental impact statement will be prepared by the Agency, NTB, together with the bureau having operational responsibility and GC for the legal aspects, will prepare the statement. In doing so, they shall consult with and obtain the comments of Government agencies with special expertise or interest. In addition they may, where appropriate, solicit information and comments from private organizations and, under the direction of the Secretary of State, engage in consultations with foreign governments whose environments will be substantially affected by the proposed action. Decisions on legal requirements regarding the contents of environmental impact statements will be obtained from GC.

4. *Responsibility for Investigation Into Environmental Effects of All Proposed Actions.* Even where it appears clear from the start that a proposed action will not require an environmental impact statement, the consideration of possible environmental effects will still be made by NTB and the bureau having operational responsibility and, as required by the NEPA, the results of that investigation will be an integral part of the decisionmaking process. Furthermore, where no impact statement will be prepared, GC will nonetheless submit for review and comment to the Environmental Protection Agency (EPA) all proposals for legislation, regulations, and construction projects which are related to the statutory responsibilities of the Administrator of the EPA, as required by section 309 of the Clean Air Act and by section 1500.9(b) of the CEQ Guidelines.

5. *General Procedure.* Unless excluded under section 2, actions of the Agency which are covered by the NEPA will require an environmental impact statement. Section 1500.7(a) of the CEQ Guidelines emphasizes "that draft environmental statements be prepared and circulated for comment and furnished to the Council as early as possible in the agency review process in order to permit agency decisionmakers and outside reviewers to give meaningful consideration to the environmental issue involved."

The draft statements will be distributed by GC for comment to Government agencies with jurisdiction by law or special expertise with respect to any environmental impact involved, such as the agencies identified in Appendices II and III of the CEQ Guidelines, and, in accordance with section 6(d) below, made available to the public. Upon circulation of draft statements to the EPA, comments shall be requested under both the NEPA and section 309 of the Clean Air Act. GC shall arrange for notice of the draft statement's availability to be published in the FEDERAL REGISTER.

Any comments received will be considered in final policy decisions and in the preparation of a final evironmental impact statement. All such comments should be attached to the final statement, and those responsible comments not adequately discussed in the draft statement should be appropriately dealt with in the final statement. In any case where comments are not received in sufficient time to allow consideration in final policy decisions, they should be considered in future decisionmaking in similar areas of policy.

6. *Exceptions.* The nature of negotiations and relations at the international level may make it necessary to depart in some instances from the procedures in the CEQ Guidelines. CEQ foresaw the need for such departures in sections 1500.4 and 1500.11 of the CEQ Guidelines. Exceptions applicable to the Agency are set forth below:

(a) The statements and other written matter prepared to comply with the NEPA should not normally include any classified or administratively controlled material. However, there may be situations where such statements and memoranda cannot adequately discuss environmental effects without including material classified or administratively controlled under the provisions of 22 CFR Part 605 and the ACDA Security and Classification Handbook. In any event, however, those portions of any statement which are not classified or administratively controlled shall be made available to the public unless the material thus disclosed would be distorted or incomprehensible.

(b) Every attempt will be made to comply with the 30-day and 90-day periods which section 1500.11(b) of the CEQ Guidelines requires between submission of statements and final action. Where schedules of international conferences or other factors make this impossible, the Agency will consult with the CEQ concerning appropriate modifications by the Agency of these minimum arrangements for the availability of environmental impact statements.

(c) Normally, agencies consulted in accordance with section 1500.9 of the CEQ Guidelines shall be allowed 30 days for reply, and the EPA shall be allowed 45 days. However, the procedure in section 6(b) above will be followed if it becomes necessary to reduce these periods. When this is the case, all agencies to whom the draft statement has been sent will be informed by GC of the reduced time period. The reduced time period must also be included in the public notice published in the FEDERAL REGISTER.

(d) Section 2(b) of Executive Order 11514 establishes requirements for providing public information on Federal actions and impact statements and envisions use of public hearings whenever appropriate. Public hearings will be employed by the Agency following the circulation of each draft impact statement unless it is determined that the requirements of carrying on international relations, including the constraints of time and the posture of the United States in negotiations do not allow such hearings to be carried out without prejudice to the national interest. The provisions of the Administrative Procedure Act do not apply to hearings involving "foreign affairs functions"; however, in each case where hearings are employed in accordance with this paragraph, a public notice of the hearings shall be published in the FEDERAL REGISTER indicating the time and place of the hearing and the matters to be considered, and the draft environmental impact statement shall be made available to the public at least 15 days prior to the hearings. Where possible, notice of hearings in the FEDERAL REGISTER and circulation of draft impact statements should occur 30 days before the hearings. GC shall determine the nature and the procedures to be employed for such hearings, shall arrange for the hearing and the publication of the prescribed notice, and shall conduct the hearing. If such hearings cannot be carried out, arrangements should still be made, where practicable, for an expedited opportunity for members of the public to present their views orally.

Dated: January 21, 1977.

LEON SLOSS,
Acting Director.

CIVIL AERONAUTICS BOARD

[Order No. 77-1-89; Docket No. 27573; Agreement CAB 26381 R-1 throught R-8]

INTERNATIONAL AIR TRANSPORT ASSOCIATION

Order

Issued under delegated authority January 14, 1977.

An agreement has been filed with the Board pursuant to section 412(a) of the Federal Aviation Act of 1958 (the Act) and Part 261 of the Board's Economic Regulations between various air carriers, foreign air carriers, and other carriers,

embodied in the resolutions of the Traffic Conferences of the International Air Transport Association (IATA), and adopted pursuant to the provisions of Resolution 590 dealing with specific commodity rates.

As set forth in the attachment, the agreement adds three and extends five specific commodity rates under existing specific commodity descriptions, all reflecting reductions from general cargo rates. The agreement was adopted pursuant to unprotested notices to the carriers and promulgated in an IATA letter dated January 6, 1977.

Pursuant to authority duly delegated by the Board in the Board's Regulations, 14 CFR 385.14, it is not found that the subject agreement is adverse to the public interest or in violation of the Act, provided that approval is subject to the conditions hereinafter ordered.

Accordingly, it is ordered, That:

Agreement 26381, R–1 through R–8, is approved, *Provided,* That (a) approval shall not constitute approval of the specific commodity descriptions contained therein for purposes of tariff publications; (b) tariff filings shall be marked to become effective on not less than 30 days' notice from the date of filing; and (c) where a specific commodity rate is published for a specified minimum weight at a level lower than the general commodity rate applicable for such weight, and where a general commodity rate is published for a greater minimum weight at a level lower than such specific commodity rate, the specific commodity rate shall be extended to all such greater minimum weights at the applicable general commodity rate level.

Persons entitled to petition the Board for review of this order, pursuant to the Board's Regulations, 14 CFR 385.50, may file such petitions within ten days after the date of service of this order.

This order shall be effective and become the action of the Civil Aeronautics Board unless within such period a petition for review is filed or the Board gives notice that it will review this order on its own motion.

This order will be published in the FEDERAL REGISTER.

By James L. Deegan, Chief, Passenger and Cargo Rates Division, Bureau of Economics.

PHYLLIS T. KAYLOR,
Secretary.

Agreement CAB	Specific commodity item No.	Description and rate
26381:		
R-1	0007	Fruits and vegetables, excluding strawberries, 190 c/kg,[1] minimum weight 500 kg. From Johannesburg to New York.
R-2	3341	Bathroom shower sets, 160 c/kg, minimum weight 500 kg. From Tel Aviv to New York.
R-3	3909	Locks, 145 c/kg, minimum weight 500 kg. From Tel Aviv to New York
R-4	4479	Electrical apparatus for killing insects, 190 c/kg, minimum weight 500 kg. From Tel Aviv to New York.
R-5	8001	Surgical instruments including rubber/enamel articles for use in surgery, 286 c/kg,[2] minimum weight 500 kg. From Bombay to New York.
R-6	1100	Furs, hides, pelts, and skins, excluding wearing apparel, 172 c/kg, minimum weight 1,000 kg. From Melbourne to New York.
R-7	7067	Lottery tickets, 125 c/kg, minimum weight 1,000 kg. From Auckland to New York.
R-8	9512	Handicraft, namely brass, copper, iron, wood, stone, bamboo, wicker, paper, papier mache, leather, clay, lac and handloom textiles, excluding wearing apparel, diamonds and precious stones, 112 c/kg, minimum weight 100 kg. From Nandi to Honolulu.

[1] Expires Sept. 30, 1977.
[2] Expires June 30, 1977.

DEPARTMENT OF COMMERCE

Bureau of the Census

CENSUS ADVISORY COMMITTEE ON THE SPANISH ORIGIN POPULATION FOR THE 1980 CENSUS

Public Meeting

Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (5 U.S.C., Appendix I (1974)), notice is hereby given that the Census Advisory Committee on the Spanish Origin Population for the 1980 Census will convene on February 17 and 18, 1977 at 9:30 a.m. The Committee will meet in Room 2424, Federal Building 3, at the Bureau of the Census in Suitland, Maryland.

The Committee is composed of 21 members appointed by the Secretary of Commerce. It was established in February 1975 to advise the Director, Bureau of the Census, on such 1980 census planning elements as improving the accuracy of the population count, developing definitions for classification of the Spanish-origin population, recommending subject content and tabulations of special use to the Spanish-origin population, and expanding the dissemination of census results among present and potential users of census data in the Spanish-origin population.

The agenda for the February 17 meeting is: (1) Current status of the 1980 census plans; (2) pretest census in Oakland, California; (3) enumeration of migrants; and (4) reports by Committee members on population items on the census questionnaire.

The February 18 meeting, which will adjourn at 12:30 p.m., will consist of: (1) Reports by Committee members on housing items on the census questionnaire, (2) affirmative action, and (3) Committee review and recommendations.

The meeting will be open to the public and a brief period will be set aside on February 18 for public comment and questions. Extensive questions or statements must be submitted in writing to the Committee Control Officer at least 3 days prior to the meeting.

Persons wishing further information concerning these meetings or who wish to submit written statements may contact Clifton S. Jordan, Deputy Chief, Demographic Census Staff, Bureau of the Census, Room 3779, Federal Building 3, Suitland, Maryland. (Mailing address: Washington, D.C. 20233) Telephone: (301) 763–5169.

Dated: January 21, 1977.

ROBERT L. HAGAN,
Acting Director,
Bureau of the Census.

National Oceanic and Atmospheric Administration

NEW ENGLAND REGIONAL FISHERY MANAGEMENT COUNCIL AND MID-ATLANTIC REGIONAL FISHERY MANAGEMENT COUNCIL

Meetings

Pursuant to section 302(h) of the Fishery Conservation and Management Act of 1976 (Pub. L. 94–265); and section 10(a)(2) of the Federal Advisory Committee Act; notice is hereby given of a series of public meetings to be held for the purpose of receiving public views and comments on a Draft Fishery Management Plan prepared by the New England Regional Fishery Management Council in consultation with the Mid-Atlantic Regional Fishery Management Council for the following fisheries: (a) Atlantic cod (*Gadus morhua*); (b) haddock (*Melanogrammus aeglefinus*); (c) yellowtail flounder (*Limanda ferruginea*).

These do not have a surplus available for foreign nationals to harvest and thus the draft plan pertains solely to the management of the United States domestic groundfish fisheries identified above.

The New England Regional Fishery Management Council will hold its public meetings at the following locations and dates. All will be from 7:30 to 9:30 p.m.

Monday, February 7, 1977, Gloucester City Hall, Dale Avenue, Gloucester, Massachusetts.
Tuesday, February 8, 1977, Brunswick Recreational Hall, 30 Federal Street, Brunswick, Maine.
Wednesday, February 9, 1977, Holiday Inn, 500 Hathaway Road, New Bedford, Massachusetts.
Thursday, February 10, 1977, Dutch Inn, Great Island Road, Point Judith, Rhode Island.
Friday, February 11, 1977, Cape Cod Community College, West Barnstable, Massachusetts.

The Mid-Atlantic Regional Fishery Management Council will hold its public meetings at the following locations and dates. All will be from 7:30 to 9:30 p.m.

Monday, February 7, 1977, City Hall, 4400 New Jersey Avenue (use Davis Avenue Entrance), Wildwood, New Jersey.
Tuesday, February 8, 1977, Kings Grant Inn, River Road and Route 70, Point Pleasant, New Jersey.
Wednesday, February 9, 1977, Holiday Inn, Routes US 13N and 113, Dover, Delaware.
Friday, February 11, 1977, Gold Crest Manor, North Highway, Southampton, L.I., New York.

Copies of the Draft Fishery Management Plan are being distributed by:

Office of the Director, National Marine Fisheries Service, NOAA, Page Building 2—Room 400, Washington, D.C. 20235, Tel: 202–634–7283.

Members of the public interested in immediately viewing a copy of the draft plan may contact any member of the New England or Mid-Atlantic Regional Fishery Management Councils. Copies of the complete draft plan may also be viewed at the public meetings and summaries will be distributed at the public meetings. In addition, the complete draft plan will be published in the FEDERAL REGISTER prior to the above meetings.

A summary of the draft plan may also be obtained by contacting:

John C. Bryson, Executive Director, Mid-Atlantic Regional Fishery Management Council, c/o Senator Roth's Office, Federal Building, North New Street, Dover, Delaware 19901.
Patricia Pelczarski, New England Regional Fishery Management Council, c/o National Marine Fisheries Service, State Fish Pier, Gloucester, Massachusetts 01930.

Written comments on the draft plan may be submitted by interested members of the public no later than 23 February, 1977 to either of the addresses above.

This notice was prepared and published at the request of the New England Regional Fishery Management Council in consultation with the Mid-Atlantic Regional Fishery Management Council.

Dated 24 January, 1977 at Washington D.C.

WINFRED H. MEIBOHM,
Associate Director, National Marine Fisheries Service.

DEPARTMENT OF DEFENSE

Department of the Army

CONSTRUCTION OF MILITARY FAMILY HOUSING IN FORT BELVOIR, VIRGINIA, MLITARY RESERVATION

Filing of Supplement to Final Environmental Impact Statement

In compliance with the National Environmental Policy Act of 1969, the Army is filing with the Council on Environmental Quality a Supplement to the Final Environmental Impact Statement concerning the scope reduction to 444 from 1,445 for construction of military housing units in the Fort Belvoir, Virginia, Military Reservation.

Copies of the statement have been forwarded to concerned Federal, State and local agencies. Interested individuals may obtain copies from the Office of the U.S. Army Engineer District, Norfolk, ATTN: NAOEN–D, 803 Front Street, Norfolk, Virginia 23510. In the Washington area, inspection copies can be seen in the Environmental Office, Assistant Chief of Engineers, Room 1E676, Pentagon Building, Washington, D.C. 20310. (Telephone: (202) 694–1163).

CHARLES R. FORD,
Deputy Assistant Secretary of the Army (Civil Works).

Defense Privacy Board

GUIDELINES FOR RELEASE OF PERSONAL INFORMATION TO COMMERCIAL ENTERPRISES

Application of the Privacy Act and Exemption 6 of the Freedom of Information Act

On August 30, 1976, a general notice promulgated by the Defense Privacy Board, FR Doc. 76–25326, was published in the FEDERAL REGISTER (41 FR 36523) setting forth Department of Defense proposed guidelines for release of personal information, as affected by the Privacy Act of 1974 and Exemption 6 of the Freedom of Information Act, in responding to requests for information or assistance from commercial enterprises.

The notice invited interested parties to submit their views and comments to the Defense Privacy Board by September 29, 1976. All comments with respect to the proposed guidelines were given due consideration. As a result of comments received, the following changes in the revised final policy guidelines are made in addition to language changes for clarification:

1. A new sentence is added to paragraph 3. containing policy guidelines which reads: "Requests for evaluation of personal characteristics, including pay habits, if known, shall not be provided." Reason: The Department of Defense is not in a position to render an evaluation of personal characteristics of integrity or ability of an individual to pay or not pay his or her debts.

2. Paragraph 3b. concerning releasable information pertaining to military personnel has been expanded to include: date of birth, marital status, the number, names, sex and age of dependents; awards and decorations, and the duty status at any given time. Reason: Information is releasable under the Freedom of Information Act exception, or matter of public record.

3. Paragraph 3e. providing locator assistance, containing the sentence: "However, once an individual's affiliation with the Department of Defense is terminated through separation or retirement, the locator assistance the Department may render in the disclosure of home address is severely curtailed." is changed by adding: "unless the public interest dictates disclosure of the last known home address." Reason: To permit disclosure of home address for certain special overriding public policy matters, e.g., child support and alimony.

Accordingly, the Department of Defense policy on guidelines for release of personal information to commercial enterprises, as revised, is set forth below. These guidelines will be incorporated within the Department of Defense rules implementing the Privacy Act (Title 32, Chapter 1, Part 286a) which is currently under revision.

Effective date: This policy guideline shall become effective February 1, 1977.

Adopted by the Defense Privacy Board at its office in Washington, D.C., on the 19th day of January 1977.

Dated: January 24, 1977.

MAURICE W. ROCHE,
Director, Correspondence and Directives, OASD (Comptroller).

GUIDELINES FOR RELEASE OF PERSONAL INFORMATION TO COMMERCIAL ENTERPRISES

1. *Scope.* The provisions of this guideline apply to all requests for personal information or assistance concerning Department of Defense military and civilian personnel. The provisions also apply to all commanders, supervisors, personnel officers, Privacy Act, and Freedom of Information Act officials, administrators, legal counsels and others involved in releasing information to the public within the various components of the Department of Defense.

2. *Background.* It is the policy of the Department of Defense, consistent with the Freedom of Information Act (5 U.S.C. 552) to make available to the public the maximum amount of information concerning its operations and activities. Information may be disclosed without the written consent of the individual to

whom the information pertains if such disclosure is required under the Freedom of Information Act. Section 552(b)(6) of that Act, however, clearly states that information in personnel, medical and similar files is exempt from the provisions of the Act if disclosure to a member of the public would result in a clearly unwarranted invasion of personal privacy. This guideline attempts to strike a balance between the rights of all requestors under the Freedom of Information to obtain information in Department of Defense records and the rights of individuals pursuant to the Privacy Act of 1974 (5 U.S.C. 552a) and the Freedom of Information Act (5 U.S.C. 552) to avoid an unwarranted invasion of personal privacy by the release of personal information from Department of Defense records. This guideline attempts to advise what personal information concerning individuals of the Department of Defense can and cannot be disclosed. To comply with the Privacy Act, any record contained in a system of records filed by name or personal identifier, maintained within the Department of Defense may not be disclosed by any means of communication to any other person unless it is available under the Freedom of Information Act, or to any agency outside the Department of Defense, pursuant to a published routine use or pursuant to a written request by, or with the prior written consent of, the individual to whom the record pertains.

3. *Policy Guidelines.* Commercial enterprises hold the same position and relationship to their customers and to the Government as they did before the enactment of the Privacy Act. In this connection, banks, branch banks, military banking facilities, credit unions, or any type of commercial facility or concession operating on any Department of Defense installation or facility have no better standing than any other commercial enterprises or public requestor in the private sector to obtaining personal information concerning Department of Defense personnel. Within their usual business relationships, commercial enterprises are assumed to be responsible for safeguarding the information provided by their clients and for obtaining only such information as is reasonable and necessary to conduct business. This includes normal credit information and proper identification, which may include the Social Security number. Requests for evaluation of personal characteristics including pay habits, if known, shall not be provided.

a. *Indebtedness.* The Department of Defense policy towards personal indebtedness is set forth in DoD Directive 1344.9, July 1, 1969, (32 CFR 43a) for military personnel and the Civil Service Commission Federal Personnel Manuel (5 CFR 735.207) for federal civilian employees. The established policy towards indebtedness expressed in these documents is unaffected by the Privacy Act. Department of Defense personnel are expected to pay all just financial obligations in a timely and proper manner.

b. *Releasable Information.* Information which would be released as required under provisions of the Freedom of Information Act is releasable to a member of the public. Verification of identity shall be required of an individual or commercial enterprise seeking access to information under the Freedom of Information Act (5 U.S.C. 552) only when such information is relevant to determining whether a clearly unwarranted invasion of privacy would result from the requested release. Information available under the Freedom of Information Act and not involving research or duplication may be releasable by telephone. Examples of personal information pertaining to military personnel which normally are releasable under the Freedom of Information Act without an unwarranted invasion of personal privacy are: name, rank, date of rank, salary, present and past duty assignments, future assignments which are final, office phone number, source of commission, promotion sequence number, date of birth, marital status, the number, names, sex and age of dependents, awards and decorations, and the duty status at any given time. Disclosure of personal information pertaining to civilian Department of Defense employees shall be made in accordance with the Civil Service Commission Federal Personnel Manual (5 CFR Part 294). There is nothing to preclude a written request for personal information pursuant to the Freedom of Information Act. However, a formal written request obligates the addressee to various automatic legal obligations should the request be delayed or denied. Search and duplication may require more time for processing and subject the requester to search and duplication fees (32 CFR 286.10).

c. *Restrictions on Release of Personal Information.* (1) Social Security Number (SSN): Disclosure of the SSN may constitute a clearly unwarranted invasion of personal privacy. The SSN is considered an individual identifier in accordance with the Privacy Act, which need not be disclosed in all instances without the prior written consent of the individual concerned.

(2) Home Addresses: The home address of an individual is considered to be personal information, the release of which may be considered a clearly unwarranted invasion of personal privacy. In this regard, an individual's name and address may not be sold or rented unless specifically authorized by law. Lists or compilations of names and home addresses, or single home addresses normally will not be disclosed, without the prior written consent of the individual concerned.

(3) Home Telephone Numbers: An individual's home telephone number falls within the same restrictions imposed on home addresses set forth in (2) above.

d. *Individual Consent.* Disclosure may be authorized for any personal information, including that set forth in c. above, when prior written consent for release is obtained from the individual concerned. There is nothing to preclude commercial enterprises in their direct bilateral negotiations from soliciting any personal information deemed necessary from the individual concerned or from incorporating consent to disclosure of personal information in agreements signed by their potential customers. Such an agreement might require the customer to sign a consent to the release of certain personal information at the time of a conditional sale, agreement, or the like. Commercial enterprises may incorporate the following conditions of disclosure of personal information in all agreements honored by the Department of Defense as meeting the prior written consent condition for the release of information:

"I hereby authorize the Department of Defense and its various departments and commands to verify my social security number or other identifier and disclose my home address to authorized (name of commercial enterprise) officials so that they may contact me in connection with my financial business with (name of commercial enterprise). All information furnished will be used solely in connection with my financial business relationship with (name of commercial enterprise)."

When the commercial enterprise presents such signed authorizations, the military commands or installations shall provide the appropriate information.

e. *Providing Locator Assistance.* In those cases where a Department of Defense member with a financial obligation is reassigned, and fails to inform a commercial enterprise or individual of his or her whereabouts, the remedy is to seek the locator assistance of the individual's last known commander or supervisor at the official position or duty station within that particular Department of Defense component. That commander or supervisor shall either furnish the individual's new official duty location address to the requestor or forward, through official channels, any correspondence received pertaining thereto to the individual's new commander or supervisor for appropriate assistance and response. Correspondence addressed to the individual concerned at his or her last official place of business or duty station is forwarded as provided by postal regulations to the new location, but the individual may choose not to respond. However, once an individual's affiliation with the Department of Defense is terminated through separation or retirement, the locator assistance the Department may render in the disclosure of home address is severely curtailed unless the public interest dictates disclosure of the last known home address. The Department may at its discretion forward correspondence to the individual's last known home address. The individual may choose not to respond and the Department of Defense will not act as an intermediary for private matters concerning former Department personnel who are no longer affiliated with it.

ENVIRONMENTAL PROTECTION AGENCY

[FRL 676-5]

FOSSIL FUEL-FIRED STEAM GENERATORS; SO_2 EMISSIONS

Study To Review New Source Performance Standard

The Clean Air Act requires the Environmental Protection Agency to develop and implement regulations on air pollution. These include standards of performance for new and modified stationary sources. The Act also provides that the Administrator may, from time to time, revise such standards as new knowledge or technology becomes available.

In December, 1971, pursuant to section 111 of the Clean Air Act, the Administrator promulgated a regulation establishing standards of performance for emissions of SO_2 from new or modified fossil fuel-fired steam generators. (40 CFR 60.40 et seq.) Since that time, the technology for controlling these emissions has been greatly improved. Emissions of SO_2 continue to be a national problem. The utility industry contributes about half of all the SO_2 emissions from stationary sources, and it is a source category for which rapid growth is predicted.

EPA was petitioned on August 6, 1976, by the Oljato and Red Mesa Chapters of the Navajo Tribe, and the Sierra Club, to revise that standard so as to require a 90% reduction in SO_2 emissions from all coal-fired power plants. The petition included detailed information which on its face presented a compelling case to support the claim that advances in technology since 1971 call for a revision of the standard, and EPA has agreed to investigate the matter thoroughly.

EPA is required to consider a broad range of issues in promulgating or revising a standard issued under section 111 of the Clean Air Act. Any revision of this regulation would have broad environmental impact by reducing nationwide SO_2 emissions, and would have economic impact in terms of added industry control costs and their attendant effect on the cost of electrical power. Accordingly, the Agency has initiated a study to complete the technological, economic and other documentation needed to determine to what extent the regulation for emissions of SO_2 from fossil fuel-fired steam generators should be revised. This study is scheduled for completion by November 1977.

Interested persons are invited to participate in Agency efforts by submitting written data, opinions or arguments as they may desire. The Agency is specifically interested in information on the following aspects of fossil fuel-fired steam generators and their SO_2 emissions: industry definitions; emission data; toxicological data; information concerning both demonstrated emission control technology and processes; cost associated with the control of SO_2 emissions and solid and liquid waste treatment and disposal systems; and methods and costs of coal desulfurization. Communication on these or any other aspects of this program should be submitted to: the Environmental Protection Agency, Office of Air Quality Planning and Standards, Emission Standards and Engineering Division, Research Triangle Park, North Carolina 27711, Attention: Mr. Don R. Goodwin.

In the near future, EPA will conduct a public hearing, at which interested persons will have the opportunity to orally present their views on this subject. The time and place of the hearing will be announced in a separate notice.

Dated: January 19, 1977.

ROGER STRELOW,
Assistant Administrator for Air and Waste Management.

[FR Doc.77-2586 Filed 1-26-77;8:45 am]

LOUISIANA

Submission of State Plan for Certification of Pesticide Applicators

In accordance with the provisions of Section 4(a)(2) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended (86 Stat. 973; 7 U.S.C. 136) and 40 CFR Part 171 (39 FR 36446 (Oct. 9, 1974) and 40 FR 11698 (March 12, 1975)), the Honorable Edwin Edwards, Governor of the State of Louisiana, has submitted a State Plan for Certification of Commercial and Private Applicators of Restricted Use Pesticides to the Environmental Protection Agency (EPA) for contingency approval, pending promulgation of proposed regulations. Notice is hereby given of the intention of the Regional Administrator, EPA, Region VI, to approve this plan on a contingency basis pending promulgation of the proposed regulations.

A summary of the plan follows. The entire plan, together with all attached appendices, except for sample examinations, may be examined during normal business hours at the following locations:

Louisiana Department of Agriculture, Harry D. Wilson Lab, Room 223, LSU Campus, Baton Rouge, Louisiana 70893, phone: 504-389-5478.

U.S. Environmental Protection Agency, Region VI, Pesticides & Hazardous Materials Branch, First International Building, 1201 Elm Street, Dallas, Texas 75270, phone: 214-749-7601.

U.S. Environmental Protection Agency, Office of Pesticide Programs (WH-569), Federal Register Section, Room 401 East Tower, 401 M Street SW., Washington, D.C. 20460, phone: 202-755-4854.

SUMMARY OF LOUISIANA STATE PLAN

The Louisiana Department of Agriculture, Bureau of Technical Services, has been designated as the State Lead Agency for the administrator of the pesticide certification program. Since the authority to regulate applicators is legislatively delegated between the Bureau of Technical Services and the Bureau of Entomology and Plant Industry within the Department of Agriculture, each agency will certify those applicators in its sphere of authority. The Bureau of Technical Services will certify all applicators of restricted use pesticides except those individuals required to be licensed as Structural Pest Control Operators. Those individuals will be certified by the Bureau of Entomology and Plant Industry in conjunction with the licensing procedure of the Structural Pest Control Commission. The Bureau of Entomology and Plant Industry is the departmental adjunct to the Structural Pest Control Commission and as such will administer the laws, rules, and policies of the Commission regarding certification.

The Cooperative Extension Service will handle training and educational aspects of certification with participation by the Bureau of Entomology and Plant Industry and the Bureau of Environmental Health in the areas in which they have available expertise.

Legal authority for the program is contained in the Louisiana Pesticide Control Act (R.S. 3:1621-1642) and the Louisiana Structural Pest Control Law (R.S. 40:1261-1274), and proposed regulations. A copy of the proposed regulations is attached to the plan.

The plan indicates that the State Lead Agency and cooperating agencies have sufficient qualified personnel and funds necessary to carry out the programs.

The Bureau of Technical Services will submit an annual report providing the information required in 40 CFR 171.7(d) on March 1 of each year for the previous year and other reports as may be required by 40 CFR 171.7 (d).

The major categories for commercial applicators for the State of Louisiana will conform to those listed in 40 CFR 171.3(b). Louisiana has adopted the following subcategories:

2. Forest Pest Control: a. General Forest Pest Control. b. Forest Tree Seed Orchards and Nurseries Pest Control. c. Wood Processing Treatment.

6. Right-of-Way Pest Control: a. Industrial Weed and Brush Control.

7. Industrial, Institutional, Structural and Health Related Pest Control: a. Commercial applicators licensed as Pest Control Operators by the Bureau of Entomology and Plant Industry in the following areas. 1. Entomology. 2. Wood-destroying Organism Control. 3. Household Pest Control. 4. Fumigation. 5. Rodent Control. b. Commercial applicators not covered by subcategories 7a or 7c. c. Commercial applicators who apply or supervise the application of pesticides with restricted uses in, on, or around establishments engaged in the manufacture of food products from raw agricultural commodities.

8. Public Health Pest Control: a. Mosquito Control (governmental programs). b. Rodent Control (governmental programs). c. Community Public Health Pest Control.

Approximately 4,905 commercial and 70,000 private applicators will need certification.

Commercial applicators will be certified using the standards of competency established in 40 CFR 171.4(b&c) and 171.6. Competency will be determined by written examination for both general and specific standards.

Commercial applicators will be certified by written examinations administered by employees of the appropriate agency. These tests will be graded by agency employees and the results will be mailed to the applicators.

In accordance with 40 CFR 171.7(e)(3), the State of Louisiana has described its current licensing program for applicators in subcategory 7a, 1-5 (See App. B, R.S. 40:1265) and has requested authority to certify those applicators licensed in these categories on the basis of written examinations with further demonstration of competency solely through a written examination covering the

general standards. This Agency has reviewed the examinations submitted with the Plan, and has determined that applicators licensed on the basis of the examinations have satisfied the requirements for certification with respect to the specific standards of competency. Passage by these applicators of a written examination covering the general standards would, in this Agency's view, fully satisfy the requirements for certification. Accordingly, notice is hereby given of the intention of the Regional Administrator to approve the Louisiana request.

Private applicators will be certified to the standards of competency listed in 40 CFR 171.5 and 171.6.

General certification will be obtained by private applicators by one of two methods:

1. Completion of a State Cooperative Extension Service training course which will include oral review questions and group discussions;

2. Completion of written examination administered by the State Lead Agency.

Single product certification will be used for certification of private applicators who cannot read the label and for emergency certification. A written questionnaire will be used for single product certification. This questionnaire will be administered by field inspectors of the Bureau of Technical Services and employees of other designated agencies. Applicators able to read the label will be allowed to fill out the questionnaire while those applicators not able to read a label will be asked the questions by the field inspector or employee of the designated agency. This certification will be valid for one year. Emergency certification will not be renewable. Non-reading applicator certification will be renewable.

Programmed instruction may be utilized in the future as a means of granting general certification. Louisiana will submit a copy of the programmed instruction to EPA for approval.

A copy of the examinations or a representative sample of questions has been submitted with the plan for review.

To preserve the confidentiality of the examinations, the State of Louisiana has requested they not be made available for public inspection. The Agency agrees with this request and has removed the examinations and sample questions from the public inspection copies of the plan.

Credentials will be furnished to all applicators when they become certified.

Louisiana will not accept the Government Agency Plan (GAP) as it is understood at this time. Within 60 days of final approval of the GAP a statement will be forwarded to EPA in regards to acceptance of GAP.

The Department of Agriculture intends to enter into agreements with the two Indian reservations in the State to provide for jurisdiction of applicators under this State Plan. Copies of this agreement will be furnished to EPA.

Louisiana is open to reciprocity with States that have competency standards at least equal to Louisiana. Copies of these agreements will be furnished to EPA.

Other pesticide regulatory activities include the regulation of: pesticide dealers, pesticide registrations, pesticide residues, and pest management consultants.

Pesticide inspectors will make checks of persons applying, selling, or recommending the application of pesticides to determine if they are complying with the law. Inspectors may also sample pesticides to determine if they meet the analysis specification. The inspector may also obtain pesticide residue samples.

The certification documents (credentials) will be renewed every three years for private applicators and every year for commercial applicators. All applicators will be required to attend a training session every three years beginning October 21, 1977 to maintain their certification.

PUBLIC COMMENTS

Interested persons are invited to submit written comments on the proposed State Plan for the State of Louisiana to the Chief, Pesticides and Hazardous Materials Branch, Region VI, Environmental Protection Agency, First International Building, 1201 Elm Street, Dallas, Texas 75270. The comments must be received on or before February 28, 1977, and should bear the identifying notation (OPP-42038). All written comments filed pursuant to this notice will be available for public inspection at the above mentioned location from 8:30 a.m. to 3:30 p.m. Monday through Friday.

Date: January 14, 1977.

JOHN C. WHITE,
Regional Administrator,
EPA, Region VI.

[FR Doc-77-2590 Filed 1-26-77;8:45 am]

[FRL 675-8; OPP—42033A]

NEW YORK

Approval of State Plan for Certification of Commercial and Private Pesticide Applicators

Section 4(a)(2) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended (86 Stat. 973; 7 U.S.C. 136b) and the implementing regulations of 40 CFR Part 171 require each State desiring to certify applicators to submit a plan for its certification program. Any State certification program under this section shall be maintained in accordance with the State Plan approved under this section.

On October 28, 1976, notice was published in the FEDERAL REGISTER (41 FR 47283) of the intent of the Regional Administrator, Environmental Protection Agency (EPA) Region II, to approve, on a contingency basis, the New York State Plan for Certification of Pesticide Applicators (New York State Plan). Contingency approval was requested by the State of New York pending enactment of an approvable amendment to Article 33 of the Environmental Conservation Law to delete or clarify the exemption granted to public employees from unlawful acts and pending approval of implementing regulations. Complete copies of the New York State Plan were made available for public inspection at the Bureau of Pesticides, Division of Quality Services, Department of Environmental Conservation, Albany, New York; Pesticides Branch, Environmental Programs Division, EPA Region II, New York, New York and the Federal Register Section, Technical Services Division, Office of Pesticide Programs, EPA Headquarters, Washington, D.C.

The only written comments received were from the National Canners Association. These comments were carefully reviewed and evaluated by EPA and by the Department of Environmental Conservation, the State lead agency responsible for implementing the New York State Plan.

The National Canners Association commented that because pesticide applicator training is not required by amended FIFRA, New York State Cooperative Extension Service funds for training should not be considered in the assessment of the adequacy of funding to support the State Plan. Although the State of New York plans to utilize training programs as an integral part of the pesticide applicator certification program, the Agency assessed the proposed certification program only on the basis of funding information provided by the lead agency.

Objections were raised to the State's intention to require a certification fee for pesticide applicators, to the plan's provision for private applicator categories and to certain commercial applicator subcategory divisions. It is the Agency's position that Section 4 of the amended FIFRA establishes a coordinated State/Federal program for certifying applicators with section 4(a)(1) making EPA responsible for prescribing applicator certification standards. Under section 24 of the amended FIFRA, the States are left with a great deal of flexibility in developing their individual programs provided these programs meet the prescribed Federal standards. These comments received pertain to regulatory requirements which are specific to the State of New York and do not address the acceptability of the regulations to the Agency. Since these comments are pertinent to the specifics of the New York State Plan, the Agency has forwarded the comments to the Department of Environmental Conservation for its consideration.

Certain comments address regulations promulgated under amended FIFRA rather than the acceptability of the plan under Federal regulations. Since these comments are not germane to the conformance of the plan to prescribed standards they were not considered by the Agency.

The New York State Plan will remain available for public inspection at the Bureau of Pesticides, Division of Quality Services, Department of Environmental Conservation, 50 Wolf Road, Albany, New York.

It has been determined that the New York State Plan will satisfy the requirements of Section 4(a)(2) of the amended FIFRA and of 40 CFR Part 171 if an approvable amendment to Article 33 of the Environmental Conservation Law to delete or clarify the exemption granted to public employees from unlawful acts is enacted and if necessary implementing regulations are promulgated. Accordingly, the New York State Plan is approved contingent upon enactment of such amendment and upon promulgation of implementing regulations in accordance with and as prescribed in the State Plan.

This contingency approval shall expire on October 21, 1977, if these terms and conditions are not satisfied by that time. On or before the expiration of the period of contingency approval, a notice shall be published in the FEDERAL REGISTER concerning the extent to which these terms and conditions have been satisfied, and the approval status of the New York State Plan as a result thereof.

Effective date. Pursuant to Section 4(d) of the Administrative Procedure Act, 5 U.S.C. 553(d), the Agency finds that there is good cause for providing that the contingency approval granted herein to the New York State Plan shall be effective immediately. Neither the New York State Plan itself nor this Agency's contingency approval of the Plan create any direct or immediate obligations on pesticide applicators or other persons in the State of New York. Delays in the work necessary to implement the plan, such as may be occasioned by providing some later effective date for this contingency approval, are inconsistent with the public interest. Accordingly, this contingency approval shall become effective immediately.

Dated: January 70, 1977.

ERIC B. OUTWATER,
Acting Regional Administrator,
United States Environmental
Protection Agency, Region II.

[FR Doc.77-2589; Filed 1-26-77;8:45 am]

[FRL 675-6, OPP-180111]

WASHINGTON STATE DEPARTMENT OF AGRICULTURE

Issuance of Specific Exemption To Use Benomyl to Control Fungus on Cabbage, Cauliflower, Broccoli, and Brussels Sprout Seeds

Pursuant to the provisions of section 18 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended (86 Stat. 973; 89 Stat. 751; 7 U.S.C. 136(a) et seq.), notice is given that the Environmental Protection Agency (EPA) has granted a specific exemption to the Washington State Department of Agriculture (hereafter referred to as the "Applicant") to use benomyl on commercial cabbage, cauliflower, broccoli, and brussels sprout seeds in western Washington to control infestations of the fungus *Phoma lingam*, which causes the plant disease called "blackleg". This exemption was granted in accordance with, and is subject to, the provisions of 40 CFR Part 166, issued December 3, 1973 (38 FR 33303), which prescribes requirements for exemption of Federal and State agencies for use of pesticides under emergency conditions.

This notice contains a summary of certain information required by regulation to be included in the notice. For more detailed information, interested parties are referred to the application on file with the Registration Division (WH-567), Office of Pesticide Programs, EPA, 401 M Street, S.W., Room E-315, Washington, D.C. 20460.

According to the Applicant, *Phoma lingam*, the causal agent of blackleg disease in these crucifers (plants of the family *Cruciferae*) is frequently present on seed, but epidemic outbreaks depend on the weather conditions in seed growing, transplant and food production areas. The organism, which may remain viable on plant debris for up to four (4) years, can be introduced into new fields by seed transmission. The Applicant stated that a disastrous outbreak of cabbage blackleg occurred in the eastern cabbage-growing States in 1973 as a result of seed transmission of *Phoma lingam*. In that year, cabbage growers suffered a ten (10) percent loss of the nation's cabbage crop to blackleg and blackrot; the cabbage seed growing industry of Washington State was threatened by lawsuits and the potential loss of insurance coverage.

Control of this fungus requires effective treatment of stock seed used for seed production and commercial seed; however, tolerances have not been established for benomyl residues on cabbage, cauliflower, broccoli, or brussels sprouts. EPA has made the determination that the use of benomyl on seed used exclusively for seed production does not constitute a food use and therefore, does not require food tolerances. Although there is an alternative control method, hot water treatment, the Applicant contended that it is not effective and may cause damage to the seeds. The fungus *Phoma lingam* has been found on seeds from this year's cabbage crop; without an effective control method, spread of the fungus to growing fields by seed transmission may occur.

The Applicant will treat up to one million (1,000,000) pounds of commercial seed which has been harvested from the 1976 cabbage, cauliflower, broccoli and brussels sprout seed production crop. The seed from these crucifers will be utilized for food production in 1977. Benomyl (Benlate 50 percent wettable powder, EPA Reg. No. 352-354 AA) will be applied at the rate of eight (8) ounces of the product, four (4) ounces active ingredient, in sufficient water to treat one-hundred (100) pounds of seed. Seeds will be treated upon the determination of the presence of Phoma lingam; each seed lot will be treated no more than once. Treatment will begin as soon as possible and be completed by March 31, 1977. All applications will be made by seed companies or seed contractors utilizing seed treating personnel.

There are approximately 1,500 acres of cabbage grown for seed in the United States each year, including 1,000 acres in western Washington State, according to the Applicant. These 1,000 acres supply about 80% of the cabbage seed for the United States and 30% for the world. The Applicant stated that the potential market value of cabbage raised from this seed is $84,000,000. This estimate of economic loss does not include the possible losses which could be incurred regarding the cauliflower, broccoli and brussels sprout crops.

After reviewing the application and other available information, EPA has determined that (a) a pest outbreak of the fungus *Phoma lingam* has occurred; (b) there is no pesticide presently registered and available for use to control the fungus in Washington State; (c) there are no alternative means of control, taking into account the efficacy and hazard; (d) significant economic problems may result if the fungus is not controlled; and (e) the time available for action to mitigate the problems posed is insufficient for a pesticide to be registered for this use. Accordingly, the Applicant has been granted a specific exemption to use the pesticide noted above until April 1, 1977, to the extent and in the manner set forth in the application. The specific exemption is also subject to the following conditions:

(1) A benomyl product, Benlate 50 percent wettable powder (EPA Reg. No. 352-354 AA) will be used;

(2) Benomyl will be applied at the rate of eight (8) ounces of the product, four (4) ounces active ingredient, in sufficient water to treat one hundred (100) pounds of seed;

(3) Each seed lot will receive no more than a single application of benomyl;

(4) A maximum of one million pounds of seed will be treated;

(5) Treated seed will not be used for food, feed, or any other use except planting;

(6) EPA has determined that residues of benomyl resulting from this use are not likely to exceed 0.2 ppm (parts per million) in cabbage and cauliflower and 0.4 ppm in broccoli and brussels sprouts, which will not pose a hazard to the public health. The Food and Drug Administration of the U.S. Department of Health, Education, and Welfare, has been advised of this action;

(7) The Applicant is responsible for ensuring that the restrictions pursuant to this specific exemption are met;

(8) The Applicant will monitor crops grown from treated seed for residues of benomyl and its metabolites; and

(9) All applications will be made by seed treating personnel of the seed companies or seed contractors.

Dated: January 17, 1977.

EDWIN L. JOHNSON,
Deputy Assistant Administrator
for Pesticide Programs.

RADIATION PROTECTION IN HEALING ARTS; GUIDANCE TO FEDERAL AGENCIES

Memorandum of Understanding with Department of Health, Education, and Welfare

The Environmental Protection Agency (EPA) and the Department of Health, Education, and Welfare (HEW) each have statutory responsibilities which affect radiation protection. In addition, HEW has the major Federal responsibility for national health care policy, including areas in the practice of medicine which involve radiation exposure. For the purpose of reducing unnecessary patient exposure to radiation in the healing arts, through the devel-

opment and promulgation of radiation protection guidance to Federal agencies, the EPA and HEW hereby agree to the following:

AUTHORITY

1. The Administrator of EPA is directed by Section 274(h) of the Atomic Energy Act (42 U.S.C. 2021(h)) to advise the President with respect to radiation matters, directly or indirectly affecting health, including guidance for all Federal agencies in the formulation of radiation standards and in the establishment and execution of programs of cooperation with States.

2. The Secretary of HEW is directed by Sections 301, 310, 311, and 356 of the Public Health Service Act (42 U.S.C. 241, 242o, 243, and 263d) to conduct research and investigations, to issue information to the public, to advise the States, and to make recommendations on radiation matters affecting public health and safety, and by Section 520(e) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360j(e)) to prescribe regulations restricting the sale, distribution and use of medical devices. These authorities have been delegated to the Commissioner of Food and Drugs (21 CFR 5.1).

AGENCY RESPONSIBILITIES

1. EPA will identify in consultation with other Federal agencies (including HEW) areas of potential reduction in radiation exposure in the healing arts, particularly those areas of concern to Federal agencies.

2. In the consideration of potential Federal radiation guidance affecting radiation exposure in the healing arts, EPA will consult with HEW on the need for Federal guidance, the time within which it should be developed, the degree of specificity appropriate to the problem, and the adequacy of any existing criteria as a basis for such guidance.

3. When HEW believes that development of Federal guidance is needed and is consistent with its resources and priorities, FDA will proceed to develop and promulgate a radiation protection recommendation and transmit it to EPA for review as proposed Federal radiation guidance.

4. When, in the interest of timely Federal guidance, it is appropriate to consider issuance in two phases: (1) Broad guidance developed by EPA, followed by (2) Specific implementing guidance developed by HEW, the agencies will consult on the appropriate division between the broad and specific phases.

5. In those instances when EPA develops proposed Federal radiation guidance, HEW will provide available input on the content of that guidance and a determination of the anticipated impact on health care, and EPA will address in the public record all comments by Federal agencies (including HEW), professional organizations, and the public.

6. EPA will conduct review of proposed Federal radiation guidance developed by either HEW or EPA. Such review will include coordination of appropriate review by affected Federal and State agencies, experts in radiation matters, professional organizations, and the public.

7. EPA will provide appropriate followup and coordination with Federal agencies to assure implementation of Federal radiation guidance as used in the healing arts.

LIAISON OFFICIALS

All matters pertaining to this agreement will be administered by the following officials or their designees:

For the Department of Health, Education, and Welfare: Director, Bureau of Radiological Health, FDA.

For the Environmental Protection Agency: Director, Criteria and Standards Division, Office of Radiation Programs.

PERIOD OF AGREEMENT

This Memorandum of Understanding shall continue in effect unless modified by mutual consent of both parties or terminated by either party upon thirty (30) days advance written notice to the other.

This Memorandum of Understanding will become effective on the date of the last signature.

For the Environmental Protection Agency.

Dated: January 5, 1977.

RUSSELL E. TRAIN,
Administrator.

For the Department of Health, Education, and Welfare.

Dated: January 18, 1977.

THEODORE COOPER,
Assistant Secretary for Health.

FEDERAL ENERGY ADMINISTRATION

KLEER SALT DOME STORAGE SITE; STRATEGIC PETROLEUM RESERVE

Availability of Draft Site-Specific Environmental Impact Statement

Pursuant to Section 102(2)(C) of the National Environmental Policy Act, 42 U.S.C. 4332(2)(C), the Federal Energy Administration (FEA) has prepared a draft site-specific environmental impact statement (EIS) for the Kleer salt dome site, one of eight storage sites that is being considered for the creation of a Strategic Petroleum Reserve. The Reserve is mandated by Part B of Title I, Energy Policy and Conservation Act, 42 U.S.C., Sections 6231–6246. The Reserve will be created for the storage of approximately 500 million barrels of crude oil and/or petroleum products for use in the event of a Presidential determination of a severe energy supply interruption or a requirement to meet the obligations of the United States under the International Energy Program.

The Kleer salt dome site is located near Grand Saline, Texas. This site is currently under consideration for use in the Early Storage Reserve, i.e., for the first 150 million barrels of storage capacity.

Single copies of the draft Kleer EIS (DES–77–3) may be obtained from the FEA, Office of Communications and Public Affairs, Room 3138, 12th and Pennsylvania Avenue, N.W., Washington, D.C. 20461. Copies of the draft Kleer EIS will also be available for public review in the FEA Information Access Reading Room, Room 2107, 12th and Pennsylvania Avenue, N.W., Washington, D.C. 20461, between 8:00 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays.

Interested persons are invited to submit data, views or arguments with respect to the draft Kleer EIS to Executive Communications, Box KI, Room 3309, Federal Energy Administration, 12th and Pennsylvania Avenue, N.W., Washington, D.C. 20461.

Comments should be identified on the outside of the envelope and on the documents submitted to FEA Executive Communications with the designation "Draft Kleer EIS (DES–77–3)." Fifteen copies should be submitted. All comments should be received by FEA by March 7, 1977, in order to receive full consideration.

Any information or data considered by the person furnishing it to be confidential must be so identified and submitted in one copy only. The FEA reserves the right to determine the confidential status of the information or data and to treat it according to that determination.

Issued in Washington, D.C., January 21, 1977.

DAVID G. WILSON,
Acting General Counsel,
Federal Energy Administration.

[FR Doc.77-2606 Filed 1-24-77;9:32 am]

WEST HACKBERRY SALT DOME STORAGE SITE; STRATEGIC PETROLEUM RESERVE

Availability of Final Site-Specific Environmental Impact Statement

Pursuant to Section 102(2)(C) of the National Environmental Policy Act, 42 U.S.C. 4332(2)(C), the Federal Energy Administration (FEA) has prepared a final site-specific environmental impact statement (EIS) for the West Hackberry salt dome site, one of eight storage sites that is being considered for the creation of a Strategic Petroleum Reserve. The Reserve is mandated by Part B of Title I, Energy Policy and Conservation Act, 42 U.S.C., Sections 6231–6246. The Reserve will be created for the storage of approximately 500 million barrels of crude oil and/or petroleum products for use in the event of a Presidential determination of a severe energy supply interruption or a requirement to meet the obligations of the United States under the International Energy Program.

The West Hackberry salt dome site is located in Cameron Parish, Louisiana. This site is currently under consideration for use in the Early Storage Reserve, i.e., for the first 150 million barrels of storage capacity.

Single copies of the final West Hackberry EIS (FES–76/77–4) may be obtained from the FEA, Office of Communications and Public Affairs, Room 3138, 12th and Pennsylvania Avenue, N.W., Washington, D.C. 20461. Copies of the final West Hackberry EIS will also be available for public review in the FEA Information Access Reading Room, Room 2107, 12th and Pennsylvania Avenue, N.W., Washington, D.C. 20461, between 8:00 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays.

Interested persons are invited to submit data, views or arguments with respect to the final West Hackberry EIS to Executive Communications, Box KJ, Room 3309, Federal Energy Administration, 12th and Pennsylvania Avenue, N.W., Washington, D.C. 20461.

Comments should be identified on the outside of the envelope and on the documents submitted to FEA Executive Communications with the designation "Final West Hackberry EIS (FES–76/77–4)." Fifteen copies should be submitted. All comments should be received by FEA by February 22, 1977, in order to receive full consideration.

Any information or data considered by the person furnishing it to be confidential must be so identified and submitted in one copy only. The FEA reserves the right to determine the confidential status of the information or data and to treat it according to that determination.

Issued in Washington, D.C., January 21, 1977.

DAVID G. WILSON,
Acting General Counsel.
Federal Energy Administration.

FEDERAL HOME LOAN MORTGAGE CORPORATION

[No. MC 77–5]

GOVERNMENT IN THE SUNSHINE ACT

Public Information Regarding Decision Making Process

JANUARY 13, 1977.

SECTION 1. *Purpose and scope.* Notice is hereby given of proposed rules issued by the Federal Home Loan Mortgage Corporation ("the Corporation") pursuant to the requirement of the Government in the Sunshine Act of 1976 (Pub. L. 94–409, 5 U.S.C. 552b). These proposed rules are issued in accordance with the provisions of the Act in order to provide the public with the fullest practicable information regarding the Corporation's decision making processes while protecting the rights of individuals and the ability of the Corporation to carry out its purposes and objectives.

Interested persons are invited to submit written public comments in connection with these proposed rules through February 23, 1977. Comments should be sent to Mr. Don Hill, Director of Corporate Relations, Federal Home Loan Mortgage Corporation, 311 First Street, NW., Washington, D.C. 20001.

SEC. 2. *Definitions.* (a) For purposes of these rules, the term "meeting" means any deliberations of two or more members of the Corporation's Board of Directors ("Director"), assembled in *collegio*, the purpose or effect of which is to determine or result in joint conduct of official business of the Corporation.

SEC. 3. *Opened meetings.* (a) Except as provided in section 4 of these Rules, all meetings of the Directors shall be open to the public.

(b) Procedures for open meetings:

(1) Except as provided in subparagraph (2) of this section, the Directors shall announce at least one week before a meeting the time, place, and subject matter of the meeting and the name and telephone number of the official designated to respond to requests for information about the meeting. This announcement shall be sent to the FEDERAL REGISTER for publication and also posted in the main lobby of the Corporation's headquarters which is located on the 6th floor at 311 First Street, NW., Washington, D.C. 20001.

(2) Where a majority of the Directors determine by recorded vote that Corporation business requires a shorter announcement period or a change in a meeting or portion thereof previously announced, the one-week prior-announcement rule shall be suspended and announcement shall be made at the earliest practicable time.

SEC. 4. *Closed meetings*—(a) *Expediting regulation.* (1) This section, providing for expedited closing procedures with regard to meetings or portions thereof exempt under paragraphs (4), (8), (9) (A) or (10) of subsection (c) of this Act (paragraphs (c) (4), (8), (9)(A) or (10) of this section), is adopted pursuant to 5 U.S.C. 552(d)(4), because a majority of the Directors' meetings include deliberations which if held publicly would be likely to disclose information required or authorized by law to be kept confidential. However, the Directors may choose to open any meeting on an ad hoc basis notwithstanding that it may lawfully be closed.

(2) Where a meeting or portion thereof is to be closed, a public record shall be kept of the Directors' vote at the beginning of the meeting to close it or a portion thereof and any certification by the General Counsel that such closure is authorized by law, including a statement pertaining to the relevant exemptive provision or provisions of law. Such record shall be made available to the public at the Office of the Secretary of the Corporation. Public announcement of the time, place and subject matter of closed meetings or portions thereof shall be made at the earliest practicable time.

(b)(1) A complete transcript or recording shall be made and maintained of the proceedings at each meeting or portion thereof closed to the public under these Rules, except that, where appropriate, a set of minutes may be made and maintained in lieu of such transcript or recording. Such minutes shall fully and clearly describe all matters discussed and provide a full and accurate summary of any action taken, and the reasons therefor, including a description of each of the views expressed on any item and the record of any rollcall vote (reflecting the vote of each Director on the question). All documents considered in connection with any action shall be identified in such minutes.

(ii) Such transcript, electronic recording, or minutes of the discussion of any item on the agenda shall be made promptly available to the public at or through the Office of the Secretary, except for such item or items of such discussions as the Directors determine to contain information which may be withheld under paragraph (c) of this section. Copies of such transcript or minutes or a transcription of such recording, disclosing the identity of each speaker, shall be furnished to any person at the actual cost of duplication or transcription. The Directors shall maintain a complete verbatim copy of the transcript, a complete copy of the minutes, or a complete electronic recording of each meeting, or portion of a meeting, closed to the public, for a period of at least two years after such meeting, or until one year after the conclusion of any Corporation proceeding with respect to which the meeting or portion was held, whichever occurs later.

(c) Except in a case where the Directors find that the public interest requires otherwise, the Directors may close a meeting or portion of a meeting where they determine that disclosure of information pertaining to such meeting or portion thereof is likely to:

(1) Disclose matters that are (A) specifically authorized under criteria established by an Executive order to be kept secret in the interests of national defense or foreign policy and (B) in fact properly classified pursuant to such Executive order;

(2) Relate solely to the internal personnel rules and practices of the Corporation;

(3) Disclose matters specifically exempted from disclosure by statute (other than 5 U.S.C. 552), provided that such statute (A) requires that matters be withheld from the public in such a manner as to leave no discretion on the issue, or (B) establishes particular criteria for withholding or refers to particular types of matters to be withheld;

(4) Disclose trade secrets or commercial or financial information obtained from a person and privileged or confidential;

(5) Involve accusing any person of a crime, or formally censuring any person;

(6) Disclose information of a personal nature where disclosure would constitute a clearly unwarranted invasion of personal privacy;

(7) Disclose investigatory records compiled for law enforcement purposes, or information which if written would be contained in such records, but only to the extent that the production of such records or information would (A) interfere with enforcement proceedings, (B) deprive a person of a right to a fair trial

or an impartial adjudication, (C) constitute an unwarranted invasion of personal privacy, (D) disclose the identity of a confidential source or, in the case of a record compiled by a criminal law enforcement authority in the course of a criminal investigation, or by an agency conducting a lawful national security intelligence investigation, confidential information furnished only by a confidential source, (E) disclose investigative techniques and procedures, or (F) endanger the life or physical safety of law enforcement personnel;

(8) Disclose information contained in or related to examination, operating, or condition reports prepared by, on behalf of, or for the use of the Corporation or another agency responsible for the regulation or supervision of financial institutions;

(9) Disclose information the premature disclosure of which would:

(A) Be likely to (i) lead to significant financial speculation in currencies, securities, or commodities, or (ii) significantly endanger the stability of any financial institution; or

(B) Be likely to significantly frustrate implementation of a proposed Corporation action,

except that subparagraph (B) shall not apply in any instance where the Corporation has already disclosed to the public the content or nature of its proposed action, or where the Corporation is required by law to make such disclosure on its own initiative prior to taking final action on such proposal; or

(10) Specifically concern the Corporation's participation in a civil action or proceeding, an action in a foreign court or international tribunal, or an arbitration, or the initiation, conduct, or disposition of a particular case involving a determination on the record after opportunity for a hearing.

SEC. 5. *Accommodation for public attendance at open meetings.* Open meetings are held in Room 630 at 320 First Street, N.W., Washington, D.C. 20552, at the time and on the date specified in the advance public notice; such information is also posted in the main lobby at such location. Interested members of the public may attend such meetings but may not participate therein unless invited or permitted to do so by the Corporation.

FEDERAL HOME LOAN MORTGAGE CORPORATION,
RONALD A. SNIDER,
Assistant Secretary.

[FR Doc.77-2543 Filed 1-26-77;8:45 am]

[NO: MC 77-3]

PUBLIC INFORMATION

Notice Providing Information Concerning Organization, Rules and Access to Records

JANUARY 13, 1977.

Notice is hereby given as to the (1) organization, (2) rules, and (3) procedures for access to records used by the Federal Home Loan Mortgage Corporation. Some of this information is set forth herein, and the remainder is incorporated by reference pursuant to 5 U.S.C. 552(a)(1). This Notice supersedes, in its entirety, the Notice on this subject which appeared at 41 FR 30721 on July 27, 1976 and is effective upon publication.

1. CREATION AND PURPOSE

The Federal Home Loan Mortgage Corporation (hereinafter referred to as "FHLMC" or the "Corporation") is a corporate instrumentality of the United States created pursuant to an Act of Congress enacted on July 24, 1970 (Title III of the Emergency Home Finance Act of 1970, as amended, 12 U.S.C. 1451–1459, hereinafter referred to as the "FHLMC Act"). The Federal Home Loan Mortgage Corporation was established primarily for the purpose of increasing the availability of mortgage credit for the financing of housing. It seeks to provide an enhanced degree of liquidity for residential mortgage investments primarily by assisting in the development of secondary markets for conventional mortgages.

The Corporation currently carries out its statutory responsibilities by purchasing mortgages, and by selling securities representing interests in mortgages it has purchased. Sales of mortgages provide funds for additional mortgage purchases or are used to repay borrowings of the Corporation.

The Corporation purchases conventional mortgages, FHA insured mortgages and VA guaranteed mortgages; these purchases include mortgages secured by both single family and multifamily real properties. The Corporation is statutorily limited to purchasing mortgages from financial institutions the deposits or accounts of which are insured by the United States or from certain state institutions as described in the FHLMC Act. The FHLMC Act further restricts the Corporation's mortgage purchases to those mortgages which would be acceptable to institutional mortgage investors.

The Corporation currently resells mortgages it purchases primarily in the form of Participation Certificates (PCs) and Guaranteed Mortgage Certificates (GMCs). A description of the terms of these securities can be found in the current Offering Circular for PCs and current Prospectus for GMCs, both of which are available from the Corporation. The primary purchasers of PCs have been savings and loan associations, and the primary purchasers of GMCs have been institutional investors—e.g., pension funds.

2. CENTRAL AND FIELD ORGANIZATION

A. *Principal and Regional Offices.* The principal office of the Federal Home Loan Mortgage Corporation is located at 311 First Street, NW., Washington, D.C. 20001. In addition, it has established five regional offices for administrative purposes. The locations and respective administrative areas of these regional offices are set forth below.

Regional Offices and Administrative Areas

Northeast: 2001 Jefferson Davis Highway, Suite 901, Arlington, Virginia 22202 (703) 685–2400: Connecticut, Delaware, District of Columbia, Maine, Maryland, Massachusetts, New Hampshire, New Jersey, New York, Pennsylvania, Virginia, Virgin Islands, West Virginia.

Atlanta: 229 Peachtree Street, N.E., Suite 2600, Atlanta, Georgia 30343 (404) 659–3377: Alabama, Florida, Georgia, Kentucky, Mississippi, North Carolina, South Carolina, Tennessee.

Chicago: 111 East Wacker Drive, Suite 1515, Chicago, Illinois 60601 (312) 861–8400: Illinois, Indiana, Iowa, Michigan, Minnesota, North Dakota, Ohio, South Dakota, Wisconsin.

Dallas: 12700 Park Central Place, Suite 1800, Dallas, Texas 75251 (214) 387–0600: Arkansas, Colorado, Kansas, Louisiana, Missouri, Nebraska, New Mexico, Oklahoma, Texas, Wyoming.

Los Angeles: 3435 Wilshire Boulevard, Suite 1000, Los Angeles, California 90010 (213) 487–4800: Alaska, Arizona, California, Guam, Hawaii, Idaho, Montana, Nevada, Oregon, Utah, Washington.

B. *Corporation Officers and Directors.*—(i) *Board of Directors.* The Board of Directors of the Corporation consists of the Chairman and Board Members of the Federal Home Loan Bank Board. The Board of Directors is responsible for all corporate functions.

(ii) *President and Chief Executive Officer.* The President and Chief Executive Officer is directly responsible to the Board of Directors for the management of the Corporation.

(iii) *Executive Vice President and Chief Administrative Officer.* The Executive Vice President and Chief Financial Officer is directly responsible to the President for administration of corporate activities relating to Finance, Marketing, Office Services, Personnel and Systems.

(iv) *Executive Vice President and Chief Operating Officer.* The Executive Vice President and Chief Operating Officer is directly responsible to the President for the recommendation and implementation of all corporate activities relating to the procurement and administration of the corporate mortgage portfolio and regional operations.

(v) *Senior Vice President—Regional Operations.* The Senior Vice President—Regional Operations is directly responsible to the Executive Vice President and Chief Operating Officer for the administration of the corporate regional offices.

(vi) *Senior Vice President—Region.* The Senior Vice President—Region is directly responsible to the Senior Vice President—Regional Operations for the administration of the corporate regional office.

(vii) *Vice President—General Counsel.* The Vice President—General Counsel is directly responsible to the President for advice concerning corporate policy on all matters of law affecting the Corporation.

(viii) *Vice President—Research.* The Vice President—Research is directly responsible to the President for the analysis of current economic indicators affecting overall corporate activity as well as research on housing and mortgage finance related topics.

(ix) *Vice President—Congressional Relations.* The Vice President—Congressional Relations is directly responsible to the President and provides national legislative analysis, advice and coordination.

(x) *Vice President—Treasurer.* The Vice President—Treasurer is directly responsible to the Executive Vice President and Chief Administrative Officer for the recommendation and implementation of corporate financial policy.

(xi) *Vice President—Marketing.* The Vice President—Marketing is directly responsible to the Executive Vice President and Chief Administrative Officer for the development and implementation of all marketing functions of the Corporation.

(xii) *Vice President—Systems.* The Vice President—Systems is directly responsible to the Executive Vice President and Chief Administrative Officer for development, operation, support and control of all corporate computer systems.

(xiii) *Vice President—Appraisal and Underwriting.* The Vice President—Appraisal and Underwriting is directly responsible to the Executive Vice President and Chief Operating Officer for the establishment and maintenance of appraisal and underwriting standards for corporate mortgage procurement.

(xiv) *Corporate Secretary.* The Corporate Secretary is directly responsible to the Board of Directors for preparation and maintenance of the Minute Record of all official actions of the Board of Directors of the Corporation.

3. PUBLISHED INFORMATION

A. *Federal Register.* The Corporation hereby publishes in the FEDERAL REGISTER for the guidance of the public:

(i) A description of its central and field organization, and

(ii) The place at which forms may be obtained.

B. *Availability of Forms and Other Publications.* All forms and other publications of the Corporation which are described hereinafter are reasonably available to the class of persons affected thereby and may be obtained from the FOIA Director of the Corporation at the Corporation's principal office, 311 First Street, N.W., Washington, D.C. 20001, during normal business hours. These forms and publications are hereby incorporated by reference in this Notice.

(i) *Sellers' Guide Conventional Mortgages.* The Sellers' Guide Conventional Mortgages sets forth eligibility requirements applicable to conventional mortgages purchased by the Corporation, and describes the procedures pursuant to which the Corporation purchases such mortgages.

(ii) *Servicers' Guide.* The *Servicers'* Guide sets forth rules and procedures to be followed by entities (such as savings and loan associations) which service mortgages which the Corporation has purchased either in whole or in part, or on an agent basis.

(iii) *Sellers' Guide FHA/VA Mortgages.* The Sellers' Guide FHA/VA Mortgages sets forth eligibility requirements applicable to mortgages purchased by the Corporation which are either insured by the Federal Housing Administration or guaranteed by the Veterans Administration, and describes the procedures pursuant to which the Corporation purchases such mortgages.

(iv) *Mortgage Insurer Eligibility Requirements.* The Mortgage Insurer Eligibility Requirements are standards (such as minimum capitalization) which must be met by private mortgage insurance companies in order to insure those loans purchased by the Corporation as to which such insurance is required. Private mortgage insurance companies are State-chartered, and are regulated by the applicable State insurance commissioner.

(v) *Home Mortgages—Underwriting Guidelines.* The Home Mortgages—Underwriting Guidelines are intended to assist in the establishment of underwriting criteria which will produce institutional quality loans which can be purchased by the Corporation.

(vi) *How to Package and Sell Conventional Home Mortgage Loans to The Mortgage Corporation.* This publication describes, in an illustrated step-by-step manner, the way in which financial institutions should submit loans for sale to the Corporation.

(vii) *Policy and Procedure Manual.* The Policy and Procedure Manual sets forth policies and procedures to be followed by Corporation personnel in connection with mortgage purchases, underwriting review, supervision of servicers, and the sale of loans and securities.

(viii) *Annual Report.* The Corporation prepares an annual report of the type prepared by other corporate entities. The report describes the Corporation's operations for the preceding year and contains the Corporation's financial statements for that period.

(ix) *Mortgage Finance Review.* The Mortgage Finance Review, which is prepared quartely, describes mortgage activity during the preceding quarter and charts significant financial indicators relevent to housing.

(x) *FNMA/FHLMC Uniform Mortgage Instruments.* The FNMA/FHLMC Uniform Mortgage Instruments consist of a note and mortgage or deed of trust form for use in each State in connection with 1–4 family property. These forms were developed in conjunction with the Federal National Mortgage Association.

(xi) *FHLMC Uniform Mortgage Instruments.* The FHLMC Uniform Mortgage Instruments consist of a note and mortgage or deed of trust form for use in each State in connection with property involving more than four dwelling units—i.e., multifamily property.

(xii) *Current Offering Circular for PCs.* This document describes the terms and conditions under which Mortgage Participation Certificates are sold and contains information concerning the business operations and financial condition of the Corporation which may be material to the purchaser of PCs.

(xiii) *Current Prospectus for GMCs.* This document describes the terms and conditions under which Guaranteed Mortgage Certificates are sold and contains information concerning the business operations and financial condition of the Corporation which may be material to the purchaser of GMCs.

C. *Index of Records.* The Federal Home Loan Mortgage Corporation hereby determines and orders that the publication of a quarterly index to those items specified in 5 U.S.C. 552(a) is unnecessary and impractical in that it does not materially assist the public and, in addition, such publication imposes a financial burden on the Corporation. A copy of said index will nonetheless be provided, upon request, at a cost not to exceed the direct cost of duplication at the rate per page specified in Section 4E(i) of this Notice.

4. ACCESS TO RECORDS

A. *General Rule.* All records of the Corporation are made available to any person for inspection and copying in accordance with the provisions of this Notice and subject to the limitations stated in section 5 of this Notice. It is the policy of the Corporation to disclose its records (including computerized information which can be retrieved through an existing information system program of the Corporation) to the public, even though such records may, in the Corporation's discretion, be exempted from disclosure by section 552 of Title 5 of the United States Code or by Section 5 of this Notice, wherever such disclosure can be made without resulting in injury to a public or private interest intended to be protected by the foregoing statute or in a significant interference with the statutory responsibilities of the Corporation. However, requests for information which can be produced only by processing through an information systems program especially designed for that purpose are not regarded as requests for identifiable records that must be disclosed pursuant to section 552 of Title 5 of the United States Code; but it is the policy of the Corporation to make such information available if it is not otherwise exempt from disclosure, provided that the retrieval or production of such information does not unduly burden or interfere with the functioning of the Corporation. For purposes of this paragraph, a request for information which can be produced only by processing through an information systems program designed for that purpose means any request for information which can be obtained only by the use of an information systems program furnished by the person making the request, by the creation of a new information systems program by the Corporation, or by the modification by the Corporation of one of its existing information systems programs.

B. *Statements of Policy, Interpretations, and Staff Manuals and Instructions.* Subject to the provisions of Section 5 of this Notice, the Corporation makes available for inspection and copying (1)

statements of policy and interpretations adopted by the Corporation that are not published in the FEDERAL REGISTER; and (2) administrative staff manuals and instructions to staff that affect any member of the public. However, to the extent required to prevent a clearly unwarranted invasion of personal privacy, the Corporation may delete identifying details in any material of the kinds abovedescribed; and in each such case the justification for such deletion will be fully explained in writing. The Corporation maintains and makes available for public inspection and copying a current index providing indentifying information for the public as to any material described in this paragraph which is issued, adopted or promulgated after July 24. 1970 (date of corporate charter).

C. *Other Records.* Subject to the provisions of Section 5 of this Notice, a record of the final votes of each member of the Board of Directors of the Corporation in any proceeding of the Corporation is available for public inspection.

D. *Requests for Records and Other Information.* Available records and other information of the Corporation subject to this section may be inspected or copied during regular business hours on regular business days at the offices of the Federal Home Loan Mortgage Corporation, 311 First Street, NW., Washington, D.C. 20001. Any person requesting access to, or copying of, such records or other information shall submit such request in writing to the FOIA Director. The request shall state the full name and address of the person and a description of the records or other information sought that is reasonably sufficient to permit their identification without undue difficulty. Wherever possible request should be submitted in advance of the date inspection or copying is desired, preferably by mail.

E. *Fees for Providing Copies of Records.* (i) A person requesting access to or copies of particular records shall pay the cost of searching or copying such records at the rate of $10 per hour for searching by non-clerical personnel, $5 per hour for searching by clerical personnel, and 10 cents per page for copying. Unless a requester states in his initial request that he will pay all costs regardless of amount, he shall be notified as soon as possible if there is reason to believe that the cost for obtaining access to and/or copies of such records will exceed $50. If such notice is given, the time limitations contained elsewhere in this section shall not commence until the requester agrees in writing to pay such cost. The FOIA Director is authorized to require an advance deposit whenever in his judgment such a deposit is necessary to insure that the Corporation will receive adequate reimbursement of its costs. If such a deposit is required, the time limitations contained elsewhere in this section shall not commence until the deposit is paid.

(ii) The FOIA Director or a person designated by the FOIA Director is authorized either to waive such payment in instances in which total charges are less than $3, or to waive in full or in part such fees when unnecessary hardship would be inflicted upon the requesting person or when waiver would serve the public interest.

(iii) With respect to information obtainable only by processing through an information systems program, which has been made available under paragraph A of this section, a person requesting such information shall pay a fee equal to the full cost of retrieval and production of the information requested and the Vice President—Systems, or such person or persons as he may designate, with the concurrence of the Vice President—Research, or such person or persons as he may designate, is authorized to determine the cost of such retrieval and production, and to waive such payment in instances in which unnecessary hardship would be inflicted upon the requesting person or in which waiver would serve the public interest.

F. *Initial Determination.* (i) The FOIA Director of the Corporation, or his designee, shall determine within 10 days (excepting Saturdays, Sundays and legal public holidays) after the receipt by the FOIA Director of a written request for records or other information of the Corporation whether, or the extent to which, the Corporation will comply with such request.

(ii) Upon determination by the FOIA Director, or his designee, with respect to a request for records or other information of the Corporation, the FOIA Director shall immediately send written notification to the person making the request. If the request is denied, in whole or in part, said notification shall include the reasons therefore and shall advise such person that such determination is not a final agency action and of the right to appeal therefrom under paragraph G of this Section.

G. *Appeal Procedure.* (i) In the event of a denial of a request for records or other information pursuant to paragraph F of this Section, the person making the request may appeal from such denial to the Board of Directors of the Corporation by so notifying the FOIA Director at the address set forth in Section 4D of this Notice. Such an appeal shall be in writing and shall state the grounds for the appeal.

(ii) The Board of Directors of the Corporation has delegated to the Vice President—General Counsel the authority to grant (in whole or in part) any request for records or other information which was denied by the FOIA Director pursuant to paragraph F of this Section, and as to which an appeal to the Board of Directors has been filed pursuant to paragraph G(i) thereof. In the event that the Vice President-General Counsel decides to grant such a request, this decision shall be made within 10 days (excepting Saturdays, Sundays and legal public holidays) after the receipt of the appeal to the Board of Directors. In the event that the Vice President-General Counsel does not grant such a request, the Board of Directors (or such Member thereof as it shall designate) shall make its determination with respect to the appeal within 20 days (excepting Saturdays, Sundays and legal public holidays) after receipt of such appeal under paragraph G(i) of this Section. If the Board of Directors upholds (in whole or in part) the denial of a request for records or other information, the FOIA Director shall promptly notify the person making the request. Such notice shall be in writing, and shall inform such person of the provisions for judicial review under 5 U.S.C. 552(a)(4).

H. *Appeal During Pendency of Action for Judicial Review.* If a suit is filed in a district court of the United States under 5 U.S.C. 552(a)(4) in any case in which an initial adverse determination, in whole or in part, has been issued, regardless of whether or not the suit is premature: (1) the Board of Directors of the Corporation or a designated Member thereof may continue to process any appeal therefrom under paragraph G of this Section, or (2) if the person making the request has not appealed under said paragraph G, the Board of Directors of the Corporation or a designated Member thereof may initiate and process an appeal from such determination.

I. *Time Extension in Unusual Circumstances.* In unusual circumstances as provided in this paragraph, the time limitations prescribed in paragraphs F or G of this Section may be extended for not more than ten additional working days by written notice to the person making the request setting forth the reasons for such extension and the date on which a determination of the request or appeal is expected to be dispatched. As used herein, "unusual circumstances" means:

(i) The need to search for and collect the requested records from field facilities or other establishments that are separate from the office processing the request;

(ii) The need to search for, collect and appropriately examine a voluminous amount of separate and distinct records which are demanded in a single request; or

(iii) The need for consultation with another agency having substantial interest in the determination of the request or the appeal, or among two or more components of the Corporation having substantial subject-matter interest therein.

J. *Time Limitations.* All time limitations established pursuant to this Section with respect to initial determinations and appeals therefrom shall begin as of the time that a written request for records or other information of the Corporation, or the appeal from such determination, is actually received by the FOIA Director.

5. INFORMATION NOT DISCLOSED

A. *General Rule.* Except as otherwise provided in this Section or as may be specifically authorized by the Corporation, records or other information of the Corporation that have not been published in accordance with this Notice and are not available to the public through other sources will not be made available to the public or otherwise disclosed if such records or other information are:

(i) Specifically authorized under criteria established by an Executive order to be kept secret in the interest of national defense or foreign policy and are in fact properly classified pursuant to such Executive order;

(ii) Related solely to the internal personnel rules and practices of the Corporation;

(iii) Specifically exempted from disclosure by statute;

(iv) Trade secrets and commercial or financial information obtained from a person and privileged or confidential;

(v) Inter-agency or intra-corporate memoranda or letters which would not be available by law to a party other than an agency in litigation with the Corporation;

(vi) Personnel and medical files and similar files the disclosure of which would constitute a clearly unwarranted invasion of personal privacy;

(vii) Investigatory records compiled for law enforcement purposes, but only to the extent that the production of such records would (a) interfere with enforcement proceedings, (b) deprive a person of a right to a fair trial or an impartial adjudication, (c) constitute an unwarranted invasion of personal privacy, (d) disclose the identity of a confidential source, (e) disclose investigative techniques and procedures, or (f) endanger the life or physical safety of law enforcement personnel; or

(viii) Contained in or related to examination, operating, or condition reports prepared by, or on behalf of, or for the use of an agency responsible for the regulation or supervision of financial institutions;

Any reasonably segregable portion of a record shall be provided to any person requesting such record after deletion of the portions which are exempt from disclosure under this Section.

B. *Prohibition Against Disclosure.* Except as authorized by this Notice or otherwise by the Corporation, no officer, employee, or agent of the Corporation shall disclose or permit the disclosure of any unpublished information of the Corporation to anyone (other than an officer, employee, or agent of the Corporation properly entitled to such information for the performance of his official duties), whether by giving out or furnishing such information or a copy thereof or by allowing any person to inspect, examine, or copy such information or copy thereof, or otherwise. Notwithstanding the foregoing, unpublished economic, statistical or similar information may be disclosed, orally or in writing, by any officer, employee or agent of the Corporation, subject, however, to the restrictions stated in this section.

C. *Subpoenas.* (i) If any person, whether or not an officer, employee, or agent of the Corporation, has information of the Corporation that may not be disclosed under this Section, and in connection therewith is served with a subpoena, order or other process requiring his personal attendance as a witness or the production of documents or information in any proceeding, he shall promptly advise the Corporation of such service and of all relevant facts, including the documents and information requested and any facts which may be of assistance to the Corporation in determining whether such documents or information should be made available; and he shall take action at the appropriate time to advise the court or tribunal which issued the process and the attorney for the party at whose instance the process was issued, if known, of the substance of these rules.

(ii) Except as the Corporation has authorized disclosure of the relevant information, or except as authorized by law, any person who has information of the Corporation that may not be disclosed under this section and is required to respond to a subpoena or other legal process shall attend at the time and place therein mentioned and respectfully decline to produce such information or give any testimony with respect thereto, basing his refusal upon this Section. If, notwithstanding, the court or other body orders the disclosure of such information or the giving of such testimony, the person having such information of the Corporation shall continue respectfully to decline to produce such information and shall promptly report the facts to the Corporation for such action as the Corporation may deem appropriate.

(5 U.S.C. 552, as amended; 12 U.S.C. 1452 (b)(3)(1970))

RONALD A. SNIDER,
Assistant Secretary.

PACIFIC COAST EUROPEAN CONFERENCE, ET AL.

Agreement Filed

Notice is hereby given that the following agreement has been filed with the Commission for approval pursuant to section 15 of the Shipping Act, 1916, as amended (39 Stat. 733, 75 Stat. 763, 46 U.S.C. 814).

Interested parties may inspect and obtain a copy of the agreement at the Washington office of the Federal Maritime Commission, 1100 L Street, N.W., Room 10126, or may inspect the agreement at the Field Offices located at New York, N.Y., New Orleans, La., San Juan, Puerto Rico and San Francisco, California. Comments on such agreements, including requests for hearing, may be submitted to the Secretary, Federal Maritime Commission, Washington, D.C., 20573, on or before February 7, 1977. Any person desiring a hearing on the proposed agreement shall provide a clear and concise statement of the matters upon which they desire to adduce evidence. An allegation of discrimination or unfairness shall be accompanied by a statement describing the discrimination or unfairness with particularity. If a violation of the Act or detriment to the commerce of the United States is alleged, the statement shall set forth with particularity the acts and circumstances said to constitute such violation or detriment to commerce.

A copy of any such statement should also be forwarded to the party filing the agreement (as indicated hereinafter) and the statement should indicate that this has been done.

Notice of agreement filed by:

Raymond A. Velez, Chairman, Pacific Coast European Conference & Pacific Coast Europe Rate Agreement, 417 Montgomery Street, San Francisco, California 94104.

Agreement No. 10280, between the Associated North Atlantic Freight Conferences (ANAFC) on the one hand and the Pacific Coast European Conference and the Pacific Coast Europe Rate Agreement on the other hand evidence the understanding whereby ANAFC will provide self-policing, enforcement, cargo inspection and revenue collection services for the two bodies.

By Order of the Federal Maritime Commission

Dated: January 24, 1977.

FRANCIS C. HURNEY,
Secretary.

FEDERAL POWER COMMISSION

PANHANDLE EASTERN PIPE LINE CO.

[Docket No. CP77-112]

Notice of Application

JANUARY 13, 1977.

Take notice that on December 30, 1976, Panhandle Eastern Pipe Line Company (Applicant), P.O. Box 1642, Kansas City, Missouri 64141, filed in Docket No. CP77-112 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of natural gas pipeline and compressor facilities to be located at various points on the Applicant's existing Anadarko Gathering and Rocky Mountain systems in the states of Colorado, Oklahoma, Texas and Kansas, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant proposes to construct and operate the following facilities at the listed locations:

Pipeline facilities

Section	Township or block	Range or survey	County and State	Length (miles) diameter (inches)
10,13,16	Block 3	A.B. & M.	Carson, Tex.	2.1-12
79,77	Block 5	I. & G.N.	do.	1.6-8
77	do.	I. & G.N.	do.	.4-8
81	do.	I. & G.N.	do.	.5-8
11,12	Block 3	A.B. & M.	do.	1.1-8
	Horace Hall		Moore, Tex.	.6-6
22	Block 1	J. Poitevent	do.	.4-8
15,16	Block 44	H. & T.C.	do.	.7-8
29,30	27S	35W	Grant, Kans.	1.5-8
16	27S	35W	do.	.5-6
16	27S	36W	do.	.9-8
14,15	29S	36W	Stevens, Kans.	1.1-6
16,22	32S	36W	do.	.9-6
12,13	33S	38W	do.	1.0-6
1	35S	39W	do.	1.4-8

Section	Township or block	Range or survey	County and State	Diameter (inches) miles
26,35	31S	38W	do.	1.8-6
3	32S	38W	do.	.8-8

Compressor facilities

Station name	Section	Township	Range	County and State	Proposed horsepower
McAtee	33	34S	39W	Stevens, Kans.	2,000
Ward	16	33S	39W	Morton, Kans.	2,000
Ulysses	24	29S	36W	Grant, Kans.	(1)
Adams	22	3N	18E	Texas, Okla.	(1)
Vollmer	14	2N	67W	Weld, Colo.	1,500

[1] Re-gasification.

Applicant states that the compressor units proposed would be installed immediately adjacent to existing similar units or related pipeline facilities and that all miscellaneous pipeline facilities would run, essentially, parallel to and would be constructed within existing pipeline rights-of-way. Applicant estimates the cost of the proposed facilities to be $7,740,000. The cost would be financed from funds available to the Company.

Applicant states that the production and gathering of oil and gas in most of the areas in which the proposed facilities would be installed has been carried out for more than forty years. The pressure of these older gas reservoirs, it is indicated, has declined with a resultant loss in deliverability. Furthermore, new gas supplies have been insufficient to offset deliverability losses from the older fields. The proposed facilities would assist Applicant to remedy this problem, it is stated, by lowering system line pressures to permit production at lower reservoir pressures. Applicant anticipates that the construction and improvements proposed would allow older reservoirs on the Applicant's system to produce substantial volumes of gas and would assist Applicant in meeting its mainline requirements east of its Haven, Kansas, Compressor Station.

Any person desiring to be heard or to make any protest with reference to said application should on or before February 4, 1977, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUM,
Secretary.

City Bank & Trust Company, Moberly, Missouri, to make an additional investment in bank premises.[1]

To Establish a Domestic Branch Pursuant to Section 9 of the Federal Reserve Act.

APPROVED

Glenwood State Bank, Glenwood, Iowa. Branch to be established in the Glenwood Shopping Center, Glenwood.[2]

• • • • •

To Withdraw from Membership in the Federal Reserve System Without a Six-Month Notice as Prescribed by Section 9 of the Federal Reserve Act.

DENIED

The Oberlin Savings Bank Company, Oberlin, Ohio.[2]

• • • • •

To Form a Bank Holding Company Pursuant to Section 3(a)(1) of the Bank Holding Company Act of 1956.

APPROVED

Marion National Corporation, Marion, Indiana, for approval to acquire 28.29 per cent or more of the voting shares of Marion National Bank of Marion, Marion, Indiana.

Reed Street Company, Inc., Red Oak, Iowa, for approval to acquire an additional 66.8 per cent of the voting shares of The Montgomery County National Bank of Red Oak, Red Oak, Iowa.[2]

Midwest Bancshares, Inc., Midwest City, Oklahoma, for approval to acquire 80 per cent or more of the voting shares of Security Bank & Trust Company, Midwest City, Oklahoma.[2]

DENIED

Lake View Bancorp, Inc., Northbrook, Illinois, for approval to acquire 100 per cent of the voting shares (less directors' qualifying shares) of Lake View Trust and Savings Bank, Chicago, Illinois.

To Expand a Bank Holding Company Pursuant to Section 3(a)(3) of the Bank Holding Company Act of 1956.

APPROVED

Independent Bank Corporation, Ionia, Michigan, for approval to acquire 100 per cent of the voting shares of the successor by consolidation to Western State Bank, Howard City, Michigan.

• • • • •

To Expand a Bank Holding Company Pursuant to Section 3(a)(5) of the Bank Holding Company Act of 1956.

APPROVED

Trust Company of Georgia, Atlanta, Georgia, for approval to merge with Central Bankshares Corporation, Jonesboro, Georgia.

• • • • •

[1] Application processed on behalf of the Board of Governors under delegated authority.

[2] Application processed by the Reserve Bank on behalf of the Board of Governors under delegated authority.

To Expand a Bank Holding Company Pursuant to Section 4(c)(8) of the Bank Holding Company Act of 1956.

WITHDRAWN

Mid America Bancorporation, Inc., Minneapolis, Minnesota, notification of intent to engage in de novo activities (the placement and servicing of real estate mortgages of all kinds including but not limited to mortgages on industrial, commercial, apartments, and homes) at 815 Foshay Tower, Minneapolis, Minnesota, through a division of the Corporation known as Mid America Mortgage Company (1/7/77).[3]

DELAYED

Industrial National Corporation, Providence, Rhode Island, notification of intent to engage in de novo activities (consumer finance and insurance agency for any insurance directly related to an extension of credit or provision of other financial services or otherwise sold as a matter of convenience to the purchaser) at 715 W. Oglethorpe Boulevard, Albany, Georgia, through a subsidiary, Southern Discount Company, a subsidiary of Industrial National Corporation (1/5/77).[3]

REACTIVATED

Shawmut Corporation, Boston, Massachusetts, notification of intent to engage in de novo activities (agricultural commodity financing, and servicing such financing and related and incidental activities and in general, making, servicing, or acquiring, for its own account of for the account of others, loans and other extensions of credit to agricultural enterprises or secured by agricultural commodities) at 4701 Marion Street, Denver, Colorado, through a subsidiary, American Cattle and Crop Services Corporation (1/5/77).[3]

Citicorp, New York, New York, notification of intent to engage in de novo activities (purchasing and servicing for its own account consumer installment sales finance contracts; and will act as broker for the sale of consumer credit related life/accident and health insurance on purchased consumer installment sales finance contracts, said insurance will only be offered when such transactions are the equivalent of direct extensions of consumer credit by the subsidiary; if the proposal is effected, the subsidiary will offer to sell insurance as follows: group credit life/accident and health insurance to cover the outstanding balances on consumer installment sales finance contracts to obligators, singly or jointly, with their spouses or cosigners in the case of life coverage in the event of death, or, to make the contractual monthly payment on consumer installment sales finance transactions in the event of the obligators' disability to the extent permissible under applicable State insurance laws and regulations; and individual casualty insurance on personal property subject to security agreements; further, in regard to the sale of credit related insurance, the subsidiary will not act as a general insurance agency) at 3000 Lynch Extension, Jackson, Mississippi, through its subsidiary, Nationwide Financial Corporation (12/28/76).[3]

PERMITTED

Bank of Virginia Company, Richmond, Virginia, notification of intent to engage in de novo activities (making loans or extensions of credit such as would be made by a finance company; and acting as agent for credit life/accident and health insurance and other insurance written to protect collateral during the period of credit extension) at 10750 Lee Highway, Fairfax Mall Shopping Center, Store #26, Fairfax, Virginia, through a subsidiary, The Budget Plan Company of Virginia (a wholly-owned subsidiary of General Finance Service Corporation) (1/2/77).[3]

Bank of Virginia Company, Richmond, Virginia, notification of intent to engage in de novo activities (leasing of real property or acting as agent, broker, or adviser in leasing such property provided the lease is to serve as the functional equivalent of an extension of credit to the lessee of the property, the property to be leased to be acquired specifically for the leasing transaction or having been acquired specifically for an earlier leasing transaction) at 11011 West Broad Street Road, Richmond, Virginia, through its subsidiary, BVA Credit Corporation (1/8/77).[3]

Banks of Iowa, Inc., Cedar Rapids, Iowa, notification of intent to engage in de novo activities (bookkeeping or data processing services for the internal operations of its subsidiaries and other banking institutions and storing and processing other banking, financial, or related economic data such as performing payroll, accounts receivable or payable, or billing services for other businesses) at 1014 Nebraska Street, Sioux City, Iowa, through its subsidiary, Banks of Iowa Computer Services, Inc. (1/6/77).[3]

Security Pacific Corporation, Los Angeles, California, notification of intent to engage in de novo activities (the financing of personal property and equipment and real property and the leasing of such property or the acting as agent, broker, or adviser in the leasing and/or financing of such property where at the inception of the initial lease the effect of the transaction (and, with respect to Governmental entities only, reasonably anticipated future transactions) will yield a return that will compensate the lessor for not less than the lessor's full investment in the property plus the estimated total cost of financing the property over the term of the lease and the servicing of such financings and/or leases) at Suite 910, 7777 Bonhomme, Clayton, Missouri, through its subsidiary, Security Pacific Leasing Corporation (1/7/77).[3]

Security Pacific Corporation, Los Angeles, California, notification of intent to relocate de novo activities (the origination and acquisition of mortgage loans including development and construction loans on multi-family and commercial properties for its own account or for the sale to others and the servicing of such loans for others) from 319 West 5th Avenue to 1011 East Tudor Road, Anchorage, Alaska, through its subsidiary, Security Pacific Mortgage Corporation (1/6/77).[3]

APPROVED

Trust Company of Georgia, Atlanta, Georgia, for approval to acquire direct acquisition of ownership and control of the leasing activities of Central Bankshares Corporation, Jonesboro, Georgia.

Trust Company of Georgia, Atlanta, Georgia, for approval to acquire acquisition of 100 per cent of the voting shares of Central Bankshares Equity Corporation, Jonesboro, Georgia.

APPLICATIONS RECEIVED

To Establish a Domestic Branch Pursuant to Section 9 of the Federal Reserve Act.

[3] 4(c)(8) and 4(c)(12) notifications processed by Reserve Bank on behalf of the Board of Governors under delegated authority.

Piedmont Trust Bank, Martinsville, Virginia. Branch to be established at 200 East Church Street, Martinsville.

Tracy Collins Bank and Trust, Salt Lake City, Utah. Branch to be established at 1090 North 500 East, North Salt Lake, Davis County.

• • • • •

To Withdraw from Membership in the Federal Reserve System Without a Six Month Notice as Prescribed by Section 9 of the Federal Reserve Act.

The Oberlin Savings Bank Company, Oberlin, Ohio.

• • • • •

To Form a Bank Holding Company Pursuant to Section 3(a)(1) of the Bank Holding Company Act of 1956.

REDWOOD BANCORP

Order Amending Prior Board Orders With Regard to Divestiture of Real Estate

By Order dated July 24, 1973, the Board approved the application of Redwood Bancorp, San Francisco, California ("Redwood"), a bank holding company within the meaning of the Bank Holding Company Act (12 U.S.C. 1841), to acquire the assets of Montgomery Street Mortgage Corporation ("MSMC") and shares of West Coast Insurance Agency, Inc., both of San Francisco, California (38 FR 20951). In acquiring the assets of MSMC, Redwood indirectly acquired a parcel of unimproved real estate held by MSMC for development. Redwood committed itself to divesting that property promptly but in no event later than July 24, 1975. The Board's Order approving the acquisition was made subject to the condition that such divestiture be carried out. The period for divestiture was extended to October 24, 1976, by the Federal Reserve Bank of San Francisco. Redwood has requested that the divestiture period be extended to February 24, 1977.

Redwood has indicated that active efforts to sell the property are continuing. In fact, the property has been sold to a developer, subject to approval of the development plan by municipal authorities. It appears, in light of Redwood's efforts to sell the property, that an extension of the period for divestiture would not be detrimetnal to the public interest.

After examining the facts of record, the Board has concluded that Redwood's request should be granted. Accordingly, the Board's Order of July 24, 1973, is hereby amended to authorize retention of the property subject to the condition that Redwood promptly divest such real property, but in no event later than February 24, 1977.

In addition, the Board has noted that as a result of Redwood's acquisition of National Mortgage Company, Salt Lake City, Utah ("NMC"), approved by the Board on January 18, 1973 (38 FR 3014), Redwood holds indirectly four parcels of real property. At the time that Redwood's acquisition of NMC was approved, the Board was not aware of the ownership of such real property by NMC. The ownership of land for development or investment is not a permissible activity under the Act.

After examining the facts of record, the Board has concluded that Redwood should divest the properties that it holds indirectly through NMC. Accordingly, the Board's Order of January 18, 1973, is hereby amended so that Redwood must promptly divest itself of such properties, but in no event later than June 30, 1977.

By order of the Board of Governors,[1] effective January 19, 1977.

GRIFFITH L. GARWOOD,
Deputy Secretary of the Board.

FEDERAL TRADE COMMISSION

[File No. 72 3197]

GRAND SPAULDING DODGE, INC.

Consent Agreement With Analysis To Aid Public Comment

Pursuant to section 6(f) of the Federal Trade Commission Act, 38 Stat. 721, 15 U.S.C. 46 and § 2.34, of the Commission's Rules of Practice (16 CFR 2.34, 40 F.R. 15236, April 4, 1975), notice is hereby given that the following consent agreement containing a consent order to cease and desist and an explanation thereof, having been filed with and provisionally accepted by the Commission,

[1] Voting for this action: Chairman Burns and Governors Gardner, Wallich, Coldwell, Jackson, Partee, and Lilly.

has been placed on the public record for a period of sixty (60) days. Public comment is invited on or before March 28, 1977. Such comments or views will be considered by the Commission and will be available for inspection and copying at its principal office in accordance with § 4.9(b) (14) of the Commission's Rules of Practice (16 CFR 4.9(b) (14), 40 FR 15236, April 4, 1975). Comments should be directed to:

Office of the Secretary, Federal Trade Commission, 6th Street and Pennsylvania Avenue NW., Washington, D.C. 20580.

GRAND SPAULDING DODGE, INC.
A CORPORATION

AGREEMENT CONTAINING CONSENT ORDER TO CEASE AND DESIST

The Federal Trade Commission having initiated an investigation of certain acts and practices of Grand Spaulding Dodge, Inc., a corporation, sometimes hereinafter referred to as proposed respondent, and it now appearing that proposed respondent is willing to enter into an agreement containing an order to cease and desist from the use of the acts and practices being investigated.

It is hereby agreed by and between Grand Spalding Dodge, Inc., by its duly authorized officer, and its attorney, and counsel for the Federal Trade Commission that:

1. Proposed respondent Grand Spaulding Dodge, Inc. is a corporation organized, existing and doing business under and by virtue of the laws of the State of Illinois, with its principal place of business located at 3300 W. Grand Ave., Chicago, Illinois.

2. This agreement is for settlement purposes only and does not constitute an admission by proposed respondent that the law has been violated as alleged in the draft of complaint here attached.

3. Proposed respondent admits all the jurisdictional facts set forth in the draft of complaint here attached.

4. Proposed respondent waives:

(a) Any further procedural steps;

(b) The requirement that the Commission's decision contain a statement of findings of fact and conclusions of law; and

(c) All rights to seek judicial review or otherwise to challenge or contest the validity of the order entered pursuant to this agreement.

5. This agreement shall not become a part of the official record of the proceeding unless and until it is accepted by the Commission. If this agreement is accepted by the Commission it, together with the draft of complaint contemplated thereby, will be placed on the public record for a period of sixty (60) days and information in respect thereto publicly released, and such acceptance may be withdrawn by the Commission if, within thirty (30) days after the sixty (60) day period, comments or views submitted to the Commission disclose facts or consideration which indicate that the order contained in the agreement is inappropriate, improper, or inadequate.

6. This agreement contemplates that, if it is accepted by the Commission, and if such acceptance is not subsequently withdrawn by the Commission pursuant to the provisions of § 2.34 of the Commission's Rules, the Commission may, without further notice to proposed respondent, (1) issue its complaint corresponding in form and substance with the draft of complaint here attached and its decision containing the following order to cease and desist in disposition of the proceeding and (2) make information public in respect thereto. When so entered, the order to cease and desist shall have the same force and effect and shall become final and may be altered, modified or set aside in the same manner and within the same time provided by statute for other orders. The order shall become final upon service. Mailing of the complaint and decision containing the agreed-to order to proposed respondent's address as stated in this agreement shall constitute service. Proposed respondent waives any right he may have to any other manner of service. The complaint may be used in construing the terms of the order, and no agreement, understanding, representation, or interpretation not contained in the order or the agreement may be used to vary or contradict the terms of the order.

7. Proposed respondent has read the proposed complaint and order contemplated hereby, and understands that once the order has been issued, it will be required to file one or more compliance reports showing that it has fully complied with the order, and that it may be liable for a civil penalty in the amount provided by law for each violation of the order after it becomes final.

ORDER

It is ordered, that respondent Grand Spaulding Dodge, Inc., a corporation, its successors and assigns and its officers, and respondent's agents, representatives and employees, directly or through any corporation, subsidiary, division or other device, in connection with the advertising, offering for sale, sale, and distribution of new and used automobiles in or affecting commerce, as "commerce" is defined in the Federal Trade Commission Act, do forthwith cease and desist, in connection with credit sales in which the sales presentation has been conducted in whole or in part in Spanish, from:

1. Failing to furnish consumers with complete and accurate translations in Spanish of any documents, notices or disclosures normally provided to consumers in connection with respondent's credit sales at the time of the transaction.

2. Failing to furnish to consumers executing any contracts, agreements or other documents in connection with such credit sales, a complete and accurate translation in Spanish of each such writing, prior to the execution of the same.

Provided however, That nothing in this order shall be understood to apply to sales receipts or other documents which serve merely as a memorandum of sales and do not, in themselves, contain covenants, disclaimers or other provisions defining the rights and responsibilities of the parties.

Further provided, That respondent must comply with subparagraphs 1 and 2 of this order by providing consumers either with:

a. bilingual documents containing all the provisions and disclosures in both English and Spanish, or

b. separate documents containing complete and accurate translations in Spanish of each English language document, and which shall contain in a clear and conspicuous manner in the Spanish language, the following heading in bold-face 10 point type:

READ THIS FIRST

THIS IS A TRANSLATION OF THE DOCUMENT OR DOCUMENTS YOU HAVE RECEIVED OR ARE ABOUT TO SIGN.

It is further ordered, That respondent shall display, in at least two different locations on its premises, one of them being the location where consumers usually execute consumer credit instruments or other legally binding documents, the following notice in Spanish:

NOTICE TO SPANISH-SPEAKING CUSTOMERS

IF YOU ARE A SPANISH-SPEAKING CONSUMER AND THE SALE PRESENTATION WAS MADE, IN WHOLE OR IN PART IN SPANISH, YOU ARE ENTITLED TO RECEIVE A SPANISH TRANSLATION OF THE CREDIT CONTRACT AND OF THE OTHER DOCUMENTS RELATED TO THE FINANCING OF YOUR PURCHASE BEFORE YOU SIGN ANYTHING. DO NOT SIGN ANY DOCUMENTS UNTIL YOU HAVE RECEIVED AND READ THE SPANISH TRANSLATIONS.

It is further ordered with respect to each account in which translations in Spanish are provided, as required herein, that respondent shall maintain in its files, for a period of two years, statements signed by respondent's consumers acknowledging receipt of such translations.

It is further ordered, That respondent deliver a copy of this order to cease and desist to all operating divisions and to all present and future personnel of respondent engaged in making sales presentations and in the consummation of any consumer credit transactions.

It is further ordered, That respondent notify the Commission at least thirty (30) days prior to any proposed change in the corporate respondent such as dissolution, assignment or sale resulting in the emergence of a successor corporation, the operation or dissolution of subsidiaries or any other change in the corporation which may affect compliance obligations arising out of this order.

It is further ordered, That no provision of this order shall be construed in any way to annul, invalidate, repeal, terminate, modify or exempt respondent from complying with agreements, orders or directives of any kind obtained by any other agency, or act as a defense to actions instituted by municipal or state regulatory agencies. No provision of this order shall be construed to imply that any past or future conduct of respondent complies with the rules and regulations of, or the statutes administered by the Federal Trade Commission.

It is further ordered, That the respondents herein shall within sixty (60) days after service upon them of this order, file with the Commission a report, in writing, setting forth in detail the manner and form in which they have complied with this order.

DECISION AND ORDER

In the Matter of Grand Spaulding Dodge, Inc., a corporation.

The Federal Trade Commission having initiated an investigation of certain acts and practices of the respondent named in the caption hereof, and the respondent having been furnished thereafter with a copy of a draft of complaint which the Chicago Regional Office proposed to present to the Commission for its consideration and which, if issued by the Commission, would charge respondents with violation of the Federal Trade Commission Act; and

The respondent and counsel for the Commission having thereafter executed an agreement containing a consent order, an admission by the respondent of all the jurisdictional facts set forth in the aforesaid draft of complaint, a statement that the signing of said agreement is for settlement purposes only and does not constitute an admission by respondent that the law has been violated as alleged in such complaint, and waivers and other provisions as required by the Commission's Rules; and

The Commission having thereafter considered the matter and having determined that it had reason to believe that the respondent has violated the said Act, and that complaint should issue stating its charges in that respect, and having thereupon accepted the executed consent agreement and placed such agreement on the public record for a period of sixty (60) days, now in further conformity with the procedure prescribed in § 2.34 of its Rules, the Commission hereby issues its complaint, makes the following jurisdictional findings, and enters the following order:

1. Respondent Grand Spaulding Dodge, Inc. is a corporation, organized, existing and doing business under and by virtue of the laws of the State of Illinois with its office and principal place of business located at 3300 West Grand Ave., Chicago, Illinois.

2. The Federal Trade Commission has jurisdiction of the subject matter of this proceeding and of the respondent, and the proceeding is in the public interest.

ORDER

It is ordered, That respondent Grand Spaulding Dodge, Inc., a corporation, its successors and assigns and its officers, and respondent's agents, representatives and employees, directly or through any corporation, subsidiary, division or other device, in connection with the advertising, offering for sale, sale, and distribution of new and used automobiles in or affecting commerce as "commerce" is defined in the Federal Trade Commission Act, do forthwith cease and desist, in connection with credit sales in which the sales presentation has been conducted in whole or in part in Spanish, from:

1. Failing to furnish consumers with complete and accurate translations in Spanish of any documents, notices or disclosures normally provided to consumers in connection with respondent's credit sales at the time of the transaction.

2. Failing to furnish to consumers executing any contracts, agreements or other documents in connection with such credit sales, a complete and accurate translation in Spanish of each such writing, prior to the execution of the same.

Provided however, That nothing in this order shall be understood to apply to sales receipts or other documents which serve merely as a memorandum of sales and do not, in themselves, contain covenants, disclaimers or other provisions defining the rights and responsibilities of the parties.

Further provided, That respondent must comply with subparagraphs 1 and 2 of this order by providing consumers either with:

a. bilingual documents containing all the provisions and disclosures in both English and Spanish, or

b. separate documents containing complete and accurate translations in Spanish of each English language document, and which shall contain in a clear and conspicuous manner in the Spanish language, the following heading in bold face 10 point type:

READ THIS FIRST

THIS IS A TRANSLATION OF THE DOCUMENT OR DOCUMENTS YOU HAVE RECEIVED OR ARE ABOUT TO SIGN.

It is further ordered, That respondent shall display, in at least two different locations on its premises, one of them being the location where consumers usually execute consumer credit instruments or other legally binding documents, the following notice in Spanish:

NOTICE TO SPANISH SPEAKING CUSTOMERS

IF YOU ARE A SPANISH-SPEAKING CONSUMER AND THE SALES PRESENTATION WAS MADE, IN WHOLE OR IN PART IN SPANISH, YOU ARE ENTITLED TO RECEIVE A SPANISH TRANSLATION OF THE CREDIT CONTRACT AND OF THE OTHER DOCUMENTS RELATED TO THE FINANCING OF YOUR PURCHASE BEFORE YOU SIGN ANYTHING. DO NOT SIGN ANY DOCUMENTS UNTIL YOU HAVE RECEIVED AND READ THE SPANISH TRANSLATIONS.

It is further ordered with respect to each account in which translations in Spanish are provided, as required herein, that respondent shall maintain in its files, for a period of two years, statements signed by respondent's consumers acknowledging receipt of such translations.

It is further ordered, That respondent deliver a copy of this order to cease and desist to all operating divisions and to all present and future personnel of respondent engaged in making sales presentations and in the consummation of any consumer credit transactions.

It is further ordered, That respondent notify the Commission at least thirty (30) days prior to any proposed change in the corporate respondent such as dissolution, assignment or sale resulting in the emergence of a successor corporation, the operation or dissolution of subsidiaries or any other change in the corporation which may affect compliance obligations arising out of this order.

It is further ordered, That no provision of this order shall be construed in any way to annul, invalidate, repeal, terminate, modify or exempt respondent from complying with agreements, orders or directives of any kind obtained by any other agency, or act as a defense to actions instituted by municipal or state regulatory agencies. No provision of this order shall be construed to imply that any past or future conduct of respondent complies with the rules and regulations of, or the statutes administered by the Federal Trade Commission.

It is further ordered, That the respondents herein shall within sixty (60) days after service upon them of this order, file with the Commission a report, in writing, setting forth in detail the manner and form in which they have complied with this order.

ANALYSIS OF PROPOSED CONSENT ORDER TO AID PUBLIC COMMENT

The Federal Trade Commission has accepted an agreement to a proposed consent order from Grand Spaulding Dodge, Inc., a corporation.

The proposed consent order has been placed on the public record for sixty (60) days of reception of comments by interested persons. Comments received during this period will become part of the public record. After sixty (60) days, the Commission will again review the agreement and the comments received and will decide whether it should withdraw from the agreement or make final the agreement's proposed order.

Grand Spaulding Dodge, Inc. is an Illinois corporation engaged in the advertising, sale and distribution of new and used automobiles to the general public. Over forty percent of Grand Spaulding Dodge, Inc. customers are Spanish speaking customers.

The complaint alleges that in the advertising and sale of new and used automobiles, Grand Spaulding Dodge, Inc. engaged in false, misleading and deceptive sales presentations to Spanish speaking consumers, many of whom have been induced to deal with respondent as a result of respondent's advertisements and sales presentations made in whole or part in the Spanish language.

Spanish speaking consumers do not have the opportunity to receive full and adequate disclosure in Spanish of the terms and conditions of any agreements they have entered into with respondent.

These terms and conditions include customer's rights and obligations under sales agreement, and other written instruments normally provided to consumers at the time of the transaction.

The consent order prohibits Grand Spaulding Dodge, Inc. from failing to make adequate disclosures in Spanish to all Spanish speaking customers of the terms and conditions of the transaction as alleged in the complaint. In addition the order prohibits respondent from failing to provide customers who only speak, write and understand Spanish with bilingual documents containing all the provisions and disclosures of the transaction in both the English and Spanish languages.

Respondent must provide said customers with separate documents containing complete and accurate translations in Spanish of each English language documents in a clear and conspicous manner. A headline sign to notify consumers of this requirement is provided for in this provision of the order.

The order further requires the posting of a notice, in at least two locations, where sales agreement are negotiated, advising Spanish speaking customers that if the sales presentation was made to them in Spanish they are entitled to receive a Spanish translation of all documents that they are about to sign, and all documents relating to the financing of their purchase, prior to signing and documents.

The purpose of this analysis is to facilitate public comment of the proposed order, and it is not intended to constitute an official interpretation of the agreement and proposed order or to modify in any way their terms.

JOHN F. DUGAN,
Acting Secretary.

[FR Doc.77-2608 Filed 1-26-77;8:45 am]

NATIONAL SERVICE INDUSTRIES, INC., TRADING AS CERTIFIED LEASING COMPANY

[File No. 742 3225]

Consent Agreement With Analysis To Aid Public Comment

Pursuant to section 6(f) of the Federal Trade Commission Act, 38 Stat. 721, 15 U.S.C. 46 and Section 2.34 of the Commission's Rules of Practice (16 CFR 2.34, 40 FR 15236, April 4, 1975), notice is hereby given that the following consent agreement containing a consent order to cease and desist and an explanation thereof, having been filed with and provisionally accepted by the Commission, has been placed on the public record for a period of sixty (60) days. Public comment is invited on or before March 28, 1977. Such comments or views will be considered by the Commission and will be available for inspection and copying at its principal office in accordance with § 4.9(b)(14) of the Commission's Rules of Practice (16 CFR 4.9(b)(14), 40 FR 15236, April 4, 1975). Comments should be directed to:

Office of the Secretary, Federal Trade Commission, 6th Street and Pennsylvania Avenue, NW., Washington, D.C. 20580.

ANALYSIS OF PROPOSED CONSENT ORDER TO AID PUBLIC COMMENT

The Federal Trade Commission has accepted an agreement containing a proposed consent order from National Service Industries, Inc., doing business as Certified Leasing Company.

The proposed consent order and complaint described in this analysis have been placed on the public record for sixty (60) days for reception of comments by interested persons. Comments received during this period will become part of the public record. After sixty (60) days, the Commission will again review the agreement and the comments received and will decide whether it should withdraw from the agreement or make final the agreement's proposed order.

The complaint alleges that customers who are determined by proposed respondent to be eligible for the return of their security deposits and who do not, within ninety (90) days of the termination of the lease agreement, furnish a forwarding address to which their deposits are to be sent forfeit the deposits to the company. It also alleges that proposed respondent fails to make any effort to return to customers security deposits in instances where customers have not specifically furnished proposed respondent with their forwarding addresses.

The terms of the proposed order as presented in the provisionally accepted consent agreement require proposed respondent to cease and desist from:

(1) Failing to follow certain procedures, detailed in the order, which are aimed at maximizing the number of instances in which the company, by taking certain affirmative steps, will obtain forwarding addresses for the return of deposits to eligible customers.

(2) Failing to refund all security deposits due lessees whose lease terminated or expired within three months from the effective date of the consent order, by following certain procedures in an attempt to obtain forwarding addresses.

(3) Failing to maintain for a period of three years from the date the lease was terminated or expired adequate records concerning the disposition of each lessee's security deposit; and

(4) Failing to honor any lessee's request for the return of his security deposit up to three years from the date the lease was terminated or expired.

The purpose of this analysis is to facilitate public comment on the proposed order. It is not intended to constitute an official interpretation of the agreement and proposed order or to modify in any way their terms.

[File No. 742 3225]

AGREEMENT CONTAINING CONSENT ORDER TO CEASE AND DESIST

In the Matter of National Service Industries, Inc., a corporation, doing business as Certified Leasing Company.

The Federal Trade Commission having initiated an investigation of certain acts and practices of National Service Industries, Inc., a corporation, doing business as Certified Leasing Company, and it now appearing that National Service Industries, Inc., a corporation, doing business as Certified Leasing Company, hereinafter sometimes referred to as proposed respondent, is willing to enter into an agreement containing an order to cease and desist from the use of the acts and practices being investigated.

It is hereby agreed by and between National Service Industries, Inc., doing business as Certified Leasing Company, and its attorney, and counsel for the Federal Trade Commission that:

1. This agreement is for settlement purposes only and does not constitute an admission by proposed respondent that the facts as alleged in the draft complaint here attached are true or that any law has been violated.

2. Proposed respondent National Service Industries, Inc., doing business as Certified Leasing Company, is a corporation organized, existing and doing business under and by virtue of the laws of the State of Delaware with its office and principal place of business located at 1180 Peachtree Street, N.E., Atlanta, Georgia 30309.

3. Proposed respondent admits all the jurisdictional facts set forth in the draft of complaint here attached.

4. Proposed respondent waives:

(a) Any further procedural steps;

(b) The requirement that the Commission's decision contain a statement of findings of fact and conclusions of law; and

(c) All rights to seek judicial review or otherwise to challenge or contest the validity of the order entered pursuant to this Agreement.

5. This agreement shall not become a part of the official record of the proceeding unless and until it is accepted by the Commission. If this agreement is accepted by the Commission, it together with the complaint, will be placed on the public record for a period of sixty (60) days and information in respect thereto publicly released; and such acceptance may be withdrawn by the Commission if comments or views submitted to the Commission disclose facts or considerations which indicate that the order contained in the agreement is inappropriate, improper, or inadequate. The Commission may at any time pending final acceptance of this order, require hearings on the relief requirements provided by this order.

6. The agreement contemplates that, if it is accepted by the Commission, and if such acceptance is not subsequently withdrawn by the Commission pursuant to the provisions of Section 2.34 of the Commission's Rules, the Commission may, without further notice to the respondent, (1) issue its Complaint corresponding in form and substance with the draft of Complaint here attached and its decision containing the following order to cease and desist in disposition of the proceeding and (2) make information public in respect thereto. When so entered, the order to cease and desist shall have the same force and effect and may be altered, modified or set aside in the same manner and within the same time provided by statute for other orders. The order shall become final upon service. Mailing of the complaint and decision containing the agreed-to order to proposed respondent's address as stated in this agreement shall constitute service. Proposed respondent waives any right it may have to any other manner of service. The complaint may be used in construing the terms of the order, and no agreement, understanding, representation or interpretation not contained in the order or the agreement may be used to vary or contradict the terms of the order.

7. Proposed respondent has read the complaint and order contemplated thereby, and it understands that once the order has been issued, it will be required to file one or more compliance reports showing that it has fully complied with the order and that it may be liable for a civil penalty in the amount provided by law for each violation of the order after it becomes final.

8. It is agreed that the relief for consumers set forth in the order contained herein fully satifies any claim for consumer redress which the Commission has under sections 5(b) and 19 of the Federal Trade Commission Act, as amended, arising out of the acts and practices alleged in the complaint, prior to the effective date of this order. By its final acceptance of this agreement, with such modifications, if any, which the parties may make prior to said final acceptance, the Commission waives its right to commence a civil action under section 19 of the Federal Trade Commission Act, as amended, with respect to the acts and practices alleged in the Commission's complaint, prior to the effective date of this order.

ORDER

It is ordered, That respondent National Service Industries, Inc., a corporation, doing business as Certified Leasing Company, its successors and assigns, and its officers, representatives, agents and employees, directly or through any corporation, subsidiary, division or other device, in connection with the leasing to consumers of furniture, related accessories, or any other personal property, in or affecting commerce, as "commerce" is defined in the Federal Trade Commission Act, as amended, do forthwith cease and desist from:

1. Failing to request, both orally and in writing, at the time the lease agreement is signed with two or more legally unrelated persons, which person will be designated by the joint lessees to be the recipient of the lessees' returnable security deposit in the event that respondent is obligated to return the full security deposit or any portion thereof to such customers.

2. Failing to incorporate on the face of the lease agreement, in bold print, the following notice which shall be given to the lessee at the time the lease agreement is signed.

NOTICE: YOU MAY BE ENTITLED TO A REFUND OF ALL OR A PORTION OF YOUR SECURITY DEPOSIT AT THE TERMINATION OF THIS LEASE AGREEMENT. RETAIN THIS REMINDER SO THAT YOU MAY SEND US A FORWARDING ADDRESS WHERE YOU CAN BE REACHED SO THAT WE CAN PROMPTLY FORWARD ANY BALANCE OF THE SECURITY DEPOSIT DUE YOU.

3. Failing to request from the lessee, both orally and in writing, at the time the lease agreement is signed, a tentative forwarding address where the security deposit, or any portion thereof which may be returnable to the lessee, can be mailed if no updated forwarding address is received prior to or at the termination of the lease agreement.

4. Failing, when notice of termination of the lease agreement is received telephonically, to request from the lessee at that time a forwarding address.

5. Failing to send written notice by first class mail prior to the expiration of the term of the lease agreement to the lessee's last known address requesting a forwarding address within five business days after receiving notification of the lessee's intent to terminate the lease agreement, if such forwarding address has not been received.

6. Failing to send by first class mail, with the envelope captioned "PLEASE FORWARD," the security deposit, or any portion thereof which may be returnable to the lessee, including an itemized accounting of respondent's charges against the lessee's security deposit, within thirty (30) days from the termination of the lease agreement, to the lessee's updated forwarding address or to the tentative forwarding address obtained at the time the lease agreement was signed if no updated address has been received, or in the absence of the above, to the lessee's last known address; and failing in all other situations to provide within 30 days, by first class mail, such itemized accounting upon the oral or written request of the lessee.

It is further ordered:

A. That respondent attempt to refund all security deposits or portions thereof due lessees whose lease terminated or expired within three months from the effective date of this order. In attempting to refund all returnable deposited money, respondent shall perform the following steps:

1. Determine whether the lessee's file contains an address to which a returnable deposit is to be forwarded. If so, respondent shall forward a check in that amount to the lessee or his designee at the address given.

2. If no forwarding address is given, respondent shall send a notice by first class mail, with the envelope captioned "PLEASE FORWARD," to the lessee's last known address informing such lessee that a refund is due him, and that he should immediately contact the respondent at the address or telephone number given, requesting an address correction.

3. If the letter is returned by the post office as undeliverable, respondent shall

(a) Determine from information set forth in the lessee's credit application filed by the lessee incident to the consummation of the lease agreement the name and address of the lessee's parents, employer and a listed personal reference of the lessee.

(b) Forward the notice in the form set forth below, entitled "We need your help", to either the parents, employer, or one listed personal reference of the lessee, if such names and addresses are available in the lessee's file.

WE NEED YOUR HELP

The individual listed below recently rented furniture from Certified Leasing Company and placed a security deposit with us. The individual is entitled to a refund of all or a portion of such deposit, which refund will be sent as soon as we can determine a current address.

If you know the individual's current address and/or telephone number, please complete the following form and return it to us. The postage is prepaid.

Thank you for your help.

CERTIFIED LEASING COMPANY

Lessee .....

Street ..... Apt. .....

City ..... State ..... Zip Code .....

( ) .....

Area Code Telephone Number

B. That respondent shall not use the notices described in paragraphs 2. and A. 3.(b) of the order to collect or attempt to collect delinquent accounts.

C. That respondent maintain, for a period of three years from the date the lease was terminated or expired, adequate records including a complete summary of each lessee's file which (1) substantiate that respondent is following the procedures specified in the order, and (2) readily disclose the disposition of the lessee's security deposit and the reasons therefor, including a notation of the specific amount of money due the lessee from his security deposit; any request by such person within three years from the date the lease was terminated or expired for the return of the deposit due shall be honored by mailing the balance of said deposit within thirty (30) days from the date of receipt of such request.

D. That respondent deliver a copy of this order to all present and future administrative and sales employees engaged in any aspect of communicating

with customers with respect to the leasing to consumers of furniture or other personal property, and that respondent secure a signed statement acknowledging receipt of said order from each such person.

E. That respondent notify the Commission within thirty (30) days prior to any proposed change in the corporate respondent or its division such as dissolution, assignment or sale resulting in the emergence of a successor corporation, the creation or dissolution of subsidiaries or other change in the corporation or its division which may affect compliance obligations arising out of the order.

F. That respondent herein shall within sixty (60) days after service upon it of this order file with the Commission a report, in writing, setting forth in detail the manner and form in which it has complied with this order.

JOHN F. DUGAN,
Acting Secretary.

TRADE REGULATION RULEMAKING PROCEEDINGS UNDER THE MAGNUSON-MOSS WARRANTY—FEDERAL TRADE COMMISSION IMPROVEMENTS ACT

Placement of Presiding Officer and Staff Reports on Public Record

In Re: Placement of Presiding Officer and Staff Reports on the Public Record and Authorization of Federal Register Notice of Publication for 60-day Comment Period.

The Director of the Bureau of Consumer Protection is authorized to place on the public record and to arrange for Federal Register notice of public availability of presiding officer reports completed under Rule 1.13(f) and staff reports completed under 1.13(g) in Magnuson-Moss trade regulation rulemaking proceedings. The presiding officer's report should state that it has not been reviewed or adopted by the Bureau of Consumer Protection or by the Commission, and the staff report should state that it has not been reviewed or adopted by the Commission. Both reports should explain that the Commission's final determination in the matter will be made upon the record taken as a whole, including the presiding officer's report, the report and recommendations prepared by the staff under Section 1.13(g) of the Rules, and comments upon these reports received during the 60-day period after the staff report is placed on the public record.

By direction of the Commission.

Dated: January 26, 1977.

JOHN F. DUGAN,
Acting Secretary.

Office of the Secretary

SECRETARY'S ADVISORY COMMITTEE ON POPULATION AFFAIRS

Renewal

Notice is hereby given that pursuant to the authority contained in section 14 (a)(1)(A) of Pub. L. 92-463 I have determined that renewal of the Secretary's Advisory Committee on Population Affairs beyond December 7, 1976 is in the public interest in connection with the performance of duties imposed upon the Department by law, that such duties can best be performed through the advice and counsel of such a group, and, therefore, the Committee has been continued for a period of one year.

My determination to continue the Committee for a period of two years was communicated to the Office of Management and Budget on November 24, 1976, and that Office on December 2, 1976 approved the renewal of the Committee for a period of one year.

In making my determination I concluded that it is not feasible for the Department or any of its existing committees to perform the duties above described, and that a satisfactory plan for appropriate balance of the Committee membership has been submitted.

Dated: December 6, 1976.

DAVID MATHEWS,
Secretary.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Federal Disaster Assistance Administration

[Docket No. N-77-695]

DISASTER LEGAL SERVICES

Notice is hereby given that pursuant to section 412 of the Disaster Relief Act of 1974, Pub. L. 93-288, the Federal Disaster Assistance Administration has entered into an agreement with the Young Lawyers Section of the American Bar Association for the provision of disaster legal services for the victims of Presidentially declared major disasters. Volunteer services under this agreement is one of the methods used by the Federal Disaster Assistance Administration in providing disaster legal assistance. The Office of Emergency Preparedness, predecessor of the Federal Disaster Assistance Administration, originally entered into a legal services agreement with the Young Lawyers Section of the American Bar Association in December 1972. The Federal Disaster Assistance Administration found that arrangement beneficial and entered into a revised agreement in March 1976. The purpose of this notice is to submit the revised agreement for the public record. Also published in today's FEDERAL REGISTER are the proposed regulations governing the provision of disaster legal services, 24 CFR 2205.47a (FR Doc. 77-2703).

THOMAS P. DUNNE,
Administrator, Federal Disaster Assistance Administration.

AGREEMENT BETWEEN THE YOUNG LAWYERS SECTION (AMERICAN BAR ASSOCIATION) AND THE FEDERAL DISASTER ASSISTANCE ADMINISTRATION CONCERNING DISASTER LEGAL SERVICES

The Federal Disaster Assistance Administration, hereinafter referred to as FDAA, and the Young Lawyers Section of the American Bar Association, hereinafter referred to as YLS, enter into the following agreement concerning legal services to disaster victims at the local or State level in the aftermath of a "major disaster" as defined in the Disaster Relief Act of 1974, Public Law 93-288, hereinafter referred to as the Act.

a. *First:* When the President declares a major disaster under the Act, and when the Administrator or Regional Director of FDAA determines that implementation of this agreement is necessary, the Regional Director or his designee will notify the appropriate YLS Regional Director or State Chairman that legal services are needed in accordance with the provisions of this agreement.

b. *Second:* The YLS Regional Director or State Chairman will activate a local legal services unit and instruct them to report to the Individual Assistance Officer on the Federal Coordinating Officer's staff for full particulars and assignment. Local YLS units will then provide legal assistance in accordance with their previously prepared response plans, and with the advice and approval of the State or local bar association. The local unit shall report to, and be under the general direction of, the Individual Assistance Officer.

c. *Third:* "Legal services", for the purposes of the agreement, shall be defined as legal counseling and advice, referral to appropriate sources of assistance, and representation in non fee-generating cases. Legal services may be provided to low-income disaster victims and those who, as a result of the disaster, have insufficient resources to secure adequate legal assistance. Legal services are authorized only to assist disaster victims in securing benefits under the Act and in resolving claims arising out of the disaster.

d. *Fourth:* Disaster legal services units shall operate with the advice, assistance, and cooperation of the appropriate State or local bar association, in accordance with Section 412 of the Act. The legal services units will undertake to have knowledge of the disaster assistance programs through all available means, including training materials furnished by FDAA. At its discretion, FDAA will assist in the training of participating lawyers through the furnishing of material describing Federal disaster assistance programs, payment of travel expenses to training sessions, meetings with FDAA Regional personnel, and by other means it deems useful.

e. *Fifth:* The YLS agrees to mobilize voluntary legal services units at the local level. The mobilization functions shall include, but not be limited to, the following:

1. Enlisting of attorneys to comprise the legal services unit.

2. Serving as a conduit in transmitting materials received from FDAA and other Federal agencies.

3. Maintaining direct communication with FDAA, at the National, Regional, and local office levels.

4. Providing whatever additional services are mutually agreed upon by the parties to this agreement.

f. *Sixth:* No compensation shall be paid to or accepted by participating attorneys, nor may participating attorneys accept any fee-generating cases. Participating attorneys shall be encouraged to refer to private local attorneys any matters they are handling when it becomes apparent that substantial legal effort will be required to resolve the problem and where referral can be done without jeopardizing the interests of the disaster victims.

g. *Seventh:* FDAA will provide the local legal services units with administrative support, including office space and supplies, secretarial services, and reimbursement for official phone expenses in connection with this agreement.

h. *Eighth:* Nothing in this agreement nor in the plans developed pursuant to this agreement, precludes FDAA from providing legal services in any other manner it selects, including, without limitation, arrangements with other Federal agencies or through implementation of agreements between FDAA and State or local bar associations, or in any other manner.

i. *Ninth:* As required by Section 311 of the Act, the legal services program provided for under this agreement shall be conducted in an equitable and impartial manner, without discrimination on the grounds of race, color, religion, nationality, sex, or age.

In witness whereof, the parties hereto have executed this agreement on the 6th day of March, 1976.

THOMAS P. DUNNE,
Administrator, Federal Disaster Assistance Administration.

R. WILLIAM IDE, III,
Chairman, Young Lawyers Section, American Bar Association.

WEST VIRGINIA

Notice of an Emergency Declaration and Related Determinations

Pursuant to the authority vested in the Secretary of Housing and Urban Development by the President under Executive Order 11795 of July 11, 1974, and delegated to me by the Secretary under Department of Housing and Urban Development Delegation of Authority, Docket No D-74-285; and by virtue of the Act of May 22, 1974, entitled "Disaster Relief Act of 1974" (88 Stat. 143); notice is hereby given that on January 19, 1977, the President declared an emergency as follows:

I have determined that the impact of a drought on the State of West Virginia is of sufficient severity and magnitude to warrant a declaration of an emergency under Public Law 93-288. I therefore declare that such an emergency exists in the State of West Virginia. You are to determine the specific areas within the State eligible for Federal assistance under this declaration.

Notice is hereby given that pursuant to the authority vested in the Secretary of Housing and Urban Development under Executive Order 11795, and delegated to me by the Secretary under Department of Housing and Urban Development Delegation of Authority, Docket No. D-74-285, I hereby appoint Mr Arthur T. Doyle, FDAA Region III, to act as the Federal Coordinating Officer for this declared emergency.

I do hereby determine the following areas to have been adversely affected by this declared emergency:

The Counties of:

Grant	Mercer
Greenbrier	Mineral
Hampshire	Monroe
Hardy	Summers

The purpose of this designation is to provide emergency livestock feed assistance only in the aforementioned affected areas effective the date of this Notice.

UTAH

Emergency Declaration and Related Determinations

Pursuant to the authority vested in the Secretary of Housing and Urban Development by the President under Executive Order 11795 of July 11, 1974, and delegated to me by the Secretary under Department of Housing and Urban Development Delegation of Authority, Docket No. D-74-285; and by virtue of the Act of May 22, 1974, entitled "Disaster Relief Act of 1974" (88 Stat. 143); notice is hereby given that on January 20, 1977, the President declared an emergency as follows:

I have determined that the impact of a drought on the State of Utah is of sufficient severity and magnitude to warrant a declaration of an emergency under Public Law 93-288. I therefore declare that such an emergency exists in the State of Utah. You are to determine the specific areas within the State eligible for Federal assistance under this declaration.

Notice is hereby given that pursuant to the authority vested in the Secretary of Housing and Urban Development under Executive Order 11795, and delegated to me by the Secretary under Department of Housing and Urban Development Delegation of Authority, Docket No. D-74-285, I hereby appoint Mr. Donald G. Eddy, FDAA Region VIII, to act as the Federal Coordinating Officer for this declared emergency.

I do hereby determine the following areas to have been adversely affected by this declared emergency:

The Counties of:

Beaver	Piute
Emery	Sanpete
Juab	Sevier
Millard	

The purpose of this designation is to provide emergency livestock feed assistance only in the aforementioned affected areas effective the date of this Notice.

(Catalog of Federal Domestic Assistance No. 14.701, Disaster Assistance.)

Dated: January 20, 1977.

THOMAS P. DUNNE,
Administrator, Federal Disaster Assistance Administration.

Office of Assistant Secretary for Housing—Federal Housing Commissioner

[Docket No. D-77-480]

REGIONAL ADMINISTRATORS, ET AL.

Redelegation of Authority With Respect to Housing

Section L of the redelegation of authority to Regional Administrators et al. with respect to Housing published at 41 FR 52545, November 30, 1976, is revised to read:

SEC. L. *Additional authority redelegated to Insuring Office Officials.* 1. Each Insuring Office Director and Deputy Insuring Office Director in the offices listed below is authorized to exercise the power and authority of the Secretary of Housing and Urban Development for housing for the Elderly and Handicapped under Section 202 of the Housing Act of 1959 (12 U.S.C. 1701 et seq.) and for housing assisted under the U.S. Housing Act of 1937 as amended (42 U.S.C. 1401, et seq.).

Phoenix, AZ	Albuquerque, NM
Fresno, CA	Albany, NY
Sacramento, CA	Cincinnati, OH
Santa Ana, CA	Cleveland, OH
Denver, CO	Providence, RI
Springfield, IL	Memphis, TN
Des Moines, IA	Houston, TX
Topeka, KS	Salt Lake City, UT
Shreveport, LA	Spokane, WA
Grand Rapids, MI	Charleston, WV
Helena, MT	

The authority redelegated above includes the power and authority under sections 1(1) and 1(2) of Executive Order 11196, except the authority to:

a. Determine that there is a substantial breach or default and invoke any remedy on behalf of the Federal Government upon default or breach by a local housing authority in respect to the terms, covenants, or conditions of an annual contributions contract.

b. Terminate annual contributions contracts when the decision to terminate is made by the Federal Government.

c. Waive the provisions of annual contributions contracts: Provided, That each Insuring Office Director and Deputy Insuring Office Director is authorized to waive provisions with respect to the following:

i. Employment of a former local housing authority Commissioner.

ii. Frequency of reexamination of tenants to permit a local housing authority to change its established reexamination schedule.

iii. Approval of the use of force account for modernization programs.

iv. Approval of construction and equipment contracts for modernization exceeding $5,000, but not exceeding $50,000.

2. Each Director of Housing Management in the above listed Insuring Offices is authorized to exercise the powers and authorities redelegated to Directors of Housing Management in Area Offices in section D.

(Secretary's delegation of authority to redelegate published at 41 FR 24755, June 18, 1976.)

Effective date: This amendment to redelegation of authority is effective on January 17, 1977.

JOHN T. HOWLEY,
Acting Assistant Secretary for Housing—Federal Housing Commissioner.

New Communities Administration

[Docket No. N-77-696]

SHENANDOAH NEW COMMUNITY PROJECT

Intent to Supplement Environmental Impact Statement

The U.S. Department of Housing and Urban Development, New Communities Administration, Washington, D.C., intends to issue a supplement to the Final Environmental Impact Statement for the Shenandoah New Community Project, Coweta County, Georgia. The final EIS was issued on December 4, 1972, and copies are available at the address set forth below.

Shenandoah is located approximately 35 miles southwest of Atlanta adjacent to the junction of Interstate Highway 85 and Georgia State Highway 34 lying between the cities of Newman and Peachtree.

The Supplement will evaluate the impact of changing the water supply system from the original Flint River Water Supply System (reflected in Shenandoah's Final Environmental Impact Statement) to the Line Creek-Lake Shenandoah Water Supply System. This Water Supply System will essentially comprise construction of an intake structure and pumping station (initial capacity of 12 million gallons per day) located at Wynnes Pond adjacent to Georgia State Highway 54, about 8 miles of 24-inch raw water transmission pipeline from Wynnes Pond intake to the City of Newman's present water intake at White Oak Creek; and construction of water treatment facilities, and Lake Shenandoah Reservoir on Sullivan Creek which at maximum design capacity will cover about 300 acres and impound about 5,000 acre-feet of water.

Copies of the Supplement will be available at the address set forth below in February 1977. The comment period on the Supplement will be 30 calendar days. All persons who received the Final EIS will receive the Supplement. Copies of the Supplement will also be available in the Atlanta HUD Regional Office at Room 211 Pershing Point Plaza, 1321 Peachtree Street, NE., Atlanta, Georgia, and the Carnegie Public Library in the City of Newnan.

Comments concerning this Notice are invited from all affected and interested parties. Please send comments by February 15, 1977, to:

Earl DeMaris, Deputy Administrator for Project Support and Development, Attn: Leo Stein, U.S. Department of Housing and Urban Development, New Communities Administration, 451 7th Street, SW, Room 7134, Washington, D.C. 20410, Telephone 202-755-6092.

Issued in Washington, D.C.

JAMES F. DAUSCH,
Deputy General Manager and Administrator, New Communities Administration.

Concurrence: January 7, 1977.

RICHARD BROUN,
OEQ.

Concurrence: January 10, 1977.

BURTON BLOOMBERG,
OGC.

Bureau of Land Management

[S-2635]

CALIFORNIA

Reclassification of Natural Resource Lands for Transfer Out of Federal Ownership

1. Notice is hereby given that the following described national resource lands are reclassified for transfer out of federal ownership by exchange pursuant to the Act of July 15, 1968 (16 U.S.C.A. 460L-22, 1969 Supplement). The lands were classified previously for exchange pursuant to the Point Reyes National Seashore Act of September 13, 1962 (76 Stat. 538) by a notice of classification published January 7, 1970 in the FEDERAL REGISTER.

MOUNT DIABLO MERIDIAN, CALIFORNIA

T. 7 N., R. 7 W.,
Sec. 11: E½NE¼;
Sec. 12: SW¼NW¼; NW¼SW¼.

The above described lands aggregate 160 acres and are located in Sonoma County.

2. The reclassification has been discussed with local governmental agencies as well as with other interested parties. These lands, after appropriate analysis including an environmental assessment, meet the criteria of 43 CFR 2430.4(d). The regulation authorizes classification of national resource lands for exchange under appropriate authority where they have special values arising from the interest of proponents for exchange of other lands needed in support of a federal program. The National Park Service has a proponent interested in exchanging private in holdings within the Golden Gate National Recreation Area for the subject lands.

3. One comment only was received after publication of the notice of proposed reclassification in the FEDERAL REGISTER (FR Doc. 76-33121) on November 11, 1976 (41 FR 49892). The comment was not adverse to the proposal.

4. Information concerning the lands including the land report and environmental record, is available for inspection at the Bureau of Land Management District Office, 555 Leslie Street, Ukiah, California 95482.

5. On or before February 28, 1977, the classification shall be subject to the exercise of administrative review and modification by the Secretary of the Interior as provided for in 43 CFR 2461.3.

For the State Director.

ALAN L. BELLON,
Acting District Manager.

[N-16095]

NEVADA

Proposed Withdrawal and Reservation of Lands of Military Purposes

JANUARY 19, 1977.

The United States Army, Corps of Engineers, on behalf of the Department of the Air Force, filed application N-16095 on December 23, 1976, for the withdrawal of lands described below from settlement, sale, location or, entry under the public land laws, including the mining and mineral leasing laws and disposals of materials under the Act of July 31, 1947, as amended (30 U.S.C. 601, 602).

The applicant desires to continue using the lands for the Indian Springs Auxiliary Air Force Field and bombing and gunnery ranges (Nellis) in the training of combat aircrews as well as testing of new and improved weapons systems.

On or before February 28, 1977, all persons who wish to submit comments, suggestions, or objections in connection with the proposed withdrawal may present their views in writing to the undersigned officer of the Bureau of Land Management.

Pursuant to section 204(h) of the Federal Land Policy and Management Act of 1976 (hereinafter referred to as the act), an opportunity for a public hearing is hereby afforded. All interested persons who desire to be heard on the proposed withdrawal must submit a written request for a hearing to the State Director, Bureau of Land Management, at the address shown below, on or before February 28, 1977. Upon determination by the State Director that a public hearing will be held, the time and place will be announced.

The lands involved are presently segregated from the operation of the public land laws by virtue of withdrawals effected by Executive Orders No. 8578 of October 29, 1940, No. 9019 of January 12, 1942, No. 9086 of March 4, 1942, Public Land Orders No. 58 of November 12 1942, No. 89 of February 10, 1943, and No. 168 of September 17, 1943, which withdrawals will expire February 15, 1977. Under section 204(b) of the Act, the segregation will remain in effect for a period of 2 years from date of publication of this notice unless Congress approves the withdrawal prior to that date, in which case the segregation would be continued in accordance with the legislation.

The authorized officer of the Bureau of Land Management will undertake such investigations as are necessary to determine the existing and potential demands for the lands and their resources. He will also undertake negotiations with the applicant agency with the view of adjusting the application to reduce the area to the minimum essental to meet the applicants needs, to provide for the maximum concurrent utilization of the lands for purposes other than the applicant's, and to reach agreement on the concurrent management of the lands and their resources

He will also prepare a report for consideration by the Secretary of the Interior who will submit a legislative proposal to the Congress of the United States for its consideration to determine whether the lands will be withdrawn as requested by the applicant agency.

The lands involved in the application are described below and are delineated on maps designated 256-FP-1, 256-FP-3 and 389-FP-1, copies of which are on file in Case No. N-16095, Nevada State Office, Bureau of Land Management.

All correspondence in connection with this withdrawal should be directed to the Bureau of Land Management, Department of the Interior; Chief, Division of Technical Services, 300 Booth Street, Reno, Nevada 89509.

NEVADA

Termination, in Part of Airport Lease Nev-025474

JANUARY 17, 1977.

Notice is hereby given that Elko County, through and by the Board of County Commissioners, relinquished its airport lease as to the following described lands:

MOUNT DIABLO MERIDIAN, NEVADA

T. 47 N., R. 64 E.,
Sec. 12, E½E½SE¼NE¼, SE¼NE¼NE¼ and portions of the NE¼SW¼NE¼NE¼, SE¼SW¼NE¼NE¼, NW¼NE¼SE¼NE¼, SW¼NE¼SE¼NE¼, NW¼SE¼SE¼NE¼, SW¼SE¼SE¼NE¼, more particularly described as follows: Beginning at the east quarter corner of said section 12, Corner No. 1; thence, north along the east section line of said sec. 12, 1,980', more or less, to corner No. 2; thence, west along the north line of the SE¼NE¼NE¼, 921.05 feet, more or less, to a point 300' from the centerline of the existing Jackpot runway, corner No. 3; thence, S. 16°37'15" E., 2,066.33', more or less, to the east-west quarter section line of said sec. 12, corner No. 4; thence, east, 330', more or less, to the east quarter corner of said sec. 12, Corner No. 1, the point of beginning.

Therefore, at 10:00 a.m. on February 21, 1977 the lands will be relieved of the segregation effect of the lease.

WILLIAM J. MALENCIK,
Chief, Division of Technical Services.

WASHINGTON

Order Providing for Opening of Public Land

JANUARY 20, 1977.

1. Pursuant to Order of the Office of Hearings and Appeals, dated January 25, 1972; Indian Trust Patent No. 77896, dated September 9, 1909, has been cancelled, and the following land has returned to the status of national resource land:

WILLIAMETTE MERIDIAN

T. 5 N., R. 19 E.,
Sec. 19, SE¼.

The area described contains 160 acres in Klickitat County.

2. The subject land is located approximately 19 miles northeast of the Town of Goldendale. Elevation ranges from 2,300 to 2,700 feet above sea level, and the topography varies from generally flat to rolling and undulating. Vegetation consists primarily of scattered conifers and native grasses and brush. In the past, the land has been used for livestock grazing purposes, and it will be managed, together with adjoining national resource lands, for multiple use management.

3. Subject to valid existing rights, the provisions of existing withdrawals, and the requirements of applicable law, the land described in paragraph 1 hereof is hereby open to operation of the public land laws, including the mining laws (Ch. 2, Title 30 U.S.C.) and the mineral leasing laws. All valid applications received at or prior to 10:00 a.m. February 25, 1977, shall be considered as simultaneously filed at that time. Those received thereafter shall be considered in the order of filing.

4. Inquiries concerning the land should be addressed to the Chief, Branch of Lands and Minerals Operations, Bureau of Land Management, P.O. Box 2965, Portland, Oregon, 97208.

HAROLD A. BERENDS,
Chief, Branch of Lands and Minerals Operations.

Fish and Wildlife Service

ISSUANCE OF FEDERAL WILDLIFE PERMITS

Delegation of Authority

Notice is hereby given that the Associate Director, Federal Assistance, and the Federal Wildlife Permit Office have been delegated the authority formerly held by the Division of Law Enforcement to issue, modify, suspend and revoke permits and exemptions issuable under authority of the Endangered Species Act of 1973, 16 U.S.C. 1531-1543; Lacey Act, 18 U.S.C. 42, 44; Tariff Classification Act of 1962, 19 U.S.C. 1202; and Marine Mammal Protection Act of 1972, 16 U.S.C. 1368-1384, 1401; and they may redelegate this authority by memorandum to other Washington Office Federal Wildlife Permit Office personnel.

The Associate Director, Federal Assistance, and the Federal Wildlife Permit Office also have been delegated authority to issue permits for the importation and exportation into or out of the United States of migratory birds, or parts, nests, or eggs thereof; to kill, frighten or otherwise herd migratory birds (except eagles) injuring crops or other property; and they also may exercise all of the authority set forth in the Code of Federal Regulations pertaining to the acquisition and possession of migratory birds.

Effective date: This delegation of authoirty shall be effective as of November 15, 1976.

Dated: December 28, 1976.

LYNN A. GREENWALT,
Director, U.S. Fish and Wildlife Service.

DEPARTMENT OF JUSTICE

Office of the Attorney General

ACTION TO ENJOIN DISCHARGE OF WATER POLLUTANTS BY THE CITY OF NEW YORK

Proposed Consent Decree

In accordance with Departmental Policy, 28 CFR 50.7, 38 FR 19029, notice is hereby given that on January 14, 1977, a proposed consent decree in *United States v. City of New York, Abraham Beame, Robert Low and Charles Samowitz* was lodged with the United States District Court for the Southern Ditrict of New York. The proposed decree would require the City to meet a detailed time-table to build two sewage treatment facilities, the Red Hook Water Pollution Control Plant at the Brooklyn Navy Yard, Brooklyn, New York and the North River Water Pollution Control Plant at the Hudson River between West 138th and 145th Streets, New York, New York; to upgrade one sewage treatment facility, the Oakwood Beach Pollution Control Plant at Staten Island, New York; and to otherwise comply with the National Pollutant Discharge Elimination System permits covering the service areas for the above projects.

The proposed consent decree may be examined at the office of the United States Attorney, One St. Andrew's Plaza, New York, New York, 10007; at the Region II Office of the Environmental Protection Agency, Enforcement Division, 26 Federal Plaza, New York, New York, 10007; and at the Pollution Control Section, Land and Natural Resources Division of the Department of Justice, Room 2625, Ninth Street and Pennsylvania Avenue, Northwest, Washington, D.C. 20530. A copy of the consent decree may be obtained in person or by mail from the Pollution Control Section, Land and Natural Resources Division of the Department of Justice.

The Department of Justice will receive until February 28, 1977 written comments relating to the proposed consent decree. Comments should be addressed to the Assistant Attorney General, Land and Natural Resources Division, Department of Justice, Washington, D.C. 20530, and should refer to *"United States v. City of New York, et al.,"* D.J. Ref. 90–5–1–1–683. In requesting a copy, please enclose a check in the amount of one dollar (ten cents per page reproduction charge) payable to the Treasurer of the United States.

PETER R. TAFT,
Assistant Attorney General,
Land and Natural Resources Division.

[Order No. 681–77]

PRIVACY ACT OF 1974

Notice of Systems of Records, Proposed Routine Uses, and Other System Modifications

Notice is hereby given that pursuant to the provisions and requirements of the Privacy Act of 1974, 5 U.S.C. 552a, the following system notices, routine uses and system modifications are proposed by the Department of Justice.

JUSTICE/USA–015, Pre-Trial Diversion Program Files, is a proposed new system of records for which no public notice is currently published in the FEDERAL REGISTER.

JUSTICE/DEA–027, DEA Employee Profile System (DEPS) is an existing system of records which was inadvertently omitted from previous publication and for which no public notice consistent with the requirements of 5 U.S.C. 552a(e)(4) has been published in the FEDERAL REGISTER.

JUSTICE/BOP–006, Inmate Commissary Accounts Record System, is partially reprinted to reflect the proposed automation of this system. The original Privacy Act notice for this system appeared on August 27, 1975, at 40 FR 38705.

Interested persons are invited to comment on those portions of the notices which describe the routine uses of JUSTICE/USA–015 and JUSTICE/DEA–027, and the storage and retrievability practices of JUSTICE/BOP–006. Comments should be mailed to the System Manager at the address listed in the relevant System Notice. All comments must be received by February 28, 1977. No oral hearings are contemplated. Comments received will be available for inspection in Room 1266, Main Department of Justice Building, 10th and Constitution Avenue, N.W.

Dated: January 18, 1977.

EDWARD H. LEVI,
Attorney General.

JUSTICE/USA 015

System name:

Pre-Trial Diversion Program Files

System location:

Ninety-four United States Attorneys' Offices (See attached Appendix)

Categories of individuals covered by the system:

Individuals referred to in potential or actual pre-trial diversion cases.

Categories of records in the system:

(a) USA Form 184—Referral letter to Probation Service; (b) USA Form 185—Letter to defendant; (c) USA Form 186—Agreement for Pre-Trial Diversion; (d) USA Form 187—Pre-Trial Diversion Report Form; (e) USA Form 188—Certification of Completion of Programs; (f) USA Form 189—Defendant Application Form; (g) Telephone Records; (h) Miscellaneous Correspondence; and, (i) Files Unique to a District.

Authority for maintenance of the system:

This system is established and maintained pursuant to 5 U.S.C. 301 and 44 U.S.C. 3101.

Routine uses of records maintained in the system, including categories of users and purposes of such uses:

A record maintained in this system of records may be disseminated as a routine use of such record as follows:

(a) In any case in which there is an indication of a violation or potential violation of law, criminal, or regulatory in nature, the record in question may be disseminated to the appropriate federal, state, local, or foreign agency charged with the responsibility for investigating or prosecuting such violation or charged with enforcing or implementing such law;

(b) In the course of investigating the potential or actual violation of any law, criminal, or regulatory in nature, or during the course of a trial or hearing or the preparation for a trial or hearing for such violation, a record may be disseminated to a federal, state, local, or foreign agency, or to an individual or organization, if there is reason to believe that such agency, individual, or organization possesses information relating to the investigation, trial, or hearing and the dissemination is reasonably necessary to elicit such information or to obtain the cooperation of a witness or an informant;

(c) A record relating to a case or matter may be disseminated in an appropriate federal, state, local, or foreign court or grand jury proceeding in accordance with established constitutional, substantive, or procedural law or practice;

(d) A record relating to a case or matter may be disseminated to a federal, state, or local administrative or regulatory proceeding or hearing in accordance with the procedures governing such proceeding or hearing;

(e) A record relating to a case or matter may be disseminated to an actual or potential party or his attorney for the purpose of negotiation or discussion on such matters as settlement of the case or matter, plea bargaining, or informal discovery proceedings;

(f) A record relating to a case or matter that has been referred by an agency for investigation, prosecution, or enforcement, or that involves a case or matter within the jurisdiction of an agency, may be disseminated to such agency to notify the agency of the status of the case or matter or of any decision or determination that has been made, or to make such other inquiries and reports as are necessary during the processing of the case or matter;

(g) A record relating to a person held in custody pending or during arraignment, trial, sentence, or extradition proceedings, or after conviction or after extradition proceedings, may be disseminated to a federal, state, local, or foreign prison, probation, parole, or pardon authority, or to any other agency or individual concerned with the maintenance, transportation, or release of such a person;

(h) A record relating to a case or matter may be disseminated to a foreign country pursuant to an international treaty or convention entered into and ratified by the United States or to an executive agreement;

(i) A record may be disseminated to a federal, state, local, foreign, or international law enforcement agency to assist in the general crime prevention and detection efforts of the recipient agency or to provide investigative leads to such agency;

(j) A record may be disseminated to a federal agency, in response to its request, in connection with the hiring or retention of an employee, the issuance of a security clearance, the reporting of an investigation of an employee, the letting of a contract, or the issuance of a license, grant, or other benefit by the requesting agency, to the extent that the information relates to the requesting agency's decision on the matter;

(k) A record may be disseminated to the public, news media, trade associations, or organized groups, when the purpose of the dissemination is educational or informational, such as descriptions of crime trends or distinctive or unique modus operandi, provided that the record does not contain any information identifiable to a specific individual;

(l) A record may be disseminated to a foreign country, through the United States Department of State or directly to the representative of such country, to the extent necessary to assist such country in apprehending and/or returning a fugitive to a jurisdiction which seeks his return;

(m) A record that contains classified national security information and material may be disseminated to persons who are engaged in historical research projects, or who have previously occupied policy making positions to which they were appointed by the President, in accordance with the provisions codified in 28 CFR 17.60.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage:

All information, except that specified in this paragraph, is recorded on basic paper/cardboard material, and stored within manila file folders, within metal file cabinets, electric file/card retrievers or safes. Some material is recorded and stored on magnetic tape, card or other data processing type storage matter for reproduction later into conventional formats.

Retrievability:

Information is retrieved by the name of the person, case number or complaint number.

Safeguards:

Information in the system is both confidential and non-confidential and located in file cabinets in the United States Attorney offices. Some materials are located in locked file drawers and safes, and others in unlocked file drawers. Offices are locked during non-working hours and are secured by either Federal Protective Service, United States Postal Service, or private building guards.

Retention and disposal:

Records are maintained and disposed of in accordance with Department of Justice retention plans.

System manager(s) and address:

System manager for the system in each office is the Administrative Officer/Assistant, for the U.S. Attorney for each district. (See attached Appendix.)

Notification procedure:

Address inquiries to the System Manager for the judicial district in which the diversion application or approval was made. (See attached appendix.)

Record access procedures:

The major part of the information maintained in this system is exempt from this requirement under 5 U.S.C. 552a (j)(2), (k)(1) and/or (k)(2). To the extent that this system is not subject to exemption, it is subject to access. A determination as to exemption shall be made at the time a request for access is received. A request for access to a record from this system shall be made in writing, with the envelope and the letter clearly marked 'Privacy Access Request.' Include in the request the name of the individual involved, his birth date and place, or any other identifying number or information which may be of assistance in locating the record and the name of the case or matter involved, if known. The requester shall also provide a return address for transmitting the information. Access requests will be directed to the system manager. (See attached Appendix.)

Contesting record procedures:

The major part of the information maintained in this system is exempt from this requirement under 5 U.S.C. 552a (j)(2), (k)(1) and/or (k)(2). To the extent that this system is not subject to exemption, it is subject to contest. A determination as to exemption shall be made at the time a request for contest is received. Individuals desiring to contest or amend information maintained in the system should direct their request to the System Manager (see attached Appendix) stating clearly and concisely what information is being contested, the reasons for contesting it, and the proposed amendment to the information sought.

Record source categories:

Sources of information contained in this system include, but are not limited to investigative reports of federal, state and local law enforcement agencies, client agencies of the Department of Justice; other non-Department of Justice investigative agencies; forensic reports; statements of witnesses and parties; verbatim transcripts of Grand Jury and court proceedings; data, memoranda and reports from the Court and agencies thereof; and the work product of Assistant United States Attorneys, Department of Justice attorneys and staff, and legal assistants working on particular cases.

Systems exempted from certain provisions of the act:

The Attorney General has exempted this system from subsections (c)(3) and (4), (d), (e)(1), (2) and (3), (e)(4)(G) and (H), (e)(5) and (8), (f), (g) and (h) of the Privacy Act pursuant to 5 U.S.C. 552a (j)(2) and (k)(1) and (2). Rules have been promulgated in accordance with the requirements of 5 U.S.C. 553(b), (c) and (e) and have been published in the FEDERAL REGISTER.

JUSTICE/DEA 027

System name:

DEA Employee Profile System (DEPS)

System location:

Drug Enforcement Administration, 1405 Eye Street, N.W., Washington, D.C. 20537

Categories of individuals covered by the system:

DEA employees.

Categories of records in the system:

The following eight categories of information will be maintained in the system:

(1) Personal identification
(2) Work experience
(3) Language and geographical areas
(4) Formal education
(5) Special skills
(6) Record of training
(7) Consideration for vacancies
(8) Awards

Authority for maintenance of the system:

This system is maintained to effectively place and assign employees to positions to further the mandates of the Comprehensive Drug Abuse Prevention and Control Act of 1970.

Categories of users and the purposes of such uses:

The records will be used principally by the Personnel Management Division. Selected data will be forwarded by this personnel section to the Career Development Board and operational units throughout DEA for the purpose of:

(1) Identifying employees with particular skills or qualifications for assignment to special projects.

(2) Identification of candidates for overseas assignments who have specific language skills.

(3) Insuring that the Career Development Board will be reviewing the entirety of an applicant's background.

(4) Calculating DEA's human resources on hand and to project more accurately future resource needs and capabilities.

Information from this system will not be disseminated outside of DEA.

Storage:

These records will be maintained on magnetic tape and a disk storage device.

Retrievability:

The information in this system can be retrieved by the individual's name, special skills information, special knowledge information or by some combination of the above information.

Safeguards:

The records of the system will be maintained at DEA Headquarters which is protected by twenty-four hour guard service and electronic surveillance. Access to the building is restricted to DEA employees and those transacting business within the building who are escorted by DEA employees. In addition, the area where the tapes and disks are stored is a secured area and access is restricted to those employees who have business in the area and those non-DEA people who are transacting business within the area and escorted by a DEA employee. Inquiries to the system are only made by the written request of the Chief, Personnel Management Division.

Retention:

Records in this system are retained as long as the individual is employed by DEA.

System manager(s) and address:

Chief, Computer Services Division, Drug Enforcement Administration, 1405 Eye Street, N.W., Washington, D.C., 20537.

Notification procedure:

Inquiries should be addressed to Freedom of Information Unit, Drug Enforcement Administration, 1405 Eye Street, N.W., Washington, D.C., 20537. Inquiries should include inquirer's name, date of birth, and social security number.

Record access procedures:

Same as *Notification procedure*.

Contesting record procedures:

Same as *Notification procedure*.

Record source categories:

(1) DEA employee, (2) Servicing personnel office, and (3) The Justice Uniform Personnel System (Juniper).

Systems exempted from certain provisions of the act:

None.

JUSTICE/BOP 006

NOTE: The JUSTICE/BOP 006 system is partially reprinted to reflect a change in the equipment configuration.

System name:

Inmate Commissary Accounts Record System

Categories of records in the system:

(1) Financial data; (2) identification data. Both categories of records will be automated; the Bureau facilities will have responsibility for their maintenance. The records will be accessible by the telecommunications means of BOP facilities, Regional Offices and the Central Office.

Storage:

Information maintained in the system will be stored electronically on the Department of Justice Computer System separate from the BOP Central Office.

Retrievability:

Information on the automated system will be indexed by name and/or register number.

Safeguards:

The Inmate Commissary Accounts Record System will be protected by both physical security methods and dissemination and access controls. Access to this information will be limited to those persons with a demonstrated and lawful need to know, in order to perform assigned functions.

Protection of the automated system will be provided by physical, procedural and electronic means. The files will reside on the Department of Justice Computer System which is physically attended or guarded on a full-time basis. For retrieval purposes, access to active telecommunications terminals will be limited to those persons with a demonstrated need to know. For update purposes, access to the files will be limited to BOP facilities employees, as required in the performance of their assigned duties. Surreptitious access to an unattended terminal will be precluded by a complex authentication procedure. The procedure will be provided only to authorized BOP employees.

An automated log of queries will be maintained for each terminal. Improper procedure will result in no access, and under certain conditions complete lockout of the terminal, pending restoration by the master controller at the BOP Central Office after appropriate verification has been received. Unattended terminals, after normal office hours, will be electronically disconnected by the master controller at the BOP Central Office. All terminals will have key locks and will be located in lockable facilities.

Retention:

Records in this system will be retained for a period of ten (10) years after expiration of sentence, then destroyed by electronic means.

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

[Notice (77-5)]

STRATOSPHERIC RESEARCH ADVISORY COMMITTEE

Meeting

The Stratospheric Research Advisory Committee will meet at the National Aeronautics and Space Administration Headquarters on February 24 and 25, 1977. The meeting will be open to members of the public. The meeting will take place from 9:00 am to 5:00 pm on February 24 and from 9:00 am to 4:30 pm on February 25 in room 6004 of Federal Office Building 6, 400 Maryland Avenue SW, Washington, DC, 20546.

The Stratospheric Research Advisory Committee advises NASA concerning the contents and direction of the NASA Upper Atmospheric Research Program. Topics under discussion at this meeting will include: Development of the NASA measurement strategy; Responses to the NASA UARO "Dear Colleague" Letter; Discussion of the research programs at the Goddard Space Flight Center and the Jet Propulsion Laboratory.

For further information regarding the meeting, please contact Dr. Shelby G. Tilford, Executive Secretary, at Area Code 202/755-3766 or 755-1790, National Aeronautics and Space Administration, Washington, DC 20546.

JOHN M. COULTER,
Acting Assistant Administrator for DOD and Interagency Affairs.

JANUARY 21, 1977.

[Notice 77-6]

LONG DURATION EXPOSURE FACILITY (LDEF)

Experiment Review Ad Hoc Subcommittee of the Space Technology Steering Committee and the Research and Technology Advisory Council

MEETING

The Long Duration Exposure Facility (LDEF) Experiment Review Ad Hoc Subcommittee of the Space Technology Steering Committee and the NASA Research and Technology Advisory Council (RTAC) will meet on February 22-25, 1977, to evaluate experiment proposals submitted in response to the LDEF Announcement of Opportunity No. OAST-76-1. The Subcommittee will discuss and complete the categorization of proposals for flight on the first LDEF mission. Discussion of the professional qualifications of the proposers and their potential research and technology contributions to the LDEF mission would invade the privacy of the proposers and other individuals involved. Since this Subcommittee session will be concerned throughout with matters listed in 5 U.S.C. 552(b)(6), it has been determined that the sessions be closed to the public.

The Subcommittee is comprised of four advisory groups to evaluate proposals in appropriate technology disciplines. The Structures and Materials Advisory Group, which consists of eleven members, will meet on February 22-25, 1977, in Room 124, Building 1192C, Langley Research Center, Hampton, Virginia, 23665. The Electronics Advisory Group, which consists of seven members, will meet on February 23-25, 1977, in Room 103, Building 1192C, Langley Research Center, Hampton, Virginia, 23665. The Propulsion and Power Advisory Group, which consists of nine members, will meet on February 23-25, 1977, in Room 185, Building 1192D, Langley Research Center, Hampton, Virginia, 23665. The Basic Research Advisory Group, which consists of seven members, will meet on February 24-25, 1977, in Room 125, Building 1192E, Langley Research Center, Hampton, Virginia 23665.

The LDEF is a large, free-flying, passive satellite which provides accommodations to experiments which require long-term exposure to the space environment. It will be carried into Earth orbit during the 1979-80 Shuttle Orbital Flight Test program, deployed in a gravity-gradient stabilized mode, and retrieved six to nine months later during a subsequent Shuttle flight. The LDEF Experiment Review Ad Hoc Subcommittee was established to review experiment proposals for the first flight of the Long Duration Exposure Facility. The NASA Chairman is Mr. Robert G. Kyle, and the Advisory Chairman is Professor Seymour M. Bogdonoff of the Research and Technology Advisory Council. The Subcommittee will report the results of its evaluation to the Space Technology Steering Committee. It will also report the results to the RTAC Council after the formal announcement of the experiment proposal selections has been made.

The Structures and Materials Advisory Group will convene at 1:00 p.m. on February 22, 1977. The Electronics Advisory Group will convene at 8:30 a.m. on February 23, 1977. The Propulsion and Power Advisory Group will convene at 9:30 a.m. on February 23, 1977. The Basic Research Advisory group will convene at 8:30 a.m. on February 24, 1977. After being convened, the Advisory Groups will meet daily from 8:15 a.m. to 4:30 p.m. until all assigned proposals have been evaluated individually according to the guidelines of Section V of the Announcement of Opportunity. For further information, please contact the Executive Secretary, Mr. James L. Jones, Jr., NASA, Langley Research Center, Mail Code 158B, Langley Station, Hampton, Virginia 23665 (Area Code 804, 827-3704).

JOHN M. COULTER,
Acting Assistant Administrator for Department of Defense and Interagency Affairs, National Aeronautics and Space Administration.

JANUARY 21, 1977.

[FR Doc. 77-2664; Filed 1-26-77, 8:45 am]

NATIONAL FOUNDATION ON THE ARTS AND HUMANITIES

NATIONAL COUNCIL ON THE ARTS

Meeting

Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), notice is hereby given that a meeting of the National Council on the Arts will be held on February 11-12, 1977, from 9:00 a.m. to 5:30 p.m., and February 13, 1977, from 9:00 a.m. to 1:00 p.m., in the Chandelier Room, Sheraton Carlton Hotel, 16th and K Streets, NW., Washington, D.C.

A portion of this meeting will be open to the public on February 11-12, from 9:00 a.m. to 3:00 p.m., on a space available basis. Accommodations are limited. The agenda for these sessions include a general budget briefing, discussion of Dance, Education, Music, and Public Media program guidelines, and long-range program and policy planning.

The remaining sessions of this meeting on February 11-12, from 3:00 p.m. to 5:30 p.m., and February 13, from 9:00 a.m. to 1:00 p.m., are for the purpose of Council review, discussion, evaluation, and recommendation on applications for financial assistance under the National Foundation on the Arts and the Humanities Act of 1965, as amended, including discussion of information given in confidence to the agency by grant applicants. In accordance with the determination of the Chairman published in the FEDERAL REGISTER of June 16, 1975, these sessions, which involve matters exempt from the requirements of public disclosure under the provisions of the Freedom of Information Act (5 U.S.C. 552(b), (4), (5), and (6)) will not be open to the public.

Further information with reference to this meeting can be obtained from Mr. Robert M. Sims, Advisory Committee Management Officer, National Endowment for the Arts, Washington, D.C. 20506, or call 202-634-6377.

ROBERT M. SIMS,
Administrative Officer, National Endowment for the Arts, National Foundation on the Arts and the Humanities.

[FR Doc.77-2644 Filed 1-26-77;8:45 am]

NATIONAL SCIENCE FOUNDATION

ADVISORY PANEL FOR ENGINEERING CHEMISTRY AND ENERGETICS

Meeting

In accordance with the Federal Advisory Committee Act, Pub. L. 92-463, the National Science Foundation announces the following meeting:

Name: Advisory Panel for Engineering Chemistry and Energetics.
Date and time: February 14 and 15, 1977—9:00 a.m. to 5:00 p.m. each day
Place: Room 338, National Science Foundation, 1800 G Street, N.W., Washington, D.C. 20550.
Type of meeting: Part Open—Open 2/14/77 9:00 a.m.-1:00 p.m. and 2/15/77, 9:00 a.m.-1:00 p.m.; Closed—2/14/77, 1:00 p.m.-5:00 p.m. and 2/15/77—1:00 p.m. 5:00 p.m.
Contact person: Dr. Marshall M. Lih, Head Chemical Processes Program, Room 413, National Science Foundation, Washington D.C 20550 telephone (202) 632-5867.
Purpose of panel: To provide advice and recommendations concerning support for research in Engineering Chemistry and Energetics.

AGENDA

FEBRUARY 14

9 a.m.	Open Session—Remarks and Introductions. Status Report on the Engineering Division.
9:45 a.m.	Section Head's Report (M Lih).
10:15 a.m.	Break.
10:30 a.m.	Program Briefing (30 min each). Dr. Rafi Turian, Chemical Processes. Dr. Win Aung Heat Transfer. Dr. Royal Rostenbach, Engineering Energetics. Dr. William Weigand Thermodynamics and Mass Transfer. Dr. Morris Ojalvo, Solid and Particulate Processing.
11:20 a.m.	Question and Answer Time.
11:45 a.m.	Lunch Break.
1 p.m.	Closed Session—Subpanel review of the individual programs including proposal jackets and peer reviews.
5 p.m.	Adjourn.

FEBRUARY 15

9 a.m.	Discussion. (1) Oral Reports from subpanels. (2) Section-wide concerns
12 noon	Main panel adjourns.
1 p.m.	Closed Session—Heat Transfer subpanel's further in-depth study of the Program including proposal jackets and peer reviews.

Reason for closing: The proposals being reviewed include information of a proprietary or confidential nature, including technical information concerning individuals associated with the proposals. These matters are within exemptions (4) and (6) of 5 U.S.C. 552(b), Freedom of Information Act. The rendering of advice by the panel is considered to be a part of the Foundation's

deliberative process and is thus subject to exemption (5) of the Act.

Authority to close meeting: This determination was made by the Committee Management Officer pursuant to provisions of Section 10(d) of Pub. L. 92-463. The Committee Management Officer was delegated the authority to make determinations by the Director, NSF, on February 11, 1976.

M. REBBECCA WINKLER,
Acting Committee Management Offier.

JANUARY 24, 1977.

NATIONAL SCIENCE FOUNDATION ADVISORY COUNCIL

Revision of Charter

This notice is to announce revision to the charter of the National Science Foundation Advisory Council.

The National Science Foundation Advisory Council was established on March 8, 1976 to provide advice and counsel to the NSF Director and principal members of his staff on Foundation-wide issues. This revision will provide for membership on the Council of non-scientists as well as scientists.

The revision described above is reflected in the Council's modified charter. Copies of the charter addendum like the initial charter, have been forwarded to the Library of Congress for public inspection and filed with the standing committees of Congress having legislative jurisdiction of the National Science Foundation.

RICHARD C. ATKINSON,
Acting Director.

JANUARY 24, 1977.

NUCLEAR REGULATORY COMMISSION

[Dockets Nos. 50-250 and 50-251]

FLORIDA POWER AND LIGHT CO.

Issuance of Amendments to Facility Operating Licenses

Notice is hereby given that the U.S. Nuclear Regulatory Commission (the Commission) has issued Amendments Nos. 22 and 21 to Facility Operating Licenses Nos. DPR-31 and DPR-41, respectively, issued to Florida Power and Light Company which revised Technical Specifications for operation of the Turkey Point Nuclear Generating Units Nos. 3 and 4, located in Dade County, Florida. The amendments are effective as of the date of issuance.

These amendments concern changes required as a result of (1) the steam generator repair and (2) a reevaluation of the emergency core cooling system, for Turkey Point Unit No. 3. The emergency core cooling system reevaluation fulfills, for Unit No. 3, the requirements of the Commission's Order for Modification of License dated August 27, 1976. The operating limits for Unit No. 4 set forth in its Technical Specifications remain unchanged although the Unit No. 4 Technical Specifications will be modified to reflect the revisions to the Unit No. 3 Technical Specifications.

The application for the amendments complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendments. Prior public notice of these amendments was not required since the amendments do not involve a significant hazards consideration.

The Commission has determined that the issuance of these amendments will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of these amendments.

For further details with respect to this action, see (1) the application for amendments dated December 21, 1976, as supplemented by letters dated December 9, December 22, December 30, 1976 and January 3, 1977, (2) Amendments Nos. 22 and 21 to Licenses Nos. DPR-31 and DPR-41 and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. and at the Environmental and Urban Affairs Library, Florida International University, Miami, Florida 33199.

A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Operating Reactors.

Dated at Bethesda, Maryland, this 14th day of January 1977.

For the Nuclear Regulatory Commission.

GEORGE LEAR,
Chief, Operating Reactors Branch No. 3, Division of Operating Reactors.

[FR Doc.77-2292 Filed 1-26-77;8:45 am]

[Docket No. 50-331]

IOWA ELECTRIC LIGHT AND POWER CO., ET AL.

Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 26 to Facility Operating License No. DPR-49 issued to Iowa Electric Light and Power Company, Central Iowa Power Cooperative, and Corn Belt Power Cooperative, which revised Technical Specifications for operation of the Duane Arnold Energy Center, located in Linn County, Iowa. The amendment is effective as of its date of issuance.

This amendment modifies the Technical Specifications by lowering the trip level setpoints for the differential pressure instruments associated with the HPCI Turbine Steam Line High Flow trip.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) the application for amendment dated December 17, 1976, (2) Amendment No. 26 to License No. DPR-49, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. and at the Cedar Rapids Public Library, 426 Third Avenue, S.E., Cedar Rapids, Iowa 52401.

A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Operating Reactors.

Dated at Bethesda, Maryland, this 17th day of January 1977.

For the Nuclear Regulatory Commission.

GEORGE LEAR,
Chief, Operating Reactors Branch No. 3, Division of Operating Reactors.

[Docket No. 50-267]

PUBLIC SERVICE COMPANY OF COLORADO

Issuance of Amendment to Facility Operating License

Notice is hereby given that the U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 17 to Facility Operating License No. DPR-34 issued to Public Service Company of Colorado which temporarily revised Technical Specifications for operation of the Fort St. Vrain Nuclear Generating Station, located in Weld County, Colorado. The amendment was effective on December 8, 1976.

The amendment temporarily revised the provisions in the Technical Specifications relating to operation of the bearing water makeup pumps in the primary coolant system. On December 8, 1976, telephoned authorization was given to the licensee to extend from 24 hours to seven days the duration during which one bearing water makeup pump could be inoperable without the helium circulators being considered inoperable. On December 15, 1976, telephoned authorization was given to the licensee to extend the time to a total of twenty-one days from December 8, 1976. Following this period the original technical specification would be reinstated.

The applications for the amendment comply with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) the applications for amendment dated December 8, 1976 and December 15, 1976, (2) Amendment No. 17 to License No. DPR-34, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. and at the Greeley Public Library, City Complex Building, Greeley, Colorado 80631.

A copy of items (2) and (3) may be obtained upon request addressed to the United States Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Project Managment.

Dated at Bethesda, Maryland, this 17th of January, 1977.

For the Nuclear Regulatory Commission.

RICHARD P. DENISE,
Assistant Director for Special Projects, Division of Project Management.

[Docket No. 50-346]

THE TOLEDO EDISON CO. AND CLEVELAND ELECTRIC ILLUMINATING CO. (DAVIS-BESSE UNCLEAR POWER STATION, UNIT NO. 1)

Issuance of Amendment to Construction Permit and Availability of Initial Decision (Antitrust)

Notice is hereby given that pursuant to an Initial Decision (Antitrust), dated January 6, 1977, by the Atomic Safety and Licensing Board, the Nuclear Regulatory Commission has issued Amendment No. 3 to Construction Permit CPPR-80 issued to The Toledo Edison Company and The Cleveland Electric Illuminating Company for construction of the Davis-Besse Nuclear Power Station, Unit No. 1, presently under construction at the Applicants' site on the southwestern shore of Lake Erie in Ottawa County, Ohio, approximately 21 miles east of Toledo, Ohio. The Board's Initial Decision includes antitrust conditions to be attached to licenses for the Davis-Besse 1, 2 and 3 nuclear units.

The Nuclear Regulatory Commission has found that the provisions of this amendment comply with the requirements of the Atomic Energy Act of 1954, as amended, and the Commission's regulations published in 10 CFR Chapter I and has concluded that the issuance of this amendment will not be inimical to the common defense and security or to the health and safety of the public.

A copy of the Atomic Safety and Licensing Board's Initial Decision (Antitrust), dated January 6, 1977, and Amendment No. 3 to Construction Permit No. CPPR-80 are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. and in the Ida Rupp Public Library, 310 Madison Street, Port Clinton, Ohio 43452.

Single copies of the Initial Decision (Antitrust) and Amendment No. 3 to CPPR-80 may be obtained by writing to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Project Management.

Dated at Bethesda, Maryland this 14th day of January 1977.

For the Nuclear Regulatory Commission.

JOHN F. STOLZ,
Chief, Light Water Reactors Branch No. 1, Division of Project Management.

[Docket No. 50-271]

VERMONT YANKEE NUCLEAR POWER CORP.

Establishment of Atomic Safety and Licensing Board

Pursuant to delegation by the Commission dated December 29, 1972, published in the FEDERAL REGISTER (37 FR 28710) and §§ 2.105, 2.700, 2.702, 2.714, 2.714a, 2.717 and 2.721 of the Commission's Regulations, all as amended, an Atomic Safety and Licensing Board is being established in the following proceeding:

VERMONT YANKEE NUCLEAR POWER CORPORATION

Vermont Yankee Nuclear Power Station, Facility Operating License No. DPR-28.

This action is in reference to a notice published by the Commission on December 9, 1976, in the FEDERAL REGISTER (41 FR 53871) entitled "Proposed Issuance of Amendment to Facility Operating License".

The members of the Board and addresses are as follows:

Samuel W. Jensch, Esq., Chairman, Atomic Safety and Licensing Board Panel, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555.

Dr. David B. Hall, Member, Los Alamos Scientific Laboratory, P.O. Box 1663, Los Alamos, New Mexico 87544.

Dr. Paul W. Purdom, Member, 245 Gulph Hills Road, Radnor, Pennsylvania 19087.

Dated at Bethesda, Maryland this 17th day of January, 1977.

Atomic Safety and Licensing Board Panel.

JAMES R. YORE,
Chairman.

[FR Doc.77-2296 Filed 1-26-77;8:45 am]

NUCLEAR REGULATORY COMMISSION

[Docket No. PRM-71-4]

CHEM-NUCLEAR SYSTEMS, INC.

Filing of Petition for Rule Making

Notice is hereby given that the Chem-Nuclear Systems, Inc., P.O. Box 1866, Bellevue, Washington, by letter dated November 22, 1976, has filed with the Nuclear Regulatory Commission a petition for rule making to amend the Commission's regulation "Packaging of Radioactive Material for Transport and Transportation of Radioactive Material Under Certain Conditions", 10 CFR Part 71.

The petitioner requests the Commission to amend §§ 71.7 and 71.10 of 10 CFR Part 71 to exempt from the specification container requirements of Part 71 "low specific activity material" as defined in § 71.4(g). The petitioner states that § 71.4(g) defines the term "low specific activity material" using the same language provided in § 173.389 of the Department of Transportation (DOT) Hazardous Materials Regulations, 49 CFR Parts 170-189, and that the DOT regulations provide a specific exemption for "low specific activity material" from the type A and type B packaging requirements. The petitioner states that this exemption is consistent with both the 1967 regulations of the International Atomic Energy Agency and the 1972 revised edition of the IAEA regulations.

A copy of the petition for rule making is available for public inspection in the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. A copy of the petition may be obtained by writing to the Division of Rules and Records, Office of Administration, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555.

All interested persons who desire to submit written comments or suggestions concerning the petition for rule making should send their comments to the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Docketing and Service Branch, by March 28, 1977.

Dated at Washington D.C this 18th day of January 1977.

For the Nuclear Regulatory Commission.

SAMUEL J. CHILK,
Secretary of the Commission.

[FR Doc.77-2291 Filed 1-26-77;8:45 am]

[Docket Nos. 70-8, 70-25 etc.]

LICENSEES AUTHORIZED TO POSSESS OR TRANSPORT STRATEGIC QUANTITIES OF SPECAL NUCLEAR MATERIALS

Memorandum and Order

Docket Nos. 70-8, 70-25, 72-27, 70-33, 70-135, 70-143, 70-364, 70-371, 70-734, 70-754, 70-820, 70-1143, 70-1257, 70-1319, et al.

On February 2, 1976, the Natural Resources Defense Council, Inc. ("NRDC") filed a petition requesting that the NRC either immediately implement emergency safeguards measures to protect strategic special nuclear material ("SSNM") currently held or transported by NRC licensees or revoke forthwith the licenses and take immediate possession of the SSNM. The emergency safeguards measures included immediate dispatch of U.S. Marshall to licensee facilities, curtailment or complete suspension of licensee activities, revocation of outstanding SSNM licenses, and immediate recovery of SSNM.

The "Emergency Safeguards Petition" before the Commission addresses the adequacy of safeguards measures used by NRC licensees who are authorized under our regulations (10 CFR Parts 70 and 73) to possess or transport substantial quantities of strategic special nuclear material.[1] The term "safeguards" refers to the security measures undertaken by a licensee to protect SSNM from loss, theft, or diversion and to prevent sabotage of a licensee's facilities or activities.

By notice in the FEDERAL REGISTER dated February 4, 1976 (41 FR 5357), the Commission requested comments on the petition. The Commission referred the petition to the Director of NRC's Office of Nuclear Material Safety and Safeguards ("NMSS") under 10 CFR § 2.206. After reviewing the matter and meeting with NRDC representatives, the Director denied the request for emergency relief on March 22, 1976, concluding that the requested emergency action was "unnecessary" and failed "take into account the competing interest of the licensees and the broader public interests involved." In the Director's words, "the present safeguards programs of the licensees in question are adequate to provide a reasonable assurance of public health and safety and are not inimical to the common defense and security." On April 8, 1976, petitioner filed a motion requesting action at the Commission level, in response to the emergency safeguards petition. In its response, the NRC staff did not oppose the request for Commission action. However, the staff contended that our review should be a limited one under our *Indian Point* decision.[2] In *Indian Point*, we stated our authority to review, under an abuse of discretion standard, a staff decision made under 10 CFR § 2.206 not to issue an order to show cause.

Ten private companies (operating 13 facilities) licensed by NRC currently possess SSNM, and four transport companies hold NRC-approved transportation plans for shipments of SSNM. The licensees utilize the SSNM for a number of purposes, but most of the SSNM—more than 90%—is high-enriched uranium held by certain licensees whose principal business is fabricating fuel for the Navy Nuclear Propulsion Program, an important national defense activity relating to the initial fueling and refueling of Navy nuclear submarines and surface ships. Other SSNM is used in various research and development programs of private organizations and institutions and of governmental agencies. The SSNM which licensees possess or transport (predominantly high-enriched uranium) differs from the low-enriched uranium primarily utilized as fuel in commercial light water-cooled power reactors in that the former is capable of being used to fabricate a nuclear explosive device while the latter is not.[3] SSNM licensees are therefore required by NRC regulations to protect the SSNM against loss, theft, or diversion (10 CFR parts 70 and 73). The potential consequences which could arise from the illicit use of SSNM are sufficiently great that licensees are required to employ detailed security measures to provide a high-degree of assurance against the threat of theft or diversion of the SSNM. Safeguards programs of licensees typically have several dimensions including: (1) physical security measures, such as private guards, physical barriers, and intrusion alarms (e.g., 10 CFR § 73.50); (2) material containment programs providing for separate material access areas and vault storage of SSNM (e.g., 10 CFR § 73.60); and (3) material control and accounting procedures such as inventory and measuring systems designed to detect discrepancies in the amount of material on hand (e.g., 10 CFR § 70.57).

Petitioner contended that the safeguards programs of the SSNM licensees do not sufficiently and adequately protect SSNM from theft or diversion by, for example, an armed terrorist group intent on obtaining SSNM for its illicit use. In support of its position, petitioner relied principally on internal memoranda and reports done by or for the NRC and its predecessor agency, the Atomic Energy Commission.[4] Petitioner asserted that the common defense and security and the public health and safety require either that the licensees' safeguards programs be immediately supplemented to provide protection against the maximum credible threat of theft—as, for example, by the immediate dispatch of federal marshals—or, if this cannot expeditiously be done, that the SSNM licenses be revoked forthwith and that possession immediately be taken of the SSNM.

1. *Preliminary Considerations.* At the outset, we need to address two aspects of the emergency petition each of which affects our consideration. The first relates to our scope of review. The petition can be viewed as requesting both enforcement action against individual licensees and special rulemaking on a generic level. Because of its request for enforcement action, the petition was initially referred to the staff under 10 CFR § 2.206. The Director's decision not to institute action under 10 CFR § 2.202 is reviewable by the Commission utilizing the standard of review established in *Consolidated Edison Company of New York, Inc.* (Indian Point, Units 1, 2, and 3, 2 NCRI 173 (1975)).[5] Under this standard, detailed in a note below,[5] the Director's decision will not be disturbed unless it is clearly unwarranted or an abuse of discretion. The *Indian Point* review is essentially a deferral to the staff's judgment on the facts relating to a potential enforcement action, in order to avoid premature commitment by the Commission on factual issues. While the Director's decision not to institute emergency action was rendered in March 1976, we consider this to remain his decision today by virtue of his responsibility under our regulations to act on his own initiative. The Director has not initiated the emergency action requested by petitioner to date. Thus, the *Indian Point* issue is whether the Director's decision was an abuse of discretion, either when he made it or in light of the current facts.

[1] The term strategic special nuclear material ("SSNM") includes uranium-235 (contained in uranium enriched to 20 percent or more in the U-235 isotope), uranium 233, or plutonium alone or in any combination in a quantity of 5,000 grams or more computed by the formula, grams = (grams contained U-235) + 2.5 (grams U-233 + grams plutonium).

[2] *Consolidated Edison Company of New York, Inc.* (Indian Point, Units 1, 2, and 3), 2 NRCI 173 (1975). See note 5 infra.

[3] Some licensees also possess limited amounts of plutonium. Plutonium is toxic. Adverse consequences could follow from its dispersal in the atmosphere. This is not as great a concern with either low or high-enriched uranium.

[4] The reports and memoranda include an early draft of the NRC Security Agency Study required by the Energy Reorganization Act of 1974, an internal memorandum, dated January 19, 1976, written by Carl Builder, the Director of NRC's Division of Safeguards, NMSS ("Builder Memorandum"), the Rosenbaum Special Safeguards Study done for the AEC and issued in April 1974 ("Rosenbaum Report"), and a Mitre Corporation report to the NRC entitled "The Threat to Licensed Nuclear Facilities," done in September 1975.

[5] Review of the Director's decision embodies the following elements: (1) whether the statement of reasons given permits rational understanding of the basis for his decision; (2) whether the Director has correctly understood governing law, regulations, and policy; (3) whether all necessary factors have been considered, and extraneous factors excluded, from the decision; (4) whether inquiry appropriate to the facts asserted has been made; and (5) whether the Director's decision is demonstrably untenable on the basis of all information available to him.

In this case, contrary to petitioner's view utilization of the *Indian Point* standard will not noticeably limit Commission involvement in the issues raised by the emergency safeguards petition. As we have earlier noted, a substantial part of the petition relates to policy matters which, as is clear from *Indian Point* and otherwise, the Commission itself must decide. In any event, we would rely heavily on the staff's judgment of factual matters, quite apart from the considerations in *Indian Point*. Of course, we would examine the staff's judgment and its basis with the appropriate degree of discrimination to satisfy ourselves of the judgment's validity. A searching inquiry is also considered essential to an *Indian Point* review.[6]

The second important aspect of the petition relates to the emergency nature of the relief sought. Much of the substance of the NRDC's position is of a policy nature which would warrant close Commission attention whether or not available information compelled the precipitate action it sought.[7] Nonetheless, petitioner's contentions must be weighed in the context of its request for emergency action.

The emergency action requested by petitioner is a drastic procedure which can radically and summarily affect the rights and interests of others, including licensees and those who depend on their activities. Our emergency powers must be responsibly exercised. *Cf. Nader* v. *Federal Aviation Administration*, 440 F.2d 292, 294 (D.C. Cir. 1971). Available information must demonstrate the need for emergency action and the insufficiency of less drastic measures. In the context of the request for emergency relief in this case, the available information must show that the continued activities of NRC licenses, under current safeguards programs, are inimical to the common defense and security and constitute an unreasonable risk to the public health and safety. We are not required either by the Atomic Energy Act or by our regulations, to take the emergency action petitioner has requested whenever we receive information adverse to the integrity of existing nuclear power safety or safeguards systems. See *Nader* v. *Nuclear Regulatory Commission*, 513 F.2d 1045, 1054–55 (D.C. Cir. 1975). Where the balance of available information demonstrates an undue risk, we of course take prompt remedial action. Actions have been taken to improve our safeguards posture. But the facts have never called for the drastic relief which petitioner seeks. And as we state in detail in the following paragraphs, we believe that current available information also falls short of establishing a basis for the emergency relief.

2. *Review of the Director's Decision and the Staff's Site-Specific Actions.* Petitioner has raised a number of safeguards issues calling for our consideration. Although there were safeguards deficiencies pointed up by a series of staff site visits initiated prior to receipt of the petition, the Commission is of the view that the emergency remedies sought by petitioners were inappropriate in March 1976, when Mr. Chapman denied the petition, and are equally inappropriate now. As we now discuss, what the staff review indicated as necessary to remedy the shortcoming revealed in fuel cycle facility safeguards was a systematic and integrated increase in safeguards protection implemented on an expedited, but not emergency, basis. Such an orderly enhancement of safeguards effectiveness has indeed been in progress since March, and we have recently directed implementation of additional measures at a limited number of facilities. Additionally, the Commission has decided to conduct a rulemaking, the details of which will be publicized shortly to establish, through public proceedings, a long-term regulatory framework for safeguarding strategic quantities of special nuclear material.

We believe the orderly approach adopted by the staff was and remains the correct one, in view of the compressed timetable under which needed safeguards improvements have been and are being implemented. In contrast, the emergency measures proposed by petitioners would have required our taking action in the absence of the results of the staff's careful, though expeditious, review of the situation and could have had an unwarranted and severe impact on the operations of our licensees, most of whom are engaged in activities of importance to the national security.

In January of last year and prior to this petition, the Director of the NRC Office of Nuclear Material Safety and Safeguards initiated a special onsite review of all SSNM licensees.[8] The purpose of the special review was to evaluate the safeguards measures of licensees against current NRC regulations and to analyze safeguards capabilities against a hypothetical internal threat of diversion of SSNM by at least one insider—an employee of the licensee—occupying any position, and a hypothetical external threat of theft presented by a determined violent attack of, at minimum, three well-armed, well-trained attackers, who might possess inside knowledge or assistance.[9] Two separate task groups of the NRC safeguards staff visited each licensee's facilities. The task groups consisted of six-to-eight staff personnel, and the visits ranged from two-to-four days' duration. One task group examined the licensee's physical security measures for compliance with existing regulations, the purpose of gauging the timeliness, likelihood and adequacy of the licensee's response to an external attack. The second task group reviewed the licensee's material control programs to evaluate procedures controlling access to and containment of SSNM. The reviews were completed in May.[10] While the fixed-facility licensees were found to have safeguards programs which were generally in compliance with existing regulations, nearly all licensees were unable to defeat both hypothetical threats. The most frequently observed weaknesses were control of access to significant quantities of SSNM (both stored and in process), exit search procedures, and adequacy of response by onsite and offsite forces.

The special review task groups reported that most weaknesses could be corrected by licensees instituting changed procedures, and the Director concluded that shutdown or curtailment of SSNM activities was not necessary. A few weak-

[6] The *Indian Point* standard of review is similar to the review that would be accorded the Director's decision by a court. 2 NRCI at 175. *See Dunlop* v. *Bachowski*, 421 U.S. 560, 568–576 (1975); *Citizens to Preserve Overton Park, Inc.* v. *Volpe*, 401 U.S. 402, 416 (1971). Using the *Indian Point* standard to review the Director's decision in this case is not an abdication of Commission responsibilities as petitioner maintains. As we have noted, the Commission itself will decide questions of safeguards policy. The *Indian Point* standard is reserved for the factually oriented controversies in which full Commission review at the very outset of a proceeding risks premature commitment on factual disputes which the Commission might later be called upon to review.

[7] Indeed, as we note later, the petitioner's contentions relate to policy matters being considered by the Commission. For this reason and as we note *infra*, we retain these aspects of petition for further review.

[8] The January review was directed at the fixed-facility fuel cycle licensees. Activities of companies authorized to transport SSNM had been under special review since October 1975, and are discussed infra. Much of the information generated by these staff reviews and follow-up activities is classified or proprietary. We have attempted in this memorandum and order to set forth the salient aspects of the information without, of course, compromising the classified nature of it. But the factual underpinning of our conclusions includes the classified information and briefings we have received from the staff.

[9] No specific threat levels are defined in our regulations.

[10] While the Director's decision on the NRDC emergency request preceded completion of the site reviews, we do not conclude that his inquiry into the facts asserted by petitioner was thereby rendered incomplete. In our view the factual issues raised by the petition center primarily on the nature of the threat to licensed facilities, generally, rather than on the implementation of safeguards measures at specific sites, which was the subject of the staff's site reviews. The Director properly focused his inquiry on the former, broader question. The Director's denial of the emergency relief requested amounted to a finding that modification of NRC's regulatory standards on an emergency basis was not called for. The Director's action was based in large measure on examination of the very information and reports cited by petitioner, who, as the Director pointed out in his response to the petition, brought forward no new factual material on this subject. Nevertheless, implicit in the petition was a request for the actual implementation of emergency safeguards measures to protect the public against whatever threat was ultimately found to be appropriate. As we note in the text, each site visit was followed by the imposition of new license conditions as appropriate, although in no case were the dramatic measures petitioner sought found to be required.

nesses were found which required structural changes, but these were susceptible to correction through compensatory procedural changes as a short-term solution. The NRC safeguards staff suggested specific procedural alterations to each fixed-facility licensee at the conclusion of each site visit, and has continued to work closely with the licensees to increase safeguards capabilities and correct weaknesses found. A special survey, conducted by inspectors in the NRC Regional Offices during June, determined that all licensees had made significant improvements in their safeguards systems, although further upgrading measures still had to be taken.

Beginning in May, new license conditions were issued to individual SSNM licensees which, in effect, formally required each licensee to employ the safeguards measures that the review teams had determined were sufficient to defend against the hypothetical threats. During September and October, the staff conducted a second round of special onsite reviews to verify that the actions required by the new license conditions had been fully implemented. These onsite reviews were similar, in personnel, time, and procedures, to the earlier initial staff review. Our staff's conclusions were that marked safeguards improvements had been made by all SSNM licensees, and that, in the judgment of the site-review teams, all facilities visited have the capability of meeting the postulated threat. However, as to several facilities, the site reviews have suggested that the level of assurance underlying that judgment was not as great as for the remaining facilities. The Commission considers it prudent—in order to maintain a reasonably assured margin of safeguards at all facilities—to undertake additional measures at these facilities to increase the level of assurance that they are protected against the postulated threat. Based on a generic staff analysis that shows a strong relationship between onsite guard strength and the level of safeguards protection afforded at SSNM facilities, the Commission has decided to require the facilities to increase the number of guards on site or to implement alternative measures which are equally effective within the next two months.[11]

As regards SSNM transportation activities, on October 1, 1976, ERDA assumed responsibility for shipment of all Government-owned SSNM—over 90 percent of the total SSNM road shipments. In a separate series of reviews, the NRC staff evaluated the vulnerability of road shipments of SSNM to attack by at least one insider, or an external group of a minimum of three attackers with military training and skills, at least one of whom could be an insider. As to the private shipments which are still subject to NRC regulation—about 10–30 shipments annually—the NRC staff reviews have led to improvements in commercial transportation planning and scheduling. New license conditions responding to other problems identified by the staff vulnerability studies were implemented in May 1976. The license conditions required increased escort guards, training and instruction of shipment guards and drivers, and installation of citizen band radios for shipment and escort vehicles. The staff is conducting additional reviews, and further upgrading measures remain under consideration.

As we next address, we believe the NRC policy of orderly strengthening of safeguards which the staff is implementing and enforcing provides adequate protection to the public. This policy includes planned agency public proceedings directed at requiring additional upgrading actions by SSNM licensees. In this context, we are satisfied with the staff's conclusions that licensees have safeguards programs which are adequate for the immediate term and that the emergency safeguards sought by NRDC are unwarranted. Our conclusion to initiate rulemaking directed at further upgrading of existing safeguards discussed below, is founded on considerations of prudence. As we have described above, the staff's conclusions rest on extensive onsite reviews of and work with individual licensees. We do not construe the staff's efforts as a statement that the safeguards measures of NRC licensees are insufficient. Rather, we view the activities as an important ingredient to enhance a safeguards posture which we believe is adequate to protect during this interim period while the upgrading measures discussed below are implemented. Because of the staff's past and continuing safeguards efforts, we believe that the emergency measures which petitioner requests are not necessary and that the continued activities of SSNM licensees are not inimical to the common defense and security and do not constitute an unreasonable risk to the public health and safety. Based upon the information present available, we cannot conclude that the Director's decision not to invoke the emergency action petitioner requests was an abuse of discretion.[12]

3. *Consideration of Safeguards Policy Matters.* Specific threat levels are not defined in NRC regulations. However, the effect of the staff's recent activities with individual SSNM licensees has been to require safeguards systems that will protect against the postulated threat of diversion of SSNM by at least one insider occupying any position, or by, at minimum, three well-armed, well-trained outside attackers, who might possess inside knowledge or assistance. This current NRC safeguards posture rests on judgment and experience. It is supported by (1) analysis of and to the extent possible extrapolation from historical evidence on the size and character of groups involved in incidents of terrorism and other antisocial behavior; (2) communications and work with other federal agencies having special knowledge and expertise of this area; and (3) review of our records of the types of actual and threatened violence in the commercial nuclear industry. No NRC-licensed nuclear facility or activity has ever been subjected to armed attack, and we have no evidence suggesting that any such attack is likely. Nonetheless, the danger of attack cannot be wholly discounted. Given our impending proposals for safeguards upgrading, we believe the current level of safeguards reasonably assures that continued SSNM activities of NRC licensees are not inimical to the common defense and security and do not constitute an unreasonable risk to the public health and safety.

The principal safeguards policy issue raised by the NRDC is whether SSNM licensees should be required immediately to employ safeguards measures which would protect against attacks by groups substantially larger than the threat postulated in the staff's special safeguards review. The documents upon which petitioner relies are several reports and memoranda generated by or for the NRC and the AEC over the last two years.[13] The authors of some of these documents judge larger groups to be a possible risk as petitioner contends. However, neither these judgments nor the factual context in which they must be evaluated suggest that the emergency action petitioner requests is either necessary or appropriate. Petitioner has not provided information demonstrating an imminent threat to SSNM licensees—although such risks cannot be wholly discounted—and in this regard it is noteworthy that the reports and memoranda referenced by petitioner

[11] All SSNM facilities and transportation activities will be the object of continued NRC review, inspection, and evaluation. In this regard, the Commission has asked the staff to develop a plan for the comprehensive assessment of all SSNM facilities, to be used in the context of current safeguards as well as upgraded safeguards measures which are to be the subject of a Commission rulemaking described later in this document. The staff's expertise in using safeguards evaluation techniques is growing, and future site visits will likely include the use of additional evaluation strategies.

[12] Analyzing the Director's March 22 decision under the Indian Point standards (see footnote 5, supra), we consider the letter-decision to be understandable and to rationally explain the basis for the decision. The Director understood and executed then-current safeguards policy and his obligations under the Atomic Energy Act and NRC regulations. No essential factor was excluded from consideration or extraneous factor included. An appropriate factual inquiry was made (see footnote 10 supra), and the decision was, and remains, not demonstrably untenable in light of the available information.

[13] Representative of the internal reports and memoranda—and also the documents upon which petitioner principally relies in seeking emergency action—are the Rosenbaum Report, and the Builder Memorandum. See note 4 supra. The former hypothesizes a threat of 15 highly trained persons, three of whom might be insiders; the latter assumes, for purposes of future safeguards consideration, an internal and external threat of two and six persons respectively (nothing a range of expert opinion from one and three to four and 12) and hypothesizes a minimum level of one insider and three outsiders.

do not recommend the kind of precipitate action which petitioner seeks.[14]

In the safeguards context, the specifications of the threat against which safeguards should protect—its size and characteristics—cannot be precisely quantified. In this respect, threat analysis appears to be an example of regulatory action that would greatly benefit, before implementation, from a detailed and open review, including a public examination of the costs and benefits attendant to increasing safeguards measures to meet varying levels of threat. Some historical perspective exists for threat analysis, but it appears to be of limited value. Much of the safeguards question deals in the complexities and unpredictable nature of human character. Thus, the possible analogy of safeguards planning and design and of the technical health and safety planning and design undertaken incident to the licensing of commercial nuclear facilities is of uncertain scope or validity.[15] At present we are not convinced that the empirical or technical means exist to assess the threat with such precision as to establish as mandatory one specific level of safeguards and no higher or lower level. Further examination of safeguards policy may reveal that the appropriate level of safeguards protection will depend on the public acceptability of the measures employed and on the cost-benefit balance of increasing safeguards protection.[16] In this regard, we cannot discount that the ultimate decision to require additional safeguards may involve substantial amounts of initial and continuing expenditures.[17] Before requiring this action, we should be reasonably certain that the expenditures will provide a publicly desired benefit in safeguards protection. Additional safeguards protection need not be implemented on an emergency basis unless necessitated by the facts. Available information does not provide a factual basis for emergency implementation. Thus, in refusing petitioner's requests for emergency action, we do not put a price on basic public safety. Rather, we simply recognize that we must determine that the common defense and security and the public health and safety are advanced by proposed safeguards improvements. All of this discussion convinces us that the issues addressed by petitioner are of important concern but can and should be resolved in contexts other than that of a request for immediate, emergency action.

We do not perceive an actual threat to our licensees although such may not be wholly discounted. As we have said, no NRC licensees has ever been the target of an armed attack, and available information does not indicate than an attack is probable. However, prudence dictates that our safeguards policy be subject to close and continuing NRC review.

Thus, we have decided to conduct a public rulemaking to consider upgraded interim safeguards requirements and proposed longer-term upgrading actions. The specific upgrading actions remain to be defined in the proposed rule and in developing these actions the Commission will consult and coordinate with the Energy Research and Development Administration and other Federal agencies having special knowledge and expertise in this area.[18] For the reasons already stated, we have concluded that continuing activities of SSNM licensees are neither inimical to the common defense and security nor present an unreasonable risk to the public health and safety.

The rulemaking is currently planned for the next few months. This proceeding is intended as a public review of generic safeguards policy for SSNM licenses, and transportation activities and will consider requirements for upgraded safeguards programs in both the near and long term. At the Commission's request, the staff is formulating, for consideration in the rulemaking, recommendations for additional steps that might be taken to upgrade safeguards to protect against higher levels of threat. In formulating its recommendations, the staff is considering, among other materials, the report from a joint NRC–ERDA Task Force which evaluated safeguards of the fixed-facility licensees involved in this proceeding for the purpose of formulating a safeguards action plan for NRC licensees and government-owned SSNM facilities.[19] The Task Force recommended employing additional safeguards measures to counter the hypothetical threats of internal conspiracies among licensee employees and determined violent assaults which would be more severe than those postulated in evaluating the adequacy of current safeguards. The Commission has approved this objective as an appropriate proposal for purposes of the planned public review.[20] The rulemaking proposal will also include interim safeguards actions to be taken over a shorter span of time. Proposed interim actions include: (1) increasing the capability of weapons supplied to guards; (2) improving guard training; (3) requiring SSNM licensees to employ additional safeguards measures, as the staff determines necessary at each facility or for each transport company, to defend against an external threat having the capability of a determined assault more severe than that currently postulated; [21] (4) a security clearance program for employees with access to SSNM; [22] and (5) other measures which may, for the interim, be utilized to increase protection against internal threats of theft or diversion of SSNM.

The Commission believes that the contemplated safeguards rulemaking proceeding presents a satisfactory framework for near- and long-term safeguards decisionmaking. We see no reason to short-circuit the usual rulemaking procedures to address safeguards policy matters.[23]

One final matter merits comment. Petitioner has contended that SSNM licensees must employ safeguards measures

[14] The Builder Memorandum, for example, did not suggest that additional safeguards must be implemented on an emergency basis. Rather, the memorandum recommended a review of existing facilities while awaiting further judgments about what may be a prudent design threat level. This, of course, has been done by the staff.

[15] See "A Report to the U.S. Nuclear Regulatory Commission on a Conceptual Approach to Safeguards," p. 21 (October 31, 1975).

[16] Id. at 16.

[17] On his point, we note that some of the SSNM licensees are engaged in important national defense activities. Thus, there may not be the option of ultimate shutdown of these SSNM licensees even though the publicly desired level of safeguards might be greater and more expensive than the present level. Petitioners recognize this, albeit in the contetx of short-term, emergency relief.

[18] In this regard, we note that ERDA has recently initiated upgrading actions at its facilities and plans additional actions in Fiscal Year 1978. Over 90 percent of the SSNM possessed by NRC licensees is government-owned and subject to ERDA possession and safeguards at one point, or another. Our safeguards concerns relate, of course, to those periods when SSNM is in the hands of our licensees.

[19] The Task Force was directed by Carl H. Builder, then Director of NRC's Division of Safeguards. Its report—sometimes referred to as the "Builder Task Force Report"—contains Restricted Data, and is classified "Confidential," under the Atomic Energy Act of 1954. 42 U.S.C. § 2014y. Like previous reports on this subject, the report based its recommendation to increase safeguards on prudence, rather than a perception of the imminence of threats to the nuclear industry. An unclassified version of the report is planned for release shortly.

[20] While we are committed to proposing for public review an upgrade of safeguards capabilities at SSNM facilities, this is not to say that the Commission will necessarily adopt the proposed upgrade measures as its ultimate course of action. The Commission remains free, at the close of the public proceeding, to adopt the course it considers as most prudent to maintain a margin of safeguards protection, taking into consideration all ingredients of responsible regulatory action, including the education it undergoes as a result of the public process. While we have no evidence of actual threats, we cannot wholly discount that SSNM licensees will be the object of assaults more severe than those currently postulated or of internal conspiracies among employees.

[21] Depending on the staff's evaluation of what is preferable at each facility, these additional safeguards measures would include additional guards at some facilities, installation of undefeatable offsite communications systems, improved guard deployment and defensive positions, and hardened facility alarm stations.

[22] Security clearances are already required by ERDA for employees of SSNM licensees that are engaged in activities under ERDA contract. This covers 90 percent of the SSNM in facilities licensed by the NRC.

[23] The Commission's analysis of safeguards issues in the context of the wide-scale use of mixed-oxide fuels in commercial light water-cooled power reactors ("GESMO") may also offer a forum for discussion of longer-term safeguards matters. GESMO does not apply to existing SSNM licensees, but could serve to focus long-term generic safeguards issues and develop future approaches that would be relevant to existing SSNM licensees.

ures designed to combat "the maximum credible threat of theft or diversion." It is maintained that the concept finds support, by analogy, in the health and safety requirements incident to the licensing of commercial nuclear facilities—an analogy which, as we have previously indicated, is of uncertain validity. The maximum credible threat concept is not now a part of NRC safeguards policy. Without intending to prejudge the utility of the concept, which will likely be evaluated in planned agency proceedings and studies, the present state of safeguards information does not render the concept obviously useful. For example, there does not now appear to be sufficient sophistication in safeguards analysis to establish conclusively the precise nature and level of threats which may be posed to nuclear facilities.[34] Current safeguards policy relies on extrapolation from historical evidence and communications with law enforcement authorities and with other Federal agencies having intelligence-gathering responsibilities or experience and expertise in protecting materials similar to SSNM. Yet, as we have noted earlier, the empirical basis for nuclear safeguards threat assessment is not well developed. This, of course, is not to say that an analytical framework for threat analysis cannot be developed and would not be important in the resolution of safeguards policy issues. In this regard, we again note that the parameters appear to us to be more social than technical. The staff has underway several studies which address the analytical basis for a design basis threat. Additionally, consideration of this safeguards matter may be a part of the planned NRC public proceedings. Thus, while future information and developments may provide clarity, we are not now convinced that the maximum credible threat concept is a helpful one in safeguards planning.

4. *Disposition of the Petition.* On the basis of the above, we conclude that existing safeguards programs, including the extensive and continuing activities of the staff and the SSNM licensees along with the planned safeguards policy activities, are adequate to provide a reasonable assurance that the current SSNM activities of NRC licensees are not inimical to the common defense and security, and do not constitute an unreasonable risk to the public health and safety. We further conclude that the Director's decision not to invoke the emergency action requested by petitioner was not an abuse of discretion. We accordingly deny petitioner's request for the immediate dispatch of federal guards, or similar emergency measures, or the revocation of SSNM licensees. As to the safeguards policy issues raised by the emergency petition—apart from the requested emergency relief—we retain these to be incorporated into ongoing and contemplated reviews and proceedings, and shall invite NRDC participation at appropriate stages in these proceedings. The staff will be instructed to notify petitioner of agency proceedings, which involve public participation, on agency proposals relating to the safeguards measures to be used by SSNM licensees and in related transportation activities. Nothing contained herein should be construed as precluding petitioner from renewing its request for emergency action upon a showing of new information which demonstrates the need for emergency relief.[35]

It is so ordered.

Dated at Washington, D.C. this 21st day of January, 1977.

By the Commission.

SAMUEL J. CHILK,
Secretary of the Commission.

[FR Doc.77-2390 Filed 1-21-77;1:09 pm]

[34] For example, petitioner asserts that existing information places the maximum credible threat at from 12–15 armed outsiders or 3–4 industry employees in collusion, with the chance that future review and assessment may reveal a significantly larger threat. We consider these numbers to be essentially matters of judgments. Such judgments, together with the other available information, have been taken into account by the Commission in arriving at its safeguards decisions.

[35] Petitioner has filed a motion entitled "Motion to Ensure Compilation of the Record." The motion reflects petitioner's concern that all materials relevant to the contentions made in the Emergency Safeguards Petition be available and before the Commission for review. We agree with this concern and note, that the Commission is free to consider any materials it believes relevant including, but not limited to, the documents enumerated in petitioner's motion. This follows from the fact that our consideration of the Emergency Safeguards Petition is not a formal agency proceeding conducted on the record. Thus, the Commission is free to rely on its expertise in the matter and to consider any and all available information whether or not cited by NRDC or the staff, and whether or not it has been or could be made publicly available. The information relevant to and considered in this case includes staff reports and documents on the special onsite reviews (some of which are classified Restricted Data or National Security Information), information and reports provided to the Commission in connection with its continuing interchanges with the Congress and other Executive branch agencies, safeguards studies done by or for the Commission (some of which are classified Restricted Data or National Security Information), documents and reports furnished to the Commission in the course of performing its daily business affairs.

ADVISORY COMMITTEE ON REACTOR SAFEGUARDS, SUBCOMMITTEE ON EMERGENCY CORE COOLING SYSTEMS

Meeting; Correction

The February 5, 1977 meeting of the ACRS Subcommittee on Emergency Core Cooling Systems announced in FEDERAL REGISTER, Vol. 42, page 3906, January 21, 1977, will discuss experimentation concerning core bypass of emergency core coolants. It will not consider items regarding the Oyster Creek Nuclear Power Plant as stated in paragraph (a) of cited notice. (The Subcommittee will consider items pertaining to the Oyster Creek Plant at its January 29, 1977 meeting, announced in FEDERAL REGISTER, Vol. 42, page 2729, January 13, 1977.)

Dated: January 25, 1977.

JOHN C. HOYLE,
Advisory Committee Management Officer.

[FR Doc.77-2763 Filed 1-26-77;8:45 am]

[Docket No. 50-313]

ARKANSAS POWER & LIGHT CO.

Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 18 to Facility Operating License No. DPR-51, issued to Arkansas Power & Light Company (the licensee), which revised Technical Specifications for operation of Arkansas Nuclear One—Unit No. 1 (the Facility) located in Pope County, Arkansas. The amendment is effective as of its date of issuance.

This amendment authorized changes in the Technical Specifications concerning tendon and ventilation system surveillance requirements.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of the amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5 (d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) the application for amendment dated November 12, 1976. (2) Amendment No. 18 to Facility Operating License No. DPR-51 and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. and at the Arkansas Polytechnic College, Russellville, Arkansas 72801. A single copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Operating Reactors.

Dated at Bethesda, Md., this 18th day of January, 1977.

For the Nuclear Regulatory Commission.

DENNIS L. ZIEMANN,
Chief, Operating Reactors Branch No. 2, Division of Operating Reactors.

[FR Doc.77-2766 Filed 1-26-77;8:45 am]

[Docket Nos. 50-317 and 50-318]

BALTIMORE GAS & ELECTRIC CO.

Issuance of Amendments to Facility Operating Licenses and Negative Declaration

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment Nos. 19 and 5 to Facility Operating License Nos. DPR-53 and DPR-69 (respectively), issued to Baltimore Gas & Electric Company (the licensee), which revised the licenses for operation of the Calvert Cliffs Nuclear Power Plant Unit Nos. 1 and 2 (the facilities) located in Calvert County, Maryland. The amendments are effective as of their date of issuance.

The amendments authorized an additional offsite power source from Southern Maryland Electric Cooperative (SMECO) which provides a standby offsite power source to augment the two existing offsite power sources and increases the reliability of the offsite power sources, thus minimizing the possibility of an extended shutdown of the facilities.

The application for the amendments complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendments. Prior public notice of these amendments was not required since the amendments do not involve a significant hazards consideration.

The Commission has prepared an environmental impact appraisal relating to the action authorized by these license amendments and has concluded that an environmental impact statement for this particular action is not warranted because there will be no significant environmental impact attributable to the action.

For further details with respect to this action, see (1) the application for amendment dated March 18, 1976, and supplement thereto dated July 13, 1976, (2) Amendment No. 19 to License No. DPR-53 and Amendment No. 5 to License No. DPR-69, and (3) the Commission's jointly issued Safety Evaluation and Environmental Impact Appraisal. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C. and at the Calvert County Library, Prince Frederick, Maryland 20678. A single copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Operating Reactors.

Dated at Bethesda, Md., this 14th day of January, 1977.

For the Nuclear Regulatory Commission.

DENNIS L. ZIEMANN,
Chief, Operating Reactors Branch No. 2, Division of Operating Reactors.

[FR Doc.77-2767 Filed 1-26-77;8:45 am]

[Docket Nos. STN 50-491, STN 50-492, and STN 50-493]

DUKE POWER CO., CHEROKEE NUCLEAR STATION, UNIT NOS. 1, 2, AND 3

Issuance of Revision to Limited Work Authorization

Pursuant to the provisions of 10 CFR 50.10(e) of the Nuclear Regulatory Commission's (Commission) regulations, the Commission has authorized the Duke Power Company to conduct certain site activities in connection with the Cherokee Nuclear Station, Unit Nos. 1, 2, and 3, prior to a decision regarding the issuance of construction permits. Notice of the Limited Work Authorization was published in the FEDERAL REGISTER on June 10, 1976 (41 FR 23489). Based upon an Atomic Safety and Licensing Board Order, the staff has now revised two of the environmental conditions related to the radwaste treatment system and preservation of a mountain-laurel hardwood stand.

A Partial Initial Decision on matters relating to the National Environmental Policy Act and site suitability was issued by the Atomic Safety and Licensing Board in the above captioned proceeding on May 21, 1976. A copy of (1) the Partial Initial Decision; (2) the applicant's Preliminary Safety Analysis Report and amendments thereto; (3) the applicant's Environmental Report, and amendments thereto; (4) the staff's Final Environmental Statement dated October 1975; (5) the Commission's letter of authorization, dated May 28, 1976; and (6) the Commission's revision to that letter of authorization dated January 19, 1977, are available for public inspection at the Commission's Public Document Room at 1717 H Street NW, Washington, D.C. and the Cherokee County Library, 300 East Rutledge Avenue, Gaffney, South Carolina.

Dated at Rockville, Md., this 19th day of January 1977.

For the Nuclear Regulatory Commission.

WM. H. REGAN, Jr.,
Chief, Environmental Projects Branch 2, Division of Site Safety and Environmental Analysis.

[FR Doc.77-2768 Filed 1-26-77;8:45 am]

[Docket No. 50-334]

DUQUESNE LIGHT CO., OHIO EDISON CO., AND PENNSYLVANIA POWER CO.

Proposed Issuance of Amendment to Facility Operating License

The Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to Facility Operating License No. DPR-66 issued to Duquesne Light Company, Ohio Edison Company, and Pennsylvania Power Company (the licensees), for operation of the Beaver Valley Power Station Unit No. 1, located in Beaver County, Pennsylvania.

In accordance with the licensees' application for amendment dated December 3, 1976, the amendment would revise the provisions in the Technical Specifications relating to the spent fuel storage pool. As amended, the Technical Specifications would permit the replacement of the existing 272 spent fuel storage cells with High Density Spent Fuel Storage Racks, increasing the ultimate storage capacity of the spent fuel storage pool to 833 storage locations.

Prior to issuance of the proposed license amendment, the Commission will have made the findings required by the Atomic Energy Act of 1954, as amended (the Act), the Commission's rules and regulations.

By February 28, 1977, the licensees may file a request for a hearing and any person whose interest may be affected by this proceeding may file a request for a hearing in the form of a petition for leave to intervene with respect to the issuance of the amendment to the subject facility operating license.

Petitions for leave to intervene must be filed under oath or affirmation in accordance with the provisions of § 2.714 of 10 CFR Part 2 of the Commission's regulations. A petition for leave to intervene must set forth the interest of the petitioner in the proceeding, how that interest may be affected by the results of the proceeding, and the petitioner's contentions with respect to the proposed licensing action. Such petitions must be filed in accordance with the provisions of this FEDERAL REGISTER notice and Section 2.714, and must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Docketing and Service Section, by the above date. A copy of the petition and/or request for a hearing should be sent to the Executive Legal Director, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, and to Gerald Charnoff, Esquire, Shaw, Pittman, Potts and Trowbridge, 1800 M Street, NW., Washington, D.C. 20036, the attorney for the licensees.

A petition for leave to intervene must be accompanied by a supporting affidavit which identifies the specific aspect or aspects of the proceeding as to which intervention is desired and specifies with particularity the facts on which the petitioner relies as to both his interest and his contentions with regard to each aspect on which intervention is requested. Petitions stating contentions relating only to matters outside the Commission's jurisdiction will be denied.

All petitions will be acted upon by the Commission or licensing board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel. Timely petitions will be considered to determine whether a hearing should be noticed or another appropriate order issued regarding the disposition of the petitions.

In the event that a hearing is held and a person is permitted to intervene, he becomes a party to the proceeding and has a right to participate fully in the conduct of the hearing. For example, he may present evidence and examine and cross-examine witnesses.

For further details with respect to this action, see the application for amendment dated December 3, 1976, which is available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C., and at the Beaver Area Memorial Library, 100 College Avenue, Beaver, Pennsylvania.

Dated at Bethesda, Md., this 12th day of January 1977.

For the Nuclear Regulatory Commission.

ROBERT W. REID,
Chief, Operating Reactors Branch No. 4, Division of Operating Reactors.

[FR Doc.77-2764 Filed 1-26-77;8:45 am]

[Docket No. STN 50-572]

WESTINGHOUSE ELECTRIC CORP.

Receipt of Standard Safety Analysis Report

Westinghouse Electric Corporation, in response to Option No. 1 of the policy statement of the Nuclear Regulatory Commission (the Commission) entitled "Methods of Achieving Standardization of Nuclear Power Plants", issued March 5, 1973, and pursuant to Appendix O to 10 CFR Part 50, has filed with the Commission a seven-volume document entitled "Westinghouse Reference Safety Analysis Report 414" (RESAR-414), which was docketed on December 30, 1976. The tendered application for RESAR-414 was received on October 8, 1976. Following a preliminary review for completeness, the application was found to be acceptable for docketing. Docket No. STN 50-572 has been assigned to RESAR-414 and should be referenced in any correspondence relating thereto.

RESAR-414 has been submitted in accordance with the "reference system" option wherein an entire facility design or major fractions of it can be identified as a standard design to be used in multiple applications. RESAR-414 describes and analyzes a four-loop pressurized water reactor nuclear steam supply system (NSSS) with auxiliary and safety systems. The reactor is designed for initial operation at a rated core thermal power level of 3,800 megawatts.

On March 11, 1974, the Commission docketed for review an application filed by Westinghouse Electric Corporation for its Reference Safety Analysis Report, RESAR-41. The Commission issued a preliminary design approval for RESAR-41 on December 31, 1975. The RESAR-414 NSSS is in many respects similar to the RESAR-41 NSSS, with the principal differences being the reactor core length, control rods, systems for emergency core cooling and boration, electrical protection systems, and spent fuel removal and storage.

When its review of RESAR-414 is complete, the Commission's staff will prepare and publish a Safety Evaluation Report documenting the results of the review. In addition, RESAR-414 has been referred to the Advisory Committee on Reactor Safeguards (ACRS) for its review and a report thereon. Copies of the Safety Evaluation Report and the ACRS report will be made available to the public. A notice relating to the availability of these documents will be published in the FEDERAL REGISTER.

All interested persons who desire to submit written comments for consideration by the staff and ACRS during their review of RESAR-414 should send them to the Office of the Secretary, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Docketing and Service Section by ----------.

A copy of the RESAR-414 Reference Safety Analysis Report is available for public inspection at the Commission's Public Document Room, 1717 H Street, Washington, D.C. 20555. When available, the Safety Evaluation Report and the ACRS report will be made available for inspection by the public at the Commission's Public Document Room.

Dated at Bethesda, Md., this 19th day of January, 1977.

For the Nuclear Regulatory Commission.

S. A. VARGA,
Chief, Light Water Reactors Branch No. 4, Division of Project Management.

[FR Doc.77-2765 Filed 1-26-77;8:45 am]

[Docket Nos. 50-443, 50-444]

PUBLIC SERVICE COMPANY OF NEW HAMPSHIRE ET AL., (SEABROOK STATION, UNITS 1 AND 2)

Order Regarding Stay Application

On January 21, 1977, the Atomic Safety and Licensing Appeal Board rendered ALAB-366, suspending the effectiveness of the outstanding construction permits for the proposed Seabrook facility. The Board's decision is to become effective on February 4, 1977. An application for a stay of construction is pending before the United States Court of Appeals for the First Circuit. *Audubon Society of New Hampshire* v. *United States*, 76-1346. On December 17, 1976, the Court rendered an opinion deferring its ruling on the stay application pending further agency consideration of the issues. The Court stated its expectation that it would rule on the stay application unless further agency action eliminating a need for a stay were taken by February 18, 1977.

Pursuant to 10 CFR 2.786, the Commission has elected to review ALAB-366. The matter raises complex legal and policy issues with possible ramifications for other proceedings. As is our custom, we will articulate in appropriate detail the reasons for any action we may decide to take in our decision announcing the results of our review.

As previously noted, the Appeal Board decision will become effective by its own terms and construction must cease (except for measures which protect the environment or buildings, material or personnel) on February 4, 1977. In order to allow adequate time for consideration of the submissions of the parties under the schedule we are establishing by this order, the effectiveness of the Appeal Board decision is hereby stayed until 6 p.m., February 7, 1977. Any party who believes that the Appeal Board decision should be stayed beyond that date should apply for a stay. The other parties will have an opportunity to respond. The Commission will rule on any such stay application no later than February 7, 1977. Should the Commission decline to issue a further stay, the applicant will be given a reasonable period of time to comply with the Board's decision.

Apart from the question of a temporary stay pending completion of Commission review, the parties are to file papers addressed to the correctness of the Appeal Board decision. In addition, the applicant is to provide a detailed description of the status of work at the site and its plans with reference to construction over the next several months, should continued construction be permitted. In this regard, the applicant should explain the meaning of its Board of Directors resolution of January 6, 1977 referred to in the Appeal Board's opinion at pp. 63-64, detailing the work now underway whose continuation is regarded as "necessary or desirable in order to complete a particular phase or phases of the Project or to permit full construction activity to be resumed in an efficient and orderly manner as soon as possible * * *."

In view of time constraints the parties are free to incorporate relevant portions of papers previously submitted to the Licensing and Appeal Boards and to the Court, so long as such submissions are readily intelligible.

The following schedule is established for Commission review:

Jan. 31, 1977---	All parties submit papers on the merits of the Appeal Board decision; any party seeking a stay pending a completion of Commission review shall file an appropriate submission.
Feb. 3, 1977----	Reply papers due from all parties on the merits and any stay application.
Feb. 7, 1977----	Oral argument before the Commission.

All submissions must be put in the hands of all parties by the close of business on the specified deadlines. The oral argument will take place at 9:30 a.m. in the Commissioners Conference Room, 1717 H Street NW., Washington, D.C. Counsel wishing to participate in oral argument should so inform the Secretary by January 31, 1977. The Secretary will thereafter issue an order allocating time for oral presentations.

In footnote 54 of the majority opinion, the Board noted that it had not reached the merits of many of the issues pending before it for decision in this proceeding. It indicated, however, that some of those issues appear to be "troublesome." The Appeal Board is requested to identify these issues and to provide the Commission with a statement of the seriousness of these issues and the competing considerations involved. This submission is requested by February 3, 1977.

The reconstituted Licensing Board in this proceeding should proceed with preparation for the hearing contemplated in the Appeal Board's opinions without awaiting the outcome of Commission review of ALAB-366.

Dated at Washington, D.C., this 24th day of January 1977.

It is so ordered.

SAMUEL J. CHILK,
Secretary of the Commission.

[FR Doc.77-2791 Filed 1-26-77;8:45 am]

NUCLEAR REGULATORY COMMISSION

ADVISORY COMMITTEE ON REACTOR SAFEGUARDS NUCLEAR REGULATORY COMMISSION

Notice of Meeting

In accordance with the purposes of Sections 29 and 182b. of the Atomic Energy Act (42 U.S.C. 2039, 2232b.), the Advisory Committee on Reactor Safeguards will hold a meeting on February 10-12, 1977, in Room 1046, 1717 H Street NW., Washington, D.C.

The agenda for the subject meeting will be as follows:

THURSDAY, FEBRUARY 10, 1977

8:00 A.M.—8:45 A.M.: Executive Session (Closed).—The Committee will discuss the qualifications of candidates nominated for appointment to the ACRS.

8:45 A.M.–9:45 A.M.: Executive Session (Open).—The Committee will hear and discuss the reports of ACRS Subcommittees and consultants who may be present regarding the evaluation of selected safety issues related to light-water reactors. Portions will be closed if necessary to discuss proprietary material or intra-agency memoranda prepared for internal use only.

9:45 A.M.–12:45 P.M. and 1:45 P.M.–4:45 P.M.: Meeting on Evaluation of Selected Safety Issues Related to Light-Water Reactors (Open).—The Committee will hear presentations and hold discussions regarding evaluation of selected safety issues related to light-water reactors.

Portions of this session will be closed if necessary to receive reports from individual NRC employees who will present their personal opinions and recommendations only in confidence. Portions will also be closed if required to review Proprietary Information related to the matters being considered and intra-agency memoranda prepared for internal use only.

4:45 P.M.–6:30 P.M.: Executive Session (Open).—The Committee will hear and discuss reports of ACRS Subcommittees regarding proposed Regulatory Guides and regulatory activities related to the practices and policies for correction of ECCS errors for operating power plants. The Committee will also discuss a proposed revision of its report on the Status of Generic Matters Related to Light-Water Reactors.

FRIDAY, FEBRUARY 11, 1977

8:30 A.M.—11:15 A.M.: Meeting with Members of the NRC Staff.—This portion of the meeting will include sessions with the Executive Director for Operations and other members of the NRC Staff related to current reactor operating experience and licensing actions; evaluation of generic matters related to light-water reactors, including performance of steam generator tubes in pressurized water reactors and evaluation of fuel handling accidents inside containment; and evaluation of safety research data and regulatory requirements of the Federal Republic of Germany. The future schedule for ACRS activities will be discussed. Reports will be made to the Committee regarding the NRC program to evaluate integrity of reactor pressure vessels designed and fabricated to the ASME Boiler and Pressure Vessel Code Sections I and VIII and the NRC program to review environmental phenomena at sites with facilities for processing and fabricating plutonium.

11:15 A.M.–12:00 Noon: Executive Session (Open).—The Committee will hear and discuss the report of the ACRS Subcommittee and consultants who may be present regarding the analytical models formulated to evaluate use of Exxon Nuclear Company Replacement Fuel for Light-Water Reactors. Portions of this session will be closed if required to discuss Proprietary Information related to the design, fabrication, or operation of this fuel.

1:00 P.M.–3:00 P.M.: Meeting Regarding Exxon Nuclear Company, Inc. Replacement Fuel for Light-Water Reactors (Open).—The Committee will hear and discuss information with representatives of the NRC Staff and the Exxon Nuclear Company, Inc., and the Jersey Central Power & Light Company, regarding the ECCS evaluation models for replacement fuel to be used in non-jet pump boiling water reactors and pressurized water reactors with low-pressure containment.

Portions of this session will be closed if required to discuss Proprietary Information related to the design, fabrication or operation of this type fuel.

3:00 P.M.–5:00: Executive Session (Open).—The Committee will hear and discuss the reports of ACRS Subcommittee Chairmen with respect to ACRS activities regarding review of the Zion Nuclear Station, ACRS review of the Clinch River Breeder Reactor, review of sites with environmental phenomena for plutonium processing and fabrication facilities, and ACRS review of the NRC plan to reevaluate siting policy and practices.

5:00 P.M.–6:30: Executive Session (Closed).—The Committee will meet in closed Executive Session to discuss the qualifications of proposed candidates for appointment to the Committee. The Committee will discuss a proposed ACRS report on safeguards provisions at nuclear facilities.

SATURDAY, FEBRUARY 12, 1977

8:30 A.M.–4:30 P.M.: Executive Session (Open).—The Committee will discuss proposed ACRS reports and activities regarding matters considered during this meeting. Portions of this session will be closed if necessary to discuss proprietary material related to the matters being discussed. Portions will also be closed if necessary to discuss information related to safeguards provisions at nuclear facilities and to discuss proposed policy and practice regarding conduct of ACRS activities.

I have determined in accordance with Subsection 10(d) of Public Law 92-463 that it is necessary to close portions of the meeting as noted above to protect material, which has been designated national security information and is classified under E.O. No. 11652 (5 U.S.C. 552(b)(1), to protect proprietary data (5 U.S.C. 552(b)(4)), to protect the confidentiality of intra-agency memoranda prepared for internal agency use only and discussion of information which, if written, would fall within the provisions of exemption 5 of 5 U.S.C. 552(b) (5 U.S.C. 552(b)(5)), to preserve the confidentiality of information related to safeguarding of special nuclear material (5 U.S.C. 552(b)(4)), to protect information provided in confidence by individual members of the NRC Staff (5 U.S.C. 552(b)(5)), and to protect information which, if released, would represent an undue invasion of privacy (5 U.S.C. 552(b)(6)). Separation of factual information and information considered exempt from disclosure under exemption (1), exemption (4), exemption (5), and exemption (6) of 5 U.S.C. 552(b) during these portions of the meeting is not considered practical.

Practical considerations may dictate alterations in the above agenda or schedule. The Chairman of the Committee is empowered to conduct the meeting in a manner that in his judgment will facilitate the orderly conduct of business, including provisions to carry over an incompleted open session from one day to the next.

The Advisory Committee on Reactor Safeguards is an independent group established by Congress to review and report on each application for a construction permit and on each application for an operating license for a reactor facility and on certain other nuclear safety matters. The Committee's reports become a part of the public record. Although ACRS meetings are ordinarily open to the public and provide for oral or written statements to be considered as a part of the Committee's information gathering procedure concerning the health and safety of the public, they are not adjudicatory type hearings such as are conducted by the Nuclear Regulatory Commission's Atomic Safety & Licensing Board as part of the Commission's licensing process. ACRS meetings do not normally treat matters pertaining to environmental impacts outside the safety area.

With respect to public participation in the open portion of the meeting, the following requirements shall apply:

(a) Persons wishing to submit written statements regarding the agenda items may do so by providing a readily reproducible copy to the Committee at the beginning of the meeting. Comments should be limited to safety related areas within the Committee's purview. Persons desiring to mail written comments may do so by mailing a readily reproducible copy thereof in time for consideration at this meeting. Comments postmarked no later than February 2, 1977, to the Executive Director, Advisory Committee on Reactor Safeguards, Nuclear Regulatory Commission, Washington, DC 20555 will normally be received in time to be considered at this meeting. Background information concerning items to be considered at this meeting can be found in documents on file and available for public inspection at the Nuclear Regulatory Commission's Public Document Room, 1717 H Street, NW, Washington, DC 20555 and at the following Public Document Rooms:

OYSTER CREEK NUCLEAR POWER PLANT

Ocean County Library, 15 Hooper Avenue, Toms River, NJ 08753.

D.C. COOK UNIT 1

Maude Preston Palenske Memorial Library, 500 Market Street, St. Joseph, MI 49085.

(b) Those persons wishing to make oral statements regarding agenda items at the meeting should make a request to do so prior to the meeting, identifying the topics and desired presentation time so that appropriate arrangements can be made. The Committee will receive oral statements in safety related areas within the Committee's purview at an appropriate time chosen by the Chairman of the Committee.

(c) Further information regarding topics to be discussed, whether the meeting or portions of the meeting have been cancelled or rescheduled, the Chairman's ruling on requests for the opportunity to present oral statements, and the time allotted therefor, can be obtained by a prepaid telephone call on February 9, 1977, to the Office of the Executive Director of the Committee (Telephone: 202-634-1371) between 8:15 A.M. and 5:00 P.M., Eastern Time. It should be noted that the above schedule is tentative, based on the anticipated availability of related information, etc. It may be necessary to reschedule items to accommodate required changes. The ACRS Executive Director will be prepared to describe these changes on February 9, 1977.

(d) Questions may be propounded only by members of the Committee and its consultants.

(e) The use of still, movie, and television cameras, the physical installation and presence of which will not interfere with the course of the meeting, will be permitted both before and after the meeting and during any recess. The use of such equipment will not, however, be allowed while the meeting is in session.

(f) Persons with agreements or orders permitting access to proprietary information other than safeguards information may attend portions of ACRS meetings where this material is being discussed upon confirmation that such agreements are effective and relate to the material being discussed.

The Executive Director of the ACRS should be informed of such an agreement at least 3 days prior to the meeting so that the agreement can be confirmed and a determination can be made regarding the applicability of this agreement to the material that will be discussed during the meeting. Minimum information provided should include information regarding the date of the agreement, the scope of material included in the agreement, the project or projects involved, and the names and titles of the persons signing the agreement. Additional information may be requested to identify the specific agreement involved. A copy of the executed agreement should be provided to the Executive Director at the beginning of the meeting.

(g) A copy of the transcript of the open portion(s) of the meeting where factual information is presented will be available for inspection during the following workday at the Nuclear Regulatory Commission's Public Document Room, 1717 H Street, NW, Washington, D.C. Copies of the minutes of the meeting will be made available for inspection at the Nuclear Regulatory Commission's Public Document Room, 1717 H Street, NW, Washington, D.C. on or after May 13, 1977. Copies may be obtained upon payment of appropriate charges.

Dated: January 21, 1977.

JOHN C. HOYLE,
Advisory Committee Management Officer.

NOTE: This is a republication of a document which originally appeared at 42 FR 4564, Jan. 25, 1977.

NATIONAL TRANSPORTATION SAFETY BOARD

[N-AR 77-4]

SAFETY RECOMMENDATIONS AND RESPONSES

Availability and Receipt

The National Transportation Safety Board has recommended that the U.S. Department of Transportation in conjunction with its State agent, the Maine Public Utilities Commission, monitor the compliance actions taken by Maine Utility Gas Company to insure that it has established operations and maintenance records as required by 49 CFR Part 192. The Class II, priority followup recommendation No. P-76-101 was issued January 17 following investigation of a flash fire which occurred last August 13 in the basement of a house in Bangor, Maine.

The fire killed one Maine Utility Gas Company employee, burned two other employees, and caused minor damage to the house. Board investigation disclosed that liquefied petroleum gas admixed with air at 7-inches water-column pressure had escaped from a severely corroded segment of a 1½-inch bare steel service line at the basement wall. The escaping gas migrated underground along the service line and entered the basement through numerous openings in the stone foundation wall.

In its recommendation letter, the Board indicated that the gas company's operating procedures did not include instructions for the type of operation used by company servicemen in attempting to locate a low gas pressure problem immediately before the fire began. These procedures did not require the servicemen to vent open service lines to a safe outside location or to monitor the atmosphere for combustible gases when working in confined locations, nor did the procedures prohibit smoking or the introduction of other ignition sources while working near gas facilities. Also, the Board stated that it was doubtful that leakage surveys of the company's gas mains made previously by a contractor were adequate.

Also on January 17 the Safety Board directed five Class I recommendations to the Maine Utility Gas Company. The Board asks urgent followup action in implementing these recommendations:

Develop written procedures to insure the safety of company personnel and the public when work is performed on active gas facilities within buildings or other enclosed locations and train its employees in the use of the procedures. These procedures should require the use of equipment to monitor the atmosphere for combustible gases and should prohibit smoking, open flames, or other sources of ignition. (P-76-96)

Inspect a sample of the bare steel gas service lines at foundation walls to determine the systemwide extent of corrosion and perform a survey capable of detecting gas leakage that includes all service lines, meter set assemblies, and openings in foundation walls near gas service lines. Based upon the results of the inspection and survey, take necessary corrective action. (P-76-97)

Determine areas of active corrosion and install necessary cathodic protection to stop corrosion which could result in a condition detrimental to public safety. (P-76-98)

Determine the odor intensity of the gas at one-fifth of its lower explosive limit and periodically sample the intensity at representative locations. (P-76-99)

Maintain operation and maintenance records as required by 49 CFR Part 192. (P-76-100)

A third recommendation letter was forwarded by the Board on January 17 to the American Society of Mechanical Engineers Gas Piping Standards Committee. The Class II recommendation, No. P-76-102, also issued in connection with the Bangor accident, asked that the Committee provide priority followup action in revising its Guide for Gas Transmission and Distribution Systems, Appendix G-11, to include information appropriate to heavier-than-air gases which will guide operators of systems transporting these gases in the selection of gas leakage detection techniques and procedures.

The Federal Highway Administration, by letter of January 13, has acknowledged the Safety Board's letter of December 21 redirecting recommendations H-76-2 and H-76-3 from the National Highway Traffic Safety Administration to FHWA. (See 41 FR 56739, December 29, 1976.) These recommendations were developed as a result of the Board's investigation of the railroad-automobile grade crossing collision which occurred in Tracy, California, March 9, 1975. FHWA notes that the basic issues involved in railroad grade crossing safety and programs conducted by the Department of Transportation were discussed with Safety Board representatives at a meeting last June 14. The meeting was initiated by FHWA's Office of Engineering, partly as a result of the Board's report on the Tracy accident, and was attended by representatives of the Federal Railroad Administration and NHTSA. FHWA states that its formal response to these recommendations will be an extension and updating of the information provided to Board representatives at that meeting.

The Safety Board's letter of January 17 to the Federal Aviation Administration supplies comments on FAA's notice of proposed rulemaking 76-23—Additional Weather Information: Domestic and Flag Carriers, published last November 15 at 41 FR 50275. While the Board concurs with the intent of the proposal, certain reservations are expressed.

The preamble to NPRM 76-23 quotes, in part, the Safety Board's recommendation A-74-14, resulting from the July 1973 crash of an Ozark Airlines FH-227B at St. Louis, Missouri. The recommendation, in part, was that the FAA "* * * implement, in coordination with the National Weather Service, a system to relay severe thunderstorms and tornado bulletins expeditiously to inbound and outbound flights when such bulletins include the terminal area." The Board states that the letter to FAA was quite clear in pointing out that the tower and approach control facility had no system for the relay of severe weather warning bulletins to incoming and outgoing flights. The Board did not intend that the company have the responsibility in the terminal area.

The Board states that its operational and investigative experience and the findings of its ongoing study of terminal area thunderstorm problems indicate that the timely transmission of significant weather information by the company dispatcher to a flight in the terminal area is not feasible because of communications difficulties. The Board believes that the responsibility for transmission of such information necessarily devolves to the controller and that the proposed 14 CFR 121.601(c) as it pertains to the terminal area is not practical. The Board therefore considers recommendation A-74-14 to be still applicable and is carrying it on Board records as an "open" item.

Further commenting on the FAA proposal, the Board notes that although the major air carriers have meteorological departments which tailor weather information for their flights and provide forecasts of low-level wind shear, many carriers do not have company meteorologists and depend on the products of the National Weather Service. The Board notes that although NWS issues forecasts for clear air turbulence and thunderstorms, it does not provide routine forecasts of low-level wind shear; accordingly, there is no way many dispatch departments can provide such forecasts to flightcrews. According to the Board, similar problems no doubt exist on international routes where the dispatcher might be separated from the flight by thousands of miles, and such forecasts, even if issued by the various meteorological authorities, are not necessarily available to the dispatcher.

Safety recommendation letters are available to the general public; single copies may be obtained without charge. Copies of letters concerning recommendations may be obtained at a cost of $4.00 for service and 10¢ per page for reproduction. All requests must be in writing, identified by recommendation number and date of publication of this FEDERAL REGISTER notice. Address inquiries to: Publications Unit, National Transportation Safety Board, Washington, D.C. 20594.

(Sec. 307 of the Independent Safety Board Act of 1974 (Pub. L. 93-633, 88 Stat. 2172 (49 U.S.C. 1906)).)

MARGARET L. FISHER,
Federal Register Liaison Officer.

PRIVACY PROTECTION STUDY COMMISSION

MEETING

The Privacy Protection Study Commission will hold meetings on February 2 (Wednesday), 3 (Thursday), 9 (Wednesday), 10 (Thursday), 17 (Thursday), and 18 (Friday), 1977 for the purpose of internal deliberations and discussion with staff. The meetings will be held from 9:00 a.m. to 5:30 p.m. each day in Room 2358, Rayburn House Office Building, Washington, D.C.

Topics of discussion for February 2, 3, 9, and 10 may include the following Commission projects: Credit, credit reporting, insurance, and medical records. The sessions on February 17 and 18 will include a discussion of education records, research and statistics, and implementation of the Privacy Act of 1974.

It has been determined in writing by the Acting Director of the Office of Management and Budget, James L. Mitchell, that these meetings of the Commission to be held February 2, 3, 9 and 10 may be closed under section 10(d) of the Federal Advisory Committee Act and under exemption 5 of the Freedom of Information Act, 5 U.S.C. 552(b)(5). The Commission will discuss the progress of draft reports being undertaken by the staff of the Commission. No recommendations will be given to anyone outside of the Commission nor will the Commission take any final actions in closed session. Also, a full verbatim transcript will be taken for all sessions.

For further information, contact John Barker, Public Affairs Director, at 202-634-1477.

CAROLE W. PARSONS,
Executive Director, Privacy Protection Study Commission.

SECURITIES AND EXCHANGE COMMISSION

[File No. SR-Amex-76-30]

AMERICAN STOCK EXCHANGE, INC.

Order Approving Proposed Rule Change

JANUARY 18, 1977.

On December 13, 1976, the American Stock Exchange, Inc. ("Amex"), 86 Trinity Place, New York, N.Y. 10006, filed with the Commission, pursuant to Section 19(b) of the Securities Exchange Act of 1934 (the "Act") and Rule 19b-4 thereunder, a proposed rule change amending the Amex constitution and rules to reflect the proposed transfer of the clearing agency business of the American Stock Exchange Clearing Corporation ("ASECC"), the Amex's wholly-owned clearing subsidiary, to the National Securities Clearing Corporation ("NSCC"). The proposed amendments were filed in connection with the pending application of NSCC as a registered clearing agency.

In accordance with Section 19(b) of the Act and Rule 19b-4 thereunder, notice of the proposed rule change was published in the FEDERAL REGISTER (42 FR 85, January 3, 1977), and the public was invited to submit comments. Notice of the filing and an invitation for comments also appeared in Securities Exchange Act Release No. 13103, December 23, 1976. No letters of comment were received.

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to national securities exchanges, and in particular, the requirements of Section 6 and the rules and regulations thereunder.[1] Furthermore, in view of the proposed transfer of the clearing agency business of ASECC to NSCC, the Commission finds good cause for approving the proposed rule change prior to the thirtieth day after the date of publication of notice of the filing thereof.

It is therefore ordered, pursuant to section 19(b)(2) of the Act, that the above-mentioned proposed rule change contained in File No. SR-Amex-76-30 be, and it hereby is, approved provided, however, that the proposed rule change will not become effective prior to the effectiveness, and implementation by NSCC, of the order granting NSCC registration as clearing agency.[2]

[1] The Commission's approval of the amendments to the Amex constitution and rules is subject, nevertheless, to the Commission's review pursuant to Section 31(b) of the Securities Acts Amendments of 1975. See Securities Exchange Act Release No. 13027 (December 1, 1976).

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

[FR Doc.77-2619 Filed 1-26-77;8:45 am]

[SR-NASD-76-10]

NATIONAL ASSOCIATION OF SECURITIES DEALERS, INC.

Order Approving Proposed Rule Change

JANUARY 18, 1977.

The National Association of Securities Dealers, Inc., 1735 K Street, N.W., Washington, D.C. 20006 (the "NASD") submitted on September 28, 1976, a proposed rule change under Rule 19b-4 to amend Section 4 of Schedule G under Article XVIII of the By-Laws of the NASD to provide that the charge to members for transactions in eligible securities reported in the consolidated transaction reporting system (the "consolidated system") contemplated by Rule 17a-15 under the Securities Exchange Act of 1934 (the "Act") through the NASDAQ system be altered from $.20 per transaction for all transactions, to $.20 per transaction for transactions reported prior to January 1, 1976, and $.10 per transaction for transactions reported subsequent to January 1, 1976.

The schedule of changes proposed to be amended (contained in Section 4 of Schedule G) was originally filed with the Commission on March 21, 1975, in conjunction with other rule changes (contained in Sections 1, 2 and 3 of Schedule G) governing: (i) the reporting of transactions in eligible securities, and (ii) antimanipulative rules relating to over-the-counter trading in such securities.

The provisions of Schedule G were amended by the NASD and refiled with the Commission on June 4, 1975, and were deemed by the Commission to have been filed under Section 19(b) of the Act, as amended by the Securities Acts Amendments of 1975. In view of the need to implement the NASD rule changes proposed in Article XVIII of the NASD's By-Laws and Schedule G thereunder (the "NASD Rule Changes") immediately to permit the scheduled commencement of the consolidated system on June 16, 1975, the Commission ordered the NASD Rule Changes into effect summarily pursuant to Section 19(b)(3)(B) of the Act on June 11, 1975. Notice of that action was provided[1] by Securities Act Release No. 11461 (June 11, 1975), published in the FEDERAL REGISTER on June 18, 1975 (40 FR 25730). That release also solicited public comment on the NASD Rule Changes.[1]

On May 12, 1976, the Commission approved Article XVIII of the NASD By-Laws and Sections 1, 2 and 3 thereunder, as modified on December 15, 1975, with respect to the method of reporting transactions effected by NASD members at a price plus or minus a commission, commission equivalent, or differential.[2] With respect to the fees and charges contained in Section 4 of Schedule G, the Commission determined to take no formal action, but acknowledged the consent of the NASD to a further extension of the time within which the Commission is required to act on the proposed fees and charges.[3] In so doing, the Commission noted that it understood that the reason the NASD consented to the further extension of time was to permit an opportunity for internal resolution of certain issues relating to the proposed fees contained in Section 4 of Schedule G.[4] The Commission understands that the revised transaction fees proposed by the NASD represent a resolution of those issues.

Notice of the proposed rule change together with the terms of substance of the proposed rule change was given by publication of a Commission Release (Securities Exchange Act Release No. 12914 (October 21, 1976)) and by publication in the FEDERAL REGISTER (41 FR 47300 (October 28, 1976)). Interested persons were invited to submit written data, views and arguments concerning the proposal by November 27, 1976. The Commission has not received any comments concerning the proposed rule change.

The Commission finds that the proposed rule change is consistent with the requirements of the Act, and the rules and regulations thereunder applicable to national securities associations, and in particular the requirements of Section 15A of the Act and the rules and regulations thereunder.

It is therefore ordered, Pursuant to section 19(b)(2) of the Act, that the proposed rule change referenced above be, and it hereby is, approved.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

[File No. SRNYSE 76-29]

NEW YORK STOCK EXCHANGE, INC.

Order Approving Proposed Rule Change

JANUARY 18, 1977.

On April 30, 1976, the New York Stock Exchange, Inc. ("NYSE"), 11 Wall Street, New York, New York 10005 filed with the Commission, pursuant to Section 19(b) of the Securities Exchange Act of 1934 (the "Act") and Rule 19b-4 thereunder, a proposed rule change amending the NYSE constitution and rules to reflect the proposed transfer of the clearing agency business of Stock Clearing Corporation ("SCC"), the NYSE's wholly-owned clearing subsidiary, to the National Securities Clearing Corporation ("NSCC"). The proposed amendments were filed in connection with the pending application of NSCC as a registered clearing agency.

In accordance with Section 19(b) of the Act and Rule 19b-4 thereunder, notice of the proposed rule change was published in the FEDERAL REGISTER (41 FR 23499, June 10, 1976), and the public was invited to submit comments. Notice of the filing and an invitation for comments also appeared in Securities Exchange Act Release No. 12512, June 3, 1976. No letters of comment were received.

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to national securities exchanges, and in particular, the requirements of Section 6 and the rules and regulations thereunder.[1]

It is therefore ordered, pursuant to section 19(b)(2) of the Act, that the above-mentioned proposed rule change contained in File No. SR-NYSE-76-29 be, and it hereby is, approved provided, however, that the proposed rule change will not become effective prior to the effectiveness, and implementation by NSCC, of the order granting NSCC registration as a clearing agency.[2]

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary

[FR Doc.77-2679 Filed 1-26-77;8:45 am]

[1] On January 13, 1977, the Commission issued an order granting NSCC registration as a clearing agency subject to the terms, conditions and directives contained in the order. See Securities Exchange Act Release No. 13163 (January 13, 1977).

[1] The original deadline for submission of written comments on the proposals was June 30, 1975; the time for such comment was extended until July 18, 1975, in Securities Exchange Act Release No. 11508 (June 30, 1975), and until October 1, 1975, in Securities Exchange Act Release No. 11653 (September 15, 1975), 40 FR 43284 (1975). See also Securities Exchange Act Release Nos. 11546 (July 10, 1975), 40 FR 53085 (1975), and 11951 (December 24, 1975), 41 FR 836 (1976).

[1] The Commission's approval of the amendments to the NYSE constitution and rules is subject, nevertheless, to the Commission's review pursuant to Section 31(b) of the Securities Acts Amendments of 1975. See Securities Exchange Act Release No. 13027 (December 1, 1976).

[2] On January 13, 1977, the Commission issued an order granting NSCC registration as a clearing agency subject to the terms, conditions and directives contained in the order. (See Securities Exchange Act Release No. 13163 (January 13, 1977).

[Release No. 34-13171; File No. SR-PHLX 76-23]

PHILADELPHIA STOCK EXCHANGE, INC.

Self-Regulatory Organizations; Proposed Rule Change

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), as amended by Pub. L. No. 94-29, 16 (June 4, 1975), notice is hereby given that on December 30, 1976, the above mentioned self-regulatory organization filed with the Securities and Exchange Commission a proposed rule change as follows:

PHLX' STATEMENT OF THE TERMS OF SUBSTANCE OF THE PROPOSED RULE CHANGE

Centramart provides a system for the automatic execution of orders on the Exchange equity floor under predetermined conditions. Orders accepted under the system may be executed on a fully automated or manual basis. Securities admitted to dealings on the equity floor are eligible for trading on the Centramart System in which equity specialists and member organizations may choose to participate. The conditions under which orders will be accepted and executed are set forth below. When used in these rules PRL means a combined round-lot and odd-lot order. The Centramart rules, conditions and guidelines do not apply to orders not on the system, and existing rules governing the latter dealings are not affected hereby.

1. Member organizations wishing to participate in Centramart will undertake to send to the Philadelphia trading floor all of their market orders and limit orders up to 299 shares in securities traded under Centramart.

2. Only agency orders may be executed under Centramart.

3. Floor brokerage or service charges on orders executed under Centramart are subject to negotiation by the specialist and the participating member organization. An automated execution program, by nature, involves set parameters. The Exchange permits such a program but does not require its members to participate in it. Thus, fees are ultimately subjected to competitive determination. Members may choose to deal on the program, not on the program, or on other markets.

4. When the prices of limit orders entered under Centramart, or by floor brokers representing member organizations not participating in the system, or by competing market-makers, are between the New York market and Philadelphia market quotes, it is the responsibility of the specialist to reflect such prices in the Philadelphia quote on Centramart and allow any agency order in the crowd to participate in the transaction occurring on Centramart.

5. All market orders will be executed immediately upon entry in the system.

6. Market orders (round-lots, odd-lots and PRL's up to 299 shares) entered prior to 9:57 a.m., will be executed at the New York market opening price. In the case of delayed openings execution will occur at the New York market opening price.

7. Market orders (round-lots, odd-lots and PRL's up to 299 shares) entered after 9:57 a.m. will be executed on the best bid/ask quote on either the Philadelphia or New York markets.

8. Odd-lot limit orders will be executed at the limit price when a sale takes place on the New York market either at or through the limit price. An odd-lot stop or stop limit order which becomes a market order will be executed on the next sale in the New York market plus or minus a differential if any is charged.

9. Round-lot limit orders and PRL limit orders will be executed at the limit price when an accumulative volume of 500 shares prints at the limit price on the New York market after the time of entry of any such order into Centramart. A maximum of 300 shares will be executed on each such accumulation of 500 shares for each participant in Centramart. Round-lot limit orders and PRL limit orders are distributed to the specialists for manual execution based on the above conditions.

10. Upon approval of a Floor Procedure Committee member, the specialist will have the right to refuse by 9:55 a.m. round-lot and PRL orders which create a net long or short position in excess of 1,000 shares.

11. In case of a trading halt, orders will be executed based on the reopening price.

12. Under unusual market conditions such as imbalance in the influx of orders, specialist can seek relief during the trading day from performance conditions. In such case, only a Floor Procedure Committee member may authorize such relief.

13. It is permissible for the specialist and the participants to adjust Centramart executions when the latter take place outside the New York market range for the day because of erroneous quotation or sales information.

14. Orders to which special conditions are attached and orders which exceed 299 shares may be accepted under Centramart but such orders will be executed manually by the specialist.

PHLX' STATEMENT OF BASIS AND PURPOSE

The purpose of the proposed rule change is to provide, as an alternative, an efficient system under which specialists on an automatic and predetermined basis can expand their market-making activities to serve the investing public.

The proposed rule change establishing an alternate system for the execution of orders, is consistent with the registration and functions of odd-lot dealers and specialists as contemplated under Section 11(b) of the Exchange Act.

No written comments have been received from members on the proposed rule change. During developmental stages and operation of the pilot program, oral comments and recommendations have been received from specialists, members and technical resource people.

No burden on competition will be imposed by the proposed Rule.

The PHLX does not consent to an extension of the time periods specified in Section 19(b)(2) of the Act.

On or before March 7, 1977, or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the above-mentioned self-regulatory organization consents, the Commission will:

A. by order approve such proposed rule change, or

B. institute proceedings to determine whether the proposed rule change should be disapproved.

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons desiring to make written submissions should file six copies thereof with the Secretary of the Commission, Securities and Exchange Commission, Washington, D.C. 20549. Copies of the filing with respect to the foregoing and of all written submissions will be available for inspection and copying in the Public Reference Room, 1100 "L" Street, N.W., Washington, D.C. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number referenced in the caption above and should be submitted on or before February 17, 1977.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

JANUARY 14, 1977.

[Release No. 34-13176]

RESCHEDULING PUBLIC FORUM

On December 8, 1976 [41 FR 54785 (12-15-76)] the Commission announced that a public forum would be held on January 28, 1977 for the purpose of receiving oral presentations from a representative selection of persons who are interested in the establishment of a nationwide investor dispute grievance system. Because a relatively large number of persons have indicated an interest in appearing at the public forum and making an oral presentation, the Commission today announced that the public forum would be rescheduled to February 9-10, 1977.

By the Commission.

GEORGE A. FITZSIMMONS,
Secretary.

[812-4076]

WILLOW FUND, INC.

Application for Temporary Order of Exemption

JANUARY 18, 1977.

Notice is hereby given that The Willow Fund, Inc. ("Applicant"), 1 Chase Manhattan Plaza, New York, N.Y. 10005, an open-end non-diversified management investment company registered under the Investment Company Act of 1940 (the "Act"), has filed an application on January 4, 1977, and an amendment thereto on January 17, 1977, pursuant to Section 10(e) of the Act for an order of the Commission temporarily exempting Applicant from the requirements of Section 10(b) of the Act to the extent specified therein. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below.

Wertheim & Co., Inc. (the "Corporation") is an investment banking firm and a broker-dealer registered under the Securities Exchange Act of 1934. The Corporation acts as Applicant's regular broker in the execution of its portfolio transactions, and is also the principal underwriter of Applicant's shares. Wertheim & Co., a partnership, owns substantially all the outstanding voting stock of the Corporation. Wertheim Advisers, Inc. ("Advisers"), a wholly-owned subsidiary of the Corporation, acts as investment adviser to Applicant, and the Corporation acts as Applicant's subinvestment adviser. Applicant and Advisers have no employees other than their officers. All of Applicant's officers are affiliated persons or interested persons of the Corporation. All persons who perform services for Applicant are employees of the Corporation or one of its subsidiaries. The Corporation provides the necessary personnel and services to permit Advisers to serve Applicant. Applicant has no facilities apart from those provided by the Corporation. Applicant represents that Wertheim & Co. and Advisers, and all partners, directors, officers and employees thereof, are affiliated persons or interested persons of the Corporation within the meaning of sections 2(a)(3) and 2(a)(19)(B), respectively, of the Act.

Prior to December 16, 1976, the Applicant's Board of Directors consisted of five members, two of whom were affiliated and interested persons of the Corporation, and three of whom were not affiliated or interested persons of the Corporation. The application states that on December 16, 1976, one of the non-affiliated and non-interested directors of Applicant resigned unexpectedly leaving two of Applicant's current four directors, Messrs. Frederick A. Klingenstein and Robert Bach, as affiliated and interested persons of the Corporation, and Applicant's two other current directors as non-affiliated and non-interested persons of the Corporation. As a result of this resignation, the non-affiliated and non-interested directors of Applicant are no longer in a majority on Applicant's Board of Directors. Section 10(b) of the Act provides, in pertinent part, that it is unlawful for a registered investment company to employ as its regular broker, or to use as principal underwriter of its shares or to have as a director, officer or employee any person affiliated with an investment banker, unless a majority of the board of directors of such registered company shall be persons who are (i) not affiliated persons of such broker, (ii) not interested persons of any such principal underwriter, or (iii) not affiliated persons of any investment banker, respectively.

Section 10(e) of the Act provides, in pertinent part, that if by reason of the bona fide resignation of any director the requirements of Section 10(b) of the Act shall not be met by an investment company, the operation of such provision shall be suspended for a period of sixty days if a vote of stockholders is required to fill the vacancy, or for such longer period as the Commission may prescribe by order upon application as not inconsistent with the protection of investors.

Applicant represents that its remaining directors cannot fill the vacancy created by the December 16, 1976, resignation because of the requirements of Section 16(a) of the Act, which provide, in pertinent part, that immediately upon filling a director vacancy by vote of the remaining directors at least two-thirds of the directors of an investment company must have been elected by the stockholders at the last annual meeting. The application states that three of Applicant's four current directors were elected by the stockholders of Applicant at its last Annual Meeting of Stockholders; and that one director was elected in July, 1976, by Applicant's board of directors to fill a vacancy created by the earlier resignation of another non-interested director, who had been elected by the stockholders and was forced to retire as a result of serious illness. The application further states that under Section 10(e) of the Act, Applicant has 60 days, or until February 14, 1977, to have its stockholders elect a new noninterested director if the Corporation is to continue to serve as Applicant's regular broker and principal underwriter, if Messrs. Klingenstein and Bach are to remain directors of Applicant, and if the current officers of Applicant are to remain its officers after that date. The application further states that if stockholder action is not taken by February 14, 1977, the normal operations of Applicant will cease, because Applicant has no facilities or services apart from the Corporation, unless Applicant hires its own personnel and arranges for its own facilities and operations before that date.

Applicant represents that its Board of Directors has determined that it is the prudent course to retain the Corporation as Applicant's regular broker and principal underwriter, to retain Messrs. Klingenstein and Bach as directors, and to retain Applicant's current officers past February 14, 1977, until Applicant's 1977 Annual Meeting of Stockholders, and thereby prevent a serious disruption in the normal operations of Applicant. Applicant further states that it is the prudent course not to hold a special meeting of stockholders on or before February 14, 1977, for the purpose of electing an additional noninterested person to its board of directors, followed by the Annual Meeting of Stockholders of Applicant soon thereafter.

Applicant represents that it is not practicable to have its Annual Report to Stockholders, which under Rule 14a-3 of the Securities Exchange Act of 1934 must accompany or precede Applicant's proxy statement, prepared and delivered in time so as to combine the Annual Meeting of Stockholders with a special meeting of stockholders which would otherwise be required to be held by February 14, 1977, under Section 10(e) of the Act. Applicant also represents that its By-Laws provide for an Annual Meeting date of the third Tuesday in April in each year. Applicant states that unless the Commission grants the exemption requested, it will be required to hold a special meeting of stockholders, to be followed within a relatively short period by its Annual Meeting. Applicant further represents that its Board of Directors have determined that the interest of stockholders will not be adversely affected if Applicant continues to operate temporarily without a majority of directors who are neither affiliated persons nor interested persons of the Corporation, if Applicant is spared the expense of holding a Special Meeting of Stockholders.

On the basis of the above information, Applicant requests the Commission to grant a temporary exemption to Applicant from the requirements of Section 10(b) of the Act from February 14, 1977, until the 1977 Annual Meeting of Stockholders of Applicant, provided that such Annual Meeting is called and held not later than April 19, 1977, and at least 50 percent of Applicant's board of directors continue to be non-affiliated and non-interested persons of the Corporation and Advisers.

Applicant asserts that the granting of the application is consistent with the protection of investors, and will save the expense of holding a special stockholders' meeting approximately two months before the regularly scheduled Annual Meeting of Stockholders.

Notice is further given that any interested persons may, not later than February 10, 1977, at 5:30 p.m., submit to the Commission in writing a request for a hearing on the application accompanied by a statement as to the nature of his interest, the reason for such request and the issues, if any, of fact or law proposed to be controverted, or he may request that he be notified if the Commission orders a hearing thereon. Any such communications should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549.

A copy of such request shall be served personally or by mail upon Applicant at the address set forth above. Proof of such service (by affidavit, or in case of an attorney-at-law, by certificate) shall be filed contemporaneously with the request. As provided by Rule 0-5 of the Rules and Regulations promulgated under the Act, an order disposing of the application herein will be issued as of course following said date, unless the Commission thereafter orders a hearing upon request or upon the Commission's own motion. Persons, who request a hearing or advice as to whether a hearing is ordered, will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

[FR Doc. 77-2621 Filed 1-26-77;8:45am]

[Rel. No. 34-13187]

EXEMPTED SECURITIES

Federal Farm Credit Banks-Consolidated Systemwide Bonds Designated

The Securities and Exchange Commission announced today that the Federal Farm Credit Banks-Consolidated Systemwide Bonds of the twelve Federal Land Banks, the twelve Federal Intermediate Credit Banks, and the thirteen Banks for Cooperatives, have been designated exempted securities under the Securities Exchange Act by the Secretary of the Treasury pursuant to section 3(a)(12) of that Act.

Following is the text of the letter from the Secretary of the Treasury to the Commission providing for the exemption:

Paragraph 12 of section 3(a) of the Securities Exchange Act of 1934, as amended, provides in part that when used in Title I thereof, unless the context otherwise requires, the term "exempted security" or "exempted securities" shall include "securities issued or guaranteed by corporations in which the United States has a direct or indirect interest as shall be designated for exemption by the Secretary of the Treasury as necessary or appropriate in the public interest or for the protection of investors."

In accordance with the provisions of this paragraph and pursuant to the authority delegated to me by the Secretary of the Treasury, I am designating for exemption the obligation entitled "The Federal Farm Credit Banks-Consolidated Systemwide Bond" of the twelve Federal Land Banks, the twelve Federal Intermediate Credit Banks, and the thirteen Banks for Cooperatives, issued pursuant to section 4.2(d) of the Farm Credit Act of 1971 (12 U.S.C. 2153). This designation for exemption may be revoked, modified, or amended at any time with respect to securities not issued prior to such time.

By the Commission.

GEORGE A. FITZSIMMONS,
Secretary.

[70-5957]

GENERAL PUBLIC UTILITIES CORP.

Proposed Capital Contributions by Holding Company to Subsidiaries

JANUARY 21, 1977.

In the matter of General Public Utilities Corporation, 80 Pine Street, New York, New York, 10005; (70-5957).

Notice is hereby given that General Public Utilities Corporation ("GPU"), a registered holding company, has filed a declaration with this Commission pursuant to the Public Utility Holding Company Act of 1935 ("Act") designating section 12(b) of the Act and Rule 45 promulgated thereunder as applicable to the proposed transactions. All interested persons are referred to the declaration, which is summarized below for a complete statement of the proposed transactions.

GPU proposes to make cash capital contributions to two of its three major operating subsidiaries, Jersey Central Power and Light Company ("JCP&L") and Pennsylvania Electric Company ("Penelec"), of amounts up to an aggregate of $100,000,000. GPU proposes to make such contributions from time to time during the period beginning with the effectiveness of the authorization herein sought and ending December 31, 1977. GPU requests that it be permitted to allocate the respective amounts of the proposed contributions covered by this Declaration among its subsidiaries as to best match the needs of such subsidiary, as such needs may develop in 1977.

The proposed cash capital contributions will be utilized by JCP&L and Penelec for the purpose of financing their respective businesses as public utilities, including the construction of additional facilities and the increase in their working capital. JCP&L will require an aggregate of approximately $238,000,000 for its construction program including anticipated net payments to Metropolitan Edison (Met-Ed) and Penelec relating to the transfer of ownership in portions of certain generating stations and approximately $5,000,000 for sinking fund purposes. During 1977, Penelec will require an aggregate of approximately $101,000,000 for its construction program, including anticipated net receipts from JCP&L relating to the transfer of ownership in portions of certain generating stations and approximately $3,000,000 for sinking fund purposes.

GPU estimates that the fees, commissions and expenses paid or incurred in connection with the proposed transactions will total $4,000 including $3,500 in legal fees. It is stated that no state or federal commission, other than this Commission, has jurisdiction with respect to the proposed transactions.

Notice is further given that any interested person may, not later than February 17, 1977, request in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request, and the issues of fact or law raised by said declaration which he desires to controvert; or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request should be served personally or by mail upon the declarant at the above-stated address and proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. At any time after said date, the declaration, as filed, or as it may be amended, may be permitted to become effective as provided in Rule 23 of the General Rules and Regulations promulgated under the Act, or the Commission may grant exemption from such rules as provided in Rules 20(a) and 100 thereof or take such other action as it may deem appropriate. Persons who request a hearing or advice as to whether a hearing is ordered will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

[811-2569]

GOLD INCOME INVESTORS, INC.

Filing of Application for an Order Declaring That Applicant Has Ceased To Be an Investment Company

JANUARY 19, 1977.

In the matter of Gold Income Investors, Inc., 122 East 42nd Street, New York, New York 10017; (811-2569).

Notice is hereby given that Gold Income Investors, Inc. ("Applicant"), registered under the Investment Company Act of 1940 ("Act") as an open-end, diversified management investment company, filed an application on December 23, 1976, for an order of the Commission, pursuant to section 8(f) of the Act, declaring that it has ceased to be an investment company as defined in the Act. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below.

The Applicant was incorporated under the laws of Maryland on December 16, 1974; and registered with the Commission under the Act on May 5, 1975. The Applicant states that it has never issued any securities, has no intention of ever issuing any securities, and has no outstanding assets or liabilities.

The Applicant further represents that its Board of Directors has authorized

its dissolution, and that articles of dissolution have been forwarded for filing with the appropriate authorities of the State of Maryland.

Section 8(f) of the Act provides, in pertinent part, that whenever the Commission, on its own motion or upon application, finds that a registered investment company has ceased to be an investment company, it shall so declare by order, and upon the taking of effect of such order the registration of such company shall cease to be in effect.

Notice is further given that any interested person may, not later than February 14, 1977, at 5:30 p.m., submit to the Commission in writing a request for a hearing on the application accompanied by a statement as to the nature of his interest, the reasons for such request, and the issues, if any, of fact or law proposed to be controverted, or he may request that he be notified if the Commission shall order a hearing thereon. Any such communication shall be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail upon the Applicant at the address stated above. Proof of such service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed contemporaneously with the request. As provided by Rule O–5 of the Rules and Regulations promulgated under the Act, an order disposing of the application will be issued as of course following said date unless the Commission thereafter orders a hearing upon request or upon the Commission's own motion. Persons who request a hearing, or advice as to whether a hearing is ordered, will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

[FR Doc.77–2672 Filed 1–26–77;8:45 am]

[File No. SR–MCC–75–2]

MIDWEST CLEARING CORP.

In the matter of Midwest Clearing Corporation, 120 South LaSalle Street, Chicago, Illinois 60603 (File No. SR–MCC–75–2).

Order Approving Rule Change Submitted by the Midwest Clearing Corporation

JANUARY 19, 1977.

On October 24, 1975, the Midwest Clearing Corporation ("MCC"), a wholly-owned subsidiary of the Midwest Stock Exchange, Inc., filed with the Commission, pursuant to section 19(b) of the Securities Exchange Act of 1934 (the "Act") and Rule 19b–4 thereunder, a proposed rule change expanding its services to its members to include the trade recording, comparison, and settlement of over-the-counter securities. In connection with the proposed rule change, MCC requested that the Commission continue its previous finding pursuant to paragraph (g) of Rules 8c–1 and 15c2–1 under the Act that the agreements, provisions and safeguards established by MCC are adequate for the protection of investors.

In accordance with section 19(b) of the Act and Rule 19b–4 thereunder, notice of the proposed rule change was published in the FEDERAL REGISTER (40 FR 51514, November 11, 1975), and the public was invited to submit comments. Notice of the filing and an invitation for comments also appeared in Securities Exchange Act Release No. 11770, October 29, 1975.

The Commission has reviewed the MCC submission and finds that the agreements, provisions and safeguards established by MCC are adequate for the protection of investors. The Commission finds also that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to registered clearing agencies.

It is therefore ordered, pursuant to section 19(b)(2) of the Act, that the proposed rule change contained in File No. SR–MCC–75–2 be, and hereby is, approved.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

GEORGE FITZSIMMONS,
Secretary.

[FR Doc.77–2674 Filed 1–26–77;8:45 am]

[SR–NASD–76–14]

NATIONAL ASSOCIATION OF SECURITIES DEALERS, INC.

Order Approving Proposed Rule Change

JANUARY 19, 1977.

In the matter of National Association of Securities Dealers, Inc., 1735 K Street, NW., Washington, D.C., 20006; (SR–NASD–76–14).

The National Association of Securities Dealers, Inc. (the "NASD") submitted on December 3, 1976, a proposed rule change under Rule 19b–4 to amend Schedule D under Article XVI of the NASD By-Laws by adding a new Part III to Schedule D, redesignating existing Part III of Schedule D as Part V thereof, redesignating existing Parts V through X of Schedule D as Parts VI through XI respectively, amending Part IV of Schedule D to add a new section D thereof, and redesignating existing sections D and E of Schedule D as sections E and F respectively. Part III of Schedule D, as proposed to be added by the proposed rule change, describes the NASD's proposed Consolidated Quotations Service ("CQS") which will provide subscribers with quotations from all registered CQS Third Market Makers, as well as the Boston, Midwest, New York, Pacific, and Philadelphia Stock Exchanges, in approximately 2,000 common stocks, preferred stocks, warrants and rights registered or admitted to unlisted trading privileges on the New York Stock Exchange.

Part III of Schedule D, as proposed to be added, also establishes rules and regulations governing the activities of registered CQS Third Market Makers, including provisions governing (i) registration, (ii) character of quotations, (iii) business hours, (iv) withdrawal, (v) voluntary termination, and (vi) suspension and termination of quotations by action of the NASD. Section D of Part IV of Schedule D, as proposed to be added, contains the fees and charges associated with CQS.

Notice of the proposed rule change together with the terms of substance of the proposed rule change was given by publication of a Commission release (Securities Exchange Act Release No. 13047 (December 8, 1976)) and by publication in the FEDERAL REGISTER (41 FR 55404 (December 20, 1976)). Interested persons were invited to submit written data, views and arguments concerning the proposal by January 17, 1977. The Commission has not received any comments concerning the proposed rule change.

The Commission finds that the proposed rule change is consistent with the requirements of the Securities Exchange Act of 1934 (the "Act") and the rules and regulations thereunder applicable to national securities associations, and in particular the requirements of section 15A of the Act and the rules and regulations thereunder.

It is therefore ordered, pursuant to section 19(b)(2) of the Act, that the proposed rule change referenced above be, and it hereby is, approved.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

[FR Doc.77–2676 Filed 1–26–77;8:45 am]

[File No. SR–NASD–76–6]

NATIONAL ASSOCIATION OF SECURITIES DEALERS, INC.

Order Approving Rule Changes Submitted with Respect to Establishment of National Securities Clearing Corporation

JANUARY 19, 1977.

In the matter of National Association of Securities Dealers, Inc., 1735 K. Street, NW., Washington, D.C. 20006; (File No. SR–NASD–76–6).

On June 30, 1976, the National Association of Securities Dealers, Inc. (the "NASD") filed with the Commission, pursuant to section 19(b) of the Securities Exchange Act of 1934 (the "Act") and Rule 19b–4 thereunder, proposed changes to the NASD By-Laws, Uniform Practice Code, and Code of Arbitration Procedure to reflect the proposed transfer of the securities processing operations of National Clearing Corporation ("NCC"), the NASD's wholly-owned subsidiary, to the National Securities Clearing Corporation ("NSCC"). The rule changes were filed in connection with the ending application of NSCC as a registered clearing agency.

In accordance with section 19(b) of the Act and Rule 19b–4 thereunder, the rule changes were published in the FEDERAL REGISTER (41 FR 31949, July 30, 1976), and the public was invited to submit comments. Notice of the filing and an invitation for comments also appeared in Securities Exchange Act Release No. 12653, July 23, 1976. No letters of comment were received.

The Commission finds that the proposed rule changes are consistent with the requirements of the Act and the rules and regulations thereunder applicable to registered securities associations, and in particular, the requirements of Section 15A and the rules and regulations thereunder.[1]

It is therefore ordered, pursuant to section 19(b)(2) of the Act, that the above-mentioned proposed rule changes contained in File No. SR–NASD–76–6 be, and they hereby are, approved provided, however, that the rule changes will not become effective prior to the effectiveness, and implementation by NSCC, of the order granting NSCC rgeistration as a clearing agency.[2]

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

[FR Doc.77–2675 Filed 1–26–77;8:45 am]

[70–5924]

OHIO POWER CO.

Proposed Charter Amendments

JANUARY 19, 1977.

In the matter of Ohio Power Company, 301 Cleveland Avenue, S.W., Canton, Ohio 44702; (70–5924).

Notice is hereby given that Ohio Power Company ("Ohio"), an electric utility subsidiary company of American Electric Power Company, Inc. ("AEP"), a registered holding company, has filed a declaration, and amendments thereto, with this Commission pursuant to the Public Utility Holding Company Act of 1935 ("Act"), designating sections 6(a), 7 and 12(e) of the Act and Rules 62 and 65 promulgated thereunder as applicable to the proposed transactions. All interested persons are referred to the declaration, as amended, which is summarized below, for a complete statement of the proposed transactions.

Ohio proposes to amend its Articles of Incorporation ("Charter") to create authority for Ohio to issue 4,000,000 shares of its Cumulative Preferred Stock with a par value of $25 per share ("$25 non-voting preferred") and 1,000,000 shares of its Cumulative Preferred Stock with a par value of $100 per share ("$100 non-voting preferred") (the $25 non-voting preferred and the $100 non-voting preferred, collectively "the new preferreds"). Ohio's Charter presently authorizes Ohio to issue 4,200,000 shares of cumulative preferred stock with $100 par value ("$100 voting preferred"), of which 1,437,597, shares remain unissued to date. Ohio proposes to amend its Charter to cancel the unissued $100 voting preferred. Ohio states that a market for preferred stock priced at less than $100 per share recently has developed. Consequently, Ohio states it believes that its ability to sell preferred stock on favorable terms will be strengthened by the creation of authority to issue additional shares of preferred stock with a par value of $25 per share. Additionally, Ohio states that it may be advantageous to sell shares of $100 par value preferred in the future, but that it would not be appropriate for Ohio to issue both voting and non-voting shares.

The $100 voting preferred presently outstanding and the new preferreds will be of equal rank and will confer equal rights upon the holders thereof, except as to the par value per share of the $25 non-voting preferred, the number of votes per share, and permissible variations among the series thereof as detailed below. Unlike the holders of the $100 voting preferred, who are entitled to vote for the election of directors of Ohio and upon all matters submitted to the shareholders of Ohio, the holders of the new preferreds would not be entitled to vote, except in proceedings as to which their vote is required by Ohio law and in the case of certain other events specified in the Charter, as amended. Whenever the holders of the new preferreds would be so entitled to vote, they will vote as a single class with the holders of the $100 voting preferred, but the holders of the $25 non-voting preferred will have ¼ vote per share. Ohio's Board of Directors, without action by the shareholders, will be authorized to issue series of the new preferreds and to fix the dividend rate, liquidation prices, redemption terms and prices and sinking fund provisions, if any, for such series, as it is currently empowered to do with respect to the authorized and unissued $100 voting preferred.

The proposed amendments also will amend that portion of the Charter which permits Ohio to issue stock authorized by the shareholders which ranks prior to or on a parity with the $100 voting preferred only within a period of 180 days after the shareholders' meeting at which consent to the issuance of the stock is given. It is not intended or expected that all, or even a major part, of the new preferred will be issued within 180 days of the proposed special meeting. The amendment would eliminate any time limit on the issuance of the new preferreds or other stock ranking on a parity with the $100 voting preferred or new preferreds, but would retain a time limit with respect to any stock ranking prior to either of these classes of cumulative preferred stock. Additionally, a proposed amendment as to notices of redemption of the cumulative preferred stock would substitute publication thereof in general circulation newspapers in Canton, Ohio, (Ohio's present principal office place) for publication in Newark, Ohio (Ohio's former principal office place).

Ohio proposes to solicit proxies from its common stockholder and the holders of its $100 voting preferred stock to be used at a special meeting of the common and preferred stockholders to be held on March 3, 1977. Holders of the Ohio preferred stock will be asked to approve the Ohio Charter amendments. Such approval requires the affirmative vote of more than two-thirds of the outstanding shares of common stock and outstanding $100 voting preferred shares, voting together, and the affirmative vote of the holders of more than two-thirds of the outstanding $100 voting preferred shares, voting separately as a class. AEP, owner of all of Ohio's common stock, has indicated that it intends to vote all of such shares in favor of the Charter amendments.

It is stated that no state commission and no federal commission, other than this Commission, has jurisdiction over the proposed transactions. Fees and expenses to be incurred in connection with the proposed transactions are estimated at $79,000, including legal fees of $3,500.

Notice is further given that any interested person may, not later than February 14, 1977, request in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request, and the issues of fact or law raised by said declaration, as amended, which he desires to controvert; or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request should be served personally or by mail upon the declarant at the above-stated address, and proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. At any time after said date, the declaration, as amended, or as it may be further amended, may be permitted to become effective as provided in Rule 23 of the General Rules and Regulations promulgated under the Act, or the Commission may grant exemption from such rules as provided in Rules 20(a) and 100 thereof or take such other action as it may deem appropriate. Persons who request a hearing or advice as to whether a hearing is ordered will receive any notices and orders issued in this matter, including

[1] The Commission's approval of the amendments to the NASD By-Laws, Uniform Practice Code and Code of Arbitration Procedure is subject, nevertheless, to the Commission's review pursuant to section 31(b) of the Securities Acts Amendments of 1975. See Securities Exchange Act Release No. 13027 (December 1, 1976).

[2] On January 18, 1977, the Commission issued an order granting NSCC registration as a clearing agency subject to the terms, conditions and directives contained in the order. See Securities Exchange Act Release No. 13163 (January 18, 1977).

the date of the hearing (if ordered) and any postponements thereof.

It appearing that the declaration, as amended, insofar as it proposes the solicitation of proxies from Ohio's preferred and common stockholders, should be permitted to become effective forthwith pursuant to Rule 62:

It is ordered, That the declaration, as amended, regarding the proposed solicitation of proxies from Ohio's preferred and common stockholders, be, and it hereby is, permitted to become effective forthwith pursuant to Rule 62 and subject to the terms and conditions prescribed in Rule 24 under the Act.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

[812-4004]

VANGUARD GROUP, INC.

Filing of Application for an Order Permitting Certain Proposed Transactions

JANUARY 19, 1977.

In the matter of the Vanguard Group, Inc. and Wellington Fund, Inc., Windsor Fund, Inc., Ivest Fund, Inc., Exeter Fund, Inc., Gemini Fund, Inc., Explorer Fund, Inc., Trustees' Equity Fund, Inc., Wellesley Income Fund, Inc., W. L. Morgan Growth Fund, Inc., Westminster Bond Fund, Inc., Whitehall Money Market Trust, Qualified Dividend Portfolio, Inc., Qualified Dividend Portfolio II, Inc., and First Index Investment Trust, P.O. Box 1100, Valley Forge, Pennsylvania 19482 (812-4004).

Notice is hereby given that The Vanguard Group, Inc. ("Vanguard"), and Wellington Fund, Inc., Explorer Fund, Inc., Trustees' Equity Fund, Inc., Wellesley Income Fund, Inc., W. L. Morgan Growth Fund, Inc., Westminster Bond Fund, Inc., Whitehall Money Market Trust, Qualified Dividend Portfolio, Inc., and Qualified Dividend Portfolio II, Inc., all open-end, diversified management investment companies, and Gemini Fund, Inc., a closed-end, diversified investment company ("Vanguard Funds"), all of which are registered under the Investment Company Act of 1940 ("Act"), and First Index Investment Trust ("Index Trust"), a newly organized open-end diversified management investment company registered under the Act (collectively, "Applicants"), filed an application on August 5, 1976, and amendments thereto on October 7 and November 29, 1976, pursuant to sections 6(c) and 17(b) of the Act and Rule 17d-1 thereunder, for an order permitting Applicants to engage in certain transactions. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below.

On February 18, 1975, the Commission issued an order (Investment Company Act Release No. 8676) pursuant to an application filed by Vanguard, Vanguard Funds and Wellington Management Company ("WMC"), the Vanguard Funds' investment adviser and principal underwriter, to permit, in substance, the partial internationalization of the Vanguard Funds through Vanguard, a corporation owned by the Vanguard Funds which provides them with corporate management and administrative services at cost. Pursuant to this arrangement, each of the Vanguard Funds contributed to the capital of Vanguard in proportion to such fund's relative net assets. Adjustments will be made periodically to maintain proportional ownership by each of the Vanguard Funds. Applicants state that after approval by the shareholders of each Vanguard Fund, Vanguard began its operations on May 1, 1975.

Index Trust is a new investment company organized by WMC to provide investment results that correspond to the price and yield performance of common stocks as represented by the Standard & Poor's 500 Composite Stock Price Index. The Trustees of the Trust also serve as the Directors of Vanguard and the Vanguard Funds, and the principal executive officers of the Trust are the same persons who serve as the principal executive officers of Vanguard and the Vanguard Funds. The Vanguard Funds' Service Contract makes provision for other registered investment companies to become parties to the agreement and join in the "at cost" arrangements for corporate management and administrative services. The Vanguard Funds propose to permit Index Trust to become a party to the agreement. Index Trust will participate in the capitalization of Vanguard, which is limited to .05% of the net assets of each party to the agreement.

Section 17(a) of the Act, in pertinent part, prohibits an affiliated person of or principal underwriter for a registered investment company, acting as principal, knowingly to sell any security to such registered company, or knowingly to purchase from such registered investment company any security. Section 17(b) of the Act, however, provides that the Commission, upon application, shall exempt a transaction from the provisions of section 17(a) if evidence establishes that the terms of the proposed transaction, including the consideration to be paid, are reasonable and fair and do not involve overreaching on the part of any person concerned, and that the proposed transaction is consistent with the policy of each registered investment company concerned and with the general purposes of the Act.

Vanguard is an affiliated person of several of the Vanguard Funds which own more than 5% of its voting securities. Further, since there are common directors and Vanguard Funds and Index Trust will own all of Vanguard's voting securities, Vanguard may be deemed to be directly or indirectly controlled by, or under common control with, one or more of the Vanguard Funds and Index Trust, and therefore Vanguard may be deemed to be an affiliated person of each of them and they may be deemed to be affiliated persons of each other. Thus, Applicants state the proposed purchases and sales of Vanguard shares by Index Trust among Vanguard and Vanguard Funds may be deemed subject to the provisions of section 17(a).

Section 17(d) of the Act and Rule 17d-1 thereunder, in pertinent part, prohibit an affiliated person of a registered investment company, or an affiliated person of such a person, acting as principal, from participating in, or effecting any transaction in connection with, any joint enterprise or arrangement in which any such registered investment company or a company controlled by such registered company is a participant with the affiliated persons unless an application regarding such transaction is filed with, and an order is granted by, the Commission permitting such joint enterprise or arrangement prior to its submission to security holders for approval; and provided that, in passing upon such application the Commission will consider whether the participation of such registered or controlled company in such arrangement is consistent with the provisions, policies and purposes of the Act, and the extent to which such participation is on a basis different from or less advantageous than that of other participants.

Applicants state that Vanguard, Vanguard Funds and Index Trust may be deemed to be engaged in such a joint transaction and prohibited from having Index Trust join the Vanguard Fund Group unless the Commission issues an order allowing the implementation of such proposal.

Applicants, therefore, request an order pursuant to section 17(b) of the Act and Rule 17d-1 thereunder (1) exempting from section 17(a) of the Act the transaction whereby Vanguard will issue and Index Trust will purchase securities of Vanguard as described above; (2) exempting from section 17(a) of the Act the transactions whereby each of the Vanguard Funds and Index Trust periodically may purchase and sell securities of Vanguard among themselves to maintain ownership of Vanguard proportional to their assets; and (3) permitting Vanguard, Vanguard Funds, and Index Trust to enter into and implement the proposed joint transaction whereby Index Trust joins the Vanguard Funds described herein.

The application further states that on August 23, 1976, Vanguard became registered under the Investment Advisers Act of 1940 ("Advisers Act") with a view towards rendering investment advisory services to persons other than the Vanguard Funds, including Fiduciaries Index Trust, a private business trust recently organized by Vanguard as a vehicle through which institutional investors can acquire "index matching services" similar to those which Vanguard will provide to Index Trust. Section 12(d)(3) of the Act, in pertinent part, prohibits, with exceptions unavailable to Applicants, a registered investment company from acquiring any security issued by a registered investment adviser. Thus, section 12(d)(3) would prohibit the Vanguard Funds, including Index Trust, from acquiring shares of Vanguard pursuant to the Vanguard Service Agreement.

Section 6(c) of the Act provides, in pertinent part, that the Commission by order upon application may exempt any classes of transactions from any provision of the Act if and to the extent that such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

Applicants believe that the exemptions they request are necessary and appropriate primarily because the internationalization of the management of their corporate administrative affairs through Vanguard achieves increased independence from and an increased ability to monitor and evaluate the performance of any external investment adviser or distributor, and providing administrative services at a reasonable cost. They further state that the arrangement increases their bargaining power in obtaining advisory and underwriting services and reduces the expenses both immediately and in the long run by having corporate administrative services performed at cost. Vanguard Funds and Vanguard state that the addition of Index Trust to The Vanguard Fund Group arrangements will produce additional benefits to the Vanguard Funds because of the ability to spread Vanguard's fixed costs of operation over a larger asset base, producing economies of scale. Vanguard asserts it has the capability to provide services to Index Trust without impairing the quality of service to others.

The application states that the proposed contribution to the capitalization of Vanguard by Index Trust is reasonable in view of the anticipated working capital needs of Vanguard and the de minimis portion of its assets to be invested, and fair since each investment company will contribute capital in proportion to its current net assets with the capital contribution being adjusted periodically so that no investment company will have a disproportionate investment. Applicants further state that the essential purposes of the proposal are consistent with the provisions, policies and purposes of the Act.

Notice is further given that any interested person may, not later than February 14, 1977, at 5:30 p.m., submit to the Commission in writing a request for a hearing on the matter accompanied by a statement as to the nature of his interest, the reason for such request, and the issues, if any, of fact or law proposed to be controverted, or he may request that he be notified if the Commission shall order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail upon Applicant at the address stated above. Proof of such service (by affidavit, or in case of an attorney-at-law, by certificate) shall be filed contemporaneously with the request. As provided by Rule 0-5 of the Rules and Regulations promulgated under the Act, an order disposing of the application will be issued as of course following said date unless the Commission thereafter orders a hearing upon request or upon the Commission's own motion. Persons who request a hearing, or advice as to whether a hearing is ordered, will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

[Release No. 34-13191; File No. SR-MSRB-77-1]

MUNICIPAL SECURITIES RULEMAKING BOARD

Self-Regulatory Organizations; Proposed Rule Changes

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), as amended by Pub. L. 94-29, 16 (June 4, 1975), notice is hereby given that on January 18, 1977, the above-mentioned self-regulatory organization filed with the Securities and Exchange Commission a proposed rule change as follows:

STATEMENT OF THE TERMS OF SUBSTANCE OF THE PROPOSED RULE CHANGES

The Municipal Securities Rulemaking Board (the "Board") is filing proposed amendments to rule G-6 (hereinafter sometimes referred to as the "proposed rule changes") as follows (brackets indicate deletions; *italics* indicate new language):

Rule G-6. *Fidelity Bonding Requirements.*

[(a)] No municipal securities broker or municipal securities dealer (other than a bank dealer) shall be qualified for purposes of rule G-2 unless such broker or dealer, if a member of a registered securities association, has met the fidelity bonding requirements set forth in the rules of such association, to the same extent as if such rules were applicable to such broker or dealer, or such broker or dealer, if not a member of a registered securities association, has met the fidelity bonding requirements set forth in rule 15b10-11 under the Act, to the same extent as if such rules were applicable to such broker or dealer, in each case as such requirements were set forth on *January 10, 1977.* [May 24, 1976.]

[(b) The requirements of this rule shall become effectice on October 18, 1976.]

STATEMENT OF BASIS AND PURPOSE

The basis and purpose of the foregoing proposed rule changes is as follows:

Purpose of Proposed Rule Changes. The principal purpose of the proposed rule changes is to revise the reference date to fidelity bonding rules of the National Association of Securities Dealers, Inc. and the Securities and Exchange Commission (the "Commission") to incorporate recent changes in rule 15b10-11 of the Commission. In addition, the paragraph relating to the effective date of the rule has been omitted since such date has now passed.
